J. M. COURTNEY, *Deputy Minister of Finance.*

Correspondence.

DOMINION BUILDING AND LOAN ASSOCIATION.

Editor MONETARY TIMES:

SIR, In looking over your criticism of the fourth annual statement of the Dominion Building and Loan Association, I notice you have overlooked a number of items which certainly should be brought before the notice of the remaining deluded shareholders.

The assets amount to $510,000 and the profits for the year (legitimate and illegitimate) to $55,000, or a fraction over 10 per cent. And after paying a dividend of $11,800 to prepaid shareholders (the legality of which I question) there remains for distribution $29,000 to mature in the vicinity of $2,000,000 of stock (which they claim to have in force), which is barely 1½ per cent. Maturity in eight years looks a very slim prospect at that rate.

By referring to Loan Fund Payments, an item appears, "Interest on fully paid stock $35," and in Profit and Loss account, "Interest on fully paid stock $28.29;" also in Loan Fund account, "Interest on withdrawals $2,-061.37," and in Profit and Loss account, "Interest on withdrawals $2,861 37." Two discrepancies which surely *a chartered accountant* should have noticed?

In loan fund receipts there is credited this item "*From* expense fund $2,469.27" and in loan fund payments this item: "*Expense on prepaid shares*" $3,561 18, a difference of $1,-091.91. Surely the expense fund (enormous as it is) should be sufficient without pulling out of this loan fund $1,091.91, besides a mortgage tax of $491.81, which most certainly should have been paid out of the expense fund. As the instalment shareholder is paying one-sixth of each monthly payment into the expense fund, or in other words 20 per cent. of the year's payment, and by looking into the company's statement finds that the year's profits have been 10 per cent., out of which *preferred shareholders* have received 6 per cent., leaving 4 per cent. for distribution, he must feel very blue. Yours,

NEMO.

August 16, 1894.

THE ENGLISH BIRKBECK SOCIETY.

Editor MONETARY TIMES:

SIR,—I have just finished the perusal of the forty-third annual statement of the English Birkbeck Society, or, as it is called on the envelopes it issues, the Birkbeck Bank.

Many of our Ontario building and loan associations, I mean those "get-rich-quick" ones of recent birth, quote in their prospectus the enormous total receipts of the Birkbeck Bank and its attendant companies during all its past history—its 43d year showing an aggregate since 1851 of 843½ million dollars. Our building and loans, I would remark, are not banks. They are corporations investing in mortgages, and if they desire to publish comparisons, they can find a number of banks in this province yearly exceed in volume the Birkbeck, and can find more than a dozen loan companies, not half as old, that make better showing. The Birkbeck's total investment in mortgages in the year 1893 was $2,302 000, and in 1894 it was $2,340,000, of which $42,760 is in arrears for over twelve months, and $12,440 consists of property on hand for sale.

The Birkbeck Bank and its companies' total receipts the past year were £10,014,003, of which 91 per cent are deposits in the Bank Company and £60,281 repayments on mortgages. Of the £10,042,775 disbursements, 89 per cent are repayments to depositors. The Dominion Building and Loan Association in its fourth year shows half a million, nearly one-quarter as much as the Birkbeck's, with its 43 years.

Many an average wage-earning investor is led away with the idea that the Birkbeck's 843 millions is *made*, that it is an *asset*, and that his own particular building and loan company may eventually show an equal volume of business and be as safe.

D. J. CAMPBELL.

He was a countryman, and he walked along a busy thoroughfare and read a sign over the door of a manufacturing establishment, "Cast-Iron Sinks." It made him mad. He said that any fool ought to know that.—*Christian World.*

THE FAST MAIL SERVICE.

The following letter from the Allan Mail Line appears in the London *Times* of 11th inst. :

SIR,—The Canadian Government have now definitely voted the subsidy of $750,000, which a few years ago they had provisionally offered to the late Mr. Bryce Douglas, of the Barrow Shipbuilding Company, for a 20 knot weekly service between this country and Canada (Quebec in summer, Halifax in winter), and they have made a provisional contract with Mr. James Huddart to provide the service, allowing him three months to raise the necessary capital The subsidy is to be given for a period of ten years, after which it is to be reduced by one-third for a like period. The Finance Minister estimated the cost of running the boats at $60,000 per round voyage, or $3,120,000 per annum

In the discussion of the vote in the House, Sir Richard Cartwright, the leader of the Opposition, and Mr. Laurier are reported to have dwelt upon the dangers attending the navigation of the Gulf and River St. Lawrence, and the impossibility because of these to maintain with safety the required speed; and, as the success of the service financially depended upon speed and safety, and as the payment of the subsidy was contingent upon speed and continuity of service, they predicted for it a failure.

Sir Charles Hibbert Tupper, on the other hand, maintained that the St. Lawrence was one of the finest and safest waters in the world, and added that in 20 years not a single mail steamer had been lost in the river or gulf. Had Sir Charles stopped here, or confined himself to justifying his opinions by reference to authorities engaged in the navigation, we might have remained silent on the subject, but he went out of his way to blame parties for circulating reports about the safety of the St. Lawrence, and pointed his allusion to the Allan Line by depreciating "the conduct all the more as it proceeded from those who feared their private interests would now be affected, and who from the very outset had been aided by Government subsidies."

Representatives in this country of the Allan Line, we feel aggrieved to be thus held up as opposing for personal reasons a scheme which is so generally desired, by misrepresenting the true character of the navigation, and we venture to ask the favor of a place in your columns to make their position in this matter clear.

When the Government sought to establish a service that would vie with those running to New York, they naturally looked in the first place to the Allans to supply it.

The Allans' knowledge of the business, their experience of the St. Lawrence navigation, and their personal interests, all indicated them as the parties to provide it, if the scheme were feasible. From the beginning of the mail service in 1855 they had provided it. Losses in the prosecution of the service, due to the dangers of the navigation, did not deter them from continuing it in earlier years, and their loyalty to the Dominion has made them cleave to it in later, long after it has ceased to be remunerative. When they could not undertake the more ambitious scheme on which the Government had set their heart, believing it would fail financially and disappoint the expectations of the Government, the Allans, without pressing it upon them, offered at less cost to the Dominion to provide the highest class of service which in their view is suited to the St. Lawrence.

It was therefore unfair for any one to say that the Allans opposed the scheme in other hands because they feared that their private interests would be affected. It was well known that they had an opportunity, if they wished, to share the new service, both Mr. Bryce Douglas and the present contractor having sought their co-operation.

Why could not the Allans, it may be asked, take part in it; is not the navigation all that Sir Charles Tupper describes it? It is true that the navigation has been improved by buoys and lights and beacons, which have in bounteous measure been provided by the ministry of marine. It is also true that in 20 years not a mail steamer has been lost in the river or gulf; but it is nevertheless the case that, barring mail steamers, every line trading for any length of time to the St. Lawrence has had serious marine disasters, and a new crop springs up every season.

What was the Allan history? In the earlier years of their contract, although the speed was not half that now required, it had to be maintained under penalties, and in trying to fulfil its terms they lost between 1860 and 1864 six mail steamers. In 1864, when the contract was renewed, they got the following clause introduced:—

"That the steamers are never to approach Cape Race when the weather is so foggy or tempestuous as to make it dangerous to do so, and when the presence of fog or ice makes it dangerous to run the vessel at full speed, it shall be the duty of the captain either to slacken the speed or to stop the vessel as occasion may require, and the time lost by doing so, if proved to the satisfaction of the Postmaster-General, shall be allowed to the contractor in addition to the time specified for the length of the voyage."

When that proviso became operative the good record of the mail service began. The immunity from disaster is due to the fact that speed is now subordinated to safety. But speed under the new contract cannot be intermitted if the steamers are to compete with "Campanias" and "Lucanias."

When the warmth of the summer brings down Arctic ice into the ocean track the New York steamer can with little increase of mileage choose a southern route and career at speed through fog, fearless of ice or land, until she reaches off her port. But how can a vessel that must enter the St. Lawrence do this where the gateways are near Cape Race or the Straits of Belle Isle? It is impossible; and how can she safely go at 20 knots through fog when within land-bounded waters? If it be contended that navigation is now made safer than formerly, we answer that it is mainly due to increased watchfulness, for no beacons or lights can turn aside the dangers of ice and of fogs in land-locked seas.

What has our own experience been this very season, now not half over? One of our cargo steamers has been in contact with an iceberg, and had her bow stove in, escaping loss solely by her moderated speed—3½ knots. Another has had her bottom injured, and nearly ripped from stem to stern by being brought too near the headland of Father Point by an experienced pilot, and this against our express injunction to give headlands a wide berth. Two others coming out of the Straits of Belle Isle after midsummer passed through icefields, only escaping injury by going slow.

The St. Lawrence route, river and gulf, are not waters where a 20-knot speed can safely be maintained, and if speed be required to develop the passenger trade—that is, to provide the bulk of the earnings to meet Mr. Foster's estimated $3,120,000 expenditure and yield a return of capital—it must be admitted that the outlook is not bright.

But this is only one branch of the difficulty the proposed service has to contend with.

A new terminus has to be found in winter. Unlike New York, which is in itself an enormous centre of population and commerce, with the whole railway system of the United States converging on it, Halifax, the winter terminus of the proposed line, and Quebec, the summer, have no local trade worth considering. Everything must be railway borne—in winter over the Intercolonial Railway, and in summer over one or other of the two trunk Canadian lines.

These railways are independent enterprises, with interests of their own to look to. Railway rates must be a first charge on all through earnings. The normal condition of things among railways is that they work at uniform rates under a combined agreement. When keen competitions arise among ocean carriers—which is, unhappily, the normal state of things with them, and would certainly await the advent of a new competiter—a fall in through rates has to be wholly borne by the ocean carrier. It was not, therefore, a cheerful look-out for a line that has to develop a great trade that it should be dependent practically upon the co-operation and good will of railways, however friendly they were, to have no stake in the undertaking.

Steamers of immense power and cost to build and run, and whose cargo-carrying capacity is in the inverse ratio of their speed, and whose speed cannot by reason of the character of the navigation be fully utilized, and which are to be run under the disadvantages we have indicated, are surely not hopefully circumstanced, and we appeal to you that the Allans should not be decried because they could not countenance the scheme. We are yours truly,

JAMES AND ALEXR ALLAN.

25 Bothwell street, Glasgow, August 9.

—To err is human; to forgive, diplomatic.—*Kate Field's Washington.*

AUSTRALIAN BANK STATISTICS.

In the Australian banks deposits are increasing and gold is accumulating. "Proceeds are coming in freely these last three months, while the need for fresh advances is small," such is the account given by the Melbourne correspondent of the London *Economist*. It appears that the desire to strengthen the position still further this year has also led to a considerable calling up of loans, and full advantage has thus been taken of what is practically the closing of the season. The movement in aggregate advances is, therefore, a large one, the average amount for the March quarter being £123,870,079, against £128,769,173 for the previous quarter. The decrease shown for each colony is as follows: Victoria, £953,325; New South Wales, £1,886,313; New Zealand, £489,407; South Australia, £348,276; Queensland, £1,046,280; Tasmania, £147,111, and Western Australia, £27,382.

The movement in the aggregate amount of the deposits is also favorable, an increase of £1,362,601 for the quarter being shown, of which about one-half, the letter states, is due ot the enlargement of the Government balances held by the banks in several colonies. "Owing to the transference during the quarter of all the colonial deposits of the English, Scottish and Australian Bank to the Melbourne register, the movement in deposits per colony is not at first clear, but in no case is it of importance. The accumulation of gold continues, the average amount held being £23,264,905, against £21,967,666 for the previous quarter, the increase being £1,297,239." The movement is to be accounted for partly by the low state of the import trade, the cheapness and ease prevailing in the London market, and the languid state of the circulation in the Australian colonies themselves, induced by the prevailing depression.

The movement in the note issue also suggests a restricted currency, being (for six colonies, Queensland not being included) from £4,394,244 for the December quarter to £4,060,338 for the March quarter. As the summary just reviewed brings to a close the first twelve months of the new banking era of Australia, the movements in deposits and advances for that period are worth noting. They are as follows:—

	DEPOSITS. March Quarter, 1894.	March Quarter, 1893
Victoria	£32,711,530	£39,379,238
New South Wales	32,311,269	35,994,353
New Zealand	14,153,756	14,550,942
South Australia	7,543,181	7,649,718
Queensland	10,895,122	10,752,927
Tasmania	3,263,298	3,800,749
Western Australia	1,505,759	1,419,182
Total	£102,383,915	£113,553,709
	ADVANCES, ETC	
Victoria	£44,989,273	£49,998,827
New South Wales	38,138,041	42,527,267
New Zealand	14,532,461	15,048,340
South Australia	6,152,205	7,068,076
Queensland	15,414,648	17,391,172
Tasmania	2,586,477	3,163,330
Western Australia	2,057,974	2,237,354
Total	£123,871,079	£137,484,366

[The comparison shows a decline in every case except that of Queensland and Australia, in the matter of deposits.]

The decrease in deposits is explained partly by conversion into preference shares, partly by withdrawals, and partly by the merging of accounts, which has been actively practised since the crisis. The decrease in advances is accounted for by writings off, reductions, merging of accounts, etc

THE SIZE OF CHICAGO

Mr. Graham's school census results have been announced. While many of the more interesting points have already been made public, certain facts shown by the complete report deserve more than a passing glance.

Chicago has 1,567,657 residents. Of these 949,092 are American born, and 618,565 are foreign born.

Among foreign nationalities the Germans lead with 216,324. Then follow the Irish with 111,037; the Swedes with 58,763; the Poles with 47,881; the Bohemians with 34,950; the English with 29,275; the Norwegians with 22,405; the Canadians with 17,535; the Russians with 15,251; the Italians with 14,194; the Scotch with 12,460, and the Danes with 9,754.

BREATHING FOUL AIR.

The "tired feeling," the headache and the nervous strain of which so many people complain are often home-bred maladies. Our living rooms and sleeping rooms are kept too close. We are poisoned with our own exhalations. Throw open the doors and windows and let in the revivifying and purifying air of heaven! Better the drafts, the flies, the mosquitos even, than the unventilated rooms kept sacred from the light and from the visitation of the winds that carry new life where they wander. The hunters and the trappers on duty, accustomed to live and sleep in the open air, complain of suffocation when they are obliged to sleep in houses under roofs. The open air gives them full chests and strong lungs. Until one shall go to his grave it will be well to insist upon light and airy apartments. After that, it will be small matter.

—Corn was 57 cents a bushel, wheat 54 cents, rye 47 cents, and oats 34 cents a bushel in the Detroit market last week.

—The engagements of grain at Chicago on Monday last were:—185,000 bushels of wheat and 175,000 oats. Lake freights to Buffalo were firmer at 1 cent per bushel on both wheat and oats. A despatch from Chicago says:—"The reports there indicate some wheat taken by Germany on Saturday. The weather there is bad and there is some talk of the German potato crop being short."

Commercial.

MONTREAL MARKETS.

MONTREAL, Aug. 22, 1894.

The Montreal share market for the week has been rather a quiet one, as far as transactions are concerned, but there is a feeling tending to firmness evident among holders, and the outlook is of more cheerful character. The strongest advance has been in Montreal Gas, owing to the result of successful litigation with their new competitors, and moderate sales are reported at 166 to 167, an advance of several points. The most of the trading has been in Street Railway at 153 to 153½, and new stock at 148 to 149. Bank stocks are quite neglected, and in Industrials only one or two small sales are reported of Montreal Cotton at 125, and Dominion Cotton at 110 to 112. Money is plentiful and easy at 4½ on call, with some loans of outside money reported at 4 per cent. Sterling exchange, 9 3-16 to 9¼ for sixties, between banks; counter rate 9⅜.

ASHES.—The receipts this month have been the lightest for the months of the year, being only 55 brls. of pots to date, and 12 of pearls. Values are decidedly firmer and still tending upward. We quote first quality pots, $4.10; seconds, $3.70 to 3.75. Pearls are strong at $6.50, with only two brls. of 3-years-old ashes in store.

CEMENTS AND FIREBRICKS. — There have been very few arrivals of cement of late, and stocks on hand have been pretty well cleaned out, but prices have not materially altered. A couple of steamers, from London and Belgium respectively, are near at hand with considerable supplies. We quote $1.90 to $2 for English, and $1.80 to 1.90 for Belgian. Firebricks are in moderate demand at $14.50 to $19 per M.

DAIRY PRODUCTS.—The cheese market is comparatively quiet, but the prices being paid are somewhat high in comparison with the level of the English market. We quote finest western colored 9⅞ to 10c., white 9⅜ to 9⅞c. per lb. In butter trading is quiet and prices easy. We

SEALED TENDERS addressed to the undersigned and endorsed "Tenders for Hot Water Heating Apparatus, Lethbridge, Alta.," will be received until **Wednesday, 29th August,** for the construction of a Hot Water Heating Apparatus at the Lethbridge, Alta., Public Building.

Plans and specification can be seen and form of tender and all necessary information obtained at this Department, at the Dominion Public Works Office, Winnipeg, Man., and at the Clerk of Works Office, Lethbridge, Alta., after Wednesday, 5th August.

Persons are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, made payable to the order of the Honorable the Minister of Public Works, equal to *five per cent.* of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,

E. F. E. ROY, Secretary.

Department of Public Works, Ottawa, Aug. 4th, 1894.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for New Dredge," will be received at this office until **Friday, the 31st Day of August,** instant, for the construction and delivery of a Spoon Dipper Dredge, having Steel Hull, Steel Boom and Compound Surface Condensing Engines, for Salt Water Service, in accordance with plans and a specification to be seen at the office of Mr W. J. McCordeck, the superintendent of dredging at St John, N.B.; at the office of Mr. C. E. W. Dodwell, resident engineer, Halifax, N.S.; at the office of Mr. A. P. Lepine, post office, Quebec; at the office of Mr. E. Guilbault, post office, Montreal; at the office of Mr. H. A. Gray, resident engineer, 86 Toronto St., Toronto; and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made on the form supplied, and signed with the actual signatures of tenderers.

An accepted bank cheque for the sum of $5,000, payable to the order of the Honorable the Minister of Public Works, must accompany each tender. This cheque will be forfeited if the party declines the contract, or fails to complete the work contracted for, and will be returned in case of non-acceptance of tender.

The Department does not bind itself to accept the lowest or any tender.

By order,

E. F. E. ROY, Secretary.

Department of Public Works, Ottawa, 1st Aug., 1894.

THE MONETARY TIMES

THIS Journal completed its 27th Year of Publication with the Issue of 29th June. Bound Volumes, Conveniently Indexed, will be ready shortly. Price, $3.50.

quote creamery 18 to 18½c. for finest, Townships dairy 16 to 17c; western 14 to 15½c per lb. Eggs 8 to 9½c per dozen.

GROCERIES.—A fair degree of improvement is to be noted in this line of trade, and several houses consulted report a satisfactory distribution of goods in progress. In teas excitement may almost be said to be running high; there is active enquiry, and a good many considerable lots, notably of Japans, have been selling. Offers made to New York of an advance of from half a cent to a cent have been declined, the reply saying, "Nothing under a cent and a half advance will buy these goods. Cables quote a large advance in cost and exchange, and the market here is exceedingly active, prices taking quite a jump. Japans from 16c. downward are fully 2c. advanced." Some large lots of old Japan teas which have been held here for some time have all been closed out at good prices, some considerable shipments having been made to St. Louis and St. Paul, U.S. In London, China teas are active and very firm, and it is reported that Ping Sueys and Formosa Oolongs have been advanced there from 25 to 35%. Sugars are unchanged from last week, though further advance is reported in New York. Granulated is quoted at the refinery at 4⅜c., with the lowest figure in yellows 3¼c. Coffees are quiet we quote Rio 19 to 21c. Java 24 to 30c. Mocha 23 to 28c. Maracaibo 18½ to 21c. Further lots of California fruit in boxes, raisins have been received, and are meeting with much favor from the retail trade. They are being jobbed at 6½c, and it is pretty certain will be more largely dealt in hereafter. Of Valencias there are no stocks in wholesale hands. Currants are in fair supply at from 3½ to 6½c as to quality. There are predictions of a shortage of 30,000 tons in this year's crop.

HIDES AND TALLOW.—There has been a little buying of hides on American account in Ontario for the last several weeks, but the better prices being paid locally are rather due to the intense competition among dealers than to any other cause. The nominal price for No. 1 green hides is 3½c. per lb., but it is said over 4c. has been paid in some cases, though 4½c. is the extreme figure that can be realized from tanners for No. 1 cured and inspected. Heavy steers are bought at 4½c. and sold to tanners at 5½ to 5½c. per lb. The few calfskins coming in bring 5c.; lambskins, 30 to 35c. though more has been paid in some cases. Tallow is somewhat dull at 5½c. for rendered.

LEATHER.—No general improvement can be noted in the demand, though one large manufacturing shoe house seems impressed with the idea that prices have gone about as low as they can, and has been buying some pretty big blocks of slaughter sole and good quality splits, about cleaning up the market in this latter line. American advices show an improved market to some extent, and English circulars just to hand breathe a more hopeful feeling, though they state that the future depends largely on the results of the harvest. We quote:—Spanish sole, B A No 1, 18 to 20c, do No 2 to B A, 16 to 17c, No 1 ordinary Spanish, 17 to 18c, No 2, 15½ to 16½c, No 1 slaughter, 18 to 20c, No 2 do, 17 to 18c, American oak sole 30 to 43c, waxed upper, light and medium, 24 to 26c.; do heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c, russet sheepskin linings, 30 to 40c, harness 18 to 25c, buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Rather more enquiry is reported in the heavy metal trade, but thus far there has not been much resulting business, and transactions of any importance are not numerous. Scotch warrants are cabled firmer at 43s. 5d., and makers' prices for Summerlee, Gartsherrie and Eglinton are slightly advanced, but local prices are just as they were. Cables have been received that tin plates are firmer, and a party ordering a 1,000 box lot has had to pay an advance of eight pence, but prices there are still abnormally low, and it is impossible to get any better prices here yet. Stocks at Swansea are reported to be 302,000 boxes at date, as compared with 269,000 boxes this time last year. Bar iron is dull and weak, the bulk of the sales being at $1.70 for Canadian. Ingot tin is cabled £23 a ton advanced and local quotations are stiffer. Lead and copper are also somewhat firmer abroad We quote:—Coltness pig iron, none here; Calder, No 1, $19.50; Calder No 3, $18.50 Summerlee, $19.50 to 20.00, Eglinton, $18.50, Gartsherrie, none here; Langloan, none here, Carnbroe, $18; Shotts, none here; Middlesboro, No 3, $17, Siemens, pig No 1 $16.25 to $16.50; Ferrona No 1, $16.50 machinery scrap, $14.50 to 15.00, common do $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25, best refined $2.40 Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.10 to 2.15, all polished Canadas, $2.75, Terne roofing plate, 20 x 28 $6.00 to $6.25 Black sheet iron, No 28, $2.40, No 26, $2.25 No 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.85 to 3.00, coke wasters, $2.75 galvanized sheets, No 28, ordinary brands 4½ to 4¾c, No 26 4c, No. 24, 3¾c, in case lots; Morewood 5½ to 6c; tinned sheets, coke, No 24, 6 to 6½c, No 26 6½ to 6¾c.; the usual extra for large sizes Hoops and bands, per 100 lbs., $2.40 to 2.45 Steel boiler plate, ¼ inch and upwards $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85 heads, $2.85

Russian sheet iron, 10 to 10½c.; lead, per 100 lbs, pig, $2 60 to 2 75; sheet, $4 00 to $4 25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3¼c., ⅞ in., and upwards.

Oils, Paints and Glass.—The movement in these lines is still of a quiet summer character. Linseed oil shows considerable firmness in Britain; it is hard to establish an advance here, but prices may be quoted a little stiffer at 53 to 54c. for raw, and 56 to 57c. for boiled. Turpentine is also advanced a little South, and from 45 to 46c. is now asked here. Castor oil still flat at 6¼c. in lots. Fish oils very dull, with few transactions yet reported in new crop. Leads and paints unchanged. A cable from Belgium this week quotes advanced prices for glass, but local prices are not likely to be altered, as orders for fall stocks have been mostly all placed. Turpentine 46c. per gal. for single barrels; two to four barrels, 45c. Linseed oil, raw, 54c. per gal.; boiled, 57c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 40 to 42c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

Wool.—Cables have just been received announcing an advance both at the Cape and in London, prices in the latter city being reported from a halfpenny to a penny stronger. It is hard to establish an advance here, but holders are decidedly stiffer in their views, and we quote Cape, 14 to 16c.; greasy Australian, 15 to 16c.; B.A. scoured, 26 to 34c.; no new clip Nor'-west has yet been received here; Canadian fleece, 16 to 20c.; puller supers 20 to 22c. A cargo of Cape, comprising some 1,200 bales, will be due here about the middle of September. A little freer enquiry is reported from mill men.

TORONTO MARKETS.

Toronto, Aug. 23rd, 1894.

Drugs.—No important features have been developed within the last week; business is probably a little more active in consequence of an approaching fall season, but the increased activity is not very marked. The United States tariff has been the all-absorbing subject of conversation, and until the bill becomes law a great deal of uncertainty must necessarily exist in the market. There has been more of a disposition in American markets to speculate upon the products of China and Japan in consequence of the war, and all goods are firmly held. East India goods are said to be on the point of advancing; this is due to an upward movement in silver.

Flour and Meal.—Lower prices are again recorded, and the decline has failed to draw out any considerable request. Values now stand as follows; Manitoba patent, $3.40 to $3.50; Man. strong bakers', $3.25 to $3.40; patent, $3; straight roller, $2.60 to $2.70; extra, $2.50 per bbl. It will be found interesting to compare these quotations with those of a similar date last year. On August 25th, 1893, we quoted Man. patent, $3.85 to $3.90; Man. strong bakers', $3.60 to $3.70; patent, $3.25 to $3.40; straight roller, $3.03 to $3.10; extra, $3 per bbl. A marked decline in the value of every grade will be noticed, and this is the more important when we consider that the prices of August, 1893, were far below those of August, 1892. In order that further comparison may be made, we give our quotations on August 25th, 1892. They are as follows: Manitoba patent, $4.60 to $4.75; Man. strong bakers', $4.20 to $4.30; patent, $4 to $4.10; straight roller, $3.60 to $3.65; extra, $3.15 to $3.25 per

bbl. Oatmeals have gradually fallen off in value since new oats came in to the market, and at $4.10 to $4.20 are quoted 10c per bbl. lower. The demand for oatmeals shows improvement as the result of colder weather, and volume of movement is growing larger.

GRAIN.—In the absence of any exciting reports, values have remained almost stationary during the week. English harvests have been interfered with by wet weather, but late cable reports are more favorable. In Chicago the feed question is coming more prominently forward as a bull argument, and it is very apparent that with values on their present low basis it is becoming profitable to feed wheat mixtures to cattle. This must of course decrease stocks. On the local market the demand is confined to that from local millers. Barley has not yet commenced to move, and little activity can be expected until the first week in September. American dealers are beginning to evince an interest in this market, but enquiries are confined to the probable amount and quality of the growing crop. Oats are lower and dull at the decline, with old quoted at 34 to 35c. and new at 31 to 32c. per bushel. The Canadian Bankers' Association, of Winnipeg, has received an interesting report as to the growing crops in various parts of Manitoba and the Territories. Wheat promises best in the vicinity of Oak Bank, Minnedosa, Holland, Carberry and Shoal Lake; reports from Qu'Appelle, Regina, Napinka, Deloraine and Griswold are unfavorable. The yield varies all the way from seven to twenty-five bushels to the acre, according to locality. Barley varies from ten to forty-five bushels per acre, the best crops being in the vicinity of Carberry and Chater. Oates are a good crop near Bradwardine, Minnedosa and Shoal Lake; the range throughout the whole territory is placed between ten and fifty-five bushels to the acre.

The stocks of grain in store at Port Arthur on Aug. 11th were 1,070,400 bushels. During the week there were received 43,445 bushels, and shipped 200,225 bushels, leaving in store on Aug. 18th, 913,620.

GROCERIES.—With an advancing season the volume of trade shows an increase. Brazilian advices reveal a full supply of coffee, with private information speaking of improved quality and a more general inclination to realize; the local market is unchanged. The first steamers with new raisins sailed from Denia this week, considerably later in the season than last year. A London report by last mail says:—"There is only a small business doing in currants, and the recent advance has scarcely been maintained in the few transactions which have taken place, as provincial fruit of fair quality is again on offer at 10s. to 10s. 6d. The slight decline has been caused by the anxiety of some holders to realize their stock, but the latest advices from the currant-growing districts of Greece all agree that the crop will prove to be smaller than the recent estimates, and 130,000 tons is now named as the probable outturn. Shipments will commence about the 28th inst." A shipment of fresh Bosnia prunes is expected in Toronto about September 1st. Advices from abroad are firm for nutmegs, but indicate a weaker market in pepper. Letters from New Orleans report the rice crop as being retarded by wet weather. Sugar values have remained unchanged; local merchants are expecting a good trade in September, in consequence of reports of a large crop of peaches in the Niagara district. Reports have reached merchants of an advance in Japan teas in New York, but so far they have not been confirmed.

HARDWARE.—The last two weeks have brought with them improved conditions in the hardware and kindred trades. As yet we are not fairly into the fall trade, although a good many orders have been booked for fall shipment. Beginning with the first week of September autumn goods should move actively. Prospects for the trade of the coming autumn are thought to be fully as encouraging as those of this time a year ago, and the quantity of harvest tools sold during the season now closing was probably as great as that of last year.

HIDES AND SKINS.—Hides have continued to gain strength, and prices on the local market have advanced. We hear of sales at an advance of ½c., and are told of selections selling at 3¾c., or ¼c. advance. These higher prices apply only to heavy hides weighing from 40 to 60 lbs. Tanners claim that the leather market does not warrant higher prices, and some merchants believe that the advance will only be a temporary one. The *Review* says of the Chicago market on the 18th inst:: "Values in the packer hide market are still doing the balloon act with marked success. Sales are numerous but mostly of small size. Old stocks are pretty well cleaned up, and only a few thousand March natives are in sight. The late kill is sold up to July in natives and into the August take-off in Texas hides. Offerings of butt branded hides and Colorados are very light. Branded cows are sold up to kill. A prominent buyer remarked recently that in many years the market has not been so nearly depleted of stock. Tanners will be interested to learn that the $2 terminal or trackage charge recently imposed by the stock yards' company has been withdrawn." Fresh stock of lambskins and shearlings are readily taken by local tanners in Toronto at 35c., and there is no accumulation of stocks. Tallow sells well in the better grades, but there is a good deal of poor stock offering.

LEATHER.—Since our last report the general conditions of trade have improved but little The movement of stock to local manufacturers is very limited, while that to eastern factories has increased but little, and is confined more particularly to sole leather. Hide merchants are talking of an advance of ½ to ¼c. in hides, but tanners are of the opinion that market conditions will not warrant this being made. Stocks are not excessive. Advices from England indicate lower prices on sole, with waxed splits reported as about the only good selling article in the market.

LUMBER.—The United States tariff bill remains an uncertain factor, and trade in consequence is in an unsettled condition. Canadian merchants are anxiously awaiting the termination of the matter, which has so long disturbed the lumber trade. Next week we will doubtless be able to report an improvement in the situation in consequence of the passage of the bill. Operations upon next season's cut are just beginning and men are daily leaving for the lumber camps. The size of the cut depends much upon the developments of the next few days

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE COLOSSUS OF THE WORLD.

Some years ago Mr. Andrew Carnegie became the head of a syndicate controlling a London evening paper and a number of provincial papers. We believe Mr. Carnegie's object was to educate the masses in this country as to his principles and ideas. We remember hearing Mr. Carnegie proclaim, before the Iron and Steel Institute, that he looked forward to the time when the people of Britain and America would be re-united under one government. Some one very promptly enquired, "Which government?" but the question was not answered. Mr. James Gordon-Bennett experimented on the English public with a London edition of the *N. Y. Herald*, and where he failed Mr. Carnegie was not likely to succeed. If Mr. Carnegie, who spends much of his time here, does not now own one of the iron trade papers, it appears to be his "organ," judging by the frequent reference to Mr. Carnegie printed prominently in the paper. But for the *Iron Age*, of New York, a long article on Mr. Carnegie, what he has done, and what he proposes to do, would have escaped our notice. *The Iron Age* of 19th ult., reprints this article, and remarks: "The American iron trade will find the following 'blast' entertaining summer reading. It was 'specially' contributed to an English contemporary." According to our contemporary, Mr. Andrew Carnegie, if not one of the greatest men ever seen on earth, is the Colossus of the ironmaking world for all time—beside the Carnegie concern, "Krupp's works at Essen are not of much account." This no doubt is Mr. Carnegie's opinion, but it is not that of most people. The name of Carnegie is known throughout the States as that of a manifold millionaire, who has raked in the riches offered to him by the fiscal system which taxes the many for the benefit of the few. Mr. Carnegie is one of these few. At best Mr. Carnegie is a creature of circumstances, and he is an excellent type of the class who after being enriched at the cost of the people, at the expense of their customers who are prevented from buying in the cheapest markets, turn round and say, "Alone I did it, behold what a great man am I." Mr. Carnegie says his various works have cost six millions sterling, and he has been offered ten millions for them. About one-half the railroads in America are now bankrupt; hundreds of millions sterling have been spent in these lines, but no one would offer 50c. in the dollar for the stock. Mr. Carnegie has done well by the tariff, which made his fortune, but it has ruined most of his customers, who were compelled to pay 100 per cent. too much for their material. We don't find fault with Mr. Carnegie for taking all the good things which the tariff secured for him, but we are amused to find an English paper going into ecstacies over Mr. Carnegie and his millions. As to Krupp's works being not of much account. The products of the Carnegie works are unknown outside the area preserved for them by the tariff, but Krupp's guns, railroad material and other manufactures are known and appreciated in every market in the world. Mr. Carnegie may be a great man in his own country, but he is nobody out of it, though we must qualify this, as the trade paper we are quoting from a few weeks ago made the following announcement:—

"There is no American who is better known in English political circles than Mr. Carnegie. He is a *persona grata* with both Mr. Gladstone and Lord Rosebery; he is hand-in-glove with Sir William Harcourt, and most of the other members of the present Cabinet have at one time or another accepted his hospitality."

Mr. Carnegie is a great man in America, because his customers are compelled to deal at his shop; the law will not allow them to spend their money where they get most value for it. Our contemporary states that at the Carnegie works "the profits which are realized at home are good enough, as a rule, to allow of a large remainder being sold elsewhere, if need be, at a loss." Then we are told that "a single brain," which appears to be doing nothing at some ancient seat in Sussex, is really threatening the greatest of our industries, and that if the home market will not absorb all the output of the Carnegie works, the surplus is almost certain to be thrown on the European markets. If this is the "most formidable danger confronting the greatest of our industries," we have much to be thankful for, and we join with *The Iron Age* in a smile at "The Colossus of the Iron-making World."

FIRE BRIGADE MEMORIES.

In the course of his description of the sayings and doings at the recent convention in Montreal of the chiefs of fire brigades from all over the United States, a reporter of the *Gazette* gave an entertaining account of some incidents of firemen's lives in Montreal, entitled "Memories of the past." He was chatting over old times with Mr. Joseph Beaulieu, supply officer of the fire department, when along came Assistant-Chief Beckingham, who, with a smile, joined in the conversation of his old companion in the old No. 2 station, which was in former times located at Court House square. They told stories of the olden days by the score, and some of them were very amusing.

People talk of the good old days, but Messrs. Beckingham and Beaulieu have the satisfaction of knowing that they had their share of joys as well as hard work. They enjoyed many a hearty laugh over the escapades in which they have indulged in their younger days. Their station was the favorite one with all around town. Although the station was small and the number of men equally small, still they succeeded in several ways in entertaining not only their visitors, but themselves.

There is, however, another side to the story, and that is the hardships they were called upon to endure at times. The pay was small, and as they were not very fully provided with changes of garments, many a night after returning from a second or third fire, wet and weary, they would lie down on their beds and cover themselves up with whatever material they could secure, and with their dripping and wet clothes they would fall asleep, and when they would awake in the morning the steam would arise from them in clouds when the coverings were thrown off.

"John and I are still alive yet," said Joseph.

"Yes, we are, and I don't know how we stood it so well," replied John.

The station was a small one, and only the reel divided Messrs. Beckingham and Beaulieu from the horse, and the one slept over the other as in ship fashion.

"Do you remember one night that you were off, John?" asked Mr. Beaulieu.

"I am not very sure of the one you refer to," was the answer.

"Well, it was the night that when you came back to the station you found some one in your bed dressed up in full uniform. You did not like to disturb him and so you went and slept on a bench for the night. In the morning when you awoke you thought it was time for him to get out and give up the bed to you. Then you found out that it was one of your old uniforms stuffed with straw."

Mr. Beckingham remembered it, and had a hearty laugh.

The joke did not end here, as the "stuffed" fireman was placed outside the station and against one of the alarm boxes, and several people went up and asked him where the fire was. Among them was one of the British army officers, and as he could not get any satisfaction he went away muttering unpleasant words about the useless fireman stationed there.

During the Fenian raid the firemen had to do patrol duty around their districts for fear that the stations would be set fire to, and then some of the larger buildings afterwards. They also had to do police duty as well, and Mr. Beaulieu claims to have made two arrests, one of his prisoners being dismissed and the other one fined $1.

Assistant Chief Beckingham's record is well known to the residents of Montreal. He is one of the most noted members of the brigade, is deservedly popular, brave and fearless in the discharge of his duties. He has on more than one occasion distinguished himself. After the fire on St. Urban street in 1887 he was presented with a medal for bravery on that occasion. At the St. James' Hotel, on the 18th March, 1873, he succeeded in saving life at great peril to his own. In October, 1872, Mr. Beckingham again rendered valuable services at the fire at St. Patrick's Hall, when he was successful in saving the society's banner, which was valued at $1,200.

In January, 1881, Mr. Beckingham, at the request of the insurance companies, took charge of the salvage corps.

When attending a fire on St. Paul street Mr. Beckingham had a narrow escape for his life. He was going up stairs, and when at the head of the stairs he thought he saw an opening ahead of him, and was hesitating about going forward with the branch in his hand, when the late Chief Bertram gave him a push forward and he fell down among some packing boxes on the flat below, but was not hurt.

On the death of Assistant Chief McCulloch in 1890, Mr. Beckingham was promoted to this position, a promotion which was well deserved and has given satisfaction.

MISDIRECTED IRONY.

Many stories are told of the late Lord Bowen's gently ironical manner, and no man of this generation possessed that particular gift in the same highly-wrought perfection. But it occasionally proved a drawback to him, especially in dealing with juries. Once during the short time that he went on circuit he was tempted to sum up ironically. It was the cause of a burglar who had been caught *flagrante delicto*, having entered from the roof, and taken the precaution to leave his boots on top. His defence was that he was in the habit of taking midnight strolls on the roofs of houses, and he was tempted by curiosity to descend and have a look at one of the houses. Lord Bowen treated the defence very seriously. "If, gentlemen," he said to the jury, "you think it probable that the prisoner considered the roofs of houses a salubrious place for an evening walk, if you suppose that the temptation to inspect the interior of the houses beneath him was the outcome of a natural and pardonable curiosity, in that case, of course, you will acquit him, and regard him as a thoughtful and considerate man, who would naturally remove his boots before entering the house, and take every precaution not to disturb his neighbors." To the judge's amazement, the jury took him at his word, and promptly acquitted the prisoner.

THE TARIFF AND THE DRY GOODS TRADE.

The merits of the tariff bill as a measure of reform or of politics cuts very little figure with the business community—more or less tariff just now is of small importance in comparison with the question of relief from uncertainty. Everyone hails that approaching relief with delight, for with the tariff question disposed of business will soon find a basis upon which it can resume the activity so long suspended. It is very probable that there will be a very lively movement in many lines the moment it becomes certain that the bill is a law. Conditions are peculiarly favorable to rapid resumption of business activity. Two very important factors are abnormally low prices, very short stocks in most classes of goods, and the need for replenishment by consumers. While some manufacturers are without question heavily stocked, it is equally certain that distributors' shelves are bare. Neither jobbers nor retailers have any but skeleton stocks; and they are in excellent shape to absorb large quantities of goods. Moreover, shrewd buyers look for a marked upward reaction in prices on many classes of goods. Reduced duties have been not only discounted, but a great deal more; and sellers, in their eagerness to keep their mills going, to meet competitors' prices, or to hold their customers, have forced prices far below intrinsic values. Even a moderate buying movement would change this condition, and with short stocks in producers' hands, as is generally the case, prices will rapidly stiffen to a normal and natural basis.

Those who expect a slump, therefore, immediately following reduced duties, will be disappointed, and for many goods prices will be higher before they are lower.

There has been a great deal of animation of the expectant kind among importers this week. After complete paralysis for many months there is again promise of speedy activity, and, if the Gorman bill becomes a law, next week will see a wild scramble to get goods out of bond and make quick deliveries to potential customers. Deliveries of imported goods thus far have been trifling in quantity, nearly all contracts having been conditional; and consequently the United States warehouses are crowded beyond precedent with goods in bond, waiting for the tariff muddle to be settled and for values to be replaced on a safe basis. Early in the week a marked access of movement in imported goods began, and the week's transactions indicate clearly that with the tariff settled buyers will take hold eagerly.—*Dry Goods Chronicle.*

Cor. Toronto & Court Sts.

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

WM. McCABE,
Managing Director.

British Empire
Mutual Life Assurance Company
Established 1847
Of London, Eng.

Steam Boiler Inspection and Insurance Department of the . . .

STEAM BOILER and PLATE GLASS

Insurance Co. of Canada

Head Office:
Masonic Temple,
London, Ont.

Subscribed Capital
$200,000.00
Full Government Deposit.

JAMES LAUT, - - - - Manager.

DIRECTORS:

E. JONES PARKE, Q. C., - - - - - - - - - - - President.
F. A. FITZGERALD, Esq., President Imperial Oil Co., - - - - - Vice-President.
HON. DAVID MILLS, Q.C., M.P., Ex-Minister of the Interior.
JOHN MORISON, Esq., Ex-Gov. British America Assurance Co., Toronto.
T. H PURDOM, Esq., Barrister, London.
J. H. KILLEY, Consulting Engineer. JOHN FAIRGRIEVE, Chief Inspector.

Have your Boiler inspected and insured. It pays to know you are right.
Will your Boiler stand the pressure at its weakest point? Can you judge it?
The man who handles steam handles power.
As its danger increases, the knowledge necessary to protect yourself and property against that danger should be greater.
Know that you are right. Inspection is the best investment.
Do you use a high pressure?
Your engineer should be a skilled man.
Determine the power of your Boiler by inspection. Insure its safety by inspection and insurance.
When were your Boilers last inspected by a competent engineer?
Do you know what pressure your Boilers can safely stand?
Is your Steam Gauge registering the correct pressure?
Are your Water Gauges free and in good working order?

Is your Safety Valve working properly?
Do not trust to luck; the unexpected generally happens. Avoid the calamity of an explosion.
Protect life and property by taking out one of our inspection and insurance policies.
This Company insures Boilers against explosions, and causes inspections to be made by competent engineers. Inspection of your Boiler is the best guarantee of its safety. Our inspectors give advice and instructions wherever necessary to those in charge of Boilers, which is of advantage to the owners, and results in greater economy, knowledge and safety.
Economy in fuel, in repairs and in the length of time a Boiler lasts
Knowledge how a Boiler should be managed, and relieving the owner of responsibility.
Safety—because being kept in order the best results are obtained, and if an explosion occurs you have done what you could.

The lives of the Engineers and Firemen are insured free of any additional charge.

A. ALLAN, President. J. O. GRAVEL, Secretary-Treasurer.
F. SCHOLES, Managing Director.

The Canadian Rubber Company

DECISIONS IN COMMERCIAL LAW.

ROYAL ELECTRIC CO. v. LEONARD & CO.—The appellants, who had a contract with the city of Three Rivers to supply and set up a complete electric plant, sublet to the respondents the part of their engagement which related to the steam engines and boilers. The original contract with the city of Three Rivers embraced conditions of which the defendants had no knowledge, and included the supply of other totally different plant from that which they subsequently undertook to supply to the appellants. The appellants upon completion of the works, having sued the city of Three Rivers for the agreed contract price, the city pleaded that the works were not completed and set up defects in the steam engine and boilers, and the appellants thereupon brought an action *en garantie* simple against the respondents. The Supreme Court of Canada held, affirming the judgments of the courts below, that there was no legal connection (connexite) existing between the contract of the defendant and that of the plaintiffs with the city of Three Rivers upon which the principal demand was based, and, therefore, the action *en garantie* simple was properly dismissed.

CITIZENS' INSURANCE COMPANY v. SALTERIO.—A condition of a policy of insurance against fire provided that the policy should not be assignable without the consent of the company endorsed thereon, and that in the event of any sale, transfer or change of title in the property insured the liability of the company should thenceforth cease. S., the insured under this policy, gave a chattel mortgage to a creditor of all his stock-in-trade insured thereby, and also "all policies of insurance on said stock and all renewals thereof." The consent of the company to the giving of this mortgage was not endorsed on the policy. The Supreme Court of Canada held, reversing the decision of the Supreme Court of Nova Scotia, that as the chattel mortgage and subsequent transactions showed that S. intended the policy to pass to the creditor, there was a breach of the condition and the policy was void. Held further, that though the chattel mortgage was not a "sale" or a "transfer" of the insured property within the meaning of the condition, it was a "change of title" therein which freed the company from liability.

ST. JOHN GASLIGHT CO. v. HATFIELD.—The St. John Gaslight Co. being engaged in laying a main through one of the public streets of the city, applied to one Wisdom, a plumber and gasfitter, for the services of a competent man, and H. was sent by Wisdom to work on the said main. While H. was working at one end of a pipe, he was injured by gas escaping therefrom being set on fire from a salamander used in carrying on the work and exploding. One of the servants of the company whose duty it was to turn on the gas at this pipe every evening and turn it off every morning, had neglected to turn it off the morning the accident happened, and there was evidence that the salamander had been moved from its usual place and put near the end of the pipe where H. was working, by order of the manager of the company. In an action by H. for damages from such injury, the jury found that the company was guilty of negligence, and that H. at the time of the injury was not in the service of the company, but in that of Wisdom. A verdict in favor of H. was sustained by the full court. The Supreme Court of Canada held, affirming the decision of the Supreme Court of New Brunswick, that the finding as to negligence was warranted by the evidence. Held further, that whether or not there was a common employment between H. and the servants of the company was a question of fact, and the jury having found that H. was not in the service of the company, their finding would not be interfered with on appeal.

MERIDEN BRITANNIA COMPANY v. BRADEN.—"Void as against creditors" in s. 2 of 55 Vict., c. 26 (O), which extends the provisions of the Act respecting mortgages and sales of personal property to simple contract creditors suing on behalf of themselves and other creditors, must be read "voidable as against creditors," and it is not until an election is made by the simple contract creditors so suing by the commencement of proceedings to attack it, that it is too late to validate a defective chattel mortgage before action cannot be impeached.

WISDOM FROM THE WEST.

From an address delivered some time ago by ex-Governor Alva Adams, of Colorado, before the Monday Evening Club at Pueblo, Colorado, the following excellent thoughts are culled :—

Credit has been defined as suspicion asleep. If we can find a legislative position which, like the kiss of Selene upon the lips of Endymion, will make the slumber of suspicion perpetual, then will confidence begin an unbroken reign of prosperity.

The more I investigate the more difficult it is to find an absolute panacea for a debtor nation. The conditions must be changed before a cure can be effected. As long as our people, as communities and individuals, are so loaded with debt we cannot evade all the penalties that punish debt. In times of depression the fatalities fall upon those that owe. He who owes nothing becomes a financial Ajax, and can defy the storm and lightning of commercial disaster.

Until a large portion of our best securities are held by our own people, the nation is in the position of a debtor who has outstanding a large volume of demand paper. We are even subject to an invasion of securities calling for gold, and demand obligations, taxes, or the grip, are never presented to the payee at a welcome time.

Partizanship would rather see panic and distress reign than to have the country prosper and the credit go to the opposing party. Nowhere is the sweet and delicious agony of grief so clearly exemplified as in the words and conduct of the average politician when he sees his country swept by disaster whose origin can be laid at the door of a political enemy. Partizanship is the only element in the American character that rules stronger than selfishness. We are never so miserable and unhappy as when our enemy passes some noble and patriotic laws, even though we are the beneficiaries; never so happy as when they champion evil legislation and vote for bills whose enactment would devastate some great industry and bring distress to the threshold of a thousand homes.

Intelligent selfishness is a necessary quality in banking. When you see a banker that is unselfish, that is open handed and generous, that is not exacting, in fact an all round good fellow, take my advice and put your money in some other bank.

There is nothing congenial or in harmony between the methods of the whole-souled, liberal, everybody's-friend-sort-of-a-man, and the true banker, any more than there is between the clergyman and the pool-seller at a horse race.

Mercantile Summary.

THE Walker Plumbago Company, of Ottawa, whose works are at Buckingham, expect to make lead pencils next spring.

ONLY three of the charter members of the London Board of Trade, which was organized in 1857, are at present residing here, viz.:—Messrs. W. Anderson, John B. Smith, and Robert Reid.—*Free Press.*

THE receipts of wheat at the Fort William elevators for last week amounted to 107,138 bushels. The shipments were 244,418 bushels and the amount in store on 25th was 776,340 bushels.

AT a meeting of the council of the Board of Trade, Waterloo, a resolution was adopted, favoring the deep waterway scheme of the St. Lawrence, and appointing a committee to go to Toronto to take part in the convention to be held on September 17 to 20.

Two French newspapers in the Province of Quebec, *L'Evenement* and *La Presse*, are making a row because the exhibition company has decided that only the Dominion flag shall wave over the Quebec exhibition buildings, though exhibitors may decorate their exhibits as they please. This decision of the company is a change from what has been usual in Montreal exhibitions, but our French speaking friends should not forget that this is a British country.

Mercantile Summary.

THE Northern Transit Co. has decided to build a new steamer at Collingwood the coming winter.

THE Nova Scotia Telephone Company's new metallic circuit between Halifax and Truro, 61 miles, has been completed.

THE toot of the locomotive was heard in New Denver, B.C., last week for the first time. The Nakusp & Slocan Railway is now close to that thriving town.

THE people of Winchester village are talking of putting in water works in that town, and an electric light plant is also spoken of. About $18,000 is put down as the cost for both plants.

THE Quesnelle River Hydraulic Gold Mining Co., Limited, has been incorporated by James B. MacLaren, F. S. Reynolds and W. C. Fry, with Westminster, B. C., the principal place of business. The capital stock of the company is $600,000.

THERE has been hitherto some difficulty in getting proper titles to lands in Revelstoke, B.C., but a change has come. Deeds which were refused registration last year have been registered within the fortnight. The C.P.R. Company's action in surveying a portion of their town site indicates that they have some assurance of being able to put their lots upon the market.

Sample Room for Exhibition week:

No. 18 Merchants' Building, 50 Bay Street, Toronto.

Mercantile Summary.

THE first consignment of coal from Cleveland to London, *via* Port Stanley, in a great many years, arrived in London last week. Three hundred and fifty tons was the amount of the shipment from Cleveland.—*Advertiser.*

THE Orford Mountain Bundle Wood Company was started about two years ago to put up kindling wood for the American market, and was bonused to the extent of $3,000 by the village of Eastman, Que. The business has not proved a success, and a meeting of creditors has been called by order of the court. Liabilities are about $10,000.

THE electric railway between Galt and Preston promises to be a brilliant success. The expenses of running the line are $20 a day and the gross receipts at present average $75 a day. During cold weather the receipts from passengers will probably fall off, but as it is proposed to carry freight, it is thought that enough freight will be carried to pay the entire expenses of operating the road.

THE Medical Association of the Maritime Provinces met in St. John last week. Dr. Farrell was elected president. The Dominion Medical Association, of which Dr. Bayard, of St. John, was chosen president, met in the same city next day. A resolution was adopted to the effect that the school system of the Dominion draws too largely upon the brain tissue of children, and materially injures their mental and bodily health.

Toronto

D. A. Decasse, dry goods dealer, at Hull, Que., is offering his creditors 60 cents in the dollar, liabilities being $6,434. He started in business about two years ago on a capital of about $500.

A paragraph from Westville, N.S., says cholera morbus and other ailments prevail in that town, and blames the bad water. It is to be hoped that the incorporation of the place, just achieved, will result in improved water supply.

A brick of gold, weighing one hundred and one ounces, valued at $2,000, was deposited in the Bank of Nova Scotia at Stellarton, N.S., the other day. The *Chronicle* says the brick was the result of the crushing of two tons of quartz taken from the mines at Sherbrooke, in which Stellarton parties are interested.

The proprietor of the Anthracite and Canmore coal mines has struck a vein of coal 9 feet 11 inches wide, and a good sample. About 8,000 tons of coal are in the Winnipeg yards, says the *Free Press*, and the company will retail it all winter for $8.50 a ton, quite a drop from $10.50, the price last winter.

Saturday last was one of the heaviest days in the history of the Montreal Street Railway Company. The earnings for the day amounted to $3,731.08, against $2,518.87 for the corresponding day last year. The company is now running 110 motors with 75 trailers, and has also 106 cars now fitted with fenders.

J. O. Milette, a general merchant at Bedford, Que., has been something of a rolling stone, and in his case the old proverb has proved true. Originally a clerk in a Montreal dry goods house, he some years ago opened a store in St. Alexandre; thence he moved to St. Charles de Stanbridge, next to Drummondville, then to Iberville, and this spring to Bedford. His ramblings are temporarily done, for he has now assigned.

The items in this paragraph refer to traders in the city of Toronto. The sheriff has taken possession of A. Shannon's interest in the firm Shannon & Whillans, city contractors, in the suit of a couple of his bankers.——Geo. Williamson, who has carried on a grocery for several years and been many times sued, now assigns.——The Toronto Lumber and Manufacturing Co. was incorporated two years ago, with a nominal capital of $10.000. But not being able to make any progress, they assign.——Wm. Greig, provision dealer, has put his affairs into the hands of an assignee.

T. Leahy, of Bathurst, N.B., who has been engaged in the general store and liquor trade for some 20 to 30 years, and who has hitherto been looked upon as being in fairly good financial shape, is reported as having assigned.

J. S. Larke, who was executive commissioner of the Canadian exhibit at the World's Fair, has been appointed trade commissioner to Australia. Before leaving Canada, it is understood that Mr. Larke will put himself in communication with Canadian manufacturers.

It is quite possible that the votaries or even the authorities of Mother Church will consider that what has happened to the financial fortunes of L. A. Picard, of St. Henri de Montreal, is a judgment upon him for having renounced celibacy and other religious vows. Picard was originally a friar, but some years ago married a woman who had been keeping a dry goods store, determining in making an essay in business. In this he has not proved successful. Last spring he arranged with creditors for an extension of time, but has now had to assign, liabilities being $4,491.

Nothing has been more vaunted in its way, perhaps, than the virtues and healing powers of the Keeley Gold Cure for drunkards. And it may have done some good. We trust it has. Unhappily, the drunkard rarely stays cured. Nor is the business of curing the diunkard quite so successful in Canada as in the United States. The statement of the liquidator of the Leslie E. Keeley Institute Company of Canada, insolvent, has been issued. The assets are represented by $600, proceeds of the sale of rights and movables of the company by tender. The liabilities are represented by $129 liquidator's expenses, $616 privileged claims, and some $13,000 odd unprivileged claims, the holders of which stand to get nothing.

In a paragraph on the subject of real properties in Montreal exempted from assessment, a writer in the *Gazette* says that the increase in the assessed value of taxable and exempted property will not exceed $10,000,000. The increase in 1892 was about $8,000,000. In 1893, it will be remembered, the assessments were "jumped up" (especially the exempted properties), until an increase of nearly $29,000,000 was obtained. The actual figures were: 1891, $128,413,000; 1892, $136,258,000, and 1893, $165,020,000. The total this year will not overtop $175,000,000. The greatest increase is said to be in St. Antoine, St. Lawrence and Centre wards of the city.

An offer of 60 per cent. has been made to the creditors of the Williams, Greene, Rome Co., shirt manufacturers at Berlin, who have, as we stated last week, shown a nominal surplus of $41,000.——After being engaged making mattresses for about seven years in Hamilton, Herbert Gosnay makes an assignment, having liabilities of $2,600 and nominal assets of $1,500, which were mortgaged.——James Dick kept the "Patron" store in Caledon and Melancthon for about three years and then moved to Shelburne two years ago, where he put in a large stock. This was heavily insured, but unfortunately burned shortly afterward, and he claimed to have suffered a severe loss. Now he assigns with $20,000 liabilities. His assets are nominally $16,000.

Being unsuccessful in securing a compromise at 50 per cent., Galbraith & Co., proprietors of knitting mills at Guelph, have assigned.——Sole & Johnson, grocers, etc., in the same city, have arranged with lenient creditors to have 60 per cent. written off their liabilities.——Seven years ago Bunyan & Flannery started a general store at North Bay on a capital of $1,000, and succeeded in securing an active and large trade, but unfortunately mostly on credit. Owing to having too much outstanding, they now find themselves unable to meet their bills; consequently an assignment is in order. They owe $16,000, and have assets to a similar amount.——For some time past Thos. Donkin & Co., harness makers at Shelburne, have been struggling to make ends meet. Failing to do so the sheriff has taken possession of the premises.

The Cuban Cigar Company, of Montreal, being an ordinary business partnership, which began about a year ago on a limited capital, has been compelled to suspend. Accommodation paper is said to have a good deal to do with their troubles. Liabilities are $12,486.——A demand of assignment has been made upon N. H. Thibault & Co., lumber dealers, Montreal. The firm was formerly Bourgouin & Thibault, which firm became embarrassed several years ago, and the business has latterly been carried on under the above style, with Mrs. T. as the registered proprietress.——Mrs. L. H. Compain, carrying on a restaurant business in Montreal, formerly run by her late husband, is embarrassed financially, and has called a meeting of creditors.——Pierre Lemieux, a hotel keeper of the same city, has been asked to assign. His liabilities are $5,262, part of which is said to be accommodation paper.

INCORPORATION is being sought for the Northwest Shoe Company, with headquarters at Montreal. The capital is to be $40,000.

ALEXANDER MENZIES, for the last ten years in the drug business at Arnprior, Ont., has assigned. He has been devoting most of his attention to an electric light plant to the neglect of his regular business.——A. Branchaud, of Cornwall, a dealer in bankrupt stocks of dry goods, etc., is reported assigned. He was formerly a barber.

ABOUT eighteen months ago, A. Descary began business in Montreal as a retailer and jobber in cigars and tobaccos. He has been attempting more than his means would warrant, and is now seeking an extension of time.——T. L. Clark, Montreal, a manufacturer of sleighbells, and other nickel-plated goods, has assigned on demand, and his creditors meet on Sept. 5th. Liabilities are put at $28,729. Mr. Clark has had the name among his competitors of being a considerable cutter of prices.

A. PAUL, quite a prominent general dealer at Sudbury, Algoma District, finds himself "in a hole" financially, and is endeavoring to arrange a compromise at 50 cents, cash. Trade in the town has been poor for some time, and being a liberal buyer Mr. Paul is much over-loaded with stock. He owes about $14,000, partly secured, a Hamilton firm having a bill of sale for a considsrable amount. He nominally shows a fair surplus, but after a close valuation of stock and book accounts, liabilities and assets figure out about even.

AT one time Robert Lockhart was in comfortable circumstances. He had begun about a quarter of a century ago wagon making in Walkerton, and thrived thereat. But of late years keen outside competition has gradually brought about his insolvency.——An assignment has been made by C. J. McCrae, general storekeeper at Stayner, who failed to arrange a compromise as he expected.——Mary A. Pettman started a small grocery at Wiarton in 1892, but now finds that she has lost the money she invested therein and therefore assigns.——An assignment has also been made by S. Jarvis, whom we noted in financial difficulties a week ago.——The bailiff is in possession of the premises of Farquhar & York, stone contractors in this city. The latter compromised a couple of years ago at 50 per cent.

A LETTER to this journal from Neepawa, Manitoba, dated 27th inst., says: "Harvesting is well over. Threshing will commence this week, and all kinds of grain will turn out fine. We are having beautiful harvest weather, and, so far, without frost. Should prices for grain be good this fall, everything will be on the look up."

A PAPER hanger and house decorator in Hamilton, J. C. Campbell, trading under the style of J. C. Campbell & Co., has assigned to F. H. Lamb, accountant and trustee, of that city. The liabilities are some $8,500. Assets cannot be determined until stock is taken.

THE Quebec firm of Bilodeau, Lamontagne & Co., curriers, who last May arranged a compromise at 25 per cent. on liabilities of about $30,000, are again in trouble, and have assigned. Present liabilities are about $8,000.——Clement & Co., also of Quebec, and in the same line of business, whose case we referred to last week, have succeeded in effecting a settlement at 40 cents, at two and four months, secured.

THE SITUATION.

Mutual benefit will result from lowering of the tariffs of Canada and the United States, narrow though the cut is on either side. There is a rough reciprocity in what has been done, and it is all the better for being spontaneous. In lowering its tariff, the United States had its own interests only in view: incidentally Canada may feel the benefit. In the same way good will come to the United States from similar action by our legislature. Which country will benefit most it is impossible to tell with precision; but that country which has done the most to remove the shackles from trade will not reap the least benefit. On the whole, it is reasonable to expect that a new impulse will be given to trade by mutual lowering of the barriers which stood in its way. Lumber will go into the Republic more freely: in the greater trade, rather than in the increased price, Canada will benefit. The reduction in the duty on barley will increase the area of barley production in Canada. There can be no good reason why the United States cannot produce barley as cheaply as Canada, unless it be that its soil may have reached a greater degree of exhaustion; but there is something in the quality of the soil most suitable for the growth of barley, which that country has so far been unable to command. An increased demand for our horses and sheep will spring up. The smaller products of the farm will also pass over the border more freely. The Republic may take a larger quantity of potatoes from Canada and less from Europe than in recent years. Apples, for the growth of which this country is peculiarly suited, may be expected to pass the frontier in increased quantities. Eggs will be in better demand for the American market.

Neither in Canada nor the United States does the recent tariff legislation stay the hand of the tariff reformer. President Cleveland refused to sign the tariff bill, though strongly urged to do so by leading Democrats. Though he would not break with his party by vetoing the bill, he would not give it the sanction of his signature, but permitted it to become law by his refusal either to sign or use the veto power. In a letter to a friend intended for publication, he complains of the treachery of some who have worn the livery of Democrats in which to serve the cause of what he describes as Republican protection, and he plainly intimates that their conduct is a peril to American institutions. This is apparently a hint at the methods by which the trusts and monopolies, of which he complains, won the day. His letter is a Democratic manifesto in favor of further tariff reform. In dwelling on the necessity of free raw material, as the essential basis of tariff reform, he will do much to make this idea familiar to the nation. What effect his letter will have on those Democrats whom he charges with party treason, except to make them angry, he has probably learned by this time. Further tariff reform, in the Republic, depends upon the Democratic party; but that party is not a unit on the question; for different reasons some of the members are opposed to any decrease of the tariff. If the Democrats are to do anything really effective in the way of tariff reform, they must increase their legislative strength in the next elections.

In Canada, M. Laurier, equally with President Cleveland, put forward a programme in favor of additional tariff reform. He is just as little satisfied with the bill passed at Ottawa as Mr. Cleveland is with that which has become law at Washington. Both look forward to future conquests in the same line. The Ottawa bill was not the work of the avowed Free Traders, but of the Protectionist Government, which receded a little from the position previously taken, declaring that the time for somewhat relaxing the protectionist policy had come. The Ottawa bill was only indirectly a triumph for the party which favors free trade. The credit of the measure, whatever it may be, belongs to the other party, whose reluctant assent to some reductions was enforced. M. Laurier is loud in declaring that as between the two, he is for the farmer and against the manufacturer. So that, if he should succeed in obtaining power, he will entirely reverse the policy of the present Government. In his strong advocacy of reciprocity, he is in some need of being reminded that reciprocity is not free trade, and is not a thing which one of the two countries, which must both agree to it before it can go into effect, could of itself command. Formal reciprocity, such as M. Laurier speaks of, depends upon the possibility of making an international bargain. At present, free trade, and not reciprocity, is the policy of the ruling party at Washington. M. Laurier, many think, would do better to advocate tariff reform, which he will be able to command whenever he becomes Premier. At present he is in some danger of departing from the convention programme of his party, which appeared to be designed to get it out of the slough of an improbable reciprocity. There is good reason for doubting the policy of those bids for reciprocity support that take the form of a declaration that the speaker is prepared to make a treaty in which the Canadian manufacturer will be left to take care of himself. The making of a treaty requires the command of diplomatic ability; and it is surely the worst of diplomacy to boast to the other side what large concessions you are prepared to make.

Since the meeting of the Intercolonial Convention, Canada has acquired an interest in Australian tariffs which she did not feel before. New South Wales is about to take a step which will deepen that interest in her action. We learn by the mouth of her Governor that she is about to abandon the policy of protection, though it is not quite clear what interpretation is to be put upon this statement. It is not, in the absence of a positive averment, to be assumed that her intention is entirely to abolish Customs duties. She is to resort to a land tax and an income tax, but it is extremely improbable that she is to depend entirely upon so narrow a source of revenue. It is more probable that she is to use these two taxes

to fill the gap of the deficit that will be created by a heavy reduction of the tariff. Nothing can be more clumsy or obstructive to trade than the taxation of a vast number of articles. The United States taxes no less than 12,000 different things. Between this number and the figure two there is a happy medium to be found somewhere: England has come nearest to it of any country. It will be a long time before Canada or the United States will be able to raise all their revenue from a dozen articles; and if New South Wales should be able to get along by two different taxes, she will do what no other country is doing.

THE MONETARY TIMES.

If the new dress which was donned last month in honor of our twenty-seventh birthday meets the approval of our readers, we are more than pleased. By the use of clear-faced type, and clear paper with a good surface, we aim to make THE MONETARY TIMES agreeable reading to the eyes, as well as otherwise satisfying.

Advertisers are pleased, as a rule, we believe, with the newer and neater forms of display type we now use. They are better suited to our narrow columns, at any rate, and capable of producing good effects.

The wider column adopted for editorial matter enables us to present more clearly the statistical matter with which we have so largely to deal. Comparisons and tables can be inserted now that were impossible before.

It is our intention to continue the series of portraits and sketches of Canadian bankers begun in 1892. Our readers have had portraits of the following gentlemen, well known in the financial world of Canada, in the following order :—

1—E. S. CLOUSTON, general manager of the Bank of Montreal.
2—B. E. WALKER, general manager Canadian Bank of Commerce.
3—GEO. HAGUE, general manager Merchants Bank of Canada.
4—JAMES STEVENSON, general manager Quebec Bank.
5—JAMES AUSTIN, president Dominion Bank.

In other respects the character of the journal as a weekly visitor of interest and value to the business man will be kept up. The present special issue of 52 pages is offered as an example of what our staff and a complete printing establishment can do in holiday times. So large a constituency as ours requires a great variety of reading matter and necessitates editorial dealing with many subjects. The endeavor will be continued to maintain the independent tone of THE MONETARY TIMES as a financial, commercial and insurance organ and a necessity to the storekeeper.

THE RETAIL STOREKEEPER..

The statement and enquiry that comes to us this week from "Earnest" is in some sort a reminder of the difficult conditions under which city retailers of the present day conduct business. It is undeniable that things have changed of late years. Modern conditions in cities compel, or at least favor, great warehouses with a vast variety of merchandise under one roof, as opposed to dozens or scores of small shops with varied contents scattered over the outlying parts of the city. "I do not like the new order of things," says one, and we can quite understand his attitude. "The change is ruining me," says a suburban merchant, and we sympathize with him in the altered relations which, through no fault of his, threaten to deprive him of his livelihood. But we do not see how individual merchants or individual sympathizers with them are going to combat, with any certainty of success, a general tendency which has manifested itself for some years past in various directions from the Civil Service stores in London to the great block stores of New York and Chicago. That a small suburban shop should compete successfully with these great ones seems hopeless. In a sense it is unlikely. But there are modest little shops in the outskirts of every big city in the world which manage to make a living for their proprietors, big shops or no big shops. And if a man who knows fabrics will buy closely, keep his stock fairly assorted, and exert himself to please his customers, there are sensible people enough around him to know when he offers fresh stock at good value. And even the glare of a modern warehouse will not prevent their buying good goods at reasonable prices.

But what about country retailers? we hear a reader ask. Well, country retailers are not entirely unaffected by the change that we have mentioned. A larger proportion than before of its customers is attracted by modern facilities of travel from the modest country store to the big city store. This means that if the country dealer would keep his customers he must make an effort. Sitting on his counter and cursing Eaton or Simpson or Watkins or Morgan or Carsley, will not help him. It is more than ever necessary that he shall be fitly armed for the fight. He must be able to buy for cash—he must be acquainted with styles and a judge of values—he must have his goods well displayed and his windows clean and well arranged—he must be civil, and so must his clerks—he must count it no trouble to show goods—and lastly he must be possessed of tact, patience, resolution, taste, self-control, and mild cheek, if he would be a successful country storekeeper. Human nature is an odd mixture, and a good deal of it is shown by the customers of a country store. While we do not say that every storekeeper must be an angel in order to succeed in his business, we do know that drafts are often made upon the angelic virtues of those who attempt the *role*.

THE MILLINERY OPENINGS.

Once again Toronto has passed through an invasion of milliners. They come in scores from every part of Ontario and the neighboring provinces; and opinions agree that the fall openings of 1894 were even better attended than those of a year ago. There are not a few who for the past several weeks have been living in expectancy of the feast of art and beauty which was soon to be spread before their eyes, and it is safe to say their utmost expectations have been realized. No two tastes are exactly alike; even artists, whose faculties of judgment have reached the highest stage, differ in regard to comparative beauty. But all should be pleased this year, for variety is essentially the feature of the new millinery. In color, form, material and trimming there can be no complaint of sameness. Such being the case, a difficult task is made doubly difficult, and an attempt to give at once a concise and complete account of the autumn millinery can only result in failure.

Shapes of hats are almost endless in their variety. Plateaux may, perhaps, be singled out as worthy of first mention. Many new designs are shown, among which are lace effects stamped on Austrian felt, plain felt profusely dotted with sequins, plain felt lined with moire and plain felt with silk plush. The general tendency in walking hats is towards higher crowns and large straight brims. This style will, according to the predictions of some, eventually take the place of sailor shapes. These hats are displayed in plain felt material, with both hard and soft finish, and crowns of silk and satin. New designs are shown in dress shapes and the variety is greater than ever before. The colors are very effective, consisting as they do, for the most part, of browns and light effects. American shapes find a place in every display. The English felt is very attractive, and is an entirely new departure from the displays of pre-

vious seasons. There is the usual large assortment of white hats in plain French felt and beavers for children's wear.

It is not easy to single out one article and pronounce it a leader in the trimming of autumn shapes. Birds, feathers, flowers, fur goods, jetted effects, bows of ribbons, puffs of velvet, and a host of novelties, will all find a place on the headgear soon to make its appearance on our streets. Birds are much used, principally in trimming large hats, and although some colors are seen amongst them, black is the rule. The same may also be said of wings, and both are generally relieved by hoar-frost, spangles, or some jetted or tinselled effect. Feather aigrettes and pompons have been selling freely. Fur goods have met with favor, and late advices from Paris indicate that with the advent of colder weather even better things may be expected of them. Mounts, heads and tails are seen, while beaver, mink and sable are the furs principally used. These goods are rather expensive, and in consequence are used to trim only the higher priced hats. Jets were good last season, and promise equally well for the coming autumn. Feathers appear to be meeting with better favor than they have received for some years past. On large hats ostrich goods are sure of a prominent place. Flowers have done well, the violets, cowslips, lilacs, and lilies-of-the-valley of the spring and summer giving place to roses, dahlias and pæonies. Roses in velvet and silk evidently received most attention during the openings. The shades displayed in the flowers, as usual, show great diversity; probably the newest tints are: Bleuet, Pivoine, Pervenche, Mocha, and Eglantine.

Among the novelties of the season is a spun glass aigrette. This is a very taking effect; it lights up well and is shown in all shades. One house is reported to have cabled double repeat orders for this novelty, which is made in Bohemia. Ribbons were good last season and promise well for the approaching autumn; silk faille, moire and satin, and moire effects are among the leaders. Velvet ribbons are used in all widths from No. 5 to No. 50. The new ribbon tints are Pivoine, Eglantine, Thais, Ortoland, Argent, Pervenche, Moka and Nonnette. The staple shades of brown, myrtle, navy and reine retain much the relative position they held a year ago. Plain piece velvets are largely used, the tints being very similar to those in ribbons. On the whole velvets may be said to be as good sellers as they were last autumn, and doubtless as the season opens up they will continue to grow in favor. Velveteens have sold freely. Milleraine, a new production, which is said to be absolutely rain proof, will form an excellent trimming for every day hats and bonnets.

We do not purpose trying to describe the completed work of the milliner's art. There is such a diversity of trimmed hats, and so much looseness in the application of names, that confusion would be the inevitable result of such an attempt. But we cannot omit a reference to the "Halo" hat. This hat is perfectly round and with face trimming is worn back off the head; with wide chiffon ties in Pivoine shades the effect is picturesque and exceedingly pretty. The models displayed this week are both with and without bonnet strings. Ribbons in all widths are much used as ties, while ribbon velvets are also brought into service in this regard.

MUNICIPAL STATISTICS, ONTARIO.

Part vii. of the annual report of the Bureau of Industries is devoted to statistics of municipalities within the Province of Ontario, and relates to 1892 and previous years. The clerk of a municipality was the person applied to for figures as to assessment, taxes and population, and the treasurer for figures of receipts and expenditures, assets and liabilities. But great difficulty was experienced in some cases in obtaining the information desired, and the Bureau had to keep on writing letters, repeating and explaining what was wanted, until the officer furnished it. The secretary says it was the desire of the Bureau "to eradicate existing practices in finance not in accordance with the requirements of the statutes," and it is to be hoped some success has been reached. This letter-writing, it is added, "has been an educative power" and has evoked a quantity of data. Judging from the extracts given, pp. xvi. to xxi., from correspondence and the comments on returns furnished, the educative process was seriously needed. The action of the Bureau in probing discrepancies has proved annoying to some clerks in country places "who draw the line of duty at copying figures as they find them." It will have done a real service to such officials if through this probing they were made better aware of their duties. In fact it is a disturbing thing, and one that must excite caution and extra enquiry on the part of capitalists and dealers in debentures, to find ignorance and negligence shown by so many officials of Ontario municipalities as these extracts show.

The following table shows the total assessment in the Province for the twelve years, 1881-1892:

Year.	Townships.	Towns and Villages.	Cities	Total
1892	$452,065,658	$125,421,208	$247,724,261	$825,211,127
1891	454,070,364	123,902,115	240,874,915	818,847,394
1890	452,467,088	118,906,490	227,242,693	798,616,271
1889	450,977,220	109,808,381	201,120,215	761,905,816
1888	460,615,822	103,738,543	184,300,205	748,654,570
1887	456,170,163	96,705,063	164,436,712	717,311,938
1886	452,097,645	91,458,923	150,824,091	694,380,659
1885	446,712,364	89,319,929	145,225,499	681,257,792
1884	439,378,876	84,059,424	140,231,173	663,669,473
1883	426,640,326	79,397,438	133,457,635	639,495,399
1882	414,525,930	77,723,307	126,229,220	618,478,457
1881	407,589,270	74,240,215	120,771,755	602,601,240

It appears from the above that nearly 37 per cent. has been added to the assessed values of the municipalities from 1881 to 1892. From 1886 to 1892 the townships remained stationary, while a special impetus seems to have affected cities, towns and villages in the same period. In 1889 the personal property of townships was reduced by $28,154,121 owing to the law being changed, whereby farm live stock became exempt from taxation.

In 1892 in townships over 99 per cent. of the assessment was real estate; in towns and villages the average was 91 per cent., and in cities it was below 89 per cent.

An attempt was made to get at the value of exemptions, and returns were received from 122 municipalities as follows:—

Municipalities.	No.	Total assessment.	Value of exemptions
Townships	43	$43,489,575	$ 455,817
Towns	30	35,803,465	2,830,185
Villages	43	10,560,052	722,785
Cities	6	185,666,437	26,568,957
Total.....	122	$275,519,529	$30,577,744

These municipalities represent one-third of the total assessment of the province, and the exemptions form about one-ninth of the assessments in these 122 municipalities. Of the $30,577,744 above, the city of Toronto contributes 75 per cent.

The total amount of taxes imposed for all municipal and school purposes by Ontario townships, towns, villages and cities for twelve years past, is shown by a table. We copy a portion, giving round thousands:

Year.	Townships.	Towns & Villages.	Cities	Total Taxes.
1892.....	$4,599,000	$2,452,000	$4,757,000	$11,808,000
1890	4,573,000	2,232,000	4,192,000	10,897,000
1885	4,095,000	1,729,000	2,605,000	8,430,000
1881	3,694,000	1,336,000	2,144,602	7,175,000

The rate per head in the townships is shown to have increased from $3.26 in 1881 to $4.17 in 1892; that in towns and villages from $4.30 to $5.81; that in cities from $8.57 to $12.36. Taking the aggregate, it is shown that the

rate per head for the $7,175,000 of 1881 was $4.23 per head, while that for the $11,808,000 of 1892 had risen to $6.18. The taxation of townships rose 25 per cent. in the eleven years, town and villages 83 per cent., cities more than doubled.

It will prove interesting, in some cases racy, reading, if we copy a portion of the extracts made by the Bureau from replies to their letters. Granted that the great majority of the clerks and treasurers are prudent and competent men, the number of exceptions is by no means trifling:

NOTES AND COMMENTS FROM MUNICIPAL RETURNS.

"My salary as treasurer is only $25 and time is money."

"I cannot state the number of debentures or the amount of each."

"We were in a hurry with the rolls and looked only at the totals."

The disparity in assessment was due to the difference of opinion on the part of the assessors.

"I have gone over the assessor's figures and find that he has made an error in his calculations."

Payments of school debentures included with expenses to schools. Sinking funds were carried in general balance.

"I have no record of the Government drain debt on my books. The debt was contracted before I received the books."

". . . I cannot give them, as the assessor neglected to take them down, and the roll was accepted by the Council without them."

". . . We have no means of ascertaining exactly the amount of assessment for personalty and income for 1890, or any other year."

"I find it almost impossible to find the exact debenture debt of this town, owing to the way the debenture book has been kept in past years."

This municipality was organized in 1888, but no financial statement could be procured from its officials until November, 1893. (East Toronto.)

". . . I must admit that it was only last year that the treasurer was provided with a debenture book, and on that account mistakes were often made."

". . . I cannot furnish the information required, as none of the rolls are dated, added up, or a recapitulation sheet attached, nor are the rolls certified to."

". . . I find the assessor has made an error in the additions, and I find that the population of the township in 1894 is 4,890." (The original return was 3,830).

"I think these school debentures must have been included under some other head," was the response of treasurer, and then a detailed statement of auditors had to be secured.

"We would give you the amount of debt under each by-law and the amount paid on it, but to give the number of each debenture and amount paid on it would be a fearful endless job."

". . . I would say that in the wisdom of your Council in the year 1888 (it was) thought best to do away with the Clergy Reserve Fund, and use it to pay off our Credit Valley indebtedness. Hoping this will make the matter plain, etc."

"The Canada Company has nearly 18,000 acres in this township not settled, and until this year was always assessed as non-resident. This year they are requested to be assessed as resident. This accounts for the apparent discrepancy." (Bosanquet.)

"The item, Administration of Justice for 1891, if any, must be included in the 'Miscellaneous Expenditure.' The salary of our policeman is not included in 'Administration of Justice,' but is included in salaries, allowances, etc., as he is a street commissioner as well."

Regarding a discrepancy of $1,000 in temporary loan account, a treasurer says: "I know that the money was borrowed and the debt is paid. I must be $1,000 out of pocket."

". . . I regret that I am unable to give a satisfactory explanation of the errors that appear in loans. Since 1888 the reeve has been changed five times and the treasurer thrice, and each incoming set of officials appear to have misunderstood or mixed the statements of their predecessors. In one case I know that one of our citizens lent the municipality $400 or $600, held the note a year and transferred it to another resident who held it two years longer, and then presented it for payment to a Council that was not aware of its existence."

". . . It is four miles to the treasurer's office and fourteen miles to the bank; therefore I cannot obtain the information you ask for without going to a lot of trouble and expense. . . . We are behind in our Sinking Fund payments for the last two years; also some school sinking funds for the same years, 1891 and 1892."

LIFE ASSURANCE AND ATHLETICS.

Foot-ball is a popular game, and a rough one. It is long since the captain of the South of Scotland foot-ball team boasted, after a game at Glasgow wherein the Caledonians worsted their English opponents, that "The Englishers couldna stand oor tackety boots." That is, the heavier and iron-loaded boots of the Scotch players proved too damaging to the shins or knees of their opponents. This is brutality, if you like. The London *Lancet* recently recorded 109 cases in which injuries sufficient to necessitate hospital treatment happened in foot-ball games played in Great Britain last year. These include 11 deaths, 29 broken legs, and 20 broken collar bones.

But the roughness of the game is not confined to Great Britain. We find the Life Underwriters' Association, of Boston, Mass., gravely discussing the attitude that life underwriters should adopt towards foot-ball players. A New York doctor present at the gathering read a list of fatal and severe accidents resulting from the game in America during the past season. "As the game is played to-day," he said, "the attendance of a surgeon is as much of a necessity as in a duel. This fact ought to be fatal to the continuance of the sport as at present conducted." And he argued squarely against the acceptance of any foot-ball player as a life assurance risk. In opposition to the opinion of Dr. Wells, given above, the surgeon of the Harvard foot-ball eleven, Dr. Conant, of Cambridge, Massachusetts, declared that during his experience as surgeon in that capacity for four years, the only accidents had been from fracture of the hand, one fracture of the leg, one dislocation of the shoulder, one dislocation of the elbow, and sundry strains, which he apparently held was indicative of a very mild and gentlemanly game.

Apparently resenting the implied censure of the present day game as compared with that of former years, he said that Dr. Warren, of the Massachusetts General Hospital, who had been looking over some old papers concerning the mild game of football as played in the good old days on Memorial Hall site, found that the papers described the game even of that day as nothing less than a free fight. The discussion seems to have resulted in no conclusion, certainly in no united recommendation by the doctors. But if the playing of the game continues to result in such yearly lists of casualties such as were read at this meeting, the clubs will "make a record" that must have its effect on the conditions as well as the prices upon which football players will be able to secure life or accident assurance.

THE BRITISH CHAMBERS OF COMMERCE.

The autumn gathering of the associated Chambers of Commerce in the United Kingdom is announced to take place in Huddersfield, on Tuesday and Wednesday, the 11th and 12th September, Sir Albert Rollit, M. P., the president, in the chair. The subjects to be submitted for discussion are numerous and varied. We find 32 different resolutions for proposal set forth in the August issue of the *Chamber of Commerce Journal*. Trade with Spain is hampered, it appears, by the imposition in that country of duties on British goods twice as heavy as were agreed upon by the treaty of 1886, and Government is to be asked to intervene. The Premier having stated that the Government will not oppose a committee to consider weights and measures, the Leeds chamber asks for such a body. Also, in the interest of foreign trade, the adoption of the metric numbering of yarns so largely in use on the continent of Europe is proposed by the Leicester chamber. The practice of "commercial gambling"—that is, the practice of selling produce by parties when they neither hold it nor have contracted for it—in the opinion of the Heckmondwike merchants, injures trade, and ought to be made illegal and attended with penal consequences.

There are several recommendations, by different boards, for the amendment of British parliamentary procedure in such wise that needed commercial measures may no longer be neglected or delayed in the House of Commons. Two boards concur in urging upon Government the pushing on of India railways, and the proper representation of Britain at the Paris Exposition of 1900 is to be discussed. Railway companies and their passengers, canals controlled by railways, a graduated scale for assessment and income tax, the amendment of the law respecting joint stock companies,

their promotion, formation and audit, are subjects to be debated. A resolution from Birmingham, of all places, will pronounce the "immigration of pauper aliens into this country most detrimental to the welfare of the British artisan," and several reasons are given. Hearty approval is expressed by Newcastle and Gateshead of the views adopted by the Ottawa conference with respect to "Inter-Imperial" postal and telegraph routes, while Wakefield deems it unfair to the public to treat the telegraph department of the post-office as a separate concern, because it stands in the way of needed reforms. London chamber again urges legislation, which last session failed to secure, as to boards of conciliation in matters of strikes, and Huddersfield demands the rating-of-machinery bill passed.

A number of resolutions to be proposed relate to matters connected with navigation. One from Hull will ask that bills of lading shall be amended so as to prevent fraud in signing. Wolverhampton wishes ship owners to be made liable for loss or damage arising from negligence, fault, or failure in proper loading, stowage, custody, care in transport, or proper delivery of any merchandise committed to their care; and would by law forbid any common carrier to insert in any bill of lading or shipping document any clause, covenant, or agreement, whereby such carrier shall be relieved from liability. Halifax wants the trade marks law consolidated, and London would like further legislation *re* merchandise marks. On the subject of timber measurement the Hull chamber considers it desirable that an authoritative standard of measurement of foreign imported balk timber be established for all purposes, and would have the measuring authority mark the ship's initials, the number and the contents, upon each piece in the most unmistakable characters. What we have outlined above will fill the time of the Associated Chambers pretty well for two days.

WINNIPEG ASSESSMENT, ETC.

At the regular fortnightly meeting of the Winnipeg city council, held last week, a by-law was passed fixing the general rate of taxation for the year at 15.50 mills and the school rate at 4.10 mills, making a total of 19.60 mills on the dollar. The estimates for 1894-5 were submitted, and may be summarized as under:—

	1893-4		1894-5.
	Estimated.	Expended.	Estimated.
Finance committee..	$301,920 54	$303,858 00	$297,954 74
Works and property committee	$42,073 90	42,243 61	40,260 00
Fire, water and light committee	55,094 10	55,252 19	55,534 55
Market, license and health committee	29,735 00	39,478 27	28,855 00
Police commissioners.....	21,200 00	21,701 26	21,830 00
Public parks board.....	10,000 00	10,000 00	11,000 00
Net debt appropriation balances	7,589 90		
Totals $4,676,131 44	$472,533 33		$475,267 84

Deduct from the last sum, estimated miscellaneous revenue, 1894-1895, $44,953, and there remains to be levied by taxation, $430,314.84. The rateable assessments 1894 are $22,001,330, at 19.60 mills on the dollar, will yield $431,226.06, which is $911.22 in excess of requirements. The large items are, for this year, interest on debentures, $139,750; public schools, $90,000; street maintenance and repairs, $21,000; street lighting, $20,200; fire department, $31,864; police, $21,830; scavenging and cremation, $17,000.

The assessment last year amounted to $21,693,300, which was $308,030 less than that of the present year. Ald. Carruthers explained that when the old scavenger contract came to an end the city was in a very filthy condition, and expenditure in this direction had to be incurred, but, as the result of the steps taken, the city is to-day one of the healthiest in the Dominion. The alderman reviewed the various items of income in which there had been a falling off. He also urged that with respect to higher education the expense of providing it should be borne by the parents whose children enjoy such instruction, the most of whom could afford to pay.

Of the estimated receipts from licenses, rents, etc., in 1893-4, which were $43,041, only $37,661 was realized. The present fiscal year's estimated receipts from these sources consist of $7,750 from hotel and restaurant licenses; tobacco and wholesale liquor, $3,300 cabs and trucks, $2,450, dogs and horses, $1,800 market fees, $2,000 police court fines, $2,000; interest on taxes in arrears, $14,000; auctioneers, transient traders, pawnbrokers and hawkers, $1,350; health, dairy and milk inspection, $1,000. These and other items bring the total up to $44,953 estimated.

HALIFAX TERMINAL FACILITIES.

—A meeting of the Halifax Board of Trade was held last week, at which the chief engineer of the Intercolonial Railway submitted the plans covering the recent land expropriated on Upper Water street and showing the location of the proposed freight shed, wharves, &c. It was the general opinion of those present, some twenty prominent merchants, that the proposed new freight shed would be insufficient for the local freight of Halifax. To the suggestion that several of the wharves located on the plan should be done away with and replaced by an additional shed, Mr. Archibald, the engineer, replied that the purchase of the property by the Government was to afford accommodation to those doing both shipping and railway business. Mr. Dwyer criticised the opposition offered by the mayor and members of the city council to the proposed extension of the railway along the water front to the Ordnance wharf or some other point down town. He declared that the council's scheme to expropriate the block from North to Cornwallis street was condemned by every engineer he had spoken to about it. All the engineers emphatically stated that the harbor front extension was by far the best and in the interest of the city. After some further discussion, a committee to confer with Engineer Archibald was appointed, consisting of Michael Dwyer, A. E. Jones, George E. Francklyn and President Troop. The committee were empowered to make such suggestions as they deemed proper, and report to the board at its next meeting.

POTATOES.

Present prospects are decidedly in favor of higher prices for potatoes. In western Ontario heavy June rains and a severe August drought have had a decidedly adverse effect upon the growing crop of the vegetable. Those now engaged in ploughing or digging report it to be a difficult operation, as in the clay districts the ground is baked as hard as a rock. From the northern part of Ontario unfavorable reports are also received. In the central and eastern parts of the province the growing crop has been doing better, although even here there is room for improvement. In the Eastern Townships of Quebec, there are general fears of rot, and the Early Rose has already suffered to a considerable extent. These unfavorable reports are all the more unsatisfactory since United States Government reports as to the potato crop in the States are of a similar character. Although the acreage in the United States under potatoes has increased from 2,605,000 acres in 1893 to 2,620,000 acres in the present season, the estimated total yield is placed only at 147,000,000 bushels, a material decrease from last year's yield, which amounted to 183,000,000 bushels. Canada last year sent a large quantity of potatoes to the United States, the exports having gone principally from the Maritime Provinces. This year Nova Scotia and New Brunswick promise less than an average yield, while the crop of Prince Edward Island, although in fairly good condition, will not be excessive.

THE CONSUMPTION OF BEER.

There is something about good beer that suits the Anglo-Saxon appetite and physique and will prevent it from being easily superseded by any other beverage. The Germans are the greatest beer drinkers, and after them the people of the British Islands, while Americans come third. The quantity of beer the world consumes, according to statistics compiled in Vienna of the quantity drank in 1893, not including Asia and Africa, is 4,500,000,000 gallons, requiring for the manufacture 7,270,000 tons of malt and 82,000 tons of hops.

In the consumption of this great aggregate Germany heads with 1,202,132,072 gallons, an increase of 34,000,000 over 1892, the consumption being 33 gallons per head, ranging in different provinces from 62 gallons in Bavaria to 12 gallons in Lothringen; Great Britain is second, with 1,165,757,000 gallons, or 30 gallons per head. It appears from the statistics that Canada must be included with the United States, under the heading of America, which, including the whole of the western hemisphere, is third in the list of beer-drinkers, with more than a billion gallons, or 16 gallons per head.

—All managers of warehouses should pack their goods in such a manner as to provide proper access in case of fire. Every avenue should not be blocked up. And here we would say it would be well to build up such storehouses in sections with solid fireproof partitions extending from the cellar to the roof. Such partitions should have fireproof doors.—*U.S. Review*

AN UNWELCOME CLIMB.

The disastrous storm of wind and sleet last winter, which dismembered so many Toronto trees and wrecked so many wires, reminds me of another occasion in winter when I had to locate a break during a howling snow-storm, or rather that dreaded thing to wire-builders, a sleet storm, for the temperature was barely freezing, but the moisture, though too wet to form crystals, and too cold to fall in drops, was most chillingly and penetratingly wet. My companion and assistant was a somewhat dry Scotchman. To beguile the drive I called his attention to the beauty of the glittering twigs and sprays of the trees between us and the sky, where

> Every pine and fir and hemlock
> Wore ermine too dear for an earl,
> And the poorest twig on the elm tree
> Was ridged inch deep with pearl.

But he was oblivious to the alleged beauty. For when the encrusting ice and snow were shaken down upon us from the overhanging trees by the wind in the branches, he would say: "Man, ye'r pearl, as ye ca't, 's cauld as charity. A wad far suner see't in a picter as be oo't here in this infernal win', wi' sic *pearls* as thir drapping doon the nape o' ye'r neck. Can we no get intil a hoose? I wadna pit oot a collie dog in sic a blatter o' weather's this." The fact was, he wanted a glass of grog. But I could admit no approval of "the nappy," for in those days a lot of the budding youths of the neighborhood were members of the Cadets of Temperance, and I was one of that body of youthful reformers. And how full we were of "Love, Purity, Fidelity" and self esteem; how mysterious and important with our password and ritual, which we had pledged "our sacred honor" never to reveal!

But I am leaving my Scotchman too long in the wet. We reached the "break" at last, if it may be called a break where the wire was not broken, but, owing to the sagging of an adjoining pole and the weight of the sleet upon the wire, had got "crotched" in a tree. It was necessary to get the wire out of the crotch and to insulate it upon a side block, the said side block having first to be nailed, or in some way fastened to the bough twenty feet in the air. Having considered the situation, I told Davie to go aloft. But he demurred, expostulated in this wise:

"Od, man, yon's a fearsome hicht, and I'm no a Jacky Tar. Fac', I'm terrible stiff. Can ye no gang up yersel'—ye've younger feet and hauns nor me. Come away, I'll gie ye a heeze up."

The truth was, I was as much afraid of the slippery job as he, having had a fall from a tree not long before, and I insisted that as he had been hired for such work as there was to do, he need not expect his pay if he refused. This proved a potent argument, and with a grim look he began to climb the tree, carrying the side block, his hammer and a little saw strung around his waist, and having some spikes in his pocket. With many a 'pech' and an occasional muttered curse, he reached the spot and succeeded in fastening the block. Putting on the glass cap, he proceeded to raise the wire to its place. But as this required some exertion he over-reached himself, slipped, and to my horror, fell, with a curious cry, into the snow at my feet, his fall being happily broken by his clutching at some intermediate branches, which, however, would not sustain him. The snow was deep enough to preserve him from injury, but he was decidedly shaken up and a thoroughly angry man. Luckily he had thrown down beforehand his saw and other implements, for had these been round his waist when he fell the consequences might have been serious. When satisfied that no bones were broken, he vented his opinion freely to the winds and the trees and to myself as to the "pairfit damn nonsense" of the whole proceeding. Concerned tho' I was for Davie, the fact stared us in the face that our work was but half done, inasmuch as the wire was not insulated. Venturing to mention this aspect of the case, I hinted at his mounting the tree a second time. The blast of North-British fervor that came from his lips at this was appalling. Divested of profanity in some degree, it was something like this:

"What! gang up there again! No me. Div ye think I'm siccan a bleezin idiot? I'll no gang for man or mortal. Mebbe ye wad like tae tak' me hame a corp. See here!" and he held up his left hand, bleeding from a scratch of the branch at which he had clutched. "And dae ye see this?" as he angrily produced the broken fragments of his pipe. "Dog on't, man' but I wonder at ye. Na! na."

I had to climb that tree myself, after all, and did it with my boots off, so slippery was the job. Thankful was I to get down with a whole skin, having fastened the wire to the pin. And I made no objection to Davie's restoring exhausted nature with a drink of John Barleycorn on the road home. As the loss of his pipe seemed to trouble him most, I bought him a new one and paid him besides a trifle extra to soothe his wounded feelings after this exciting experience. ALEX.

DADDY MORGAN'S SCIENCE.

"Whah yo' gwine so fast, folks?" enquired old Daddy Morgan as he saw a pair of us drive thro ugh the colored settlement of New Canaan on an inspecting tour. He was told by the other fellow that our errand would take us to Kingsville.

"Jim and I are building telegraphs, Daddy, and we are in a hurry."

"Why, law sakes! if 'taint young Mr. Minsley," exclaimed the old coon, indicating me as he peered at us with a grin. These old folks often called me by my grandfather's family name, Menzies, which in their mouths became 'Minsley.'

"Howdy, howdy; I een't seen you, sah, fur mos' nigh a yeah. How's all youah folks; how's the ole lady? Gosh a mighty! I's jest clar 'shamed dat I een't nevah paid yo' brothathat fo' dollars he done lont me. He's a right kin' man, sah; yas, sah. Don't you make any mistake, but I'm a comin', sah, O yes, sah."

Morgan was a smiling, superstitious darkey, with a stiff leg, from having been shot in the knee while escaping from his master "befo' de wah." He was a handy-fingered, happy-hearted contraband, as black and shiny as anthracite coal, and with an appetite that was phenomenal. Having "experienced religion" some time before, he was full of rude doggerel of the pious sort, and when seated by the yard fire, turning a coffee-roaster for my brother, he used to give forth these Heaven-assaulting ditties till the Lake Erie sailors would come up from the wharves to look at the old enthusiast who, with head thrown back and eyes closed, was warbling glory to saints and confusion to sinners.

He had left the town, to do some farming as best he knew how a few miles in the country, and it was on the borders of his fraction of a farm we found him.

Then, turning to my companion, he made an urgent appeal in this wise: "Look a heah, boss, een't yo' got no place fur old darkies on yo' line-building kin' o' business? I tell you fur a fact dat I'm powerful anxious to make a dollah er two." He was told that young and active men were needed and that those who had some knowledge of the work were preferred. That it was a scientific job and so on, and so on.

"Huh! Want to tell you, folks, dat I'm jest one of the knowledgable kin'. My mastah done had a heap o' science ovah yandah in his cotton fields business, and he had this chile mos' powerful sciencefied on owah plantation. Ol' Morgan wa'n't no slouch. An' I ain't skeered o' lightnin' nbhow. Look a heah, now, Mistah Boss an' young mastah, I'se jist yearnin' fur ta arn a dollah er two. Mebbe I kain't climb poles, sence I got this yeah cussed Kaintuck bullet in my laig, but thah's a heap o' liftin' in these ole arms o' mine. An' I kin sing to lift yo' soul, an' singin' lightens the work. Hearken, honey—" And the old African burst forth into a plantation melody as a sample of his quality. But we did not hire Morgan, thinking that neither his science nor his music would be economical in line-building. J. H.

"HOW POUSTIE LAID THE CABLE."

"If ever you print these reminiscences of the Telegraph in Canada in book form," so wrote not long ago a member of the Guild, an old resident of Montreal, who loves to dwell upon the earlier days of the art, "I hope you will work in some more of the stories that William Cassils used to tell so well of adventures at Richmond, at Quebec, at Bout de l'Isle, and other places on the St. Lawrence." The suggestion is a good one, and a friend in Montreal helps us to its adoption.

The late Mr. Cassils had to do with the construction and maintenance of telegraph wires at a time when the business was small, when means were crude, when the appliances of the art were unscientific, measured by those of to-day. He had to do with both employes and customers who were ill educated or superstitious, as well as democratic to the last degree. Comparing notes with him once as to the spanning of streams large and small by single electric wires, before the use of cables, he told of the great stretches of iron wire used for crossing the St. Lawrence and the Ottawa, the Richelieu and the Chaudiere, in the old days. Learning that copper wire strung from masts had been used for telegraphically spanning Niagara, copper being the material used in 1850 from Hamilton to Clifton, Mr. Cassils said that before the Victoria Bridge was built at Montreal the wires to the south were carried over the great river at Lachine Rapids on masts 150 feet in height, in two crossings of between 3,000 and 4,000 feet each. The crossing of the Ottawa was effected at Bout de l'Isle by stringing wires from masts 130 feet high, in two stretches, one 800 and one 600 feet. At St. Helen's Island again, in front of Montreal, the masts were higher still. Many a time were these wires brought down by wind or sleet, and difficult as it was, especially at the Lachine crossing, to re-

store this great stretch of wire in summer, it was far more painful and dangerous in winter. Mr. Cassils thus related an incident in connection with the Lachine crossing, namely, the running of the Lachine Rapids by a party of repairers in the winter of 1851:

"I have told you of Mike Connors, who lived close to the rapids, and whose reckless boldness and contempt of danger—especially when he had had several stiff horns on board—made him in request when the company wanted an awkward job put through. Mike had a gang of men under him whom the villagers used to style 'the Forty Thieves,' and he could usually lead or curse or drive these men anywhere that human dare-devils could be got to go. A batteau was kept by the company at the shore of the rapids. And this was to be used one wintry day by Mr. James Poustie, an anxious superintendent, and a party of repairers, to make a connection of the broken wire across the swift and savage river at Lachine. A reel of wire, implements, pike poles, oars were all put into the craft for the risky voyage. Thick ice covered the shores, and extended out to the rapid water.

"Mr. Poustie, with Mike Connors and his gang, had hauled the batteau over the ice to a suitable point, where she was launched into the rapids. The line from one of the masts on shore having been joined to the reel of wire on board the batteau, it was intended to take the boat across the current at a certain angle, men being at the reel to give out or take in slack, as might be necessary. The oars were fully manned, and what was thought to be a steady hand was at the helm. The perilous journey was begun, the boat tossed and veered and struggled in the plunging waters, but the batteau quickly got into a whirlpool, and began to spin around as if on a pivot, the wire meantime twisting and tightening. Walls of water hissed and foamed on either side of this narrow pool, and it seemed as if the craft would be engulfed. Now, it was evident that so soon as the wire got low enough to get caught in those rushing walls of water, the boat must capsize. Connors had at first called out that the pool would soon fill and the whirling of the boat cease. The situation became every moment more alarming; the steersman, thinking all was lost, abandoned his post and fell on his knees in prayer. Connors, seeing this, cut the wire with nippers, thus freeing the boat. Hastily grabbing the steersman's paddle, he loudly cursed the delinquent, telling him that if he had not already settled his account with Heaven or the other place, it was now too late to do so! Stout muscles and practiced eyes soon released the boat from the frightful maelstrom and the boat shot like an arrow down the stream. The party got to shore at the foot of the rapids. The pool soon filled, as Connors had predicted, and the batteau was navigated, with a boldness born of danger, down these famous rapids to a place of safety, Later in the day a second attempt was made to join the wires, which proved successful." McK.

EARLY TELEGRAPHY IN THE WEST.

REMINISCENCES OF AN OLD TIMER—SOME OF THE DIFFICULTIES OF TELEGRAPHING IN ITS INFANT DAYS—CHICAGO IN THE 50'S - EZRA CORNELL.

"His life was gentle, and the elements
So mixed in him that Nature might stand up
And say to all the world: This is a man."

There are probably very few people in Canada who have not heard of Ezra Cornell, the founder of Cornell University at Ithaca, New York. Of this seat of learning, indeed, it was said the other day, by a writer to the Toronto *Mail*, that it had more Canadian students than any foreign institution in the world. Sixty-five years ago, Mr. Cornell, who was then 21 years of age, started out from his home in Westchester Landing, N.Y., to seek his fortune, and after a walk of forty miles arrived at Ithaca. He was a carpenter by trade, but had neither friends nor acquaintances in the village, and when he arrived there, we are told that his worldly possessions were all in a little bundle on the end of a stick which served for staff and baggage wagon. The Hon. Chauncey M. Depew, in an address at the Quarter Centennial celebration of the opening of Cornell University, in October last, paid an eloquent tribute to the memory and character of this remarkable man. Mr. Depew said: "As a carpenter, Mr. Cornell improved the methods of his village master; as a mechanic, he devised machines which overcame unexpected difficulties; as an unprejudiced practical man, he became familiar with the uses of electricity, while the Professor was still lecturing upon its dangers." Continuing, Mr. Depew said, "About this time, 1844, Professor Morse discovered the telegraph. He needed an undaunted and indomitable man of affairs to demonstrate to capitalists its possibilities and to the public its beneficence, and he found him in Ezra Cornell." J. D. Reid, in his work on "The Telegraph in America," has this to say of Mr. Cornell: "In after years, when the telegraph had made him rich, recollecting the struggle of his boyhood, through which he had to pass without the aids to learning which give tools to brain, Mr. Cornell gave half a million dollars to secure for his native State a grand institution where instruction in any study, to any person, could be given. He also presented 200 acres of land as a site therefor. Gifts to a large extent followed these munificent offerings to education. Thus nobly did this man, without early culture, and out of the refinement of an honest purpose and manly understanding, make his life coronal and his name immortal."

It may not be generally known that Ezra Cornell, associated with Prof. Morse, in 1844, built the first telegraph line erected on this continent. The line extended from Washington to Baltimore, and the Washington Government voted a subsidy of $30,000 to aid in its construction, and "in a series of experiments to test the expediency of the telegraph projected by Prof. Morse." On the completion of this line it was for a time used to experiment with. O. S. Wood, the well-known superintendent of the old Montreal Telegraph Company, under whose distinguished management that company became one of the most useful and prosperous telegraphic organizations in the country, was Prof. Morse's first student, and entered the Washington office in 1844. In November of that year Mr. Wood, at Washington, created a great sensation by receiving from Baltimore the result of the Presidential elections in the Northern and Eastern States; and he spent the winter of 1844-5 in exhibiting the working of the telegraph to members of Congress and diplomatic representatives and to visitors attracted thither from all parts of the globe. On April 1st, 1845, the line was opened between Washington and Baltimore for public business

Upon the organization of the Montreal Telegraph Company in 1847, Mr. Wood, whose reputation as a skilful electrician and able administrator had already reached Canada, was communicated with and invited to become its superintendent. About the same time H. P Dwight, and later James Dakers, entered the company's service. The writer of these lines sent his first message from Toronto to Mr. Wood at Montreal, in 1850, and was encouragingly told by that gentleman that "for a first attempt he did very well, and to try again some other day when the line was not busy." But it is not my mission to write a history of the telegraph in the United States or Canada. What I propose doing is simply to put on record a few old-time reminiscences in connection with telegraphy in the Western States, and to say a few words in kindly remembrance of Ezra Cornell, by whom I was employed.

I removed from Toronto to Chicago in April, 1853, being then a pretty fair telegraph operator, and carrying in my pocket a first rate recommendation from Manager Dwight, who had come from Montreal to Toronto in 1849, and with whom I learned the business. On arriving in Chicago I applied at the telegraph office for a situation. As good fortune would have it, I was presented to Mr. Cornell. That gentleman was busy with some other matters just then, but he took time to read my testimonials, and, giving me the number of his room at the Tremont House, requested me to call there at 3 o'clock that afternoon. I was promptly on hand at the time indicated, and found the old gentleman—he was then only 46 years of age, but the worries and anxieties of an unusually busy life had deepened the lines in his smoothly shaven face and made him look older—sitting at the window looking over a book. He again read my recommendation papers, and requested me to give him a specimen of my handwriting. I did so, and it seemed to satisfy him. He then commenced a pleasant talk about telegraphic matters, making particular enquiries regarding the business in Canada; how the lines worked; the number of messages sent daily; the length of the circuits, &c., &c. He thought I was a very young man to start out as an operator—I was then 14 years of age—and, after telling me that operators in the western country were expected to go out and make repairs when the lines were down, quizzed me as to what I would do supposing I were on top of a pole mending the wire and should lose my grip and fall to the ground. This was a poser, but I said something to the effect that if the fall did not entirely disable me, I would make an attempt to resume operations on top of that pole at once. This seemed to please him, and he smiled approval. His further enquiries were as to my ability to spell common, as well as uncommon, words; how fast I could copy by sound; whether I could copy with pen and ink as rapidly as with a pencil, and many other simple, but, perhaps, considering the importance of the engagement, pertinent questions. Of course he did not put my accomplishments as regards spelling to the test, but had he done so I was prepared to give a good account of myself, for I believed, at that time, if I could do anything well, it was to spell all sorts of words in common use correctly. A little incident which took place in Toronto office had a stimulating effect upon me in this respect and served to urge me on to conquer the biggest and toughest words extant. The entry clerk at Toronto—it was not Jim Poustie—in addressing, on a certain occasion, envelopes in which were to be enclosed messages for delivery, had one for Charlie Gates, the keeper of a race course on King street, east of the Don River. This he addressed "Charlie Gates, Race Corse." Manager Dwight, on looking over the messages before the messenger left the office, to see that all was right, discovered this grave blunder, and the lecture he gave that unsophisticated clerk on bad spelling was

"a teaser." He explained that there were three or four words pronounced almost alike, but each with a different meaning, viz.: course, coarse, corse, and curse. Corse, he said, meant a dead body. What would Charlie Gates have said had he received an envelope with an inscription on it so suggestive of gloom and agony and his latter end? He informed the now frightened clerk that the proper way to address the message was "Race Course:" Mr. Dwight's language was neither coarse language, nor curse language, nor corse (dead) language, but it was language lively, refined, and effective. He wound up by recommending to the bucolic young man a course of Lindley Murray, telling him that unless he mended his ways he need never aspire to become a useful member of society or to take a prize at a spelling bee. The poor fellow, whose skin was of the pachydermatous order, soon got over his word-castigation, but as I listened to it all I vowed never to lay myself open to such an overhauling. I was, therefore, pretty well up in spelling.

But to return to Mr. Cornell. Coming down to business, that gentleman enquired how much salary I had been receiving at Toronto. I replied, $20 per month. (This was then considered liberal payment for a youth of 14.) After cogitating a short time, Mr. Cornell said he thought he could improve upon that and would give me $21 per month! This certainly was not what might be called a munificent increase, but it was, as Mr. Cornell remarked, an improvement, though a slight one, upon the remuneration I had been receiving in Canada, and I arranged to go to work next day. After being employed at general clerical work in Chicago office for a few days, I was ordered to Laporte, Indiana, to relieve a Mr. Milliken, who was editor of a newspaper, as well as operator, at that place. Of course, I only relieved him of his telegraphic duties. Mr. Milliken, like all editors of newspapers, was a gentleman and a scholar; but he was a poor telegrapher, and used paper, being unable to read by sound—that is, his office was provided with a Telegraphic Register, and he received messages by means of the characters traced on the tape as it ran through the instrument. That register, too, was a curiosity—I should, perhaps, say a monstrosity. It was more like a miniature modern threshing machine than a telegraph instrument, and it was not so *very* miniature either. When the wheels were in motion the buzz and burr and whiz was terrific, completely drowning the sound of the lever as it worked between the magnets and rollers, and effectually preventing one, were he ever so competent to do so, from reading by sound. I thought how different were the registers they use in the Hoosier country from the neat and simply constructed Chubbuck registers, with their almost noiseless running motion and loud sounding lever, in use in Canada.

After remaining at Laporte a couple of weeks, I proceeded thence to Plymouth, Indiana, and remained there a month, teaching an operator, Daniel McDonald, who was also postmaster. From Plymouth I was ordered on to Logansport, Ind., where I remained several months. The wagon road from Laporte to Plymouth, about 50 miles, ran mostly through the woods, and crossed the Kankakee river a considerable distance back of Laporte. The Kankakee at this point was a great rendezvous for snapping turtles and black snakes, and while crossing the long, ricketty old bridge we could see large numbers of these reptiles down below, sprawling about in the mud and slime, while others had sought advantageous positions on logs or tufts of moss, on which they reclined, lazily basking in the sun. The country between Laporte and Plymouth was full of game, and it was a common occurrence for a deer to run across the road from one side of the woods to the other in front of the team; and at one wayside inn at least there were quite a herd of deer in an enclosure, among which were a number of spotted fawns. "Bob White's" cheery note could be heard in all directions. Raccoons were also very plentiful. As we drove along large flocks of beautiful doves, such as we see in cages in Canada, rose at frequent intervals from the middle of the road, and, alighting on the trees by the wayside, remained there until our vehicle had passed, when they returned to their grub on the road again, just as sparrows do here. I found that the Hoosiers did not encourage shooting these birds. The line between Laporte and Plymouth was often down, sometimes falling in the ditches along the roadside, and as these ditches were swarming with black snakes, it was with considerable trepidation that we entered them to handle the wire. Rattlesnakes, and a venomous hooded snake, and other species oft he great Ophidian family, were also numerous on the higher grounds.

While on a line-repairing excursion one day, we stopped at a country house for dinner. On reaching the place we saw quite a display of dead birds hanging up around the back door. The most attractive of the collection was a large crane, a handsome bird which, when standing erect, must have been five feet high. We had some distance further to go, but arranged to return in time for dinner, which we did. At dinner, instead of the never-failing ham and eggs, we were proffered a treat in the shape of wild goose. My companion and myself were both ravenously hungry and we ate heartily of the dark-colored wild goose meat. After dinner, in looking around the back premises, we noticed that the crane had disappeared, and on further investigation we elicited the fact that we had eaten it for dinner—it had been palmed off on us as roast goose. Upon remonstrating with the old chap who kept the place, he, with a knowing gleam in his eye, acknowledged the deception, but said that so far from being considered unfit to eat, the people out there deemed a good fat crane (isn't this an anomaly?) superior to any other feathered game. I was not so sure about this. Without any pretensions to the whimsically fastidious taste of an epicure, I thought there were too many snakes in that country to permit of one ever acquiring a consuming desire for roast crane. Mrs. Moore, with whom I boarded at Logansport, a kind and motherly lady, one for whom I shall always entertain the warmest feelings of gratitude, nursed me through a rather severe attack of typhoid fever. The disease was epidemic, and a great many deaths took place from it in Logansport at that time. At Mrs. Moore's was an intelligent and good looking young negress, about 18 years of age, a slave, owned by friends of the Moore family residing in Kentucky, then a slave State, and who was "loaned" to the Moore's to help as a domestic for a season. Indiana was, of course, a free State, but this young girl had no idea of making her escape, and was willing to return "home" whenever her services could be dispensed with. It might be of interest to mention here that nice peaches could then be bought at Logansport for 5 cents a bushel. The shade and ornamental trees on the streets were principally peach trees. Large watermelons could be bought for a cent apiece.

I left Logansport for Chicago in the fall of 1853, having been absent about six months. Frank Speed, a son of J. J. Speed, a pioneer in Western telegraphy, succeeded me at Logansport. On returning to work in Chicago office, I saw a great deal of Mr. Cornell. About this time an attempt was made on Mr. Cornell's lines to effect a change in the telegraphic alphabet by substituting the letter K for the letter C, and C for K, J for R and R for J. It had been discovered at that early date that the occurrence of spaced telegraphic letters in such words as iron, corn, coin, perceive, conceive, and other words that will readily occur to telegraphers, was the cause of frequent and sometimes serious blunders; but the attempt to effect the transposition of these letters was attended with so many mistakes, particularly in the addresses and signatures of messages, that, after a trial of several months, the innovation was abandoned and the old style again restored. It was found that operators did not take readily to the change, and often in the same message employed both the old and the new style. The telegraph business up to this time had not yet "evolved" either a battery-man or a line repairer. During the winter of 1853-54 Mr. Cornell was around Chicago a good deal of the time, and that gentleman and myself often came down to the office on Sunday forenoon to clean the battery. It was a Grove battery of about 60 cups, and as it was only cleaned once a week, it required a careful and complete furbishing up. We amalgamated the zincs and weeded out all the defective ones. The fumes arising from the sulphuric acid during the cleansing process almost stifled us, and we had frequently to leave the room to get a breath of fresh air.

Mr. Cornell was particular in examining the platina connections to see that none were defective. He took great pains to explain the disastrous effect one faulty connection would have in a battery which was in every other respect perfect. We worked two lines out of this battery. Mr. Cornell was probably as well informed as regards all kinds of telegraphic appliances, wire connections, and galvanic electricity, as any one engaged in the business at that time, and his conversation was exceedingly interesting and profitable. Moreover, he seemed to take a pleasure in giving his young assistant battery-man the benefit of his superior knowledge in electrical science. I do not know whether Mr. Cornell is entitled to the credit of having made the discovery that it was practicable to work more than one line out of a single main battery, but in Canada up to that time separate main batteries were employed for each separate line, and it was only after it had been learned that in Chicago a number of lines were worked from the same battery, that an attempt was made to do the like in Toronto. I never knew Mr. Cornell to personally send a message or do any work at the instruments, but I have every reason to believe that he was *au fait* in this as well as in cleaning batteries. A little incident which took place one afternoon confirms me in this impression. The line to Toledo had been down for a couple of days—no very unusual occurrence. When it came "O.K." again, a good-sized pile of messages were waiting for me to forward. I entered upon my task with much energy, and, as Mr. Cornell was sitting near the instrument table, I was ambitious to show him how fast I could reduce the pile; and, being aware that I was sending to a good receiver, I resorted to a good many little artifices, intended to save time by shortening up on the full complement of dots and dashes. Among other little vain tricks was to omit the full stop, or period, at the end of the address before commencing the body of the message. Mr. Cornell listened for a while, and then deliberately walking over to my table, said: "Now, I know you are a pretty good operator and good sender, but I would rather you would put in the period after the address. It's the rule, and it should be observed in

every instance, as it prevents the address from becoming mixed up with the body of the message, and may some time save a mint of trouble." I felt crestfallen, humiliated, guilty. My little scheme had been easily discovered and exposed, and instead of being complimented for my fast work, as I anticipated, I was chided, though mildly, for not obeying the rules. I knew after this that Mr. Cornell could read by sound.

At the time when I first arrived in Chicago all the different lines which entered the city, and which were controlled and owned by a number of separate companies, centred in one general office on the northwest corner of Clark and Lake streets, and were under the management of one general local manager, Emory Cobb. After I had been there about a year and a half Mr. Cornell had some sort of misunderstanding with Mr. Cobb, which resulted in Mr. Cornell moving his wires to other quarters. Rooms were secured in the same building upstairs, and there we set up business for ourselves, with John Draper as local manager. Our new premises proved to be inconvenient and unsuitable, and we shortly moved down stairs to the ground floor of the same building, northwest corner of Clark and Lake, with the entrance to our office on Clark street. Here we got a new local manager in the person of Ike Downs. We had two wires at first, one to Toledo and the other to Milwaukee, but we accepted business for all points. east, north and south, through Indiana to Cincinnati, Louisville, etc. Mr. M. B. Wood, superintendent of construction, a very pleasant gentleman of middle age, paid us frequent visits about this time.

The heading of the message blank used by us, a copy of which I now have before me, was in red ink and read as follows:—

MORSE AMERICAN TELEGRAPH LINE.

Consolidation of Morse, Speed & O'Reilly's Lines. Office No. 22 ground floor, Davisson's building, near corner of Lake and Clark streets. Red pole.

The only line to Oswego and Ogdensburg. Communications strictly confidential, and must be prepaid. Write plainly. Give full address. Use no figures.

Chicago,————, 1855.

By telegraph from———
To———

The instruments were placed, for advertising purposes, close up to the window, and attracted considerable attention. People passing along the street could, if they chose, look right in and see all that was going on. I have seen more than a dozen people at a time gazing in at the window, with open mouth, watching me send or receive messages. I was Mr. Cornell's only operator for a while, but by-and-by, as business increased we got another, Charlie Bassett, a good operator and good fellow, who is now, I believe, connected with one of the railroads running into Chicago. Mr. Cornell about this time was constantly on the move and was kept very busy. He was still much of the time about Chicago, but he was often east, west, north and south. When we set up for ourselves in our new office, I signed an agreement to work for Mr. Cornell for one year, that is, from 1st November, 1854, to 1st November, 1855, at a salary exceeding twice the amount he started me with eighteen months previously. This agreement, which was in duplicate, Mr. Cornell keeping one copy and I the other, was a formidable looking document. It was written by Mr. Cornell himself and covered one whole sheet of foolscap closely written, and bristled with whereases, provisos, conditions and penalties. Sir John Abbott or Hon. Edward Blake would have charged a small fortune for drawing up such a paper. How Mr. Cornell, with his multifarious duties and complicated business engagements, ever found time to write two such papers puzzled me, and all that was involved in the expenditure of so much time and labor and legal lore was merely the hiring of an operator. This, however, was only another striking illustration of Mr. Cornell's painstaking and thorough-going character. He was a rigid economist, frugal in his mode of living and dressed very plainly, but he was one of those men who could afford to dress in any manner he chose. The poet Burns must have had such a man in his mind when he wrote: :—

" What though on hamely fare we dine,
Wear hoddin grey and a' that.
. . . . . .
Rank is but the guinea's stamp,
The man's the gowd (gold) for a' that."

Mr. Cornell had a distinctive, if not distinguished, personality—always in earnest, always serious, but always pleasant. After I had been with him two years, said he one day: "Do you know that when you came from Canada to Chicago, atthough I employed you, I was not specially in need of an operator at that time; but I had three reasons for engaging you." I said, "Might I ask what they were?" "Yes," he said, "I will tell you. First, because you came from Mr. Wood's line (Montreal line); second, because you had a good recommendation from Mr. Dwight, and third, because you were a Scotch boy."

In the spring of 1853 there were perhaps half a dozen regular operators, all told, in the Chicago office. When I left there in the fall of 1855 the number had increased to 10 or 12. Figures carefully compiled by that veteran telegrapher, J. S. Henderson, manager of the Postal Telegraph Company's branch offices in Chicago, and W. R. Holligan, the obliging and competent chief operator of the Western Union Telegraph Company in that city, show that there are at the present time 2,580 telegraph operators of all classes employed in the city of Chicago; and it is said that the revenue derived from the telegraph business transacted at Chicago alone is almost, if not quite, as large as that of the entire telegraphic business of the Dominion of Canada. Among the few operators employed in Chicago office in 1853 was S. C. Mason. He was then quite a youth, but had already graduated as a first-rate sound operator, and worked an important circuit. Mr. Mason, or "Steve," as we familiarly called him, is still with the Western Union Telegraph Co., at Chicago, and, with the exception of a brief interval, has been connected with telegraphy all these years. After occupying various positions of trust and responsibility, Mr. Mason is now Col. Clowry's private secretary, and is considered one of the most valuable and best informed officers connected with the Western Union telegraphic service. E. B. Stevens, now a prosperous commission merchant of that city, was an operator in Chicago office in 1853, as was also Geo. E. Weir, who long ago retired from the business. Robt. C. Rankin, deceased, was also one of us. "Bob" was a very popular fellow and a capital operator. Col. J. J. S. Wilson, then quite a young man, and a very active and proficient telegrapher, had charge, in Chicago, of the Caton lines. Marvin Hughitt, now president and general manager of the Chicago and North-Western Railway, came on the scene later—1854. He came from the East—Albany, I believe. We had heard of his ability as an operator before he joined us, and he had not been long in the office before he gave ample proof that he belonged to the first rank, and that the reports we had heard of his skill as a telegrapher were not in the least exaggerated. He was a nice, clear sender, as well as an excellent penman and a fast receiver.

Away back in the fifties the lines were cheaply and unsubstantially constructed, and were often out of order. Telegraphy was yet in its infancy; its possibilities and capabilities had not yet been developed; it was on trial—an experiment. The people had not yet caught on; they had not, as Mr. Depew says, "woke up to the necessity of the telegraph for government and commerce." But Mr. Cornell had faith in its ultimate triumph; this faith never deserted him. He appeared to be gifted with a prophet's vision, and the future of the telegraph, commercially and socially, was as an open book to him. He also had the courage of his convictions, and, as Mr. Depew again says, "upon his judgment he staked the accumulations of his life and the almost superhuman labors of a decade." Every cent he could raise was invested in building telegraph lines, securing stock in lines already built, buying franchises, and leasing lines. His time came. The telegraph had come to stay; people had begun to have confidence in it. It was now being more generally used, and in ten or twelve years from the time in which we find Mr. Cornell cleaning a battery in Chicago—the revenue derived from the telegraph business being so insignificant at that time that the services of a regular battery-man were considered out of the question—we find him many times over a millionaire, so profitable had his telegraphic investments become in the meantime. Mr. Cornell's was a glorious character, indigenous to American soil. Without the advantages of early education, he educated himself as he grew into manhood. Nature had been kind to him in his mental outfit. He was gifted with originality, native shrewdness, and a broad, receptive mind, that made him the peer of any of the clever and educated men with whom his business brought him into contact. He had a natural genius for mechanics; sound judgment, untiring industry, and unrivalled business capacity, but more than all this, this unostentatious man, with the astute and serious face, was a philanthropist, humanitarian, a lover of his fellow-man. His princely gift to the people of the University at Ithaca will make his name immortal, and generations yet unborn will rise up and call him blessed. Other rich men have given liberally of their means to endow institutions for the instruction of the people, but few have entered upon such projects with the same ardor and intelligence, few have possessed so clear an understanding of what they desired to accomplish, and fewer still have had the business grasp and administrative ability to successfully direct the execution of their plans. I consider it a great privilege to have known such a man as Ezra Cornell.

Operators of the present day can have but a faint idea of the hardships, trials, and difficulties their congeners of 40 years ago had to undergo. As we had to do our own repairing out West, I saw a great deal of the country on all sides of Chicago. Certain sections of the different lines ran across the prairies and others through the bush. In some instances, for nearly a quarter of a mile at a stretch in the bush, poles were dispensed with altogether, and growing trees, with an insulator nailed to them, used in their stead. In some places the bush roads were so narrow and trees grew so close to the road that poles

were unnecessary, in fact, they were an impossibility. In the open country the poles were slim, and as a rule made from the cheapest and commonest timber; the wire, too, was mostly unglazed and rusty. The company, of course, paid all the expenses of any one whom I chose to take along to help fix the breaks, and in nice weather I had no trouble in getting a good companion, but in the winter season the weather was sometimes so boisterous and cold as to deter anyone from facing the cruel "winds that blew across the wild moors," who could possibly stay at home. There was very little fun in these excursions, when the thermometer hovered around zero and the playful Western zephyrs were gamboling across the prairies and getting in their fine work. When the weather and season were favorable we sometimes took a gun with us, and without wasting time hunting, generally bagged some game. I have had the horses run away across the prairie more than once when 10 or 12 miles from Chicago, on the old road to the right of the Milwaukee plank road, strewing the contents of the buggy over the prairie, doing considerable damage, and almost reaching the city before being caught. On the open prairie there was nothing to which to fasten them, but the telegraph poles and the sighing of the winds and the clanging and jangling of the wire were too much for them. Their restlessness and efforts to free themselves presently caused something to give way, and off they started, helter-skelter, across the prairie. On one occasion, while crossing the prairie 10 miles from Chicago, one of the horses, an ill-tempered kicker, in trying to reach my head with his heels, got one of his hind legs over the pole; the other horse just then drew the buggy forward, bending the kicker's leg and lacerating it in a shocking manner. Luckily there was a farm house close by, and the farmer took charge of the brutes while I and my companion tramped it back to Chicago over the ties of *the first railway ever built between Chicago and Milwaukee*, which was only then in course of construction, and on arriving at Chicago, foot sore and tired, we received orders to start off again with a fresh team.

The patronage of the telegraph companies to the keepers of the livery stables, Messrs. Loomis & Loomis, must have been worth a great deal of money. The old Erie and Michigan line between Chicago and Detroit, which Mr. Cornell controlled, ran quite close to the lake shore, right through the woods between Chicago and the Calumet River. In the winter time this road, which was not travelled a great deal, became choked up with snow, and I have known the cutter to upset and spill us out in the snow heaps, which were five to six feet deep, at least a dozen times between what is now Jackson Park—World's Fair grounds—and the Calumet River. Everybody wore top boots (Wellingtons) in those days, and the snow was often of so tenacious a character that, as we tried to extricate ourselves, it held fast to our boots, while we drew our feet out of them. We then had the pleasure of digging our boots out in our stocking feet, and when recovered, of jabbing our feet into them with the snow only partially excavated from the boot legs. The difficulties and sufferings attending the mending of a break, perchance a serious one, under these conditions, can be more easily imagined than described. I drove from Chicago to Rockford, Ill., 100 miles, in the year 1854, on the old Hotchkiss Line, in which Mr. Cornell was interested. The roads were bad and the line in a horrible condition, and it took us ten days to go out. We passed through a number of pretty little towns *en route*, among others Elgin, Ill. Elgin was then a very unimportant little place, in which a telegraph office had been opened, but which at that time had not yet been provided with an operator. Elgin is now an enterprising town of considerable importance, and has become famous as the home of the manufactory at which the Elgin watches are made.

Prairie chickens were very plentiful on the prairies west and northwest of Chicago, and quail and wild pigeons in the scrub oaks along the lake shore between Chicago and the Calumet; and we have shot quail and wild pigeons right on the grounds where the World's Fair was held. Wild pigeons were also quite numerous just outside of Cleaverville, as that section of the city where the Douglass monument is situated was then called. At the Calumet, about 15 miles from Chicago, there was good fishing and duck-shooting. Deer w alsoere plentiful in the woods right there, and at the proper season we could always depend upon being regaled with venison steaks when we drove out in that direction to fix the line. Prairie chickens could be bought very cheaply in Chicago. I had eight or ten pairs alive, bought for ten cents a-piece, and made an attempt to domesticate them, but hadn't time to give the scheme a fair trial. I kept them all winter, however, in a comfortable building in the yard. They took their food regularly and throve on it. In the spring they gave evidence of mating. The male bird became very conceited and strutted around with much pomposity, and made an abortive effort to crow. This was a short, discordant toot, not at all like the clear, musical note of our domesticated chanticleer. I sent a couple pairs of prairie chickens to C. H. Haskins, who was then an operator at Monroe, Mich. He informed me afterwards that he succeeded in getting them to breed in captivity, and that he had at that time diminutive prairie chicks running around his office. Mr. Haskins has since then become celebrated as an electrician, and is the author of "Haskins on the Galvanometer," and other valuable works in connection with telegraphy. One of the operators shot a large bald-headed eagle, measuring 7 feet from tip to tip of its wings, a few miles from the city one day, in the winter time, when out repairing the line. It was only slightly wounded, but he managed to secure it, and bringing it back to the city presented it to me. These birds are not bald-headed in the sense in which Bill Nye is bald-headed; their heads are covered with a good crop of feathers like other eagles. Bald-headed applied to them is, therefore, a misnomer; white-headed eagle would appear to be their proper name. I kept this bird in a spare room in the office building for a couple of weeks, and when it recovered from its wounds I gave it its liberty. The bird of freedom soared over the city for a while, but, being weak from confinement, its strength gradually failed, and it rather hurriedly came to earth, or rather to ice, for it alighted on the frozen river near Dearborn street. Some boys skating close by secured it, and next day the local papers, in reporting its capture, contained some amusing speculative assertions and curious surmises as to the long distance the noble bird had flown before it became tired out and sought a resting place on the ice. A saloonkeeper on North Clark street bought it from its captors, and this unfortunate representative of American prowess, with a wild cat and a few other animals, formed the nucleus of what eventually proved to be a nice little menagerie. Cynical people might wish to make it appear that the effluvia arising from the Chicago river, and "smelling rank to Heaven," had reached the olfactories of the great bird, knocking him out and causing him to take a precipitate tumble to the ice, the collision with which rendered him *hors du combat*; but this is all wrong. The river water at that time was comparatively clear and clean, so much so that musk-rats had not yet ceased to make it their home. One forenoon one of these animals, a huge fellow, and evidently an old timer, while out for an airing, missed his way, and, sauntering along Clark street, was set upon by a crowd of men and boys, and at their hands this misguided and patriarchal rodent came to an ignoble and violent death, right in front of our office door. None but a musk-rat of the most depraved instincts, and blessed with an iron constitution, would dare make Chicago River its home now. The old Pottowattomie Chief, Simon Pogagon, in an address to the assembled thousands on Chicago Day at the World's Fair, told them that his father, Leopold, had deeded the land upon which Chicago is built to the United States Government 63 years ago. He also explained to that vast assemblage that Chicago is an Indian word, and literally means "Where the skunk dwells." Had old Pog taken a ramble along the river side, and into other sections of the city where fragrance of a peculiar kind fills the air, he would have been, I imagine, compelled to acknowledge, provided his proboscis was in good smelling condition, that large colonies of "Mephitis Americana" were still around doing business at the old stand, and in the old way. In 1853 great stretches of the river had not yet been cribbed in, and flat-bottomed craft plying between Chicago and towns near by, when seeking a resting place on the river, ran their prows up the banks, and in this way came to a standstill.

The first white girl born in Chicago was married in that city while I lived there, about 1853 54, and was not more than twenty years of age at the time of her marriage. I returned from Chicago to Toronto in October, 1855, having been absent from Canada two years and a half. History, so far as I know, contains no record of a city having grown so rapidly in population, wealth and influence as Chicago. In April, 1853, when I arrived there, the population was somewhere about 40,000; at the present time it is estimated that there are two million souls in that city, or, say nearly half as many people as there are in the whole of the Dominion of Canada. What, with its magnificent Auditorium, its sky-scraping buildings twenty-three stories high, its palatial private residences, well-kept boulevards, splendid street-car system, beautiful parks, its river, its surging crowds, its shipping, its commercial activity, its importance as a telegraphic centre, its churches, its hog killing, its Board of Trade, its smoke and dust, its lager beer, it is certainly a wonderful and bewildering place. Chicagoans themselves firmly believe, and insist upon every one else believing, that there is nothing like it on earth, that no other city on this or any other continent is "in it" with Chicago.

Did ever a people live that were so bound up in and so loyal to their city as are they? Everyone who makes it his home glories in it, dotes on it, swears by it, and is ready at all times to do battle with its detractors. Of course the advantageous surroundings and superior geographical conditions that naturally belong to Chicago are favorable to the building up of a large city, but who can tell how much the intense feeling of pride in the place that permeates its inhabitants has had to do with its phenomenal growth and prosperity?

R. F. Easson.

ASSISTANCE GRATIS.

A youthful operator going out repairing, with limited knowledge of his business and still more limited equipment, is apt to meet with some set-backs. Not being in the earlier days—this was a remote point—provided by the company with scientific apparatus, and starting in the improvidence and self-sufficiency of youth, having but little impedimenta of any sort, one trusted to luck, and luck was not always kind. Getting to a "break" in a belt of woods, and finding a pole splintered by lightning, the glass cap gone and the wire dangling in the wind against a tree trunk damp with rot, one cudgels his seventeen-year-old brains how to find something that will rudely suit the occasion.

There is a house half a mile away, and a bright resolve is taken to forage for material. Arriving at the house, a woman is found seated inside engaged, much in the manner of Tom Faed's picture, "His Only Pair," in mending the trowsers of an urchin, who is enjoying the breeze on a patch of sand in the front yard, and does not seem to miss his leg coverings a bit.

"Good day, ma'am."

"Bon jour, m'sieur."

"Could I get from you an old bottle of some sort?"

"Qu' est que c' est—un bouteille? M'sieu' donc a soif."

"No, I'm not looking for a drink, but I want a bottle."

With a willing smile the woman goes to hunt in some recess of the little dwelling, and produces a preserve jar, a pickle bottle, and a little thimble-shaped flower pot. While debating about these, my eye catches a toy cup of decorated crockery, which looks as if it might be made to hold as an insulator if inverted over a rather fat side-block; and I ask if I may have that. The mother, with a soft look and a slow, pathetic shake of the head, indicates that she will not part with the toy. I feel myself grow hot with a thrill of shame that my proposal to take away the plaything has recalled a bereavement of some wee female of the household. The jar will not do, the pickle bottle is too big, and at last a black bottle is found.

"This will do, madame," and I put my hand in my pocket for money to payfor it.

"Non, non, monsieur; prenez ca—'faudra pas payer."

And my benefactor is resolute to accept no pay. Overcome wit curiosity to know what I am going to do with the bottle, madame presently asks the question, and I explain that it is to be used to repair the telegraph. She marvels in her simple way how an old bottle is to *retablir ce curieux tel'graf*. Still more does she wonder when I break the bottom off, retaining only the upper half of the bottle. Finding that my wire is pretty stiff to wind closely round its slender neck, I ask if she has any stovepipe wire, and she instantly produces some, which is brittle with rust. This, too, she insists upon giving me free, explaining with a pretty shrug and a generous movement of the hands that it is a mere trifle and M'sieu is always welcome.

How I get to the broken pole and nail on the side pin, and how, perched upon an insecure tripod of rails, I manage by one-handed efforts (for I must hang on to the pole with the other hand) to get the broken glass over the pin and twist the thick copper wire clumsily around it—the woman's second free gift being useless—seems a trivial thing to write about. And my antics as I slipped and fell, readjusted my tripod and fell again for the steenth time, resembled those of Rumpelstiltskin in the German fairy story. But time and the hour runs through the roughest day, and as I journeyed home tired, torn, and wet with perspiration, I thought of Sisyphus—I was reading mythology just then—and his block of stone, which forever rolled down the steep just when he had heaved it to the top. And I own to a feeling of satisfaction that I had secured insulation somehow, though I did not know enough to charge the company anything for lacerated clothes, flesh and feelings.

J. H.

SOMETHING OF INTEREST ABOUT FLAGS.

A flag is an emblem of nationality, and commands respect and admiration from other countries according as the nation which it represents merits in the public mind praise or blame. To some hot-headed people the sight of a particular flag is like the sight of a red rag to a bull; it sets them unreasonably wild, but for the most part such prejudice and unreason are restrained where even they exist. Some foolish people vilify the United States flag. They might be better employed, for it represents a great people. Still others curse the British flag and want to tear it down. This shows how little they know of English history, or of civilization and renown.

The flag of England is a red cross on a white field; that of Scotland, a white St. Andrew's cross on a blue field. These flags were combined when England and Scotland united in 1688, and, on the union with Ireland, the Irish flag, a red St. Andrew's cross on a white field, was added. The union of the three countries is thus indicated on the flag. The St. George's cross of England remains as before, and is the central feature of the flag, dividing it into four quarters occupied by the St. Andrew's crosses, the white of Scotland and the red of Ireland, which are placed side by side. It is a matter of wonder that the latest dictionary, the Standard, has not in its list of flags of the nations any representation of the flag of the Dominion of Canada, which is a Union Jack in the corner, and on the field surrounded with maple leaves a shield bearing the arms of the various provinces.

We learn from the *Marine Review* that the flag lockers of a modern cruiser contain more than 200 ensigns. The flags of many nations are of most elaborate design, and composed of every color known to the flag-maker's art; others are severely plain, but all have to be mathematically correct as to size, color, and proportion. The United States flag is a difficult one to make correctly, with the forty-four stars on its blue field, and have them accurately arranged. Each star must occupy its correct position, and not deviate a quarter of an inch, that the symmetry of the union be preserved.

In constructing flags, eight colors are used. They are red, white, blue, yellow, green, brown, black, and lately canary yellow has been added. The yellow first mentioned is rather of an orange tone. The canary shade was adopted to take the place of white in signal flags, as at a distance it was found that the white blended in with the horizon and made the accurate reading of a signal almost impossible; in consequence the navy department has recently ordered the change. The brown bunting is used to typify bronze, and is used quite extensively in the more elaborate foreign flags.

"The largest flag made for our navy is the American Ensign No. 1. This has a fly of 36 feet and a hoist of 28.9 feet. It is a flag that is rarely made. The cruisers "Brooklyn" and "Minneapolis" will be the only vessels of our navy to carry it. The flag borne by all our other ships is the No. 2, which is 27.19 feet long and 14.85 feet wide, and is the chief standard of the man-of-war. In this flag the side of the blue field in which the stars are placed is four-tenths the length of the fly, and in the same manner the size of flag and field is designated for every flag from the No. 2 down to the No. 8, which is only 4½ feet long and 2.67 feet wide.

"In the Brooklyn yard flag room are made flags of forty-four different nations, two sizes for each. The No. 1 is 34.86 feet long and 18.12 feet wide. The No. 2 is smaller. The United States flag is given to our cruisers in seven sizes for use in various parts of the ship and in small boats and on various occasions. All the bunting used is of American make, and comes from either the United States Bunting Company or the New England Bunting Company, both of Lowell. About 50,000 yards are used every year, and to guard against any possible defects in its manufacture each piece is put to a rigorous test. Severe tests are made for fast color. A generous clipping is steeped in fresh water for twenty-four hours, after which it is vigorously scrubbed with soap, and when thoroughly rinsed out is dried in direct sunlight for eighteen hours. Bunting that will withstand all this is considered fit to be put into Uncle Sam's flags.

"The most difficult flags to make are those of San Salvador and Costa Rica. The first is very elaborate and requires all the colors, and the second is not less elaborate and takes every color but brown. The intricate designs are cut out by means of zinc patterns. The American ensign is a comparatively plain flag. By aid of copper patterns the stars are cut out with chisels from muslin folded thirty times."

FIRE AND MARINE INSURANCE.

Mr. Relton, of the Guardian; Mr. Deuchar, of the Caledonian, and Mr. G. H. Burnett, of the North British and Mercantile, have returned to Britain after their American visit, and appear to have travelled homeward in company.

Insurance on yachts is supposed to be about the best business going for the insurer; the underwriters, however, who took the risk on Lord Dunraven's "Valkyrie," have reason to think otherwise. The yacht originally cost about £10,000, and was insured for £12,000. According to the *Record*, when she was raised after being run into by the "Satanita," she was advertised for sale. The auction took place and the ill-fated boat only realized some seven hundred pounds, just about the value of the tons of lead on her keel.

The burning of 200 horses in the Knox Express Company's fire in Washington, D.C., some weeks ago, and fifteen horses in the fire at Allen's livery stable in Brooklyn more recently, should be sufficient to prod public sentiment vigorously against the cruel practice of stabling horses on second and third floors in large cities. In Washington a movement has been started to uproot the practice, and it is hoped that other cities will speedily adopt regulations looking toward the better protection of man's most patient friend.—*Underwriter*.

We were discussing the risk at the counter and the broker remarked: "Well I think it is about time that those who pay the losses should have something to say about the risk, the way the forms should read and who should adjust the loss. There is entirely too much dictation from the broker and the assured." Naturally we looked at him

and wondered if the millennium were at hand. But there is no disguising it from our readers, we were only dreaming, and as we awoke the clock struck four. Then followed three hours of disappointment and reflection.—*Rambling Notes.*

Inspector Conway, of Chicago, has secured a chestful of the peculiar machines used by Herlet, Scharf, Nelson and others of the gang of incendiary conspirators destroying property in that city. The machines are electrical devices. The cells are in the ends and wires run the length of the tubing, which is over an inch in diameter. The circuit is broken in the centre in such a manner as to cause a spark, so that naphtha, benzine, &c., conveniently placed, would instantly ignite and cause fire. The time of the explosion can be regulated by the proper adjustment of the clockwork mechanism which frees the current.

A successful agent of a life company said to us the other day that when he first went into business as a junior partner in a New England agency, twenty-five years ago, he made it a point to read the insurance journals, and freely admitted that much of his success as an agent was due to the information and hints he found in them. His partner ridiculed him for wasting time and money on class papers, and boasted that he never subscribed for one and never read them. "What is the consequence?" said the progressive agent. "My old partner, as you know, is now a back number, left behind in the race, poverty stricken, and with but little business. I have acquired a competence, and occupy a prominent position in connection with one of the largest companies in the world. I tell you that if a man wants to keep up with the procession he must read the papers."—*Spectator.*

LIFE AND ACCIDENT PARAGRAPHS.

Mr. S. J. E. Hartley has been placed in control of their entire business for the United Kingdom by the directors of the Sun Life Assurance Company of Canada.

Sir John Gorst and Mr. Ryan, the chairman and manager of the British Empire Life Company, have reached Winnipeg on their westward journey. And Mr. Stancliffe, the Canadian manager of that company, has at last returned to Montreal.

The New York Life has declined to pay the life policy of Weston B. Thomas, secretary of the American Wire Nail Works, at Anderson, Indiana, who was killed in a drunken broil by Winnis Smith, for $20,000, on the ground that in his application Thomas fraudulently represented himself as a temperate man, which is disproved by the circumstances under which he died.

The charter of the Steam Boiler and Plate Glass Insurance Company, of London, Ontario, has been amended to enable the company to insure the lives of the men in charge of the boilers covered by the company's policies. The paid-up capital has also been increased to $40,000, which amount, we understand, has already been paid in. Mr. F. Stancliffe, British Empire building, Montreal, is the manager for this company for the city of Montreal and Province of Quebec.

There is one class in the community to whom the advantages of endowment insurance apply with peculiar force, and that is to the large number of unmarried women who are dependent upon their own exertions for a living. In many cases they not only provide for themselves, but are charged with the care and support of one or more relatives. To such women endowment insurance presents the very best possible way of investing the small sums they may be able to save. An endowment policy not only provides for the insured, in case she survives the period, but also creates a capital which, in case of death, is immediately available for the use of those dependent upon her.

A mutual life insurance company is one of the best illustrations of the principle of *co-operation*, said a speaker at a recent life gathering. "I use the word in its strictest scientific, economic sense, and not as it has been appropriated by a form of life insurance which is not very favorably regarded by the gentlemen present. A mutual life insurance company is a community of men pledged to protect each other against the consequences of a great calamity. Instead of seeking the protection from without and paying a profit to the individual or corporation furnishing it, they create it themselves, and thus save that profit, and besides that, in a way I need not pause to describe, secure a more infallible protection."

Here is the sort of square talk one likes to hear from an insurance company:—"If the assured pays the premium, the company will pay the policy." And this is what that old and steady-going company, the Confederation Life Association, says to its policyholders and the public. In the early days of life assurance it was considered necessary to burden the policy contract with numerous conditions and restrictions, some of which are continued to the present time. But time has shown where these may be relaxed. The management of this association has been in favor of liberalizing from time to time, as experience justified, the conditions of the company's policies, and the directors have decided (provided the present physical condition, habits, etc., of an applicant are satisfactory) to issue a policy free from restrictions or conditions of any kind. Snch is the unconditional accumulative policy of the Confederation Life, which should commend itself.

DRY GOODS JOTTINGS.

Japanese silk fabrics have advanced.

Umbrellas find poor sale in Western Ontario these days.

Bead trimmings in both fancy and plain designs are selling well.

Birds are again to be laid as sacrifices before the altars of fashion.

Fur capes will be popular this winter, but extreme lengths will not be worn.

The United States tariff bill is in favor of domestic manufacturers of hosiery.

In neckwear the small knot, with wide flowing ends, is becoming all popular.

Cotton hosiery for the spring trade will, from present appearances, be sold at lower prices.

Colored braid with steel beads in wave designs are used to good effect in trimming serge dresses.

Gold and silver effects will be largely used in trimming evening dresses during the coming season.

John McKay has set up a carpet loom in Kirkfield, Ont., and will carry on a carpet weaving industry.

The blouse, the Eton and the open jacket still remain in favor and perhaps will reign through the winter.

Old-rose is spoken of by London authorities as one of the most fashionable evening colors for winter.

Black silks with small spots and figures promise to be good sellers in the dress-goods department during the fall.

It is estimated that the Atwood flax mill will consume 200 tons of flax this year in excess of the quantity manufactured last year.

Salvation Army milliners are going to be busy. The ugly blue bonnet is to be replaced by a neater headgear of light straw.

Don't refuse the aid of your local newspaper; it will suggest needs to your customers which might otherwise never have occurred to them.

Negotiations are now in progress with an Eastern province woolen manufacturer, with the object of inducing him to remove his plant and operators to Victoria, B. C.

W. H. Storey & Son, glove manufacturers at Acton, Ont., have recently established an agency in Australia, and are now making preparations for an agency in Japan.

The Reine shades of velvet are selling as a finish for millinery and costumes of black, Pivoine and Jacqueminot being the darkest and richest of this range of shades.—*Economist.*

We desire to acknowledge our indebtedness to Messrs. S. F. McKinnon & Co. for interesting information in regard to the season's millinery, which appears in another column.

Fancy hose have failed, it seems, to take any considerable hold of trade in Canada. This is largely due, the selling agent for a large German house assures us, to improper introduction by salesmen.

About one hundred and fifty thousand dollars' worth of furs have been marketed at Edmonton this season, of which about seventy-five thousand dollars' worth is in possession of the Hudson's Bay Co.

Millinery openings are *exclusively* for the benefit of the trade. Toronto merchants were put to great annoyance this year by the intrusion of the general public, and it might be well for Montreal merchants to give publicity to this fact.

A peck of March dust is worth a king's ransom, and a cold spell of wintry weather in the early autumn is equally valuable to the fur trade. Last fall merchants were singularly unfortunate in this respect, and it is to be hoped that the fall of 1894 witnesses an improvement.

A large dry goods firm in St. John, N.B., has given its clerks notice that they must not engage in Sunday bicycling. The firm bases its action upon the bad effects which display themselves on "Blue Monday," as the day following Sunday dissipation is sometimes called.

How few salesmen make a really strong endeavor to sell fine goods. The one quality that all love to dwell upon is the cheapness of the article. Salesmen in wholesale and retail houses alike are guilty in this respect. In selling the fine grades of merchandise lies the profit of trade, and every effort should be turned in this direction.

Opinions as to what furs will be fashionable, says the London, Eng., *Drapers' Record*, differ somewhat, but it appears to be unanimously agreed that sable circlets will be largely worn, and good orders have already been received for this beautiful fur. For boas, collarettes,

etc., the finer qualities of Thibet in different colors are expected to be the fashion, while for trimming and cloak linings fox and Sitka fox will be largely used, and squirrel locks are likely to be much in demand. Black Persian, mink and skunk will also be fashionable, and bearskins will also be used to a considerable extent in the commoner trade. As regards the style of seal jackets it is more than probable that they will be long, although, perhaps, scarcely so long as those of last year. The skirts will be full, and the sleeves balloon-shaped, a trifle flatter on top than those of last season. The collars will also be large and deep, and made so as to be worn either up or down.

SHOE AND LEATHER ITEMS.

The shoemaker has lots of business on foot.

Large buttons and fancy tips are new features for the spring of 1895.

Men's calf shoes in different styles at $2.25 will be a popular seller next spring.

The extreme narrow toe is going to be popular with the women as well as with the men.

Black shoes make the feet appear smaller; they also make the individual look shorter.

A Halifax shoe firm, A. W. Redden & Co., intend opening business in Moncton early in October.

Piccadilly shapes are dropping out, compelled to give way before the rage for extreme narrow toes.

Goodyear shoes in women's work are meeting with good success, and large quantities are being made.

For women's wear a $2 shoe is all popular. Next spring's samples will show this shoe in all shapes and styles.

A new shoe has no place in a perfect toilet. Fine shoes are like shell combs and beautiful rugs; age improves them.

Messrs. A. J. Webster & Co., Shediac, N.B., will introduce considerable new machinery into their boot and shoe factory.

In men's footwear the square toe is losing some of its popularity, but the narrow square toe continues in favor with women.

Blucher cuts may soon become a thing of the past. Certainly they will be seen only to a limited extent in next spring's samples.

The boot and shoe factory at Pictou, N.S., which has been closed for a year, is to be re-opened by Mr. Gilbert Harrison, of Amherst.

Tan Dongolas and goats will be largely worn next season in women's footwear, as Russian leather is looked upon as too heavy.

Mr. J. S. King, of the J. D. King Co., Toronto, has just returned from an extensive trip to the centres of the American boot and shoe trade.

After Sept. 1 the firm of Greene, McLaren & Co., wholesale boot and shoe merchants, Toronto, will be dissolved, Mr. R. H. Greene continuing the business.

A rumor is afloat that Messrs. Hartt, King & Co., boot and shoe manufacturers, Tarrytown, N.Y., will establish a branch factory at Fredricton, N.B., giving employment to 200 hands.

The Drayton tannery has gone through a change of hands, Mr. T. J. Wagner, of Galt, having leased it from Dr. Lucy. A year ago this tannery was fitted up with all the latest improvements.

People are becoming more sensible in regard to their footwear, and shoe clerks say that women moving in the best society no longer seek to crowd their feet into shoes several sizes too small for them.

In a footwear window display of a large King street departmental store the lowest priced shoe is ticketed at $3.50, and $5 shoes are plentiful. This store evidently believes that people are willing to pay a fair price for a good shoe.

There is a demand for a woman's Goodyear shoe which must be very light, and look as much as possible like men's footwear. Designers are setting out with the intention to fill this want, and something novel may be expected for the spring.

Notwithstanding all the hard things that the papers have been saying about razor toes, they promise to take a prominent part in the spring samples of Canadian manufacturers. They will be seen in shoes made of colored goats, colored calf and patent leather.

A shoe generally receives its most destructive usage when off the feet. There are few men, and for that matter women, too, who know enough to take care of their footwear. Leather boots and shoes when not worn should be kept on trees. If the expense of trees is inconvenient, fill the shoe with bran or paper.

Mr. Shaw, of the Huntsville tannery, says the Burks Falls *Arrow*, has purchased the site for a tannery in that place. An arrangement has been made with the council for an exemption from taxes for ten years, and a by-law to that effect will in due course of time be submitted to a vote of the ratepayers of Burks Falls

If you wish to clean white shoes ask a druggist for ten cents worth of pipe clay; put a little in a dish, dry, and with an old tooth or nail brush that is stiff, brush the shoe hard, but always the same way as the grain of the leather, or it will make them rough. Another way is to rub with deodorized benzine first and then put on a coat of pipe-clay and let it remain on over night.

"No wonder," grumbled a manufacturer of fine shoes, "that retailers complain that they cannot sell high grade footwear; while the retail merchants have constantly been obtaining goods at reduced prices from us, the prices charged the consumer have declined but little. Why, we came across a retailer the other day who was attempting to sell some of our shoes at a profit of 75 per cent."

It is an actual fact, says the New York *World*, that women who walk well wear out very few shoes. Heels run down, soles turn, uppers crack, toes curl, seams break and stock peels because the weight is unevenly distributed, the carriage is bad, or on account of friction. The habit of crossing the feet very soon scuffs the uppers into shabbiness. Fat women, those who have had little or no cultivation and those who are beginning to get old, throw the weight of the body back; they run down, so to speak, and require an extra allowance of heel leather. Military, athletic and aesthetic training may be paid for with the savings in footwear, and in a very short while.

FOR GROCERS AND PROVISION DEALERS.

J. D. Dandeno, of Galt, has opened a bakery in Berlin.

Berlin has a new grocery, conducted by Mr. W. Winkler.

There is talk of large shipments of flour from California to China and Japan.

Hop picking commenced last Wednesday in the vicinity of Walkerville, Ont.

Mr. Alfred Brunet has been elected president of the National Bakery, Montreal.

An extensive addition is being made to the rear of the Walkerville brewery for cold storage and bottling purposes

S. L. McKay has been elected secretary of the Kingsville Preserving Company. The season's operations begin this week.

Messrs. Hoegg, Fredericton, N.B., are canning for the American market and are putting up 1,500 gallons of blueberries per day.

Messrs. Gordon and Ironsides will ship 8,000 head of cattle from Alberta ranches to the old country markets, this fall.—*Regina Leader*.

It is always satisfactory to note the development of our export trade. Messrs. E. D. Tilson, of Tilsonburg, are sending a shipment of split peas, flour and oatmeal to the Canary Islands.

The severe drouth in Western Ontario has caused some of the cheese factories to shut down, in consequence of the diminished receipts of milk. The drouth is also responsible for higher prices for butter in many districts.

The Westminster Board of Trade have requested the Fisheries Department to extend the sockeye season from the 25th to the end of the month, in consequence of the unusual lateness of the run this season.—*B. C. Commercial Journal*.

At present there are in Ontario fifteen cheese markets, located at London, Ingersoll, Woodstock, Brantford, Listowel, Shelburne and Newmarket, in Western Ontario, and at Peterborough, Belleville, Campbellford, Napanee, Picton, Kingston, Brockville and Morrisburg, in Eastern Ontario.

A car loaded at Hamilton one day last week, with bacon for Liverpool, left that station at two o'clock in the afternoon, and the contents were placed on a steamship of the Dominion line on the afternoon of the next day. This speaks well for the Grand Trunk's freight service, as Hamilton is 373 miles distant from Montreal

Mail advices report the exports of tea from Shanghai and Yangtsze ports for season 1893-94 to July 30, as follows Black United States and Canada, 3,596,904 lbs.; Great Britain, 10,576,194 lbs.; total, 14,173,098 lbs. Green: United States and Canada, 4,017,046 lbs.; Great Britain, 391,278 lbs.; total, 4,408,324 lbs. Last year shipments of black and green were: United States and Canada, 6,859,666; Great Britain, 15,553,423; total, 22,413,089 lbs.

The quantity of small fruits, strawberries, raspberries and blueberries being forwarded from the Maritime Provinces to points in the United States, over the line of the International Steamship Company, probably never before reached such figures as during the present season, says the Eastport *Sentinel*. During the month of July the value of such products entered at the Custom House at Eastport amounted to $11,500, and every steamer from St John continues to carry large shipments.

HARDWARE AND METAL TRADE ITEMS.

Values show few fluctuations.

There are at present 29 blast furnaces in activity in Belgium.

The lamp goods business is brisk and promises to remain so for a month at least.

At present among metals, galvanized iron, tin plate and black sheet iron are moving most freely.

Import orders for Canada plate are now pretty well distributed throughout the country. Quotations are slightly easier.

Canada's mineral production last year reached a total value of $19,250,000, or a quarter of a million dollars less than the previous year's output.

Last year we exported 70,767 tons of steel bars, valued at £1,002,836. The largest shipments were to Germany, the United States, Canada and India.—*British Iron and Steel Trades Journal*

The painting of the Forth Bridge, which is certainly no light undertaking, is again in progress. So vast is the structure that it takes somewhere about 50 tons of paint to give it one coat, the area that has to be dealt with being something like 120 acres. It is said that about 200 trains pass over the bridge every 24 hours.

Messrs. James Watson & Co., Glasgow, say on the 17th inst.: The Scotch pig iron market has been distinctly more active during the week. A more hopeful and speculative feeling has arisen, and there is some inclination on the part of the public to buy iron. There are no signs of an early termination of the coal strike.

The *Age of Steel* (St. Louis) says: "The economies practiced on some of our western railroads are helping them somewhat to tide over the shallows of trade depression. Economies deemed impossible twelve months ago are now being practiced. It is said that with some roads the operating expenses are 20 per cent. less than they were but a few months ago."

W. S. Patterson, Wyandotte, Mich., thinks of locating a small rolling mill in the central part of Ontario. It is his intention to make a superior grade of horseshoes, horseshoe bar and all the fine grades of iron used. This material he makes principally from old steel of all descriptions, and old steel rails, taking the carbon from it by a charcoal process. Mr. Patterson has written to the Guelph city council enquiring into the facilities of that city.

FOR MANUFACTURERS.

The recent construction of the four-storey brick wing to the Corticelli silk factory at St. Johns, Que., gives a floor addition of 15,000 square feet to that thriving establishment. This is an indication of prosperity.

The purification of sewage at Havre, France, by electrolyzed seawater, is now reported to be so successful that when the refuse is drained into the street gutters, not only is there complete absence of all disagreeable odor, but the gutters, which formerly were black and soiled, have been beautifully bleached, even the curbs and the flagstones becoming nearly white.

Carroll D. Wright does not favor compulsory arbitration carried to its logical conclusion. It would, he said, cause employers to close their factories, to adulterate their goods, or cause them to combine to keep up the price of goods, and the very objects for which the arbitration was created would be defeated, and in this way all industry would be forced into trusts and combinations, or else the government would be run into socialism.

"The business depression has recorded itself in the United States Patent Office," says the Philadelphia *Ledger*. "During the past two months the patent fees have been less than at any time during the last three or four years. There is as much inventive genius in the country now as ever, but it requires capital to exploit valuable inventions This will be withheld until the business revival sets in. In the meantime the inventors are resting."

A method adopted by an English machine firm of fixing pulleys on shafts by means of a cone in three pieces, is worth noticing. The hub of the wheel is bored to suit the taper of the cone, and the three wedges into which it is divided hold fast by reason of the taper, there being no keys. This method is also used for small gearing. One would hardly think that the attachment would be sufficient for gearing, and would expect it to slip, but this is said not to occur.—*The Engineer*.

A telegram of Monday last from New Bedford, Mass., states that on that morning the cotton operatives inaugurated their general strike, and nearly 11,000 are idle. The machinery of but five of the twenty-seven mills in the city is in motion. The manufacturers have little or nothing to say, but the notices of a reduction, against which the employes rebel, are still posted. Secretary Ross, of the Spinners' Union, stated that the members of his union have been lined up for a six months' struggle.

The Dominion Glass Company's works at Montreal, which have been closed down for several years under a yearly subsidy from the Diamond Glass Company, for their non-operation, are about being reopened under the management of an expert manufacturer from Steubenville, U.S. The business was formerly carried on as a private enterprise, but is now being organized as a joint stock company, with a capital of $100,000, the list of shareholders embracing such well-known names as Joseph Barsalou, Maurice Barsalou, Henry Hogan, Dr. G. Laviolette, and others.

The Bertram Engine Works Company of Toronto, of which Mr. A. Angstrom, formerly with the Cleveland Ship Building Company, is general manager, has secured a contract for two side-wheel steamers. The boats are for the Ottawa Improvement Company The hulls, which are to be of steel with wood covering up to the water line, will be built at the yard of the Bertram works, Toronto, and then taken down to Pembroke, Ont., for completion of cabins, etc. The larger of the two boats will be 140 feet long, 43 feet over guards, 8 feet 4 inches deep, and 3 feet 3 inches mean draft. The engines for this boat will be compound, horizontal, 22 and 42 inches by 48 inches stroke, and she will have two boilers of locomotive type, 19 feet long and 4 feet 10 inches diameter. For the second boat, which will be 120 feet long, 38 feet 4 inches over guards, 5 feet 4 inches deep and 2 feet draft, engines and boilers as well as houses wil be taken from another vessel.

The annual meeting of the Nova Scotia Steel and Forge Co., of New Glasgow, was held in McGregor's hall in that town on the 22nd inst. The directors reported a fairly successful business year, and recommended a dividend of eight per cent. Owing to the extreme depression now in view no cheering predictions were made by the report as regards the future. In looking over the stockholders' list, says the *Eastern Chronicle*, one is struck with the number of clergymen who have invested their savings in this concern, the amount being in the neighborhood of $30,000. The total paid-up capital of this concern, we are told, is close on $600,000, and almost half of this is held by citizens of the county. People in Ontario have had an immense respect for the N. S. Steel and Forge Co. ever since they saw the very handsome display of its products made at the Toronto Industrial Fair two or three years ago. And the people of the West, as well as anywhere else, admire energy, and ingenuity and pluck, such as have been shown by the management of these works, in the face of obstacles that are neither few nor small. The variety of product is remarkable, and their quality is highly spoken of by customers.

—The preponderating importance of the third class passenger traffic of the railways in the United Kingdom is shown by the returns of those roads for 1893. It earns 81½ per cent., the other two only 18½ per cent. of the whole passenger earnings. In that year the English, Scottish, and Irish railways earned from passengers £27,734,531, namely, £3,036,036 from first class; £2,075,179, second class, and £22,623,316, third class. Second class is abolished on some of the largest lines. The second class traffic is largest in Ireland and smallest in Scotland. Taking the gross total yielded by passengers, parcels and mails, which is given as £35,849,449. we find it exceeded materially by that derived from the carriage of goods, which was no less than £40,994,637. The vast mineral resources of the country account for much of this last enormous sum.

—Almost all the great Canadian fall exhibitions occur during this month. The Toronto Industrial Exhibition begins on Monday, Sept. 3rd, and lasts till the 15th of the month. The Western Fair, held at London, opens this year on the 13th September and continues till the 22nd. The Central Canada Exhibition, at Ottawa, will be held from Friday the 21st to Saturday the 29th inclusive. No autumn exhibition will be held this year in Montreal, but there will be a Provincial Fair in Quebec, beginning on the 16th. The Nova Scotia Provincial Exhibition is announced to take place in Halifax also in September. The show of the Eastern Townships Association will be held at Sherbrooke, Que., beginning on September 3rd. The show of the British Columbia Agricultural Association will be held in Victoria from the 1st to the 6th of October.

—The annual meeting of the Great North-Western Telegraph Company is announced to be held at the head office of the company in Toronto, on Wednesday, 26th September.

—The Molsons Bank has just declared its 78th dividend; it is for the current half year, and at the annual rate of 8 per cent.

—Having to go press on Thursday evening with this Special Edition, Clearing House figures are unavoidably left out.

Correspondence.

[We are compelled to hold over until next issue the letter of "Dead Earnest" referred to in our editorial columns.]

LOCAL BOARD VALUATIONS.

Editor MONETARY TIMES:

SIR,—"Nemo's" criticism, in your last week's issue, of the Dominion Building and Loan Association, is in a measure confirmed, it seems to me, in Bradstreet's Daily Report of 23rd and 24th insts., where the Dominion Building and Loan Association issued five writs against Rat Portage parties, averaging $850 each. No other loan company in Canada with five or twenty-five times the capital can show such a writ record as this. Who's in trouble—the D. B. & L. or Rat Portage?

CASEY.

August 27, 1894.

AN ANXIOUS ENQUIRER.

Editor MONETARY TIMES:

SIR,—I have not been subscribing to your paper, but I have a friend that swears by it, and he tells me sometimes I am wasting money and time fooling with social societies for life insurance. And why don't I get insured in some good company and be done with it, and put my money in a safe place. That's what he says. Now I don't see why five hundred or may be a thousand of us putting our money together and paying up regular, can't insure ourselves just as well as any mutual company can, if we get a straight up and down man to look after our money and make assessments right, and do it cheap.

I know that some people don't approve of the assessing system. They say we don't assess high enough, or else that "the last man will get the pot" if he lives long enough. But another man says it costs too much for management in these friendly societies, and the money goes for expenses in place of for to insure the members. Seems to me the big companies have pretty heavy expenses with their big buildings and their officers with heavy salaries and their agents all over the place. I would like if you would tell me what the difference is. I am insured in a society ever since five years ago; I will tell you what it is, if you like, but I want you to answer, and not give my name that I sign to this letter. I want my woman to have something when I am gone. I haven't got but one little girl.

What is the matter with my paying in my eight dollars or my ten dollars a year in our society? If six hundred of us keep paying in ten dollars a year for may be ten years, that would make sixty thousand dollars. So far there haven't been many deaths. And we have money drawing interest, and they say the interest is what counts. My friend that told me to write to you said you would probably give me the straight tip on this question if you answered at all. So I remain yours. Don't give my real name.

Chatham, Aug. 24th. J. C.

[If 600 members would pay $10 a year for ten years, and could keep each other from dying in the meantime, there would be no risk that any single "last man" would get "the pot," as J. C. says. And the interest certainly "would count," for it would amount in the ten years to very much more than $60,000. But no society has been able to conduct its affairs so cheaply as to save up the $60,000 and interest. Expenses *will* keep mounting up and people *will* die, which are the very reasons that J. C. and others like him are safer in the hands of a strong life insurance company. Companies conduct their affairs in a business-like way and charge enough to provide for the last man.—ED. MON. TIMES.]

—The House of Lords of Great Britain consists of 560 noblemen entitled to seats, and the House of Commons consists of 671 members.

—The annual production of French champagne is about 25,000,000 bottles. About 4,000,000 bottles of this go to the United States, a similar quantity to Russia, and almost as much to England.

A CITY ORNAMENT

The position a building is to occupy in a town or city ought to make a difference in the character of its design. "Station imposes obligation" as well as "rank." A good site merits a worthy building, and it would be poor policy as well as sorry taste to disfigure a prominent place on a fine street with a mean building. It is evident that these ideas are not strange to the authorities of the Canada Life Assurance Company or the architect of its building, Mr. Waite, who have already given proof of good taste as well as enterprise and judgment in the buildings erected for the company in Canadian cities.

From an illustration which appears in our columns to-day, it will be seen that the new building to be erected for the Canada Life in Montreal will be worthy of the fine position it will occupy on the corner of two principal streets of our greatest city. It is to cover 126 feet of frontage on St. James street and to extend along St. Peter street (Bleury street) all the way to Fortification lane. This imposing structure, with its variously arcaded stories and rich details, is of a type of architecture that calls for modern skill, with a keen eye to revenue; an "office building" with all the improvements that time and experience can give. Its structural carcass is to be of built-up steel stanchions and girders, with floor and roof beams of rolled iron, the whole protected with masonry and fire-clay coverings, so as to render the structure absolutely fire-proof.

The three facades will be entirely of dressed stone, the plain surfaces of which will be coarse sand-rubbed, while the mouldings and sculptural surfaces will be rough faced, a treatment that will prove appropriate to the height and quiet dignity of the structure. There are to be two principal entrances to the building, the chief one being on St. James st., and the other on St. Peter st. The St. James st. entrance will lead through a spacious vestibule to the foot of a Sicilian marble staircase which ascends to the ground floor story. This is to be occupied by the Canadian Bank of Commerce. From the vestibule steps descend to a well arranged elevator lobby. The walls and ceiling of the vestibule, entrance hall and lobby of the entrance will be made one of the most comprehensive examples of the use of faience. Commodious offices for the Canada Life Assurance Company will be placed *en suite* on the first story; and on the six stories above, conveniently arranged, well lighted, rectangular offices, each accessible to two elevators, which are to be operated by means of electricity. The heating, ventilation, artificial lighting and sanitary conveniences will, we have no doubt, be on the most advanced principles.

MONEY AND SHARES.

There is every indication that the United States now stands upon the threshold of improved conditions, and will shortly emerge from the severe and long continued depression through which the country has been passing. The tariff question has at last been definitely settled, and American buyers are already making their appearance in foreign markets. Plans for the reorganization of bankrupt railroad properties in the United States promise to materialize within a few weeks' time. Notwithstanding our protective tariff, the commercial and financial interests of Canada are very closely connected with those of the United States, and this country will of necessity benefit by the return of prosperity to the American Republic. The tariff bill which has taken effect during the present week, although not as favorable to Canadian interests as might be wished, is an improvement in this respect over the McKinley bill. Call money in London stands at ½ per cent., short bills 9-16, and three months ⅝ per cent.

Call money in New York is steadya t 1 per cent.; time money is only in moderate demand, with the offerings large. While the local money market shows increased animation, the banks have on hand large funds for which managers see no healthy use. Money in Toronto is offering at 4 and 4½ per cent.

A moderate business has been done in shares during the week. Montreal Street Railway has been active. Bell Telephone is firmer. Transactions in Cable have been made, but at present this stock is slightly easier. C. P. R. is firm, with sales at 68¼. In bank stocks there have been transactions in Ontario, Commerce, Merchants, Dominion and Molsons.

—In 1881 Great Britain consumed 112,000,000 pounds of China teas to 48,000,000 pounds from India and Ceylon; in 1893 the importation from China had sunk to 30,000,000 pounds, while from India and Ceylon there came 172,000,000 pounds.

The British warships "Tartar," "Partridge," "Magicienne," "Tourmaline" and "Canada" were in harbor at Montreal for a week, and crowds visited them. On Saturday and Sunday the number of visitors to the different ships was counted. The total number on Saturday was 27,000, on Sunday it reached 55,000, divided up as follows: "Tourmaline," 9,000; "Magicienne," 23,000; "Partridge," 6,000; "Canada," 8,000; "Tartar," 9,000. The "Magicienne" is a first class gunboat of 2,950 tons, has six guns and has engines of 9,000 horsepower. She is commanded by Capt. John P. Pipon, C.M.G. The ships have left Montreal and gone back to Quebec and Halifax.

BUSINESS IN THE UNITED STATES.

The past week has afforded a fair specimen of the sort of effects the end of tariff suspense has in store for Wall street, says Henry Clews & Co.'s circular of 25th inst. The feeling is that of universal relief from a universal obstruction. The way has been opened to a resumption of trade and enterprise in every direction; and in all interests there is a disposition to resume operations on something approaching a normal scale. There are no longer any great fears, nor any reasons for timidity, overhanging the markets. In every branch of trade stocks of merchandise are in a starved condition, and the reasons which have for fifteen months caused buyers to pursue a policy of hand-to-mouth supply are disappearing. As a rule, prices of merchandise are unprecedentedly low; so that if the purchasing ability of the consumers has been lessened, that difficulty is offset by a proportionate reduction in the cost of living and in the amount of outlays at large. Credits, as a rule, are in a sound and wholesome condition; so that the merchant who desires to enlarge his stock and extend his trade can have the needful time facilities, and at exceptionally low rates of interest.

The recovery that now seems to be setting in is something broader than a revival from the effects of last year's panic. That crisis, though immediately incident to the great silver fright, embraced also the effects of the deeper derangements that set in with the great Barings suspension, and of which that failure was but a symptom. Those derangements were largely in the nature of over-production, over-speculation, over-trading, and were world-wide in their influence, and their effects still continue in the persistent depression of trade in every European nation. If the recovery from these four years of reaction first makes its appearance in the United States, it is nothing more than might be expected from the greater resiliency of our resources and from the fact that we have been less intimately connected with the disturbing causes than have other countries. It is reasonable to hope, however that recovery on this side the Atlantic will tend to stimulate improvement on the other side, and thus it may quite possibly happen that the foreign markets, both commercial and financial, will respond to the improving tendency in our own.

Dun's Review says with respect to the busi-

ness of last week: "As the President's final decision regarding the new tariff is assumed, but not yet certainly known, part of the hesitation which appears may be attributed to the lingering uncertainty which must soon terminate. The injury to corn is less than many apprehended, but is still believed to have reduced the yield about 500,000,000 bushels. The strike of coke workers and coal miners has ended, and while the lockout of cotton operatives is important, it affects the earnings and livelihood of a much smaller number. The business so long delayed by tariff uncertainties begins to come forward.

"In all the great industries some increase in demand for products has appeared, and the boot and shoe trade continues to lead others in recovery, as shipments from the East not only exceed last year's largely, but surpass those in August of previous years. Economy appears here in purchases of cheaper qualities rather than in purchases of fewer pairs or cases. The cotton manufacture, which has been employing a larger proportion of its normal force than most others, and accumulating goods greatly in advance of current demands, has about 23,000 workers on strike at Fall River and New Bedford to resist a proposed reduction of wages, and the mills have been closed with the apparent expectation that the difficulty will last some weeks.

"In the iron and steel manufacture the demand for finished products increases, but is at present not as large as the capacity of the works which have endeavored to resume operations, so that their competition results in prices nearly as low as have been reached at any time. Several more furnaces have gone into operation, notwithstanding the scarcity of water supply at Connelsville, and consequently of coke, and prices of pig iron are not further depressed. A moderate increase is seen in the woolen mills in operation, and agents who have offered spring goods, generally at a reduction of about 12½ per cent. from last year's prices, have taken orders for considerable quantities, but there is still uncertainty about the extent and effect of foreign competition.

"A year ago this week, payments through clearing houses dropped 34 per cent., railroad earnings 16 per cent., thirty iron works stopped and half the cotton mills at Fall River, and there were 410 failures, of which only nine aggregated liabilities of $6,400,000. The exchanges this week are larger than last year by 19.6 per cent., although they are 19.4 per cent. below those of 1892. The average daily for August thus far is 118 millions, against 111 millions last year and 150 millions the year before. The liabilities of firms failing for the second week of August amounted to only $1,613,369, and for the last three weeks to only $7,262,076, of which $2,633,209 were of manufacturing and $3,787,329 of trading concerns. The failures this week have been 234 in the United States, against 410 last year, and 29 in Canada, against 20 last year. The aggregate of gross earnings of all roads in the United States reporting for the month of August to date, is $13,004,777, an increase of 1.0 per cent. compared with the corresponding period in 1893, and a decrease of 14.9 per cent. compared with 1892."

CANADA FOR THE PLEASURE SEEKER.

As a man who examines for himself and speaks out his mind, "Don," of the Toronto *Saturday Night*, has made a name for himself. Mr. Sheppard, as his custom is, has just been off for a tour through Canada, and in the last week's issue of his paper has the following:

I have just completed my annual tour of Canada. Notwithstanding the cry of hard times, I am convinced that every province of Canada is doing very well indeed this year. There is no source of revenue important to any class of the people in any province which can be considered below the average. In British Columbia the salmon catch was magnificent and the change in the United States tariff will make the coal mining industry much more profitable than ever before, and the lumbering business there and in the North-West Territories must also be improved by the change. The wheat crop in the prairie is up to the average, and there has been no suspicion of frost so far. In Ontario, cheese and everything exportable has been realized upon better than ordinarily. In New Brunswick the average has been maintained and in Nova Scotia the catch of fish has been fair; the hay crop in the valley of the Bay of Fundy is nearly four tons to the acre; in Prince Edward Island also they have had a good yield of their staples, and there is no reason why Canada should not consider herself prosperous.

In the last three weeks I have been wandering over the Maritime Provinces, and the crop of tourists has been simply phenomenal. Boston, New York, and the Atlantic coast of the United States seem to have given up thousands of travelers who ordinarily spend their money and their holiday time in the United States. Hotels, steamers, parlor cars have been crowded beyond parallel in history. St. John, N.B., Halifax, N.S., Cape Breton, Prince Edward Island, have simply been flooded with tourists, and while the hotel accommodation is not what a Canadian would desire to see offered to visitors from abroad, yet they have been reasonably well entertained and hotels are being multiplied at a rate that really is surprising. Yarmouth, N.S., which has one of the coolest and most equable of climates in the world for a summering place, and Sydney, Cape Breton, where every night is cool, have both added to their hotel accommodation in a way that should make Toronto feel as if it were being overlooked by tourists. The steamers and the farmhouses, and the boarding-houses, and all the agencies that could contribute to the comfort of strangers, have opened wide their doors, and a summer of unusual activity and prosperity is the result.

While it affords every Canadian who travels an immense amount of pleasure to see the lakes, rivers, bays, gulfs and streams of Canada thronged by tourists, it cannot but strike a Torontonian with grief to see how this, the most charming city of the whole country, a place with the finest climate, and in the centre of the greatest number of attractions, is being disregarded. People will not come here and remain for more than a day or two because our blue laws are so notorious and our Sunday arrangements so exasperating. Thus Toronto is avoided as if we had but little to offer, though as a matter of fact we have the most attractive place in the whole Dominion, and I would not be afraid to assert that there is no summer place with such a charming climate in all America; yet while every place in Eastern Canada has been thronged to overflowing, the Queen's Hotel and the Rossin House, sufficient to entertain the guests of thirty years ago, are still quite sufficient to entertain the guests of to-day. Other cities are building grand hotels. The Windsor, in Montreal, is attracting visitors from all over the continent; the Chateau Frontenac is making Quebec an attractive point, yet Toronto worries along with its old hotels, and finds no inconvenience in taking care of everybody who comes. A believer in the attractions of this city, one loving the town and its people, may be pardoned for wondering why the mistaken policy which has made Toronto the laughing-stock of the North American continent should still be pursued, while we have every attraction, and the other cities lacking in our beautiful climate and our splendid people, manage to have a thousand tourists where we have but ten

Of course Prince Edward Island and the cities on the sea have the attraction of salt air, but we have attractions ten thousand-fold greater than they. We have the waters of the great lakes, the rarified climate of Muskoka district, the hunting and fishing and the accessibility to the great centres of population, yet we get nobody, comparatively speaking, and the East gets everybody. We should pause and examine our policy and find out whether being the centre of church conventions is sufficient to hope for in this great city and the great lake country of which it is the centre. Of course if we are suited with the notoriety we have of being "too good to be on earth," and if this is our greatest attraction, we can pursue our present policy, quite satisfied with the lemonade we sell and the curl papers that are left with us. If we desire to be "in it" with the great routes over which tourists are going, while merely glancing at Toronto while passing, we must make some effort to attract people and to keep them here for weeks instead of hours. Take, for instance, Truro, N.S.; they have a park that naturally is not as attractive as our Rosedale ravines, but public-spirited citizens have taken time and spent money in fitting up their little valley with walks and drives, with arbors and cascades, until we are simply distanced. The amount of money spent has been small, but the results have been enormously attractive. Every dollar has been expended to good advantage. * * * * * * *

There is a popular idea that the Intercolonial Railroad is a misbegotten child of Confederation, a ramshackle, ill-managed affair that only needed to be seen to forever disabuse the popular mind of the idea of governmental management of a transportation system. The very opposite is the case. The Intercolonial is one of the best run railroads in America. The train service is good, the employees are obliging, well dressed, and prompt in their attention to the public. The cities, towns and villages have a service vastly superior to that given by the Grand Trunk; the cars are cleaner; the time made on the roads is good; the service exact to a moment, and everything is conducted with the same precision and comfort to the citizen which mark the post-office and such other ramifications of the Government system. These furnish us the object lessons that prove that there is no phase of the transportation system or the system of communication between towns and cities that cannot profitably and properly be conducted by the Dominion rather than by private corporations. The heavy charges for building iron bridges, switches, stations, etc., have been paid from year to year, rather than heaped up in capital account, and from this time on we have a right to hope that the Intercolonial will be at least self-sustaining, while after the fast Atlantic service touches Halifax the road will be still more profitable. * * * * * * *

One thing Canadians should always remember, and that is that they should spend their money at home. If they want salt air and seaside resorts let them go to their own coasts—they are far superior to Old Orchard Beach and Portland, and the places that have a certain fashionable reputation—keep our dollars at home and assist our American cousins in popularizing our own coasts. It only needs the co-operation of Canadians to make the watering-places of Canada popular. The people from the American neighborhoods that Canadians frequent leave home and summer on our coasts. The prices charged at Canadian seaside resorts are very much less than half that are paid on the Yankee coasts; the attractions are greater, the climate better. This is proved by the vast number of people who come from the United States to summer with us. It does not look pretty to be narrow and small in our calculations, yet let us accept the judgment of our American cousins that Nova Scotia and Prince Edward Island and Cape Breton are more attractive than Maine, and spend our money in our own country, on our own railroads and our own steamers.

Commercial.

MONTREAL MARKETS.

MONTREAL, Aug. 29, 1894.

ASHES.—Receipts all this month have been remarkably light, and still continue so. Prices are again stiffer, first quality pots being now quoted at $4.15 to 4.20, seconds $3.75 to 3.85; a lot of 30 brls. bought from the maker this week realized something over $3.80. In pearls there is not a thing doing, and no receipts reported; last sales were at $6.50.

DAIRY PRODUCTS.—The week has developed quite an advance in cheese, due mainly to speculation, for though cable quotations are slightly better, the state of the English market does not warrant the higher prices being paid, which are half a cent ahead of last week's figures. Finest Western colored is quoted at 10¼ to 10½c.; ditto, white, 10¼ to 10⅜c.; finest Eastern colored, 10⅛ to 10¼c.; white, 10⅛c. per lb. Butter prices are also firmer; we quote creamery 18½ to 19c.; Townships dairy 16 to 17c.; Western, 14 to 15½c. per lb. Eggs are easier under larger receipts at 9 to 10c. the dozen.

DRY GOODS.—It is yet a little early for sorting fall business, and not much activity is looked for during August. Travellers on Western routes are nearly all in town, as a fall excursion has been arranged for buyers from all points west of Kingston, good to leave August 31st and September 1st, 2nd and 3rd, and a goodly number of buyers are expected to avail themselves of the opportunity of making their selections from stock. Prices in some lines are a little unsettled owing to the intense competition existing among manufacturers of domestic woolens. Some wholesale buyers have already sailed for Europe to make spring purchases. Collections are on the slow side.

Total grain	727,700	692,314
Oatmeal	.....	.....
Flour	35,168	.....

GROCERIES.—The improvement in demand in this market noted last week is maintained, and a fair amount of trade doing. The lively interest in teas continues, and further considerable sales are reported to St. Paul and other western American points, principally cheap Japans ranging from 11½ to 14½c. One house here, a branch of a Japan house, has sold some 4,000 packages during the last few weeks, and is now quite out of stock. A leading authority in the grocery trade questions if, at any time within the past twenty years, the country at large has been so bare of teas, and everything points to higher prices. Eastern exchange has advanced from two shillings and a half-penny to two shillings three pence farthing as quoted on the 24th, while the Japan market is full a cent advanced. A London letter just to hand reports everything in blacks and greens up and still advancing. Sugars are again up in New York, and the market there for refined is now a half a cent above the local level, but prices here have not yet been further advanced. There is no unusual request just now, but September is expected to develop a lively demand, when higher prices may, not unreasonably, be expected. Transactions in granulated at the refinery are mainly at 4¼c. for fair lots; yellows, 3¾ to 4c. per lb. A local operator is reported to have just closed out some holdings of raws in New York at a profit of $40,000. Rice is steady at regular prices; Standard B., $3.45; English style, $3.30; crystal Japan, $4.25; Patna, $4.25 to 4.75; Carolina, $6.50 to 7.50. Valencia raisins are reported a good crop, and Denia quotations are 17 shillings for selected and 14 shillings for fine off stalk. Patras cables for currants are from 8s. to 10s. 9d. for ordinary grades f.o.b. in brls.

HIDES AND TALLOW.—The local market for hides is stronger, and 4c. per lb. may now be quoted as the regular price paid by dealers for No. 1 light green hides, with sales to tanners at 4½c. For heavy steers 5 to 5½c. is being paid, though 5½c. is all that can be got from tanners for cured hides under the most favorable circumstances. There is also great competition among dealers over lambskins, which are being bought all the way from 35 to 50c. each, though prices from tanners do not warrant anything like the latter figure. Tallow continues very dull at about 5½c

LEATHER.—Business may be said to be somewhat better. Sales of slaughter sole during the past ten days are said to aggregate some 10,000 sides; a sale of 3,000 sides of splits is also reported, with some other moderate transactions. In prices generally there is a steadier feeling, and there is an opinion in some quarters that values have reached the turning point. A London letter just to hand, reporting the sale of a lot of Canadian splits, anticipates some improvement there, and says junior splits are in good demand. The American market is reported much improved, with shoe manufacturers buying quite freely. We quote:—Spanish sole, B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do. small, 10 to 12½c.; calf-splits, 27 to 30c.; calf-skins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American. 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The Glasgow iron market is reported somewhat firmer, and Summerlee pig and equal cannot well be sold here under $20 per ton, which people are not disposed to pay, when domestic and American iron to suit their purpose can be bought at much lower figures. We hear of a purchase of 600 tons of No. 2 Niagara at about $17 net cash, as well as some other moderate lots, and American iron seems now to have obtained a pretty permanent foothold in this market. Makers of domestic iron seem inclined to be a little firmer in their ideas. Black sheet iron is easier at $2.30 for No. 28, and $2.20 for No. 26. Coke tins may be quoted lower at $2.75 to 2.85, and a round lot sold the other day at even something considerably under the inside figure. Tin is very much firmer in Britain, also lead, which is cabled up to ten pounds. We quote:—Coltness pig iron, none here; Calder, No 1, $19.50; Calder No 3, $18.50; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.25 to $16.75; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.10 to 2.15; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to $6.25. Black sheet iron, No. 28, $2.30; No. 26, $2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.85; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6¼c.; No. 26, 6½ to 6⅝c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to

HOMEWOOD RETREAT, GUELPH, ONT.

A Private Asylum for the Care and Treatment of the Insane, Inebriates and the Opium Habit.

Directors:

J. W. LANGMUIR, Esq., Ex-Inspector of Asylums, etc., for Ontario, President

E. A. MEREDITH, Esq., LL.D., Ex-Chairman of the Board of Inspectors of Asylums for Canada, Vice-President.

ROBERT JAFFRAY, Esq., Vice-President of the Land Security Co., Toronto.

JAMES A. HEDLEY, Esq., Editor MONETARY TIMES, Toronto,

Medical Superintendent:

DR. STEPHEN LETT,

Who has had twenty-four years experience in the Asylums of this Province, in the treatment of mental diseases, and who has devoted special attention to the study and treatment of Alcoholic Inebriety and the Opium Neurosis.

THIS admirably appointed and salubriously situated Retreat, whilst possessing all the advantages of a larger institution, enjoys the privacy and quietness of a gentleman's residence.

The number of patients being limited, each case comes under the direct personal care and attention of the Medical Superintendent.

There are a few vacancies for both male and female patients.

Application for admission should be made to the Medical Superintendent, either personally or by letter, giving a short outline of the history and symptoms of the proposed patient, whereupon the requisite blank forms will be furnished with full instructions as to their execution.

Habit Cases and Inebriates are received upon their voluntary application according to a prescribed form.

For terms and other information, address

DR. STEPHEN LETT,
Homewood Retreat, Guelph, Ont.

4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4½c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

Oils, Paints and Glass.—Matters in these lines are looking up a little, and there are indications of the fall trade opening up pretty well. In turpentine the slight advance noticed in Southern markets has been lost, but local prices remain steady. The advance in Belgian glass reported last week is confirmed, and is stated to be as much as ten per cent., but local quotations are not yet revised. We quote: Turpentine, 46c. per gal. for single barrels; two to four barrels, 45c. Linseed oil, raw, 54c. per gal.; boiled, 57c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 40 to 42c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

Wool.—The improvement noted in our last continues, but there is really little stock of any kind on spot. Cape is very steady at 14 to 16½c. per lb., nothing being now available under the former figure; B.A. scoured is quoted at 26 to 32c.; Canadian fleece, 17 to 20c.; pulled supers, 20 to 22c.; extra, 23 to 26c. per lb.

TORONTO MARKETS.

Toronto, Aug. 30th, 1894.

Drugs.—During the last two weeks the movement of goods to the retail trade has been exceedingly limited in volume. But the last two or three days have brought improvement, and will prove, we hope, a fair augury for the fall The proviso in the recently revised Canadian tariff, that goods bought in bond must be valued at the price at which they are sold in the country where purchased, has not yet resulted in any alteration of the course of trade. The ostensible object aimed at is to further direct importation, and the tendency will probably be to favor the large importers at the expense of the smaller ones. In the local market the following drugs may be listed as firm: Opium, morphias, camphor, quinine and oil of anise seed, while on the other hand, mercurials, salicylic acid and oil of peppermint are weaker. Merchants continue to complain of slow collections.

Grain.—Wheat is dull and lower. The new Ontario crop is now being marketed; fall wheat generally shows up well, but samples of spring do not turn out so well. The drouth, most severe in the western peninsula, has injured the crop to a greater or less extent. There is no export demand, and none is expected until the end of September. Wheat quotations are slightly lower in comparison with those of last week. Barley has commenced to move, but as yet we hear of no transactions with American merchants; it is not thought that any will take place until Canadian stocks accumulate. American buyers are apparently willing to pay 7 to 8c. a bushel more for Canadian barley than for the product of the Western States; our exporters will, of course, on the other hand, have to pay the 30 per cent. duty, which amounts to about 12 to 15c. a bushel. Oats are dull, and a decline may be expected as soon as they begin to move. Peas have not begun to move as yet, but they will be well received when once they reach the market.

The stocks of grain in store at Port Arthur on Aug. 18th were 913,620 bushels. During the week there were received 17,138 bushels, and shipped 244,418 bushels, leaving in store on Aug. 24th, 776,340.

Groceries.—The present month is always a quiet one for the grocery trade. We find that Valencia raisins are out of the market. Stocks of currants carried over by Toronto houses will not be large. As yet sugars show no active movement, but a week's time is expected to bring improved conditions. Teas are fairly active. During the week some large shipments of Japan teas have been received. Cable advices from Japan report an advance in the price of teas of 1 to 2c. per lb.

Hardware and Metals.—The trade of the last week has been a little on the quiet side. The movement now taking place is in hardware and tinware supplies for the fall trade, Crosscut saws, axes, axe handles, rope bolters, cow ties, stove boards, elbows, etc., are passing out from wholesale supplies. The plumber's trade has fallen off in volume very materially this last few days. Business in lamp goods is brisk and will probably remain so for the next month. Some metals are moving fairly well, galvanized iron, tin plate and block sheet iron finding the best movement. Import orders for Canada plate are now arriving at their destinations throughout the country. Quotations remain on the whole very steady. Tin is quoted lower, bars at 19⅞ to 20c.; ingot, 18⅞ to 19c. Galvanized iron is slightly easier, with a quotation of 50 to 50-and-5 per cent. off list. Canada plates are somewhat lower, as are some brands of tin plate, as noted in our prices current. The city retail hardware trade, long since described as dead, fails to show improvement in any of its branches. Wholesale merchants are not expecting any rush during the exhibition weeks, but many visitors will be received and old friendships renewed.

Hides and Skins.—The firmness which we reported last week as existing in heavy hides still continues, although tanners are still confident that it is but a temporary strength and cannot be sustained. Montreal dealers are reported as paying advanced prices, but this is said to be due rather to local jealousy than any strength in the market. The *Review* on Monday says of the Chicago market: "The general opinion is that the extreme edge is off the hide market. No one, of course, is so foolish as to predict an immediate decline, but the upward movement has been checked and the packers are not quite so buoyant. After all, hides haven't advanced more than the quality has improved." Fresh stocks of shearlings and lambskins are readily taken at 35c. Tallow sells well in the better grades, but poor stock

Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

It works on Sundays and Holidays,

Night and Day, Year after Year.

What Does?

Interest Does.

It never stops. Let it work for you. And it is important whether you get Five or Seven per cent.

THE GREAT-WEST LIFE ASSURANCE COMPANY offers to its patrons the advantages resulting from investments at higher rates of interest than are current in other quarters of Canada. In his address at the last annual meeting of that company, Alexander Macdonald, its President, gave this illustration:

"To show the advantage to insurers of the better rates of interest prevailing in the West, take a $10,000 Twenty Year Endowment Policy at age 36 as an example. The reserve or amount laid by each year to provide for payment of the policy at maturity in twenty years is $302; this sum annually for 20 years will give:

At American rate of interest, 5 per cent.	$10,485
At Eastern Canada rate of interest, 5½ per cent.	$11,110
At Great-West rate of interest, say 7 per cent.	$13,248

The Great-West Life Assurance Company

"With a paid-up capital equal to that of the largest company in the world, a higher reserve and a better interest earning capacity than any other Canadian company, our agents and shareholders can unhesitatingly recommend their friends and acquaintances to take their insurance with **The Great-West Life.**"—*Extract from address of President.*

continues to form the bulk of the offerings.

LEATHER.—In no material respect does the market differ from that of last week. Merchants are sending a fair quantity of stock to the eastward, and refuse to cut prices on low grades. Western manufacturers are making but moderate demands. Some buyers have been in the market turning over stock for spring goods, and shoe designers have begun to think out their spring samples. We hear of some shipments of sole going forward to England.

PROVISIONS.—Trade is quiet, but prices have an upward tendency. Choice qualities of butter are wanted at 17 to 18c.; other grades are in abundant supply, with quotations steady at 13 to 15c. Cheese is firm at 10½ to 10¾c. per lb. In hog products there is a firm feeling, long clear bacon being quoted at 8 to 8¼c., hams at 11½ to 12½c; lard at 8½ to 9⅛c. per lb.; these prices are slightly in advance of last week's quotations. Good stock eggs bring slightly better prices, but common stock are not wanted, and bring only from 5 to 7c. per doz. No new evaporated apples have as yet reached the market, but may be expected shortly.

SEEDS.—Interest has now centered almost exclusively in alsike clover. The acreage this year has been reduced in consequence of last year's unfavorable record. The results of the threshing thus far, however, show good quality and a yield to the acre fully up to the average. The business now doing is between the grower and the country merchant. The market opened at $5.50 to 6.00 for prime stock, with 25 or 30c. per bushel in excess of this paid for choice selections. Offerings, as usual, show wide variations in quality. As a result of an urgent demand for early fall sowing, stocks of timothy seed are somewhat scarce, and prices are considerably higher than at the close of the season last spring. Offerings of timothy this week have been more liberal and dealers anticipate lower prices. At present merchants are paying $2.50 to 3.00 a bushel, according to quality.

WOOL.—Those who were of the opinion that prices of Canadian fleece would advance in the event of wool being admitted free in the United States, have been disappointed. Some sales of considerable amount have been made since Tuesday, but the prices obtained were, we understand, not in excess of previous quotations. In fact, since the Wilson bill became law, the situation in the United States has lost strength in consequence of the quantity of wool, some 63,000,000 lbs., which was immediately taken out of bond, a large portion of which was placed on the market. This, however, is but a temporary condition, and a month or six weeks' time is almost sure to bring improvement.

BARNEY AND THE PRICERS.

A STORY OF INFORMATION FROM A BOWERY JEWELLERY STORE.

A young man apparently in good circumstances walked into a jewellery store on the Bowery one evening, took a good sized diamond ring from his finger, and laying it on the counter, said to the clerk:—

"How much will you give me for this ring?"

"Do you want to sell it?" asked the clerk, taking a rapid visual estimate not of the ring, but of its owner.

"Well, I might sell it if the offer was enough."

"The boss is out, and I can't buy for the store," remarked the man behind the counter.

"Well, you might take a look at it and give me an idea of what you think I'd be likely to get for it."

Picking up the ring the clerk examined the stone and said: "You can't tell much about a diamond under this light. I'd have to see it in the day time. It might be off color, and I couldn't tell it in this light. Bring it in to-morrow or next day."

The owner of the ring, after a few more questions, to which the other returned evasive answers, went out, and the clerk turned to a reporter, who happened to be in the store at the time, and observed:

"That fellow sell that ring? Not in a thousand years. I spotted him the minute he came in. He's a pricer, but he didn't get much out of me."

"What's a pricer, and why wouldn't you tell him what his ring was worth?" was asked.

"One at a time when you come to questions. I wouldn't tell him what the ring was worth because he's got too good a nerve, coming in here and wasting my time valuing stones for him that he won't sell. If it got known that I was a good thing for offering prices on stones the place would be full of pricers trying to work me all the time. What's a pricer? Why, just what you saw there. A chap that doesn't know what his stuff is worth and tries to get some man whose business it is to know about those things to tell him. It's a regular graft down here. There's two kinds of pricers around. One kind is the fellows that just want to find out for curiosity what their jewellery is worth. Maybe they got it in some swell jewellery store, where you have to pay extra prices for the name, and they know it and want to find out just how much the thing is really worth. They generally get angry if you tell 'em the fair price, for they think it ought to be more.

"Then there is the kind of a chap that wants to hock a ring or a scarf pin, and doesn't really know how much he ought to ask on it. He comes here and asks what we'll buy it for, to get a line on its real value; but it's a cinch that he hasn't any idea of selling it. Sometimes instead of asking how much we'll give for it, the owner will ask what we'll duplicate it for; but that doesn't work either. You can pretty generally tell a man that really wants to sell, and he's the only one that gets a price from this establishment. But you'd be surprised to see how many come here to try on the pricer graft.

"There used to be a young fellow here," continued the clerk, "that saw a good thing in a business line in this. He was sharp and knew the value of a stone quick and easy, and he

never made any breaks. A man brought in a sapphire and diamond pin for him to value one day, and Barney turned him down; wouldn't give him any satisfaction at all. Next day he came back with another offer to sell.

"'Look here,' says Barney to him, 'you don't want to sell that pin. I'm dead onto you. Your're hard up and want to soak it, and they're good stones and you know it; but you don't know how good they are, and you're trying to work me to find out. Is that right?'

"'That's right," says the man. 'I got the pin at the race track from a sport that was broke, and I got it dead cheap. Now I'm up against it and I want to hock the pin; but they wouldn't give me but $35 on it.'

"'Now, I'll tell you what,' says Barney, 'you can't expect to get something for nothing. My opinion's worth a quarter, and if you'll pony up I'll guarantee to tell you where you can get a good price on the pin.'

"After a little haggling the man gave up his quarter, and Barney told him the pin was worth $75, and easily saleable, and that if he went to a certain pawn shop and stuck out for $50 he'd get it. The man tried it and got his $50. He told his friends about it, and before long Barney found himself getting quite a little business from men who wanted to be advised as to the best places to hock their jewels and how much they ought to get on them. There was a regular lot of customers he had, and they brought their friends around, and finally the boss got on and kicked, so Barney left the place and started a little store of his own, keeping up the pricing business too. By joining the two he made a good thing out of it, for he got lots of sales cheap from fellows that wanted to sell instead of pawning, and he always gave good prices and yet made good profits himself.

"He'd be doing a cracking business now, only, of course, a lot of crooks got coming to him, and the police got onto that and used to watch the place, and though I believe Barney was on the level and the police couldn't get any evidence that he did a crooked business himself, yet he had to give it up and he went West. But he had some queer deals. One day a chap came in with a little case and set it down on the counter in front of Barney, who was looking over the morning paper. The man was a quiet, middle-aged chap, very soft spoken, and he says to Barney:

"'What are those worth?'

"Barney looked in the case and saw a diamond necklace that was worth an easy $3,000 if the diamonds were real. He didn't want to seem too eager, so he turned back to his paper a minute, kind of careless, and the first thing his eyes fell on was a big headline about a house robbery on a side street, near Fifth avenue, and a lot of valuable diamonds stolen. Barney looked at the man, then at the necklace. Then he says:

"'They're worth about ten years in State prison for you to sell. There's a better market for those in Canada or the West,' he says.

"The man pocketed the case and went out without a word. He was next heard of in San Francisco. But he wasn't the robber. His line was different. He was a big "con" man and bunco steerer, and he was doing the business for a friend, who had robbed the house and got the stuff. They never got the men.

"That was only one of a lot of cases, and Barney had to quit. While he was running we didn't have any trouble here with pricers. We'd simply send 'em to him. Now since he's quit they come in every day. Yes, that fellow you heard trying to work me for a price on the ring was the fifth to-day. But will he come back to-morrow? I don't think. He'll try some other place and get the same throw down as he got here. The Bowery ain't got any use for pricers since Barney closed shop."—*N.Y. Times.*

THE HANDY POSTAL CARD.

IT IS A RECENT INVENTION, BUT IT IS A POPULAR ONE.

The postal card is a very simple contrivance, and yet what a prominent factor in correspondence it has become in modern business transactions. No less than 1,150 millions of them are used annually in the civilized world. They unite the most distant hamlet with the largest cities in this country and Europe. None would have thought that in twenty-five years they would have come into such general use. The honor of this cheap and convenient means of communication belongs to Professor Emanuel Herrmann, of Vienna. On January 26th, 1869, he wrote a letter to the *Neue Freie Presse*, in Vienna, in which he developed his plan of a simple card which should be issued at two kreutzer (4-5 cent) by the Post Office Department, and which would be good for the Austro-Hungarian Empire. At first the department objected to making the price as low as two kreutzer, but agreed to three kreutzer. But Professor Herrmann and those interested in his plan objected to the extra kreutzer, so that finally the Government agreed to the cheaper rate, and, on October 1st, 1869, the first postal card ever issued was put on sale at Vienna. Some years later Germany also adopted Professor Herrmann's postal card idea, but it was not a great success till the Franco-Prussian war broke out, when they came into general use in Germany. Gradually other countries issued them. The United States, which handles them by the million now, was one of the last countries to adopt Professor Herrmann's idea. It will be interesting to know that he was born in Klagenfurt in 1839, and that in 1882 he was appointed Professor of Natural Economy at the University of Vienna.—*Easton Free Press*.

PRICES OF WHEAT.

The following statement has been issued by the United States Railroad and Warehouse Commission, showing the price of No. 1 hard wheat at Duluth as compared with the actual sale of 16,000 bushels of the same in Liverpool on July 24, 1894, for delivery "c.i.f." in London:—

	Cents.
Price per bushel No. 1 hard in Duluth..	57 25
Duluth elevator charges, weighing and inspection	01 30
Lake freight and insurance, Duluth to Buffalo	01 85
Buffalo elevator charges, commissions, etc	01 00
Canal freight and insurance, Buffalo to New York	03 00
New York elevator charges, etc., viz., weighing, transferring, demurrage, towing, trimming, etc.....	
Ocean freight and insurance, New York to London.....	
Loss in weight, Duluth to London.....	00 50
Cost in London c.i.f.....	71 65
2,000 quarters (16,000 bushels) sold in Liverpool for London delivery c.i.f. (cost, freight and insurance) at 24 shillings per quarter (or 72 cents per bushel)	72 00
Gain per bushel in transaction about 1-3 cent	00 35

WHICH WILL YOU CHOOSE?

A superintendent of schools of the State of Illinois, in speaking some years ago of the demand the common school system has upon society, says: "We must pay for refinement, intelligence and virtue, for training up our youth to be good citizens. Each one must contribute to the support and honor of society, or to ignorance, immorality and crime. We must pay for the school book or the criminal code. Our young men will learn to drink knowledge or drink rum, to make laws or break them, to hang upon the lips of ancient wisdom or at the rope's end. We have our choice between gatherers of midnight lore and midnight plunder, and happy shall we be if by any effort we can transmute the embryo picker of locks and searcher for purses into a searcher for the hidden mysteries of nature. We must pay a little to mould our future citizens into good ones, or a great deal to control them when they become bad ones."

SCOTTISH BANK STOCKS QUOTATIONS.

A most noticeable feature among Stock Exchange prices has been the great rise in the quotations of the stocks and shares of the Scottish banks during the last two months. This movement is mainly confined to the Edinburgh banks, but is very marked in the case of each of them, as the following comparative statement of prices per £100 will show:—

	April.	June.	Rise.
Bank.....	327 x.d.	336½	9½
Royal	229½	242 x.d.	12½
British.....	379	392 x.d.	13
Commercial	337	350	13
National ...	331	342	11

At these prices the return, on the basis of present rates of dividends, is very small for profit-earning companies. Roughly speaking, the stocks of the three old banks yield 3½ per cent., and those of the junior chartered banks 4½ per cent. In other words, they are ranked by investors pretty nearly with the Government stocks of the Australian colonies as far as steadiness of yield is concerned; the difference in the case of the junior being attributable to the liability attached to their stocks. As this is a somewhat peculiar condition of prices, it seems desirable to investigate its causes.

But first it may be instructive to see how bank stocks are valued elsewhere. The London market is probably the best guide to take in this matter. None of the English banks, however, will compare on all fours with the Scottish banks. More especially is the constitution of the old banks *sui generis*. Although there are one or two English banks with fully paid-up capital, their circumstances are special, and they are out of account in this comparison. All the important joint-stock banks have liability attached, generally to the extent of at least 4 to 1. But, owing to the high premiums at which the shares stand, this liability is much smaller relatively to the purchase price. Thus, in buying a share of the National Provincial Bank, £12 paid, the purchaser pays £50, and becomes liable for £48 more. This point, and the great strength, earning power, and general importance of the larger metropolitan and provincial banks in England, may be held to counterbalance, to some extent, the advantage of absence of liability in the case of the old chartered banks in Scotland; while in the case of the other two Edinburgh banks the comparison appears to be fair enough.

If, then, we take some of the best known of the London banks, it will be found that in every case the quotations of their shares yield a higher return than is obtained from any of the five Edinburgh banks. The following will show this clearly:—

		Per Cent.
London and Westminister.....	yields £4	6 6
National Provincial	" 4	7 6
National.....	" 4	10 0
London and County.....	" 4	12 6
London Joint-Stock.....	" 4	13 9
Lloyds'	" 4	16 3
Union.....	" 4	16 3

Now, these banks are all strong and of high repute, yet none of them command as high a price as the Edinburgh banks. What is it that gives this peculiar fascination to the Scottish bank stocks? For it is not only at present that this special appreciation is shown; for many years Scottish quotations have ruled higher than English. No doubt that confidence in the banks, which is a sort of hereditary instinct among the Scotch, has something to do with it; but a Scotsman is too canny to let his bawbees depend on that altogether. There is, no doubt, a belief, founded on experience, notwithstanding some trials to faith, that the banks are cautiously managed, and that banking business in Scotland is less risky than in England But, on the other hand, the Scottish banks have, in recent years, been studiously cultivating English business. The most potent influence, no doubt, is the element of trust investment, for which the bank stocks are a very convenient medium. This, of course, will only apply strictly to the old banks: but the others are affected in sympathy.

While this may, to some extent, explain the general position, it will hardly apply to the sudden and great rise in price to which we are particularly alluding, for it does not appear that the recent rise is specially due to trustees' investments. The suggestion has been made that an expectation of increased dividends has led to buying. That, however, may be dismissed as of little moment; he would be a bold man who would buy at present on such a basis. There are only two or three of the banks whose accounts show the ability to pay more, and they have shown no disposition to encourage such an expectation. That ability may exist, but the fact that it is not indicated may be taken as satisfactory evidence that no upward movement is presently contemplated. Indeed, these are no times for launching out, but rather for conserving strength.

A reaction in prices has taken place since the quotations we have given were attained to; but this is merely the inevitable result of all such movements. It is not indicative of any change of view on the part of purchasers, but is produced by realizations by persons who are holders at lower prices. Unless circumstances change considerably in the immediate future, we may, therefore, expect to see a resumption of the upward movement, for it doubtless springs from the great difficulty investors find in placing their money satisfactorily. They look around them, and, having no confidence in the many stocks offering, say in effect, "there are the old Scottish banks, which have weathered many a storm without damage and with increased repute, whose histories we know, whose directors and managers we know; what can be better, in our dubiety, than to swallow the high prices and have an easy mind."—*North British Economist.*

THE MEERSCHAUM PIPE.

The meerschaum is to all other pipes what the diamond is to precious stones. No other material is so easily wrought into beautiful forms, and nothing takes such growing rich colors by use, while at the same time its porousness absorbs much of the essential oil and thus renders the smoke less harmful. Meerschaum, as the name signifies, is seafoam, or "keff-kill," to use the Tartar term for it. It is found in various parts in Asia Minor. The principal ingredients are a silici magnesia, carbonic acid and water. It is found chiefly in veins and lumps among serpentine rocks. In its natural state it forms a lather like soap and is used in washing.

Paid-up Capital ...	100,000 00	Reserve	54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

ACCIDENT INSURANCE IN FRANCE.

A NOVELIST'S EXPERIENCE.

A correspondent of the *Insurance Record* of London, a well-known novelist, who asks that journal not to publish his name, has written the following account of his relations with a French accident insurance company:—

At the commencement of 1886 I insured with the Foncière, Paris, against accidents, my policy being for ten years. In the event of my death from accident before the expiration of that period the company contracted to pay ten thousand francs. Their agent who insured me was a personal friend, since deceased; and as he explained to me, with others of our compatriots (we were all English residents) who were insuring at about the same time, the "very advantageous" conditions of our policies, I for one did not look into the voluminous clauses of the policy I signed. This was of course extremely unbusiness-like, but I am not a business man, and I trusted my friend, the agent—an Englishman born in France. For two or three years I paid the premium every January. Then, having heard of the extra-yordinar difficulty experienced by various acquaintances in obtaining compensation for accidents, I resolved to let the policy lapse. Accordingly, I took no notice of the next application for the premium. A second and third application was sent; and as I coutinued to ignore them a liveried messenger called and informed the servant, in my absence, that if I did not pay within a few days the brokers would be put in. When this message was repeated to me I ridiculed the idea, never having heard of such a thing in connection with the British accident insurance companies. However, before the expiration of those few days, the assistant-secretary paid me a visit, and told me—quite courteously—that if I did not pay the premium I should undoubtedly be sold up Then it was that for the first time I discovered what my unbusiness-like habits had done for me. The policy I had signed was a contract for ten years certain. I begged the assistant-secretary to set me free, as a personal favor, pointing out to him that they had already put three premiums into their pockets, and offering to recommend the company to my French friends as a set-off. This was quite impossible he informed me. We adjourned to a café and drank beer, and the charm of his society almost reconciled me to my bond. I continued paying the premiums rather than be sold up, but carefully refrained, I need scarcely say, from recommending the company to anybody.

Last year the explosion of a soda water bottle injured one of the fingers of my left hand. I was under surgical treatment for fully three months; but as the accident occurred in England I made no claim upon La Foncière. In the Whitsun week of the present year I dislocated my left foot in a fall whilst playing lawn tennis at my club, in the Neuilly suburb of Paris. The accident occurred on the Thursday afternoon. It was not until the Saturday following that a visitor, condoling with me in my plight, persuaded me to apply to my valued Foncière, with its capital of twenty-five million francs. My letter reached them on the Monday morning. I promised to furnish the names and addresses of the persons who witnessed the accident; referred them to the *concierge* of my house, who knew that I could not even get downstairs; and gave the name and address, also, of a gentleman whom I had been obliged to employ to replace me in an engagement which had suddenly required my professional attention. I was called away to London the next day, and a most expensive journey it was, for I had to be supported by attendants, and when I got to Victoria found that London was in the throes of a cab strike. Here is a translation of the letter which I received from the manager of La Foncière:—"The accident of which you advise us occurred on Thursday last, consequently your report to us is unduly late. Clause 17 allows a delay of forty-eight hours to the assured person for advising us of any accident. The same clause further requires the assured person to append to his claim a detailed declaration as to the circumstances of the accident, together with a certificate from the doctor called in to give the immediate care to the case (*les premieres soins*). Now, you do not furnish any such documents, and the indications which you supply are insufficient to replace them. It is distinctly for you yourself to produce the proofs of the accident, as of the incapacity for work which may be its result, and it is not for us, on our part, to occupy ourselves with the collection of them. In addition to these reserves we have to add others respecting your departure for London, and we must refer you to the closing portion of clause 8 of the general conditions of your policy, stipulating that the indemnity is only due in so far as the assured person follows medical treatment, and submits himself to the rest recognized as necessary for his cure." There I have let it rest. Perhaps the case may interest you or some of your readers. As for me, the Foncière will totally cease to present any interest after 1896.

INSTITUTE OF BANKERS IN SCOTLAND.

The Institute of Bankers in Scotland held its nineteenth annual meeting June, 1894, in the Institute Hall, Edinburgh—Mr. T. H. Smith, general manager of the National Bank of Scotland, presiding. The report of the Council, submitted by Mr. J. Macbeth Forbes, the secretary, stated that during the past year eighty-six members and associates had been admitted, while thirty-six had been removed by death and from other causes, leaving 910 on the roll at the close of the year. To these may be added seventy-five subscribers in Glasgow and Edinburgh, making the total number connected with the Institute 985. The candidates at the March examination had numbered 350, as compared with 323 in the previous year. A larger proportion passed. In the examinations for membership the total number of papers presented was 560, as against 358 for last year. Of these there were in law and banking 364 papers, of which thirty, or 8 per cent., were rejected. On all other subjects the number was 196, of which twenty-four, or 12 per cent., were rejected. In honors examination there were forty-one papers tendered, as against four in 1892, and of those only six were rejected. The Council recognized with pleasure that there was along with the increasing number of entries a marked improvement in the quality of the work done by the candidates. The report concluded with an expression of high appreciation of the valuable services rendered the Institute by Mr. Charles Gairdner, LL.D., retiring president.

The chairman said their retiring president, who was unable to be present, had prepared some notes which he (the chairman) thought he could not do better than read to the meeting Mr. Gairdner said that last year he thought it his duty to call attention to the large percentage of failures to pass in the more elementary subjects, and he was glad to be able to refer to this subject in a different tone. Among the candidates for the associateship the rejections in arithmetic, which last year were 43 per cent of the whole, are this year only 18 per cent.; in geography last year 43 per cent. is this year only 18 per cent.; and in English composition 40 per cent. has been reduced to 36 per cent These changes, he thought, were all in the right direction, for a high standard in these subjects was absolutely essential, and in many home and foreign banks they form the chief test for admission to the service. It was also satisfactory that there were forty-one candidates who passed the full members' examinations this year as compared with sixteen last year, and that of these there are three who passed with honors under the new and more stringent regulations. On behalf of the council and himself, Mr. Gairdner offered them hearty congratulations. He said that the position gained was a highly honorable one, for it showed that thus early in their career they had some of the attainments which qualified for the higher duties of their profession. They must not suppose, however, that membership was an end in itself. It was rather of the nature of a decoration which distinguished them from those who had not passed, and signifies chiefly a certain superiority in their equipments. But these equipments had now to be turned to good account by active and energetic service in the interests of others.

The chairman emphasized the importance to all members and others of having a proper acquaintance with English composition, and then moved the approval of the report, which was seconded by Mr. John Gifford, who said that the institute had raised the professional standing of the Scottish banks. The report was adopted.

It was announced that Mr. Robert Murray, North of Scotland Bank, Dundee, and Mr. George J. Scott, of the Union Bank, head office, Edinburgh, had won Mr. Gairdner's 1st and 2nd prizes of ten guineas and five guineas respectively for the best essays on "What Limitation should be imposed by Law on the Right of Bequest."

The election of officers being the next business, Mr. H. A. Hotson, manager of the British Linen Company Bank, was elected president, as successor to Mr. Gairdner, who was thanked by the meeting for his services to the Institute during his term. Mr. Andrew Aikman, general manager of the Commercial Bank of Scotland, was appointed a vice-president in room of Mr. T. H. Smith.

THE AUSTRALIAN BANKS

The condition of affairs in Australia, particularly in connection with the banks, has a keen interest for thousands in this country. We regret to say that we cannot see our way to agree with the opinions expressed by the chairman of the London Bank of Australia at the recent meeting of the shareholders of that institution. The wool trade is in a bad way, and the frozen meat business is but slightly better, and the decrease in the imports is nothing to speak of. A Melbourne correspondent, who is in a position to know how matters are in the colonies, says they are far from satisfactory.

With respect to the capital of the Australian banks, it appears the total has increased from £15,588,755 on March 31st, 1893, to £19,532,512 on December 31st last. The new capital demanded by the New South Wales banks is being rapidly paid up, while most of the Victorian banks have also been successful in the matter of calls, but signs of exhaustion of many shareholders are increasing. Great difficulty exists in the disposal of bank shares, as the public will not touch them. There also appears to be a great dearth of safe and profitable channels for employing capital, and the banks have reduced their deposit rates to 4 per cent. London has been sending over orders for the purchase of securities, which the colonials are parting with, having apparently less faith in the future than people on this side. Broken Hill Proprietary Shares have been active amongst other securities in this connection, and some hitherto firm holders are selling to London buyers. It is stated that the limit at which the mine can produce silver is 1s. 10½d. per ounce, but through a saving in the working expenses this price has been reduced to some extent. It is observed thatthe liquidations of the various financial institutions are proceeding in an unsatisfactory manner.

It is stated that a project is under way for the formation of a joint-stock company to take over some of the unrealizable assets of the Australian banks which were reconstructed last year. It would be a very important matter for the banks if they could sell part of their property, for their liabilities as regards deposits amount to £52,634,495, spread over twelve years beginning in 1896. The bulk of repayments, however, fall due in 1898, 1899 and 1900, aggregating £33,737,712. The amount due in 1896 is only £51,958, and in 1897, £1,590,548, but in 1898 the amount is £10,605,772. Of this total the following banks are responsible for the following amounts:

Commercial Bank of Sydney..	£2,025,747
Commercial of Australia	2,000,000
National of Australasia	2,111,144
Australian Joint Stock.....	1,538,579
Bank of Victoria	1,493,334
City of Melbourne.....	700,000
Colonial of Australasia.....	520,000
Royal of Queensland.....	165,000
Bank of Queensland.....	51,968
	£10,605,772

Our contemporary, the *Australian Trading World*, has compiled a valuable set of tables giving the position of the twenty-five Australian banks at present in existence, compared with how they stood last year. From these figures it appears that the total deposits in May last were £135,600,823, as against £154,019,495 in April, 1893, or a decrease of about 12 per cent., while the advances have fallen off about 11 per cent. The amount of capital locked up in landed property is £6,330,214, of which £3,630,431 belong to the twelve reconstructed banks. As shown above, the heavy payments do not begin until 1898, so that the banks have time to pull round if trade improves during the next four years, when the burden may be lightened by the receipts of fresh deposits to replace those falling due, or a renewal of the old ones, if confidence has returned.—*Finance Union.*

Sun Life Assurance Co. of Canada . . . . . .

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond

OF THE

North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

DECISIONS IN COMMERCIAL LAW

LESLIE v. YOUNG & SONS.—The House of Lords has decided that the mere publication, in a particular order, of time-tables which are to be found in the publications of various railway companies, is not sufficient to give rise to a claim to copyright. The right may, however, exist in a compilation of information as to coach routes, ferries and steamers published in the form of an abstract for the use of a particular locality. Although it is not to be disputed that there may be copyright in a compilation or abstract involving independent labor, yet when copyright is claimed in such a work as a compilation of railway time-tables, it must be clearly established that there has been a substantial appropriation of another person's independent labor before any proceeding on the ground of copyright can be justified. If a book depends for its value upon a particular portion, that portion may be treated as an independent work and protected by the copyright law.

HANFSTAENGL v. EMPIRE PALACE.—The English Court of Appeal decides that a sketch in a daily illustrated newspaper of a *tableau vivant* representing a picture may, though the tableau does not, constitute an infringement of the copyright of the picture, within the meaning of the Fine Arts Copyright Acts; but whether it does or does not is a question of fact, and depends upon whether or not the sketch can fairly and reasonably, and as it would be judged by a jury, be considered a copy or reproduction of the picture or of the design thereof.

MELLIN v. WHITE.—A retail trader who is in the habit of selling goods manufactured by another person may be restrained by injunction from attaching to the wrappers in which the manufacturer puts up his goods for sale a label containing a false and disparaging statement as to the goods, where such statement has caused or is calculated to cause damage to the manufacturer in his business. This is a pronouncement of the Court of Appeal in England.

GOUGH v. WOOD & CO.—The defendants supplied and fixed for E., a nurseryman, on his premises, which were mortgaged to the plaintiff, a trade fixture, which, according to a hire and purchase agreement between E., E.'s landlord, and the defendants prior to the mortgage, was to remain the property of the defendants till the instalments of purchase money were paid. The plaintiff took the mortgage without notice of the agreement. E. having made default in payment of the instalments, the defendants removed the fixture before the plaintiff entered into possession. The Court of Appeal in England held that the defendants were entitled to remove the fixture.

PORTSEA ISLAND BUILDING SOCIETY v. BARCLAY.—Where a building society had exceeded its borrowing powers, but was not allowed by its rules to lend money on second mortgage, joined in a deed whereby it purported to postpone its charge upon certain hereditaments which had been mortgaged to it by one of its members for an advance with interest at 5 per cent. to secure a smaller advance with interest at 6 per cent. by a third party to the mortgagor, to enable him to reduce his debt to the society by that amount, the society arranging to pay the costs and the extra 1 per cent., Romer, J., held that the deed was *ultra vires* the society, as the directors were not authorized, either expressly or implied, by the rules, to enter into the transaction, which could not be regarded as a realization of its security. And as no potential necessity was shown, the Court could not impose terms on the society in favor of the third party, who was not entitled to rank *pari passu*, but was only a second mortgage of the hereditaments. Nor could the third party be put in the position of those creditors of the society who had been paid off with the money he had advanced to the member.

"THE HUNTSMAN".—A managing owner, who has been deputed by his co-owners to employ a vessel for their benefit, in such trades as he may from time to time think fit, has authority to give orders for repairs, fitting and outfit necessary for such employment, according to Barnes, J. If the ship is damaged, a person repairing her may do so on the credit of the owner, by the orders of the managing owner, although there is reason to believe that the ship is insured and that the underwriters are liable for the damage.

BUNTING v. HICKS.—The plaintiff and defendant were owners of lands formerly belonging to the same person. A small stream of water had for many years originated in a spinney on the defendant's land, and had flowed down in a defined channel to and through the plaintiff's land to a brook. The conveyance of the plaintiff's land expressly included all easements and watercourses "appertaining to" the land conveyed. An injunction was granted by the Court of Appeal in England to restrain the defendant from diminishing the flow of water down the stream by abstracting water from the spring that fed the stream, on the ground either that there had been an implied grant to the plaintiff of a continuous and apparent easement, or that he had the right of an ordinary riparian owner to the flow of an ancient stream.

WALLACE v. UNIVERSAL AUTOMATIC MACHINES CO.—The English Court of Appeal holds that by the compulsory winding up of a company under the Companies Acts before the date fixed for payment of its debentures, the time of payment is accelerated and the debenture-holders are entitled to realize their security for the full amount.

IN RE BLOXWICH IRON AND STEEL CO.—Wright, J., holds that where a majority in value, but not in number, of creditors of a company desire the appointment of the official receiver as liquidator, the court appointed him in accordance with their wishes and as normally the proper person to act.

ON HER SURROUNDINGS.

W. B. French, the veteran adjuster and flour mill expert of Chicago, tells the following:

The loss occurred at Joliet, under a 'Continental' policy. The assured was a woman, and the policy read

'1,000 dols. on her two-storey frame residence, and 200 dols. on her surroundings.' I settled on the building, and then asked:

'Madam, what are your surroundings?'

'What did you say, sir?'

'Your surroundings, madam, what are they?'

'What do you mean, sir? They are quite as good as yours, I think.'

'No offence, madam; please read your policy.'

She did so, and then said:

'Excuse me; I didn't notice the wording. Well, sir, what are my surroundings?' she asked with a smile

I replied: 'Ordinarily, I would define a woman's 'surroundings' as her wearing apparel.'

'What I thought I was insuring,' she answered, 'was against loss on the trees and shrubbery surrounding my residence.'

'All right.' I said and allowed her fifty dollars damage on the shrubbery and trees

It was the only case of the kind I ever had, but I think I made a common sense adjustment.—*The Coast Review*

Mercantile Summary.

BELLEVILLE is to have a new daily paper.

THE G.T.R. Company has decided to build a new passenger depot in Berlin next spring.

THERE is a scarcity of harvest hands and men for railway section work in Manitoba.

THE stockholders of the Galt and Preston Electric Railway have decided to increase the capital stock and extend the line to Hespeler—about four miles in length.

THE custom house in Montreal received in duties during last month $543,034, where in August, 1893, it took in $720,053, a considerable decrease. Of inland revenue there was collected $186,193, against $195,688 in August, 1893.

AFTER a vacation in Europe, which his friends and business acquaintances know to have been well earned, Mr. James Stephenson, superintendent of the Grand Trunk, is expected home about the close of September. He writes that his health is fully restored.

A PROJECT is said to be on foot to build a pulp and paper mill at the Kakabeka Falls, on the Kaministiquia River, which flows into Thunder Bay, in Lake Superior. The falls will furnish excellent water power and the region abounds with the necessary woods. But where will the product be sold when made?

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

IN some districts in Manitoba harvesting operations have been delayed somewhat by short stocks of binder twine.

THE Bell Telephone Company contemplates placing its system in many of the towns in the southwestern part of the Province of Manitoba.

THE Lake of the Woods Milling Co. commenced the regular buying of wheat for the season on September 1.

HERE, following, we note several smaller Montreal failures of recent occurrence: Alfred Demers, shoemaker, has assigned, owing about $500, altogether to local firms.——In the grocery line, R. A. Dubrule is insolvent, with liabilities of $1,500.——Isaac Lightstone, a clothier and second-hand dealer, asks his creditors to release him of 75 per cent. of his liability of $1,000.——J. H. Smith, saloon keeper, has been served with a demand of assignment.

A RESIDENT of St. Anne de Chicoutimi, Que., H. Cote, somewhat of a farmer, cheese-maker, log jobber and general merchant, is reported to have compromised with his creditors at 50c. on the dollar. His liabilities are mainly due in Quebec city.——E. Goyer dit Belisle, in general business alone for a year, and previously of the firm of Lalonde & Belisle, has assigned. He was burned out last December, suffering some loss.

Mercantile Summary.

THE country has evidently been economizing. According to the trade returns for July last goods entered for consumption show a decrease of $634,411. Duty collected during the month was $1,372,086, which is $340,276 less than July, 1893. We can stand this, however, better than the further fact shown by the same returns that the exports for July show a falling off equal to $1,232,370 from July last year.

AN effort has been made by the Williams, Green & Rome Co. to borrow $25,000 from the town of Berlin for ten years without interest. With this object in view Mr. E. R. C. Clarkson, assignee of the company, explained its financial position to a large number of business men and gave a brief resume of its history. It appears that three hundred hands are employed in the works, which did an annual business of $260,000. Of this sum 60 per cent. was expended in wages. If the loan asked was granted security would be given in a second mortgage on the plant, and also preference stock in the company for $25,000. A long discussion took place, many of the business men taking part. A resolution asking the town council to grant the loan was put, but was defeated on a vote. Unless the money is secured by private subscription the company says it must close down.

Mercantile Summary.

THE Galt and Preston street railway bridge at Preston, now completed, is 200 feet long and contains 36,000 feet of lumber

THE Canadian Pacific Railway Company has decided to close its Hochelaga shops on Monday, Tuesday and Wednesday of each week for a month.

A NEW gas company is proposed for Winnipeg. The projectors are said to be men with money, and, if given a chance by the city council, say that they will greatly reduce present rates.

AN established furniture dealer on Yonge street, Toronto, James Stewart, is in financial trouble. He appeared to prosper for many years and had a surplus. But competition has been keen of late and he had been paying interest on real estate purchases.

THE large dry goods stock of James Eaton & Co. is advertised for sale next week.——The furniture stock of Nolan & Co., also of Toronto, will be sold to-morrow.——The general stock of James Dick, at Shelburne, is advertised for sale, also that of Wm. Tilden, of Blythswood ——The general stock of G. Hutchinson & Son, Alliston, realized 61 per cent.——In Victoria, B C, the stationery stock of J Johnson is advertised for sale by auction, and the estate will be wound up. He assigned nine months ago, and unsecured creditors will not be paid.

Type Presses Printing Material

GWATKIN & SON
57 Bay Street
Toronto

A FARMER and trader at St. Valerien, Que., Joseph H. L'Heureux, a farmer who has of late engaged in the hay and implement business, has assigned on demand, liabilities being $7,687.

FROM Campbellton, N.B., the assignment is announced of W. A. Mowatt & Co., a general store concern, who began two years ago on limited capital and under some assistance from relatives.

MAX ROSS, a small jobber of cigars in St. John, N.B., has had to assign. He owes about $5,000, mainly in Montreal, and has apparent assets of about half that amount.

A MEETING is called of the creditors of R. T. Dagenais, who has been in the tailoring trade at Arnprior, Ont., for the past six years. He has assigned. He foolishly opened a branch at Eganville last year.

ALPHONSE GAREAU, a jobber in saddlery hardware, in Montreal, has been seeking a compromise at the rate of 60 cents on the dollar, but has now assigned upon the demand of a leading creditor. His liabilities are as follows: Direct, $5,400; indirect, $8,500, and accommodation, $8,500.

THE customs receipts at Halifax in August were $68,494, a decrease of $9,438 as compared with August last year. But on the other hand the Hamilton returns show duties collected in August amounting to $70,246.89, against $46,825.84 for the same period last year, an increase of $23,421.55.

THE landlord is in the possession of the premises and stock of Plunkett & Co., grocers at Ottawa. They have been hard up for some time, so much so that creditors were apparently loth to incur insolvency expenses. Plunkett Bros. compromised some years ago at 25 cents on the dollar.——H. E. Larue began the baking and confectionery business in Cornwall, Ont., a year ago, on limited capital. He has now assigned.

IT does not look badly (in one sense though it does in another) when a debtor is able to offer his creditors *cash* for a compromise at so round a rate as sixty cents in the dollar. This is the offer of P. Gosselin & Co., a Quebec retail dry goods concern. But it is judged that creditors would be more disposed to close the concern out. Mr. G. failed in Dec., 1891, the estate being closed out. He resumed business under the above style, and last spring made strenuous exertions to obtain an extended credit in Montreal and the West, claiming quite a fair business surplus.

A MOVE is under way in Bowmanville to grant a bonus of $10,000 to a new company which is about buying out the Dominion Organ Factory, of that town.

THE Thomas Davidson Manufacturing Company, capital $500,000, is incorporated in Quebec to make and import metal goods, own and operate water and electric power and light. Head office, Montreal. Members: Mrs. Mary Ritchie, widow of the late Thomas Davidson, James Davidson, Thomas Charles Davidson, Miss Christina Davidson and Edward Goodwill, clerk.

AN assignment has been made by Paul Magnuson, general storekeeper, Selkirk, Man. His liabilities will be small.——Carley Bros., for five or six years clothiers, etc., in Winnipeg, are in difficulty.——The sheriff has advertised for sale the millinery effects of the Misses Covert, of Winnipeg, who have recently had two judgments registered against them for something over $700.

THOS. PETERS, hotel keeper, has mortgaged his stock at Nanaimo, B.C., and is reported to have crossed the boundary.——After being in the dry goods business three years at New Westminster, B.C., James W. Harvey has assigned, with liabilities of $42,000, and nominal assets slightly in excess of this sum. He was supposed to have a good surplus at one time, but heavy expenses appear to have eaten into it.——B. Simon, who has been working at tailoring these five years at Vancouver, has assigned. ——In Victoria, Eli Beam, contractor, assigns.

HIRST BROS., a firm of general storekeepers in Nanaimo, B.C., have assigned. Only two years ago they succeeded their father, who left an estate valued at $83,000, in which these two sons had a small interest. Last autumn, one of the members of the firm, who was somewhat irregular in his habits, died. Since then they have not prospered. A few weeks ago their stock was mortgaged, hence their trouble, which it is thought can be arranged.——The sheriff is in possession of the grocery stock of Geo. Maidment, of Victoria. Probably he owes $1,000, and creditors need not expect a large dividend. ——The landlord has closed the hotel premises of Chas. Muriset in Victoria, B.C.——In the same city, a carriage maker named Wm. Grimm did a good trade, accumulated considerable property, which has probably hampered him. A month ago he was obliged to give a chattel mortgage for $9,456. Since then several judgments have been obtained against him, and the mortgage has been foreclosed

WE are told of the recent sale of a British Columbia timber limit. The Muskoka Mill and Lumber Co. has recently purchased a fine limit on Vancouver Island, B.C., from the Toronto and British Columbia Lumber Co. The figure paid has not been made known. Whether this is the result of the change in the tariff or the prospects of the Nicaragua Canal being built, we cannot say. There can be no question great interest is being taken in B.C. timber limits of late.

AT a gathering in August of the Liverpool branch of the United Kingdom Commercial Travellers' Association, a resolution was carried to the following effect: "That, inasmuch as the various railway companies issue return tickets at single fares to any town within 50 miles to delegates attending the annual gatherings of various religious bodies, this meeting seriously and confidently claims a similar concession at any week-end for commercial travellers, who are not merely temporary users of the railway, but daily travellers; and, in addition, always obtain goods traffic for the railway companies."

WE note the incorporation of Robert Allan Miller, merchant; Theodora Lovell Miller (Mrs. J. B. McConnell); Eliza Miller, widow of the late John Lovell Carson; Anne Mary Miller, wife of George M. P. Bogan, of Montreal, stationer; George M. P. Bogan, stationer; Christiana Miller, spinster; John H. Timmis, stationer; Fred Tuck, insurance agent; John Flower, clerk, all of the city of Montreal, and Georgiana Louisa Miller, wife of the Rev. Walter Bigsby, of London, Ont., to carry on a general book, paper, and stationery business, make stationery and all book supplies, by the name of "The Robert Miller Company." Capital stock, $30,000.

A COUPLE of parties representing themselves as young Englishmen, seeking to engage in the export hay and grain trade in Montreal, under the firm name of Wilson Bros., have been trying to do unwary country shippers. They took about two months ago an upper office in the Board of Trade building, in which they were seldom to be found, but they flooded the country with circulars asking for consignments and quotations. Having recent experiences in mind, consignors were few, but they managed to make some moderate purchases on short time, or for half cash, and disposing of the goods at a sacrifice, and have managed to get away with probably $5,000 to $6,000, though they were probably aiming at bigger game.

NORWICH'S rate of taxation will be 20 mills on the dollar.

GRANBY will restrict bicycle riders to a minimum speed of four miles an hour.

A JOINT stock company is being organized in Windsor to make signals for electric railways.

THE creditors of Cadieux & Co., a Montreal dry goods concern, have held a meeting and the firm will likely assign. Mr. C. is evidently lacking in some of the elements necessary to success, having come to grief before in 1889, and again in 1891.——Labelle & Co., another Montreal concern in the same line, are arranging a quarterly extension, spread over a year, on liabilities of $8,787. They compromised in 1892 at 60 cents, liabilities then being about $20,000, and it would be no great risk to predict that they will get another compromise settlement now.——N. E. Brais, engaged in the shirt manufacturing business in Montreal for the past four years, has had to assign. He owes about $25,000, and claims a small surplus.

NEARLY two years ago a small machine shop was started in Paisley, Ont., by J. B. Bowes, who had little or no capital. Perhaps he might have done better if he had possessed some means, but we now hear of his assignment at his early date.——In 1890, T. J. L. Orme left London, Ont., and opened a general store at Port Stanley. At that time he owned a farm and was supposed to be worth $6,000 or $7,000, but it appears he has not been able to make any money. Several writs were issued against him last month and an assignment is now made. ——Last week we noted that the sheriff had possession of the assets of Thos. Donkin & Co., harness makers, Shelburne, and now they assign.——A chattel mortgage appears to have been the means of closing the jewellery premises of T. W. Huff, Parry Sound.

ONE of the oldest grocery firms in Port Hope is that of Simpson & Read, who did a good trade. They are now, however, in trouble. For some time past the junior partner has been unable to attend to business, and they have assigned.——There are two assignments of traders to notice in Petrolia this week. Oliver Bros., dealers in wall paper, and D. M. Shields, grocer, who began business long ago, but was burnt out in 1889. Since then he has struggled to make ends meet.——Another assignment is that of H. C. Georke, dealer in boots and shoes at Sault Ste. Marie——Since his failure as a general store-keeper at Blezard Mines, W. J. Moore has been doing business under the name of his brother, J. A. Moore. At Worthington, a couple of months ago, he was obliged to give a chattel mortgage for $1,300. Now we hear of his assignment, which can be no surprise.——We have previously noted the failure of A. Paul & Co. at Sudbury. Since then they have assigned.

IN August, 1881, the British American Starch Company was incorporated in Brantford with a subscribed capital of $33,000. Of this sum $25,000 has been paid. In addition to this $27,000 preference stock was issued about a year ago and taken by creditors. They have been doing a trade of good extent, but were not able to make much out of it. For a considerable time they have been slow pay, and during the past month several suits have been entered against them. Now we hear of their assignment, but have not learned what their liabilities are.——Some years ago A. C. Fraser succeeded the old established hardware business of James Warnock & Co., at Galt. Before this he had been twelve years a partner. The business has always shown a good surplus, and up to a recent date he was believed to be doing a good trade. Lately, however, he has found difficulty in making collections, and now we hear that a meeting of his creditors has been called for today. The failure of Carson Price at Holland Centre was noted in these columns last week. Since then we hear of his assignment. G. B. Hoskins, dealer in tinware, Melbourne, Ont., has also assigned.

TORONTO, FRIDAY, SEPTEMBER 7, 1894.

THE SITUATION.

Labrador, which has so long been allowed to sleep the sleep of the unknown, has at last had some of her mysteries explored. As Sir William Logan remarked, in his time, the geological department of Canada, when it precedes the land surveyor, has, in addition to its own proper work, to do that of the explorer. From a preliminary expedition of this kind, extending over sixteen months, Messrs. Lowe and Eaton have just returned. The result is a valuable addition to our geographical and geological knowledge of the interior of Labrador. Their report, when it appears, ought to make us acquainted with lake Michikamau, in the North-East. This lake is said to be larger than Mistassini, being 100 miles long and 30 wide, and free of islands. Several other lakes, each larger than Lake St. John, came into view. The northern part of the country is represented as a perfect network of waterways, and the country as rich in fish. The falls of Hamilton River, which our explorers cannot claim as a discovery of theirs, extend over six miles, with an aggregate height of 800 feet, the principal fall of the series being 800 feet. It was visited from below on the ice, in winter, and the photographs taken will make us familiar with the narrow gorge into which it passes, its ice cone, and other surroundings. While the principal falls are higher than those of Niagara, they fall far below them in magnificence and power. Extensive iron ore deposits were found in the northern part of the country, extending to Ungava Bay. Of course the mere existence of even rich economic materials does not prove that, under existing conditions, they can be economically worked. The valuable timber will doubtless be utilized.

At the end of the first year's operation, there is some doubt whether the Manchester Ship Canal will prove a paying investment. The deficit is over $500,000, but the directors are said to have hope in the future. One thing is certain: the canal managers, in the event of the work not paying, will be unable to unload upon the Government, as the Welland Canal Company did, in its extremity. People who talk about increasing the capacity of the St. Lawrence canals to twenty feet of water generally take no account of the returns to be expected; in other words, they do not look at the matter from a business point of view. The cases, it may be admitted, are not quite parallel; but a great work, like the deepening of the St. Lawrence to twenty feet, ought, if undertaken at all, to be on the basis of a return equal to the interest on the investment, especially as this route can have no rival in the facilities it is capable of affording.

It begins to look as if there would be some objections to the amount of the Behring Sea claims made by Canada, when it comes to a question of Congress voting the money. Any member can raise a question over the amount. There is no reason to suppose that the executive will assume an unreasonable attitude on the question: it remains to be seen whether all parties in Congress will be equally fair. There will probably be developed a disposition to go into the details of the items before a committee. This would entail the bringing of witnesses from a great distance, at heavy expense. Some delay would be caused, though it could not well exceed the length of a session. If there be any means by which the British can assess the damages, and if this be done, the amount might not correspond with what a committee of Congress would find to be due, and the task of harmonizing the two would remain. The amount already agreed upon between the American Government and the British ambassador ought, in reason, to be taken as the amount found, on either side, to be due and be paid accordingly. But it is not certain that this course will be followed.

Labor Day as a name for a holiday is a harmless misnomer that does not mislead. We have just passed the first Labor Day, which, in Canada, is annually to recur on the first Monday in September. Instead of honoring a dead saint, we shall give rest and distinction to living labor. St. Crispin and his compeers may imagine themselves concerned in this modern unification of labor. This unification may extend by absorbing municipal holidays. The multiplication of days on which labor is suspended is a serious matter in some countries: it is even a little serious in Quebec. Labor Day need not multiply holidays, while it unifies them. One day in a year affords little rest from toil, and in the light of rest it can be little regarded. Though the length of the working day varies greatly in different countries, the policy of the Internationals is to reduce it to a common standard. Such a standard is, perhaps, far off. As time goes on, the tendency is to demand a shorter working day. In the '30's ten hours was the least asked for; now the demand is for eight. It is obvious that unless production is to be greatly lessened, there must be a limit to the progressive curtailing of hours. There is a conceivable day in which the maximum of result can be produced, without overstraining the faculties or doing injury to the system. There will always be men willing to work up to their full capacity; there will be others, and more of them, who will try to get off with as little exertion as possible. As under the Melbourne administration, when the Tories, in mere opposition to the manufacturers, advocated a ten-hour day, so now political parties lay themselves out to get the favor of labor for the vote with which modern policy has endowed it. In this way, if at all, the current hours of labor will be lessened.

Beside hastening the sweep of fire over forest and lea, the drought, which in some places came to a halt on Sunday, shrivelled up the grass and seriously interfered with the development of root crops and some kinds of fruit. In the Western States wheat and corn in addition have suffered severely. In irrigation there has been very little experimenting in this part of the world, but where practicable it is the true preventive of drought. California owes much to this expedient. In our Northwest the experiment of irrigation is to be made by the

C.P.R. Company, which, using the waters of Bow River, expects to be able to command a supply for a million of acres. Double and treble the ordinary quantity of produce can be grown where an adequate supply of water is placed at the control of men. There are many hill side springs in Ontario and elsewhere that could be utilized in this way with surprising results. In other countries nearly all such auxiliaries to fertility have been utilized long ago, and it may be confidently predicted that they will be here in time.

FOREST FIRES.

Forest fires, sometimes the offspring of drought and carelessness, sometimes of the inadequacy of the means of preventing sparks escaping from locomotives, sometimes of incendiarism, have this year been unusually widespread and destructive in the United States. Hundreds, if not thousands, of lives have been sacrificed to the flames. Canada has not escaped the scourge, which has extended from Minnesota to the Rainy River region, though here the destruction has been much less serious. If we are to believe the story of a ball of fire carried across Skunk Lake, a distance of a mile, in Minnesota, there would seem to be very little hope of contriving any general plan for cutting off such fires in their course. But something can be done even in this way. It is, however, to prevention that we must mainly look for salvation against forest fires. To begin with, some better invention than the wire netting intended to prevent the escape of sparks from locomotives is essential, and the sooner ingenuity sets to work to produce it the better. Carelessness about the spread of fire in dry seasons has a criminal element in it, and can be treated accordingly. To incendiarism we almost need to give a new reading. The wanton throwing of a live match into dry grass whence fire may spread to buildings, might perhaps be included.

THE FINANCES OF QUEBEC.

It is gratifying to learn from a statement of expenditure for the last fiscal year that the finances of Quebec are being gradually improved. That this was needful, nay absolutely imperative, will not be doubted by anyone who recalls the frightful rapidity with which the obligations of that Province were increased during the fantastically extravagant *regime* of the Mercier Administration, which lasted from 1887 to 1892.

Between 1886, the last year of the old Conservative rule, and 1892, the last year of the Mercier rule, we are told, the ordinary expenditure was increased from $3,032,000 to $4,446,000, or by nearly 50 per cent. In 1893-4, the fiscal year recently ended, the cost of the ordinary services was reduced to $3,884,000, or by $562,000, a very tangible economy.

A statement of ordinary and special expenditures for nine years indicates the progress in an economical direction:

	Ordinary.	Special.
1886	$3,032,607	$1,108,295
1887	3,288,797	1,509,817
1888	3,365,032	2,851,710
1889	3,543,618	1,580,518
1890	3,894,412	1,418,494
1891	4,095,520	2,055,148
1892	4,446,639	1,541,098
1893	3,952,258	1,390,303
1894	3,884,526	1,648,974

Thus the Mercier ministry, by means of bribery, extravagance, and other sins or follies, succeeded in running up the ordinary disbursements of the Province from $3,288,000 to $4,095,000 in five years, and the special outgoes from $1,509,000 to $2,055,000, an increase on the whole of more than thirty per cent. The Taillon administration has succeeded in reducing the ordinary expenses of the Province to $3,884,000 and the special to $1,684,000, a decrease of nearly a million per year for the two years of its unwelcome task of saving and reconstruction. It must be borne in mind, to the credit of the present Ministry, that it was necessary to meet and discharge the legacies of liability which descended to the existing Ministry, and that the obligations arising out of railway subsidies, and the public works already in hand, temporary loans and unfunded debt, could not be escaped. Loans having been made or debts incurred, they had to be provided for, and much of the obloquy which fell upon the succeeding Government by reason of its imposition of unpopular taxes, was incurred in the endeavor to provide funds to meet interest and other unavoidable outlay. Between 1886 and 1893 the charges on debt increased from $977,960 to $1,437,932—close on half a million.

A statement somewhat in detail will mark the nature of outlay on ordinary account in the two years 1891 and 1894. Thus:—

	1890-91.	1893-94.
Legislation	$281,078	$207,676
Civil government	269,660	256,725
Justice	679,006	548,038
Education	391,360	380,760
Agriculture	123,483	159,097
Colonization	132,891	83,767
Public works	139,612	101,037
Asylums	269,143	282,433
Charities	47,729	42,648
Miscellaneous	490,048	384,403
	$2,824,010	$2,446,664
Add debt outlay	1,271,506	1,437,932
Total	$4,095,516	$3,884,526

The reduction reaches $211,000, or, apart from interest, $377,400, a substantial saving. There has been no increase in any part except that of agriculture, to the encouragement of which, very properly, special attention has been given. Then there have been capital charges, *e.g.*, railway subsidies, public works, and repayment of deposits made to obtain guarantee of interest on railway bonds. These were as under:—

	1890-1.	1893-4.
Public works	$820,254	$390,955
Railway subsidies	955,620	975,426
Trust funds	235,514	263,198
Loans	43,760	19,395
	$2,055,148	$1,648,974

The reduction of $430,000 on public works' expenditure is a noticeable one. And the disbursements for railway subsidies can be reduced in a few years. A round amount was wiped off the slate when, last session, it was resolved to cancel the sums promised to companies which had failed to begin construction within the time agreed upon, and in this way a large liability standing against the Province was removed. The good work of retrenchment goes on, and with a continuance of the present policy the financial situation will improve. The imposts rendered necessary by an era of extravagance will, however, remain for a tedious length of time. And their existence will prove, let us hope, a salutary, if bitter, reminder to the Province of the danger of permitting reckless and venal politicians to have the handling of its finances.

MONTREAL'S MILLINERY OPENINGS.

A week ago Toronto was favored by a visitation from many milliners; itwas Montreal's turn this week, and Monday, Tuesday and Wednesday were devoted to a display of shapes and trimmings by the wholesale houses of that city. Montreal milliners were out in full force, while towns and cities in the Province of Quebec sent their representatives to attend the openings. Coming from the same source, the styles displayed in Montreal vary but little from those described in our last issue, on the occasion of the Toronto

openings. But the subject is not easily exhausted, and a score of editorials on the autumn millinery would leave many of its features still undescribed.

As a general rule, it may be said of shapes that the low crown has been continued from last season. But not a small lot of shapes are to be seen with medium high and broad crowns. Some of the crowns are flat, others are dented, while there is a tendency for broad, evenly-rolled brims. Every indication points to a good felt season; large and medium sized hats being very popular in the early months; such shapes as the Rosedale, Jaunty Parisian, Luzerne, Camille, Endicutt, Fairfax, and London are at present among the chief leaders. The last-named is a favorite. It is seen in wool and French felt, in covered goods and also in black straw. Plaques are still being worn, but are being shown principally in black, or the more staple colors, as navy blue and brown, and, of course, in that most popular color "bleuet." For street wear hats are generally large, but the theatre-goer should be pleased, as evening hats are for the most part small in size.

Ribbons will be largely used this year for trimming purposes; a spreading bow of five-inch ribbon being often seen on the fall shapes. Goffered ribbon placed on the edge of the brim creates a very taking effect. As the season advances, and bonnets and the smaller hats come into more general use, the narrower widths of ribbon will be utilized for bonnet strings. Birds have a prominent place in the autumn headgear adornments. However, those who have a sympathetic place in their hearts for the feathered singers, may be partially comforted by a knowledge of the fact that artificial birds are outselling natural ones. A pair of wings, or a tail, often presupposes the presence of a body, but these effects are made out of feathers plucked from chickens. Much of the plumage is decorated with jet. Ostrich tips find favor especially on large shapes. Jet and steel ornaments are everywhere displayed. Foliage designs are only occasionally seen.

Although many new shades of color have appeared this season, and none of the old shades are entirely wanting, black is prevalent everywhere. Black trimmings are used to adorn black and colored headgear alike. Black aigrettes in bunches of 6 to 24 stems are used in trimming shapes, while black feathers are very plentiful. Black satin ribbons are fashionable. Bonnets with black trimmings were in vogue a year ago, and promise well for the autumn of 1894.

WEST INDIA TRADE.

There is satisfactory evidence that the trade between West Indian ports and Canada is growing, as a result in part of the efforts put forth by Canadian merchants and manufacturers. The latest voyage of the "Taymouth Castle" took to Demerara, South America, the largest quantity of cargo yet landed in any one shipment. We are able this week to present to our readers a list of twenty or thirty articles, ranging from brooms to lumber and from lobsters to milk, and from hams to confectionery, which are offered a reasonable market in British Guiana. The description given of packages and the weights and kinds preferred ought to prove of service to Canadians who are already doing or who may intend trade with this colony. And the hints as to what is *not* wanted ought to be only less valuable. The source of these opinions and quotations is a very respectable one, and the monthly steamer from our Maritime Province ports affords opportunity for trial shipments. We append the list, which is dated Georgetown, 10th August;

LOTTING QUOTATIONS.

BARLEY, bags, 280 lbs.—English imports lotting, $7.50 to 8.00, white quality.

BEEF, h.f, brls. 100—American packing preferred; possibly other description would find favor for the gold fields, and is worthy of a trial.

BROOMS.—Three strings, painted handles, $1.90; Canadian also saleable.

BUTTER, in cases containing 100 1-lb. tins.—Imports have been disposed of of Canadian manufacture at 28c. to 30c., and could readily find a market.

CHEESE, in boxes.—Canadian manufacture is considered too rich for tropical markets; quality is light, and is packed in boxes of 28 to 32 lbs. each; could generally be placed, and would affect American imports of "Unadilla," and "Daisy" brands.

CONFECTIONERY, brls.—English manufacture imported in brls. containing 10 doz. 1-lb. glass bottles, of 6 to 8 assorted qualities, saleable at $2.40 to 2.75; this line is worthy of a trial; smaller packages would also sell; stoppers of bottles usually sealed.

CODFISH, tierces.—Present quotation, $23 to 24; supply regulating prices.
" boxes " " $6 to 6.25. " " "
" drums " " $5 to 5.50. " " "

HADDOCK, tierces " " $18 to 20. boxes and drums, $5.

HAKE, tierces. " " $17 to 18; " " "

HERRINGS, pickled, split.—$4.25 to 4.50, wanted; boxes, smoked, 16c. to 28c.

MACKEREL, pickled, brls.—$10 to 12; medium preferred.

SALMON, " tierces.—$15 to 16; fluctuating value.
" boxes, 4 doz. 1-lb. tins—$5 to 5.50 saleable at fluctuating quotations.

LOBSTERS, boxes, 4 doz. 1-lb. tins.—$6 to 7, saleable at fluctuating quotations.

FLOUR, brls., extras.—Stocks in excess of market requirements, owing to speculation on the part of importers anticipating a change in duties, not now likely to be effected

FLOUR, extra.—Canadian description quoted, nominally $3.90 to 4: Values must improve in the near future, and early shipments should find an improved market.

" superfine.—"Canadian Milling" well introduced must find favor with the middle-class man in time. This reduced quality is generally saleable on an average of 50c. below higher grade; a trial shipment of 200 brls. could be readily placed.

HAMS, tierces.—American saleable at 15c. Canadian cured should also find favor with other imports.

HAY, bales or ½ bales.—Usually saleable at 1¼ to 1½c., marked weight.

HORSES.—"Mares preferred." Late imports from P.E.I. were auctioned at $110 to 150.

LUMBER, white pine.—1 x 12 inch inspected, usually saleable at $24 to 28 per M.

" pitch do.—Special sizes imported for dealers' acct.

OATS, 4 bush. bags.—P.E.I. saleable at $3.25. Stocks moderate, and early arrival of new crop should command improved values.

PEAS, spt., brls.—Lotting, and saleable at $4.25 to 4.40.

POTATOES, do.—Limited supply at market, and first arrivals should command full values, $4.50 to $5.

SHEEP.—Sold at live weight, according to supply, 8c. to 9c.

MILK, cases, 4 doz.—Occasionally shipped from your market, and in time could be readily placed. The quality not being considered much inferior to English imports, moderate consignments always saleable.

NOTE.—Mackerel, salmon and herrings in kits, always saleable at market values.

WEATHER SIGNALS FOR FARMERS.

In the volume issued by the Ontario Government, which contains the record of the proceedings of Farmers' Institutes in the province for 1893, a deal of information is to be found, some of which might be of service to business men. There are, for example, valuable suggestions as to the care of animals, the treatment and storage of field and garden products, the cultivation of small fruits. These addresses or memoranda are for the most part the deliverance of men who have had experiences of the methods they recommend. In other cases, of course, the views expressed are theoretical.

A matter which possesses deepest interest for farmers themselves is that of weather signals, a means by which the "probabilities" now gathered from observers thousands of miles apart, and published daily by the Weather Bureau at Toronto, may be made known to farmers in the interior, away from telegraph offices and post routes. On pages 122

and 128, Mr. W. B. Leavens, of Chisholm, gives a description of two codes of signals—the one appealing to the ear and the other to the eye. "There are but few districts in the more settled portions of the province where steam whistles are not within ear-shot, while flags can easily be displayed upon milk wagons going over their routes, or by the mail stages." We are told that the use of steam whistles for announcing the weather forecasts has rapidly grown in favor among farmers. Whenever a mill or factory using steam is within the reach of the telegraph or telephone, or by evening or early morning trains or stages, the daily forecasts can be received and announced to armers and others living within a circle of several miles. It is proposed by Mr. Leavens to use whistle signals for this purpose. Thus:—

WHISTLE SIGNALS.—"*Note.*—The warning signal to attract attention will be a long blast of from fifteen to twenty seconds duration. After this warning signal has been sounded, long blasts (of from four to six seconds duration) refer to weather, and short blasts (of from one to three seconds duration) refer to the temperature; those for weather to be sounded first.

Blasts.	Indicate.
One long	Fair weather.
Two long	Rain or snow.
Three long	Local rains.
One short	Lower temperature.
Two short	Higher temperature
Three short	Cold wave.

INTERPRETATION OF COMBINATION BLASTS.

One long, alone	Fair weather, stationary temperature.
Two long, alone	Rain or snow, stationary temperature.
One long and one short	Fair weather, lower temperature.
Two long and two short	Rain or snow, higher temperature.
One long and three short	Fair weather, cold wave.
Three long and two short	Local rains, higher temperature.

It has been found, says the report, that owners of mills and factories are very willing to co-operate with farmers and others in the use of the whistle signals. "The practical value of knowing, through these signals, a day, or a day and a half in advance, with reasonable certainty—and it is becoming more certain all the time as the system is improved—the changes in the weather, the coming of storms, frosts or cold waves, as announced by the Weather Bureau of the Department of Agriculture, is almost beyond estimate in dollars and cents."

THE WEATHER SIGNAL FLAGS—THEIR MEANING AND INTERPRETATION.

Number 1, white flag, indicates clear or fair weather. No. 2, blue flag, indicates rain or snow. Number 3, white and blue flag, indicates that local rains or showers will occur. Number 4, black triangular flag, always refers to temperature; when placed above numbers 1, 2 or 3, it indicates warmer weather; when placed below numbers 1, 2 or 3, it indicates colder weather; when not displayed, the indications are that the temperature will remain stationary. Number 5, white flag with black square in centre indicates a sudden and great fall in temperatue.

CUSTOMS REVENUE OF THE UNITED KINGDOM.

That a finance minister's estimate of revenue, amounting to almost twenty millions sterling, should come within ninety thousand pounds of the amount actually realized from Customs duties is a thing worth remarking. Yet this was the case in Great Britain last year. The estimate was £20,054,364 for the year ended March, and the amount realized was £19,964,319, which, although less by £90,045 than the estimate made, was yet £78,890 greater than in the previous year 1892-3. It appears that the estimate had in part been based on an increase in population of 0.85 per cent. A further amount of £199,795 was collected from Customs duties, on behalf of the local taxation account, and the total gross receipts on account of Customs revenue was therefore £20,164,114. Of this amount the sum of £2,247,286 was collected by the officers of the Inland Revenue, so that Customs officers collected £17,916,828 on behalf of the excise revenue.

Looking for a moment at the details of the receipts from Customs, wonderfully few as are the items from which the huge sum of almost a hundred millions of dollars is raised, we note that the consumption of coffee continues to decrease, the gross yield for 1893-4 being £169,392, a decrease over the previous year of £8,035, while tea increases from £3,405,060 to £3,499,809. Cocoa again shows a decreased consumption, the gross yield for 1892-4 being £102,700. Currants show a rise of £20,598, and raisins of £20,598. Figs, plums and prunes show a slight increase. On foreign spirits the increase for the year was £40,862, the net revenue realized from rum being £1,938,181, a decrease of £140,354 on the revenue of 1892-3. The net revenue from brandy in the last financial year was £1,364,058, which is £30,000 more than it was in 1892-3. For Geneva and other sorts of foreign spirits the net receipts were £828,445, an increase of £149,678 over the yield from the same source in the previous year. Tobacco shows a decrease of £4,637, the gross yield being £10,312,124. Foreign cigars show a decrease of £58,838. Alcoholic duty shows a decrease of £70,881, but there was an increase on sparkling wines of nearly twelve thousand pounds sterling. A feature in the report of the Commissioner of Customs for the year is the very small proportion which coffee bears to tea as an article of consumption in Great Britain and Ireland.

THE BRITISH POST OFFICE.

It would appear that the Post Office is, in the United Kingdom, a somewhat paternal affair. And judging by some new facilities offered, and their effect, a class of small capitalists or tradesmen has been attracted to deposit in it, whose business would be accepted by ordinary banks. Thus it seems that the Post Office Savings Bank, "instead of being merely the depository of the small savings of the thrifty poor, is undertaking to some extent the business of an ordinary banker." The report of the Postmaster General for the year ended 31st March shows that in the last ten days of December, 2,707 depositors added £20 in one sum to the £30 they had already deposited within the year, representing £54,140; and in the period from the 21st December to the 30th of June, 1894, the sums deposited in excess of the old £30 limit reached a total of £1,073,232, the number of such deposits being 87,876. Of these deposits 20,852 were of £50 each. Another regulation of the department, which came into force on December 1st, enables persons to withdraw as much as £10 by telegraph on the same day, and £20 on the following day.

Commenting on these regulations and the possible result of them in certain contingencies, the London *Economist* shows how the Post Office Bank thus becomes liable to a sudden demand on its resources in time of distress or panic. "If," adds that journal, "it is recognized that the department is undertaking ordinary banking business, the question of providing a gold reserve such as is found necessary by those institutions becomes prominent. The normal position hitherto has been that deposits considerably exceed withdrawals, and the 'till-money,' as it may be termed, is always sufficient to meet the latter; but if any special run on the deposits occurred, it could only be met by the sale of consols, a course which in easily conceivable circumstances

might be attended with considerable disadvantages, if it did not involve a heavy loss to the department."

The business done is indicated by the following figures: The deposits in the three months after December 21st, 1893, at which time the limit of £30 to a depositor was increased to £50, amounted to £8,142,336, as compared with £6,765,179 in the corresponding period last year, an increase of £1,377,157, while the difference between the amounts deposited and withdrawn, representing increase of capital, was no less than £2,968,528, or more than a million in excess of the corresponding quarter of 1893. The savings bank figures of deposits and withdrawals are for the year ending December 31st, 1893, and compare with 1892 as follows:—

	Deposits.		Withdrawals.	
Year ended.	Number.	Amount.	Number.	Amount.
Dec. 31, 1893..	9,838,198	£24,649,024	3,618,721	£21,764,566
Dec. 31, 1892..	9,478,339	22,845,031	3,335,068	20,346,217
Inc. in 1893....	359,859	£1,803,993	283,653	£1,418,349

According to the report the total receipts of the postal department were £10,472,000, as compared with £10,344,000 in 1892-93, an increase of £128,000. The expenditure, however, increased from £7,518,000 to £7,738,000. There was thus a further diminution in the net revenue of £92,000. The telegraph department does not meet expenses by nearly £120,000 a year. The telegraph revenue was £2,534,000, and the expenditure £2,641,000, and the combined figures of the two services exhibit an increase of £175,000 in revenue and of £293,000 in expenditure. In regard to what may be called post-office banking business, the postal order appears to some extent to be superseding the money order as a means for the transmission of money. The amount remitted by money orders was £200,000 less than in the previous year, notwithstanding the large extent to which the facilities for remittance by telegraph were utilized. The sum represented by the postal orders issued was £21,768,793—an increase of £123,610 on the year.

ANOTHER ASSESSMENT SOCIETY COLLAPSED.

Another society has climbed up twining alongside the woodbine. This is the Chatauqua Mutual Life Association, of Mayville, N.Y., with nominal assets of $8,000, no members but its twelve directors, and liabilities of $12,000. That is $1,000 each for the directors. The assets are equal to $666.66 per member, if they are any good. The Independent Order of Foresters had a jubilee a few weeks ago at Desaronto, over having attained a million dollars of assets. But, with 60,000 members, that is only a trifle of $16.66 per member. Not much to bank on. The Chatauqua was a highly promising association for many years. In the years 1888 and 1889 its death cost was only $5.51 and $6.40 respectively per $1,000 of certificates carried. In 1892 it had 4,040 members, and professed to have assets of $53,856; furthermore, it paid out in death losses $82,600. The cost of these losses, however, had risen from $6.40 per $1,000 in 1889 to $14.64 per $1,000 in 1892. On the first of January of the present year its membership roll had gone down to 125, and the last man began to be in view in the near distance. Nobody wanted to be the last man, and so they all made haste to cancel their membership in time to avoid the final winding up assessment. Thus we see how the twelve directors came to be the only members remaining.

We hear much, and often, from the advocates of assessment life assurance, of the loyalty of the members and the strength of the bank account of such societies. And some clever people who think they know a great deal about the science of life assurance from having studied it a few days or weeks, presume to lecture old-line advocates, and THE MONETARY TIMES, for being narrow and bigoted, and prejudiced on the subject of assessment assurance. Such persons must have closed their unwilling eyes to the recorded facts of recent years—to the scores and hundreds of assessment societies in the United States that have come to an end, disappointing their members and squandering money by the million. They will, we presume, ignore a case like that of the Canadian Masonic Benefit Association which had its license withdrawn the other day. Some members of this had paid in $600 or $700—and some of them had reached three score and ten, and after paying money into that assessment concern for twenty-one years one of them declared it to be, as it certainly is, "Hard that I should be stripped of all that I have paid, now that I am over seventy years of age." And yet the M.B.A. was honestly conducted by its managers. The writer has some experimental knowledge of assessment societies, for he belonged to one which was maintained with much pride for many years. It was found by the management and the trustees, however, that the principle was faulty, that the calls were increasing and the membership could not be increased, but rather the reverse, and so it was wound up, to the surprise and annoyance of some blatant youngsters among the membership who, doubtless, thought the managers "ignorant, bigoted and prejudiced" because they were guided by solid fact rather than glittering theory.

OUR MONEY ORDER SYSTEM.

It is true in almost any department of finance or trade, as well as of transportation, that the more you cheapen facilities the more they will be made use of. The money order business carried on by the Post Office Department in Canada is a case in point. At Confederation there were 500 money order offices in the country, which issued 90,000 orders in a year, amounting to $3,352,000. To-day the offices are more than doubled in number, while the number of orders is multiplied by ten:

Year.	No. Offices.	Orders Issued.	Total Amount.
1883.....	828	419,613	$9,490,899
1893.....	1,168	967,866	12,902,975

Over ten millions of this business was done between Canadian points, and only $2,498,000 of it with other countries. The amount of money orders issued in other countries and payable in Canada has grown remarkably too. In 1868 it was less than $100,000; but went up to $1,236,000 in 1883 and $2,269,635 in 1893.

It is especially worthy of notice that in the case of the countries with which most of this business is done the remittances from Canada much exceed the receipts by people in Canada. Great Britain, for instance, sent to this country by postal order during twenty-six years $5,949,000. But Canada sent to the Old Country in that period $16,949,000, nearly three times as much. The United States remitted hither during the last eighteen years over $16,000,000, but we mailed to her $17,530,000. Another noticeable thing is that while only very trifling and infrequent sums are sent to Canada from Italy and Switzerland, Japan and China, those countries received from Canada last year in round numbers, $48,000 and $5,000, $9,000 and $4,000 respectively, in sums averaging ten dollars to twenty-six dollars each. It would seem, therefore, as if the Italian laborers and organ men, the Swiss rangers, as well as the Chinese economists, found Canada a good country to save money in.

There are in Ontario 593 money order offices, in Quebec, 179, Nova Scotia, 158; New Brunswick, 100; P. E. Island, 14; Manitoba, 51; British Columbia, 42, and in the Territories, 31. The total number in the Dominion is thus 1,168, an increase of 14 over the previous year.

TORONTO INDUSTRIAL FAIR.

An exhibition which has for fourteen years shown steadily increasing success, as this one has done, both in the variety of the things displayed and in the number of people it attracted, may be regarded as fairly well established. And there is reason to believe that the Toronto Industrial Fair has been managed on the whole with great enterprise, and that exhibitors have rarely had good cause for complaint. This year, although the early days of the fair were marked by rainstorms, in contrast to the usual bright sunshine that it has enjoyed in former years, there is a very fair attendance. As to the displays of commodities made, they are thus far up to the average. Indeed in some respects they may be said to be better, for a number of manufacturers

have here set up the exhibits which helped to win distinction for Canada at the World's Fair of last year in Chicago.

It has been supposed that the association was rather a money-making concern, than the reverse; and while it was known that much of the surplus left from the enormous gate receipts was applied to new or enlarged buildings and the maintenance of the grounds, the statement made at the opening of the association being responsible for a debt of some $200,000 was a general surprise. Certainly, it was not a happy thing when inviting the Premier of the Dominion to open the Exhibition and a member of the Ontario Cabinet to be present and lend *eclat* to the event, to bother these gentlemen publicly with details of the financial load, and give more than hints as to what they should do to relieve it. There is a fitting time and place for such applications *in forma pauperis*, if they must be made, but it is not at a congratulatory and convivial gathering at the very opening of the fair.

THE SCIENCE OF SANITATION.

Whether the motive be curiosity as to Canada, the presumed greater coolness of our more northerly situation, or a desire to associate Canadians in their deliberations, the fact remains that scientific, industrial and social bodies of the United States have of late years shown a growing disposition to have their annual business sessions within our borders. And they are welcome. Every such gathering helps to dissipate the ignorance of this country shown by too many American writers and speakers. Not least among the important organizations which have chosen Canadian cities for their meeting place this year is the American Public Health Association, which is to hold its twenty-second annual meeting in the Association Hall, Montreal, on September 25th to 28th.

The following topics have been selected for consideration at this meeting:—

The Pollution of Water Supplies.
The Disposal of Garbage and Refuse.
Animal Diseases and Animal Food.
The Nomenclature of Diseases and Forms of Statistics.
Protective Inoculations in Infectious Diseases.
National Health Legislation.
The Cause and Prevention of Diphtheria.
Causes and Prevention of Infant Mortality.
The Restriction and Prevention of Tuberculosis.
Car Sanitation
The Prevention of the Spread of Yellow Fever.

In addition to the above subjects, on which special committees have been appointed, discussions will be held on the Education of the Young in the Principles of Hygiene; Private Destruction of Household Garbage and Refuse; Disinfection of Dwellings after Infectious Diseases, and the Inspection of School Children with reference to the Eyesight. Papers on miscellaneous, sanitary and hygienic subjects will also be received.

The membership of this body embraces delegates from the United States, the Dominion of Canada and the Republic of Mexico.

The officers of the association for 1893-4 are:—

President, Dr. E. P. Lachapelle, Montreal, P.Q.; first vice-president, Dr. M. Carmonay, Valle, Mexico; second vice-president, Dr. J. N. McCormack, Bowling Green, Ky.; secretary, Dr. Irving A. Watson, Concord, N.H.; treasurer, Dr. Henry D. Holton, Brattleboro, Vermont. The officers of the general committee of arrangement for this meeting include the Mayor of Montreal, honorary president; Sir Donald Smith, vice-president; president, Dr. Robert Craik, and secretary, Dr. Elzear Pelletier. Among the honorary members are: Dr. P. H. Bryce, secretary Board of Health of Ontario; Dr. A. P. Reed, secretary Board of Health of Nova Scotia; Dr. G. E. Coulthard, Board of Health, New Brunswick; Dr. E. M. Wood, Provincial Board of Health of Manitoba; Dr. Davie, officer of Health of British Columbia. And on the half-dozen other committees are the names of Mr. Richard Angus, Mr. Wolferstan Thomas, Mr. S. C. Stevenson and many of the most influential citizens of Montreal.

CURRANTS.

Last year witnessed the largest production of currants on record, the total yield of 1893 amounting to between 165,000 and 175,000 tons. Of this amount all but 20,000 tons was shipped from Greece to foreign countries. The exports, according to a circular issued by the Burlumi Co., were distributed as follows: United Kingdom and Australia, 73,000 tons, against 62,000 in 1892; United States and Canada, 25,500 tons, against 15,500 in 1892; France, 6,800 tons, against 22,000 in 1892; the rest of Europe, 43,700, against 22,500 in 1892; total, 149,000 tons, against 122,000 in 1892. The present crop has been injured by severe hot weather, and will probably fall short of last year's yield by some 40,000 tons.

Estimates place the 1894 crop between 125,000 to 130,000 tons. Barff & Co., Patras, estimate the sources of supply as follows: Morea—Gulf, 8,500 to 9,000 tons; Vostizza, 10,500 to 11,000; Patras and Achaia, 12,000 to 12,500; Pyrgos and Olympia, 29,000 to 30,500; Campos, 9,500 to 10,000; Kyparissia, Filiatra and Gargaliano, 16,000 to 17,000; Pylos, Corone and Modone, 11,500 to 12,000; Calamata and Nisi, 12,500 to 13,500; Missolonghi, Lepanto, etc., 2,000 to 2,500, and Nauplia, 500; total Morea crop, 112,000 to 118,500 tons. Islands—Cephalonia, Sta, Maura and Ithaca, 9,000 to 10,000 tons; Zante, 7,000; total currant crop, 128,000 to 135,500 tons. But although the present season's crop is not so large as that of 1893, it does not follow, as the *N.Y. Journal and Bulletin of Commerce* remarks, that prices will be high. For in both America and Europe there will be considerable quantities of currants over from last year's supply.

WOOL.

Throughout Canada there were many people who looked for wonderful things as soon as the "free wool" clause of the American tariff should become a reality. It is almost two weeks since the United States tariff bill was passed, and, notwithstanding the sensational reports of certain newspapers, the wool market has failed to make the expected advance. By a survey of the statistical position in the United States the reason at once becomes apparent. The total consumption of wool in the United States for the last four years is approximately as follows: 1891, 561,000,000 lbs.; 1892, 562,000,000 lbs.; 1893, 619,000,000 lbs.; 1894, 474,000,000 lbs. This is an average of 554,000,000 lbs. a year. The American clip of 1894 amounts, at a rough estimate, to about 328,000,000 lbs. At the time the new tariff bill became law, there were in the neighborhood of 70,000,000 lbs. of foreign wool in bond in Atlantic ports, and since this time further shipments have been brought by almost every steamer arriving in New York. A Toronto merchant returning from Europe says that eight wool brokers from London, Eng., crossed the Atlantic with him, all of whom expected to sell wool to the Americans. This has naturally had a depressing effect upon woolen manufacturers in the United States, and believing that the market will yet go lower they are not disposed to anticipate future wants. During the last year the production of woolen goods has been curtailed to a considerable extent in the United States, and it is but reasonable to expect that a revival of the nation's industries will bring about an active demand for clothing. However, the purchasing power of American citizens has meanwhile decreased, and may, with low prices for wheat and a partial failure of the corn crop, be slow in gaining its wonted strength. A free entry into the United States means a great deal in the long run to the wool growers and wool brokers of Canada, but it is doubtful whether any very material advantage will be made during the present season.

SALE OF TIMBER.

On Wednesday of last week nearly one hundred lumbermen gathered in the rotunda of the Board of Trade in this city for the Ontario Government's sale of timber limits. The area of timber offered was 1,864 square miles. Of this 817 miles was in Ontario, and the balance in the Province of Quebec. Notwithstanding that the limits were the most extensive ever offered at one time in this market, the bidding was anything but animating. Only in one instance was the upset price reached, when Mr. N. Garland bid $140 per mile for 36 square miles in Caldwell township. The best bids made were $2,000 per mile on berths 181 and 182 of the Barnett and Mackie limits; $31,000 for berth 71 in Snider; $600 per mile for the Lake Expanse limit; $1,800 per mile for berth 1, township of Pringle, and $10,000 for Blind River Mill, and 28½ miles in Striker township. Many and varied reasons were assigned for the lack of spirit in the would-be purchasers. The prevailing opinion, however, seemed to be that the owners of limits who hold for use only have quite enough to keep them cutting for a good while yet; and then again the speculators are not realizing on former investments in a manner to encourage them to invest again.

DECLINE IN COLORED COTTONS.

That the boast made by the Dominion Government that the duties on many lines of dry goods had been reduced by the recent revision of the Canadian tariff has not been all bombast, is shown by various reductions in the prices of several lines since that time. Under the new tariff American manufacturers have found a profitable market in Canada for colored cottons. Domestic manufacturers, in consequence, have been compelled to lower their standard of values, and in consequence prices have declined from 5 to 20 per cent. In denims the reduction is very considerable, amounting in some lines to from 15 to 18 per cent. In shirtings the reductions are not so large, and will average perhaps 7½ per cent., being 10 per cent. in some cases. In cottonades again the reduction is more important and runs

anywhere from 5 to 10 per cent. These reduced prices apply only to goods delivered to jobbers after the first of next month. Rebates are not to be allowed. This change is a very important one and may materially affect the output of Canadian mills. In a previous number we referred to the severe competition that Canadian textile manufacturers, wholesale jobbers and even retail dry goods dealers along the border line of the United States were compelled to stand in consequence of the commercial depression in the States, and this is but another evidence of what we then said.

LAST YEAR'S AMERICAN COTTON CROP.

Secretary Hester's New Orleans Cotton Exchange report on the cotton crop was issued in full on the 3rd inst. The crop for 1893-94 amounts to 7,549,879 bales, an excess of 849,452 over last year. Mr. Hester says the largest part of the gain was in Alabama, Georgia, Florida and North Carolina. The increase in the Gulf States, Arkansas, Louisiana, Mississippi and Tennessee was 351,000 bales, while Texas decreased 59,000.

The average commercial value of the crop is placed at $37.50 per bale, against $42.50 last year, $37.50 in 1891-92, and the total at $283,118,000 as compared with $284,150,000 last year and $338,812,000 the year before, showing the remarkable fact that while the output of the last year has been 849,452 bales in excess of the previous year, its commercial value is $1,032,000 less.

The commercial crop in thousand bales is given as follows for 1893-94:

Alabama	935	North Carolina	425
Arkansas	625	South Carolina	750
Florida	50	Tennessee, etc	275
Georgia	1,125	Texas and Indian Ter	2,059
Louisiana	400		
Mississippi	916	Total crop	7,550

In relation to American mills Mr. Hester says the season has been anything but favorable, north or south. On the heels of their largely decreased takings for 1892-93, Northern mills show a further reduction for the past season of 86,113 bales. The effect of financial stringency and delay as to tariff legislation were depressing influences in this industry, and for the first time since the war a set-back is to be recorded Southern consumption has fallen off 25,333 bales.

FOR GROCERS AND PROVISION DEALERS.

A brewery is to be started at Kamloops, British Columbia.

The annual beer consumption of New York city is 5,000,000 brls.

Samples of new crop currants show the quality to be exceptionally fine.

The Delhi Canning Co. are shipping canned apples to Glasgow Scotland.

Ten car loads of cheese were sent away from Stratford the other day in one shipment.

Population considered, Milwaukee consumes more beer than any other American city.

Lemons have weakened somewhat in New York, in consequence of large arrivals at that port.

A shipment of California peaches and pears has been successfully sold in London, Eng.

E. J. Wigle, Kingsville, recently shipped ten car loads of clover hay to Southampton, England.

Thirty boxes of Prince Edward Island cheese have been forwarded as an exhibit to the Toronto Industrial Fair.

McKenzie, Powis & Co., wholesale grocers, of Winnipeg, purpose opening a branch house at Edmonton, N.W.T., at an early date.

Grocers should take more than ordinary care to place decaying fruit where it will not be offensive and dangerous to the public health.

The Dominion Express Co. is making shipments of three or four cars of assorted fruits from Niagara to Winnipeg weekly.

The first shipment of Pelee Island grapes for the season was made last week.

The Carthew cannery, on the Skeena River, B.C., has been salting instead of canning salmon this year, and is said to have put up about 1,000 barrels.

Smoked canned salmon is an innovation on the Fraser River, a smoking establishment having been running at South Westminster, B.C., for some time past.

While shipments of sugar to the Maritime Provinces are no larger than usual, the quality is much finer as a result of the recent tariff change. Next spring this trade is expected to show a large development.

Edward Adams & Co., wholesale grocers of London, will shortly open a branch of their wholesale establishment in Windsor. Maurice J Twomey will have charge

The Boston fish bureau reports the New England catch of mackerel to date 29,687 barrels, against 25,606 for the same time last year and 34,103 to a similar date in 1892.

Ottawa flour and feed dealers complain that grocers are able to buy at the same prices as themselves, and in order to catch grocery trade often sell these goods below cost

A hop cluster a foot long and seven inches wide, containing one hundred blossoms, was taken the other day from the 30-acre hop yard of D. B. Coolidge, Demorestville.—*Picton Times*

Salt supplies are in very small compass here now. Merritt Bros & Co. were yesterday loading a third cargo within the month for Maine ports, making a total of 5,000 sacks. *St John Sun*

D D Wilson, the Seaforth egg buyer, claims that it will pay farmers better to feed their wheat to the hens and sell the eggs at 8 cents a dozen, than to market the grain at 50 cents a bushel.

A company of local capitalists has been formed to build and operate a brewery in Prince Albert. The capital of the new concern is said to be $10,000. The establishment is to be in running order before the new year.

The report of the Montreal cattle inspectors of the shipments for the months of July and August is as follows: July, 42,041 cattle, 33,231 sheep and 2,528 horses; August, 12,562 cattle, 26,880 sheep and 644 horses. The figures for the same period last year were 60,836 cattle, 712 sheep and 1,123 horses There is thus a dropping off in the shipping of cattle, while the increase in sheep and horses is double that of the same months last year.

Mr. Michael Lefebvre, of the Berthier, Que., beet root sugar industry, pays varying prices for his beets, according to the acreage of the cultivator. If, for instance, a man cultivates five acres or under, he receives at the rate of $5 per ton for the roots at the factory; but if the raiser is energetic enough to put 10 acres of his farm under beet root cultivation, Mr. Lefebvre pays him $5.50 per ton. The plan has been successful in increasing the acreage under beet crops.

DRY GOODS JOTTINGS

Umbrellas may begin to sell at last.

Jackets with capes are again in favor.

Sequin laces are sellers for the fall trade.

Canadian-made cloaks are meeting with increased favor

Blue serge was never so fashionable in London as at present

In neckwear green in its various shades appears to be popular.

Black velvet will be much used in Paris for millinery purposes.

Tailors say that the bicycling craze has seriously hurt their trade

Velvets for millinery purposes promise to find increased demand with an advancing season.

Berlin has refused to grant the desired aid to the shirt factory there.

The fur exhibits at the Industrial Fair, Toronto, are exceedingly good.

Hatters have designed but little that is really new for the fall season of 1894

The firm of R. Score & Sons, merchant tailors of Toronto, have opened a branch in Winnipeg.

European textile centres are beginning to show life in consequence of a settlement of the United States tariff.

Jackets for the season range from 32 to 36 inches in length; 34 inches promises to be the popular length in Canada.

Montreal millinery openings were held on the first three days of the week, and were, as usual, well attended. We have something to say about them elsewhere.

Fur has not the place it held last year in jacket trimming material. In great part the season's jackets are plain, although braid is used to a considerable extent on some.

The autumn season has many novelties in neckwear. The Ascot s coming back into use, and so is the moderate-sized puff. Extremes of all kinds have been outlawed.

Country merchants, when paying their exhibition visit to Toronto, will do well to pay the closest attention to the departmental stores and their methods. There is many a pointer to be picked up

A new creation in bonnets is a velvet crown made in the shape of a leaf and of bright color. It is very striking, the colors of these plaque leaves being as a rule jacqueminot and bluet, both new colors.

The *Draper's Record*, in a well-written editorial, calls attention to the serious loss to merchants by over-measurement. The loss of a few inches in every parcel means a great deal when totaled up at the end of the year.

New York tailors assert that they have a method of cutting which will prevent trousers from bagging at the knees. The trousers are cut large at the hips, and slope down with almost straight seams to the bottoms. If the widths are, say, nineteen inches at the knees, they will be seventeen inches or less at the feet. This will enable the legs to fall in perpendicular lines and will prevent the knees from bunching.

Toronto merchants say that the golf cape is going to be a seller this fall. This cape is made principally from a two-toned tweed effect. Straps are attached, crossing on the breast and fastening on the back; they thus allow freedom to the arms. As the golf cape is not heavy enough for severe weather, the approach of winter will see it replaced by something else. The best colors are black, brown and grey. Prices range from $5 to $15 each.

ABOUT BOOKS AND STATIONERY.

An English writer describes Poe and Emerson, "the one as the artist of the beautiful, and the other as that of the true."

A new edition of Mrs. Oliphant's well-known book on the "Makers of Florence" is to be issued by the Macmillans this month.

"What is the difference," said the professor, "between music and noise?" "Practice is noise and playing is music," said one of the afflicted.—*Cincinnati Tribune.*

A bookstore has been opened on St. Catherine street, near Peel, in Montreal, by Alfred T. Chapman, well known as manager of Messrs. Foster, Brown & Co.'s uptown store in that city.

William Winter's popular "Life of Edwin Booth" will appear this month in the uniform edition of his works. This edition will have a new portrait of Edwin Booth as Hamlet not heretofore published.

American crépe tissue is being made in three new colors, viz.: "Geranium," a very deep rich scarlet; "American Beauty," a brilliant magenta pink, of the shade of the popular rose of the same name, and "Royal Purple."

"Kalamazoo Whist," an American paper says, has come to be as staple an article with the stationery trade as playing cards, and now that the elastics in the trays are so easily replaced the dealers cannot have any "decayed" stock.

Geo. W. Gregory has opened an office at 5 King street west, Toronto, where he will represent Lovell, Coryell & Co., Ogilvie & Co., and D. Appleton & Co. Mr. Gregory has been in New York for a couple of years, but is a Canadian by birth.

The Burlands, of Montreal, are at their old tactics again of organizing companies, says the *N.Y. Stationer*. They have now two seeking incorporation. One is the Canada Engraving and Lithographing Company, and the other is the Union Card and Paper Company.

Another blunder attributed to the framers of the tariff is one which concerns the tax on playing cards. The law requires that every pack sold shall have a two cent stamp on it. But the stamps necessary have not been printed yet. This would seem to be hard on the makers of playing cards, but it will not so much disturb the euchre players and poker players, who will just use the old pack a little longer.

The following conversation between a book-store clerk and a woman newly become rich is related—or invented—by the Chicago *Record:* "Mrs. Nurich—'I s'pose you have the best standard littry works suitable for a first rate libery.' Book-store clerk—'Certainly, ma'am.' Mrs. Nurich (firmly, but with condescension)—'Send me up a dozen of each with the bill.'"

The proofreader sat, ill at ease;
He murmured, "What sorrows are these?
Most tongues I have read,
Both the modern and dead,
And now I must study Chinese!"

—*Washington Star.*

It is somewhat of a surprise to see such books as "The Man in Black," and "The House of the Wolf," by Stanley Weyman; "A Study in Scarlet," by Conan Doyle, and the much criticised "Dodo," said to be by the Archbishop of Canterbury's son, reproduced in cheap and yellow-covered form, in the Munro library of popular novels. The series now numbers some thirty and includes "Ideala," by Sarah Grand, "A Yellow Aster," "The Duchess," and even "Ships That Pass in the Night."

We talk about cheap books, and with reason. But only the man who goes to New York with the cash and finds out the proper quarter will realize for how little a certain class of paper-covered books can be bought. New books, clearly printed, containing 250 pages and weighing six ounces, can be had for less than five cents each. How the writer, the editor, papermaker, the printer, the binder, can all make profit out of such publications before they come into the hands of the bookseller, is one of the puzzles of to-day.

Already the Toronto News Company is taking orders for the Christmas illustrated papers, such as the *Graphic*, *Black and White*, *London News*, *Pear's Pictorial*, *Puck* and *Judge*, and the *New York Life*, *Figaro*, *Saturday Night*, and a long list of others. These issues had an excellent sale last year and may be looked upon by the bookseller as standard articles. Besides, we should think it an advantage to get them in early, as it is possible to do, and have them disposed of before the usual trade of that season begins.

Quite a deal of talk has been created in Canada over the ruling of the custom authorities that all goods bought in bond in New York and imported into Canada must pay duty on an amount made up of the price paid at New York, plus the American duty that would be paid were the goods passed through the United States customs. Small importers especially feel the pinch, as they find it very convenient to buy small cases in New York from the commission merchants there at prices which are equal to London or Berlin prices, plus the freight and a small commission.—*American Stationer.*

PRESCRIPTIONS FOR DRUGGISTS

Rhubarb is reported as advancing abroad.

At the London, Eng., sales of cacao butter, on Tuesday, prices declined to an average of 13d.

Castor oil is, it is reported, to be used instead of cocoanut oil in the carriage-roof lamps on the Bombay, Baroda and Central India Railway.

The products of India and the East Indies are firmer as the result of a recent advance in silver. In dyestuffs cutch, gambier and indigo are affected.

Reports from Holland are to the effect that continued rains have injured the crop of caraway, and the seed now reaching the market is dark in color.

Gambier is gaining strength. This is due in part to a "bull" movement on the part of London operators, and in part to mills resuming operations that have long been closed down.

Samples of chlorate of potash made by an electrical process are being shown in the market. The goods are in the shape of scales, transparent, and of a handsome appearance.—*N. Y. Journal and Bulletin of Commerce.*

Toronto drug merchants report a decided improvement in trade. Retail buyers have appeared in the market only, however, when stocks were about depleted, and the volume of movement for the remainder of the year should be good.

Several influences, says the *N. Y. List*, have contributed to an advance in shellac: the advance in silver, the rise in Eastern exchange, due to the placing in the Eastern markets of large orders of all classes of merchandise for future delivery, and speculation in London and Calcutta, owing to the statistical position.

There is every indication of still higher prices for the better grades of cod liver oil. The statistical position is thus given by the *Drug Reporter:* In 1893, of 20,670 barrels reported, 16,380 barrels represented Lofoten oil; in 1894, of 13,560 barrels, 10,130 barrels is Lofoten. This heavy decline in production should, with a normal consumptive demand, add great strength to the hands of holders.

The *Drug Reporter*, of Sept. 1st, lists the following drugs as having advanced: Alcohol, castile soap, colocynth apples, cologne spirit, quicksilver, silver nitrate, spermaceti, anise oil, cassia oil, rock candy, gum chicle, gum kino, jalap, western senega, rhubarb, mace, nutmegs, pimento, pepper, shellac, cacao butter. On the other hand, these drugs have declined in American markets: Opium, boracic acid, citric acid, bay rum, borax, castor oil, licorice paste, Peru balsam, croton oil, pomades, plasters, peppermint oil, dandelion root, Mexican sarsaparilla, southern senega, quinine.

INSURANCE MATTERS.

It is stated by the *Indicator* that Mr. George R. Van Norman, for fourteen years past special agent for the Canadian Pacific Railway, has resigned the position and has joined the forces of Day & Gavett, general agents for the Equitable Life.

The Chicago *Tribune* is authority for the statement that eighty-one fires, or thirteen and one-half per cent. of the whole, in Detroit last year, were caused by gasoline stoves. Probably all, or nearly all, of these might have been prevented by proper care.

The nineteenth annual meeting of the National Convention of Mutual Life and Accident Underwriters will be held at the United

States Hotel, Boston, on the 11th September to the 14th inclusive. It is expected that by changing the date to fall there will be a larger attendance than at previous meetings.

The officers, directors and clerks of the Union Mutual Life Insurance Company, together with a number of the company's western agents, recently went to Pine Point for an old-fashioned outing. And what was the principal feature of the jollification, do our readers think? -A clam bake!

"Don't" is the title of a brochure issue by the Metropolitan Life Insurance Company. It starts off with the words "Don't what? Don't lapse," and then goes on to give reasons why policies should not be allowed to lapse. Not unlike this in style is the ingenious advertisement of the Great-West Life Assurance Company, of Winnipeg, in the special issue of THE MONETARY TIMES last week, page 291. This began with the statement that "It works on Sundays and holidays, night and day, year after year,"—and then asks WHAT DOES? replying to its own question with INTEREST DOES, and giving reasons why it thinks the Great-West can offer advantages in the way of interest earnings.

In Montreal last week an organization meeting was held by the gentlemen connected with the Colonial Mutual Life Association. This company obtained a charter at the last session of Parliament. The president of the provincial board, Col. Chas. King, of Sherbrooke, occupied the chair. The meeting passed by-laws and afterwards chose following gentlemen a board of directors, viz.: Hon. F. G. Marchand, Lieut.-Col. Chas. King, Hon. P. Garneau, Mr. F. P. Buck, Lieut.-Col. T. T. Turnbull, Mr. R. A. E. Greenshields, Mr. Charles C. Chisholm, Mr. Wm. Farwell and Mr. T. J. Tuck. The directors met afterwards and elected Lieut.-Col. T. T. Turnbull, president; Mr. F. P. Buck, first vice-president, and Hon. P. Garneau, second vice-president. Executive officers were appointed as under: J. F. Mathieson, general manager; E. A. Baynes, secretary; R. A. E. Greenshields, treasurer; J. T. Finnie, medical superintendent.

NOTES FOR MANUFACTURERS.

The Embro, Ont., flax mill had to be closed because of the drought. The flax that is spread, says an exchange, is spoiling under the hot sun, instead of rotting.

The village of Exeter, Ont., now revels in electric light. As the *Times* puts it, the people have, as it were, been suddenly brought from darkness into light. The arc lights, which are of 2,000 candle power, are working well, and much is hoped from the incandescent lights.

A company called the Oromocto Coal Mining Company has been formed in New Brunswick. The members are Parker A. Nason, farmer and trader; Edward Moore, of Fredericton; Luke E. Dewitt and Daniel Dewitt, farmers, of Sunbury; Wesley D. Nason, of Gladstone, farmer.

The preparation of stock for the use of rubber manufacturers is a business of considerable magnitude in the United States, yet never undertaken in Canada to any extent. Rubber reclaiming, the name by which the business is known, has in Montreal a company which aims to make the business a success, as it has been made elsewhere. The following are the directors of the new company: Messrs. Wm. Clendinneng, Wm. Currie, W. T. Costigan, W. D. Lighthall and Francis Dagenais. The *Gazette* tells us that all the machinery is now being made in Montreal at a figure comparing favorably with American makers.

Referring to the common statement that electricity is still in its infancy, Professor Dolbear recently said: "Electricity is not in its infancy. Despite what has been done, there is nothing in the present use of electricity that has not been known for many years. Arc lights were known 80 years ago; the telegraph is 60 years old, the telephone 30, and the incandescent lamp ditto. We are not at work with new things or on new principles. If you are running a motor with electricity, it is not a new discovery in electricity to apply the same power to the operation of a lathe or a street car."

ANSWERS TO ENQUIRERS.

ARTS, St. John.—It is not within our province to attempt to answer such questions. Apply to some bookseller.

J. P., Montreal.—The letter is too long for our columns; and, besides, your sympathy goes to a dangerous length. While we should like to see arbitration replace war, in labor, as in national differences, there must be a reasonable basis for arbitration. Laborers are quite as arbitrary as employers; this is shown in many cases we have known, and even more cruel in industrial war. The attitude of the unreasonble striking workman is satirized very well by *Puck*, in a recent issue, thus: Judge.—"You have been found guilty of assaulting the man who took the job you abandoned, guilty of attacking your employer, and burning his property. What have you to say for yourself?" The prisoner replies. "Wull, y'r anner, Oi'm willin' to ar-bytrate."

BOOKS RECEIVED.

THE BOOK OF THE FAIR. This beautiful and in all respects admirable work descriptive of the Chicago Exhibition, has reached its sixteenth number, and one looks forward almost with regret to its nine further numbers. So satisfying has been the character of those already issued that each succeeding issue is awaited with an interest that is never disappointed. In the present number are found chapters 19 and 20, devoted to Live Stock and to Ethnology, respectively. There are three full-page and 79 other illustrations, of the most delicate photogravic character. From pages 613 to 622—which contain pictures of some beautiful animals—we quote: "The first exhibits forwarded consisted of a band of Morgan horses and a herd of cattle from Vermont, these being followed soon afterward by Canadian thoroughbred horses and cattle, of which nearly sixty car loads arrived in a single day. A week or two later there were on the ground 1,200 head of cattle and 800 horses. . . . It was decided that the best hackneys were those from Nebraska and Canada. . . . Certain it is that our best trotters have come from various stocks, as the Morgan, the Canadian, and the English thoroughbred. . . . The display of Canadian cattle was much more extensive than that of any of the States, and the Dominion was rewarded with a large proportion of the highest premiums. Canadian exhibitors swept all before them in Ayrshire cattle, with Daniel Drummond, of Montreal, as the largest prize winner. . . . The prominence of Canada in the live stock department was no where more evident than in the line of blooded horses. Quebec is especially proud of the pedigree of some of her specimens, descended as they are, from a stud sent there (Norman) by the King of France in the 17th century." Address the Bancroft Company, Auditorium, Chicago.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, August 30th, compared with those of the previous week:

CLEARINGS.	Aug. 30.	Aug. 23
Montreal	$9,285,449	$10,634,062
Toronto	4,388,346	5,837,514
Halifax	1,083,590	1,165,908
Winnipeg	856,587	634,670
Hamilton	516,613	529,501
Total	$16,080,585	$18,801,685

Aggregate balances this week, $2,510,314; last week, $3,636,988

	6th Sept.	30th Aug.
Montreal	$8,459,284	$9,235,449
Toronto	3,496,267	4,388,346
Halifax	1,030,617	1,083,590
Winnipeg	769,426	856,587
Hamilton	672,403	516,613
	$14,427,997	$16,080,585

Aggregate balances this week, $2,157,550; last week, $2,510,314.

—The Government of Canada and the Harbor Commissioners of Montreal are not backward in providing machinery for deepening our great waterway of the St. Lawrence and keeping it free from obstructions to navigation. A description is given in the Montreal press of the steam-dredge "Laval," a most powerful machine, probably the most powerful in America. It has been completed under the direction of the departmental officers, at a cost approximating $57,000. And it is alleged that it could not be furnished by British manufacturers under $75,000. The lifting gear, which raises or lowers the bucket frame, has a capacity for moving sixty-five tons, while the most powerful employed in the New York harbor operations lifts only about forty-five tons. The machine can work in water of a depth of forty feet. It is working on a bottom composed of boulders running in size from a man's fist to a weight of several tons. To remove the heaviest of these, a special stone lifter is kept in reserve. Boulders weighing well up to a ton were lifted by the buckets, which work on an endless chain.

The importance of Montreal as a shipping port and a seat fo manufacture is illustrated by the fact that during the month of August this year 56 steam vessels, of a tonnage which ranged from 1,200 to 3,800 tons each, averaging 2,477 tons, carried coal thither from Maritime Province ports, and the total of their cargoes reached 138,710 tons. This, of course, was all soft coal. If receipts of Pennsylvania anthracite and Scotch coal were added the aggregate would be something large

Correspondence.

HARD LINES FOR THE STOREKEEPER.

Editor MONETARY TIMES:

DEAR SIR,—It is now getting on for thirteen years since I have been a storekeeper in this city. And I am troubled in my mind to know what is going to be the outcome of my business, as matters are now going. I made money at first, and for a good while I made several additions to my capital. But with these big stores like Eaton's, and Walker's and Simpson's, with their bargain days, cutting the trade from under our feet, and with the way goods are getting cheaper every year, us small storekeepers do not scarcely know how to turn.

I buy as close as I can, and often for cash, and I cannot say as the houses I buy from do not treat me fair personally. But this is what I find—when I buy a line of dress goods at a price, and I think I have got good value, ten to one I find some of the big stores has got "a drive" of the same goods, or something cheaper, and are underselling me right along. And my customers go to the big stores on bargain day and buy their goods for cash, and then sometimes they ask me for credit. So it don't seem to me somehow a fair shake.

The times are changing, there is no doubt about that, and we are not able to get the profits we used to in former years. We have to sell half as many goods again as we used to for to make a thousand dollars a year. Now, is this thing going to keep on? because if it is the best thing any small storekeeper can do, it seems to me, is to get out of business and go to fruit raising or something. You give us advice sometimes: now can you give advice how I, or men like me, are going to work our business so we can keep in it? DEAD EARNEST.

Toronto, August 26th, 1894.

ESTIMATE OF THE WORLD'S CROPS

The annual crop estimates issued by the Hungarian Minister of Agriculture places the wheat crop of the world at 2,476,000,000 bushels for 1894, against 2,279,000,000 bushels for 1893, and 2,280,000,000 bushels the official average for the past decade. The deficit requiring to be covered by importing countries is 364,526,000 bushels for 1894, against 379,000,000 bushels in 1893. The surplus from exporting countries is 444,245,000 bushels, against 378,664,000 bushels in 1893.

The detailed figures representing the production and deficit of the various importing countries for the year 1894 are as follows:

	Production. Bushels.	Deficit. Bushels.
Great Britain	60,995,000	170,220,000
France	354,625,000	19,859,000
Germany	102,132,000	32,625,000
Italy	120,228,000	29,788,000
Holland	6,241,000	11,915,000
Switzerland	7,376,000	11,915,000
Belgium	21,277,000	25,533,000
Denmark	4,539,000	1,702,000
Sweden and Norway	5,106,000	7,092,000
Spain	97,876,000	12,768,000
Portugal	9,078,000	5,675,000
Greece	3,404,000	3,972,000
Austria	45,400,000	31,774,000

The figures in detail of the production and surplus of exporting countries are these:

	Production. Bushels.	Surplus. Bushels.
Russia	363,036,000	141,850,000
Hungary	151,098,000	45,392,000
Roumania	51,066,000	19,859,000
Turkey	29,793,000	5,675,000
Bulgaria	31,207,000	13,050,000
Servia	9,920,000	1,985,000
United States	408,528,000	70,925,000
Canada	42,555,000	15,603,000
India	258,167,000	22,696,000
The rest of Asia	58,158,000	2,837,000
Africa	48,370,000	5,957,000
Australia	42,895,000	14,185,000
Chili	24,114,000	9,929,000
Argentine Republic	117,508,000	73,762,000

A POETICAL COMMERCIAL MAN.

This is how an American commercial editor—he ought to have been a poet—speaks of the fluctuations of the stock exchange: "Corn—the friend alike of poet, peasant and speculator—hovered lovingly a moment at 43c., and then alighted with pink-doved feet at 44c."

THE UNITED STATES TARIFF.

There have been many criticisms of the new American tariff. Neither friends nor foes of the Administration are pleased with it. But every one should be thankful—and most Americans are—that it is settled at last, and the uncertainty that paralyzed business for so long has been removed. Tariff reformers are disappointed with it, for it is still too strongly protective. But it should give some satisfaction to Canadians in that it reduces the imports laid by the Americans on a number of our products. Among these are malt, barley, hay, wheat, rye. wool, eggs, soft coal.

	McKinley Law.	Wilson Bill.	The New Tariff.
Barley	30c bu.	25 p.c	30 p.c.
Flour	25 p.c.	20 p.c.	20 p.c.
Oatmeal	1c. lb.	20 p.c.	15 p.c.
Barley malt	45 p.c.	33 p.c.	40 p.c.
Hay	$4 ton	$2 ton	20 p.c.
Hops	15c lb.	8c. lb.	20 p c.
Onions	40c. bu.	2c. bu.	20 p.c.
Potatoes	25c. bu.	10c. bu.	30 p.c.
Beans	40c. bu.	20 p.c.	20 p.c.
Buckwheat	15c. bu.	20 p.c.	20 pc..
Oats	15c. bu	20 p.c.	20 p.c.
Rye	10c. bu.	20 p.c.	20 p.c.
Wheat	25c. bu.	20 p.c.	20 p.c
Eggs	5c doz	Free	3 p.c
Vegetables	25 p.c.	10 p.c.	10 p c
Poultry	5c. lb.	2c. lb.	20 p.c.
Beef	2c. lb.	Free	25 p.c.
Mutton	2c. lb.	Free	25 p.c.
Pork	2c. lb.	Free	25 p.c.
Butter	6c. lb.	4c. lb.	20 p.c
Preserved milk	3c. lb.	20 p.c.	5c. lb
Honey	20c. gal.	10c. gal.	20 p.c.
Smoked fish	¾c. lb.	¾c. lb.	15 p.c.
Apples		Free	20 p.c.
Apples, dried		Free	20 p.c.
Plums		Free	30 p.c.
Horses	$30 or 30 p.c.	20 p.c.	20 p.c
Cattle	$10	20 p.c.	20 p.c.
Coal, bituminous, 75c.		Free	40 p.c.
Wool, raw	11 and 12c	Free	Free
	32 and 50 p.c.	Free	Free

STYLE V. ART IN WINDOW DRESSING.

The window trimmer is too apt to lose sight of the prevailing styles or fashions in making a display, to meet with his own ideas of artistic effect. There is no reason why this should be the case, as the window trimmer should be fully as interested in fashions as the dressmaker, and should not allow his personal ideas or prejudice to cause him to neglect the prevailing fashions in his display of dress fabrics.

This is particularly applicable just now, when the new fall dress goods are beginning to make their appearance and window trims of these materials are in order. With the many fixtures now designed for the artistic display of goods, almost any one can trim a window that is not bad, but this kind of negative work should be carefully avoided by any trimmer who takes an interest in his work. To excel is what all should strive for, and every window dresser should always bear in mind that artistic effect alone will not make a window display successful; though it may attract attention, it will not always sell the goods, which latter should never be lost sight of.

Dress goods should always be displayed in a manner that will suggest the prevailing style of making up, as a person attracted by the display always wants to see what the effect will be when draped as they would be in the making up, and if the display contains no suggestion of the prevailing style she is necessarily disappointed. Let the two foundations for a successful window—art and style—be combined, and neither neglected to the detriment of the other, and the result will be a window that will not only be attractive, but will also make sales.—*Dry Goods Economist.*

STORY OF THE QUEEN.

This story is given on the authority of a gentleman of large means in a Midland Scottish county: "This gentleman, Mr. C——, had a very fine hothouse vinery, which was celebrated for its choice produce. On a particular occasion, when the Queen was on one of her periodical journeys through Scotland, the Royal train was timed to stop for luncheon at a well-known through station in this county, and Mr. C—— availed himself of the opportunity afforded to send Her Majesty an offering of his best grapes. In due course a letter of acknowledgment expressing the Royal appreciation of the gift and complimenting the donor on the fitness of the fruit, reached him; and, feeling sure his head gardener would be greatly interested in the contents of the letter, Mr. C—— read it to him. The man of horticulture gravely listened, and this was all his comment: 'She disna say onything about sending back the basket!'"

—The fast side-wheel steamer "Frank E. Kirby" is reported to have made the run, the other day, from Detroit to Put-in-Bay, in 2 hours and 55 minutes. The distance between Bois Blanc light and Put-in-Bay, 35½ miles, was covered in 1 hour and 58 minutes. For nearly half this distance the water is shoal. The performance as reported would indicate that her speed between 12th street, Detroit, and Bois Blanc light, close upon 19 miles, was made in less than an hour. The average revolutions of the wheels from Detroit to Middle Sister Island was 32½. Between Middle Sister and Put-in-Bay, where the water is as deep as it is anywhere at the head of Lake Erie, 34½ revolutions were made, and the speed of the boat during this part of the run is thought to have been close to 20 miles an hour.

—Although the hay crop in the United States is slightly short, the crop on the continent of Europe is said to be abundant. Special reports covering the United States, Canada and Europe, collected for the crop report number of the *Hay Trade Journal*, have been published. They show a shortage, as compared with an average crop, of nine per cent. Some 3 per cent. of the old hay remains in the hands of the farmers and dealers. The only section of the United States showing increased acreage is Ohio and Michigan. Prices at the sea-board markets of the United States vary from $9 to $17 per ton.

—A correspondent had been to church, and afterwards receiving a life insurance proposal, the startling thought occurred to him whether, remembering the promise of longevity to those who honor father and mother, an insurer, on satisfying the life office that he had honored and did so honor his parents, ought not to pay a proportionately less premium! This point, says an insurance journal, has, so far as we are aware, in all "proposal forms" invariably been overlooked hitherto.

—The twenty-third annual meeting of the Nationa Board of Steam Navigation will be held in Cincinnati, September 11. This organization is made up largely of owners of vessel property navigating the western rivers and the Atlantic coast.

—Head of the Firm—"Humph! Booker off again to-day? What's his 'excuse this time? A lame one, I'll bet."

Clerkem—"Yes, sir; broke his leg, sir."—*Buffalo Courier*

—There is a man in New York who makes it a part of his business to repair shirts, and in these hard times he finds plenty to do. Shirts of very respectable folks come to him to be cured of their ills, and go forth looking like new garments. If a man of fashion be not content, like ordinary mortals, to buy his shirts at $1, $2 or $3 each, but must pay $60 per dozen, when hard times overtake him and duns pour in, his only recourse is the shirt repairer.

Commercial.

MONTREAL MARKETS.

MONTREAL, Sept. 5, 1894.

Last Saturday was a "dies non" on the Montreal stock market, as was also Monday of the current week, being Labor Day, but apart from this the market has been a very dull one, with few noteworthy transactions of late. The only stock receiving any attention at present is street railway, which has been selling at 154 for old, and 149½ for new stock; a little has been done in Richelieu at 82¾. Banks are neglected, the only recent transactions being a few small lots of Montreal at 220¾ to 221. Money continues plentiful and easy at the banks, the general quotation being 4½ for call money, but some round loans have been done at 4 per cent.

ASHES.—Receipts continue very light. There were in store at the end of August only 93 brls. of pots, and 9 of pearls at this port, and receipts since are only 8 brls. pots and 8 brls. pearls. Values show a further stiffening tendency, and first quality pots are now quoted at $4.15 to 4.20; seconds, $3.75 to 3.80; pearls are also very much stronger; a recent sale of a lot of poor tares was made at about $7, and we now quote $7 to 7.50.

CEMENTS AND FIREBRICKS.—Freights are somewhat higher, but local prices are hard to advance, though there has been a large consumption and supplies come out slowly, making present supplies somewhat scant. Sales of Belgian cement have been made at from $1.80 to 1.85; English, $1.85 to 2.00. Firebricks are quoted at from $14.50 for common to $19 for Glenboig.

DAIRY PRODUCTS.—In butter there is only a moderate amount of trading, and the export movement is very light, shipments last week being only 956 pkgs. We quote creamery 18¼ to 19c.; Townships dairy, 16 to 17c.; Western, 14 to 15½c. per lb. In cheese the advance noted last week has been more than maintained, and finest Western colored is now quoted at 10⅝ to 10¾c., finest white 10¼ to 10⅜c., finest Quebec 10⅜c. The shipments last week from this port were 69,090 boxes, as against 46,513 for the corresponding period of last year. Eggs are steady at 10½ to 11c. per dozen.

DRY GOODS.—The millinery openings this week have been exceedingly well attended, and millinery importers express themselves as well satisfied with results so far, but there has not been the influx of dry goods buyers expected this week. Quite a number of Montreal commercial travellers are attending the different fairs at other towns or cities, and are booking some pretty good orders thereat. City retail trade is quiet as yet. A letter just received from one of the first wholesale buyers to reach England reports a notable firmness in Bradford dress goods.

GROCERIES.—The numerous country fairs are interfering somewhat with travellers operating in the country districts, and orders show some falling off from what they have been lately. With regard to values there is little new to note. Japan teas are fully as firm as last reported, if not firmer. Further cables confirm a strong advance in Japan, which may be accepted as a full two cents, though some claim considerably more. There is doubtless a shortage in the crop, as compared with last year, which was an off year, variously estimated at from 3 million to 7 million pounds, so that the market has grounds for firmness quite apart from war troubles. Several local agents of Japan houses are reported as entirely sold out of stock, and there is still an active demand from jobbers. Sugars remain exactly as last quoted, with a good steady distribution. Molasses is firmer, first hands quoting 27½c. per gal. for Barbadoes in lots ex store, there being no further supplies available from wharf; jobbing prices 29c. in car lots, 30c. the single puncheon. There is still a lack of interest in canned vegetables; jobbers do not seem inclined to buy ahead as heretofore, and the impression

is that packers themselves will have to carry the stocks hereafter.

LEATHER.—Some further fair sales of slaughter sole are reported, with the result that the market is now pretty well cleaned up in this line. There is not a great deal of upper selling, and though shoe manufacturers are well into the cut for fall orders, the majority are just buying in moderate lots from week to week. Tanners are talking stiffer prices, but quotations are just as before. English letters speak of a little better enquiry for splits, but with no improvement in the low prices as yet. We quote:—Spanish sole, B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter, 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do. small, 10 to 12½c.; calf-splits, 27 to 30c.; calf-skins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American. 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The week has developed little that is new, and business is just moderate. It is very hard to sell Summerlee iron, or other Scotch brands, at present figures, and the consumption is gradually but surely turning to American and domestic brands. As it is, the importation of Scotch iron is a mere bagatelle to what it was some years ago, and there are those who predict an almost complete decay of the trade. The British tinplate market seems to have lost the gain in firmness noted a couple of weeks ago, and the possibility of transactions in round lots at figures below our inside quotation for cokes is freely discussed. Ingot tin and copper are steady at quotations. Lead has slacked off a little in England We quote:—Coltness pig iron, none here; Calder, No. 1, $19.50; Calder No. 3, $18.50; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Siemens, pig, No. 1, $16.25 to $16.75; Ferrona, No. 1, $16.50; machinery scrap, $14.50 to 15.00; common do., $10.00 to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.10 to 2.15; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to $6.25. Black sheet iron, No. 28, $2.30; No. 26, $2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.85; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3½c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¾ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9¼ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Trade in these lines has taken on quite a little spirt within the last ten days, and there is a steady outgo of goods. Turpentine is perhaps a shade easier; linseed oil steady at former quotations; steam-refined seal oil easier at 39 to 40c., with a slow demand; castor oil is firming up in common with all East Indian produce, and will cost more to arrive. Glass still unchanged, though Belgian makers quote from 6 to 10% advance. We quote: Turpentine, 45 to 46c. per gal. for single barrels; two to four barrels, 44 to 45c. Linseed oil, raw, 54c. per gal.; boiled, 57c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6¼c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c.

SEALED TENDERS addressed to the undersigned, and endorsed "Tender for Hot Water Heating Apparatus at Rideau Hall, Ottawa," will be received until Monday, 10th September, for the construction of a Hot Water Heating Apparatus at Rideau Hall.

Plans and specifications can be seen and form of tender and all necessary information obtained at this Department on and after Thursday, 30th August.

Persons are notified that tenders will not be considered unless made on the printed form supplied, and signed with their actual signatures.

Each tender must be accompanied by an accepted bank cheque, made payable to the order of the Honorable the Minister of Public Works, equal to five per cent. of the amount of the tender, which will be forfeited if the party decline to enter into a contract when called upon to do so, or if he fail to complete the work contracted for. If the tender be not accepted the cheque will be returned.

The Department does not bind itself to accept the lowest or any tender.

By order,
E. F. E. ROY, Secretary.

TORONTO MARKETS

TORONTO, Sept. 6th, 1894.

DRUGS.—The country trade is gaining strength, and during the last ten days there has been no decided increase in the volume of movement. Travellers are out on the road and are doing their best to stir up an activity in business. The improvement has been a long while in coming, and even should the present activity be continued until the end of December, the accounts of many houses will be behind those of last year. For a long time orders have been curtailed, and stocks throughout the country must be small, so that it is but natural to look for continued activity. Market values abroad are for the most part firm. Opium is quiet but firm. Camphor has lost no strength. Rhubarb is strong. Oil of anise seed is firm. Oil lemon is weaker. Oil of orange has weakened somewhat. Sales of cocoa butter in London are cabled to have been made at a decline to an average of 13d.; Amsterdam is also lower, with prices cabled 13 5-6d. There is some activity in silver in face of an advancing market.

GRAIN.—There has been a dull market all week. In wheat the only outward movement is to local millers. Buying at outside points is in progress, but deliveries are coming in very slowly. The severe drouth has injured the spring wheat, but samples of fall are showing up well. The Vienna Grain Congress has given out its estimate of the world's 1894 wheat crop. It is in favor of lower values, but has exercised scarcely any influence. According to the estimate the "world's wheat crop for 1894 amounts to 2,476,000,000 bush. against 2,279,000,000 bush. in 1893 and 2,289,000,000 bush. average for 10 years, leaving 71,000,000 bush. surplus in the total exporting countries over last year. The above estimate allows only 408,000,000 bush. for the United States wheat crop, when 475,000,000 to 500,000,000 bush. is the generally accepted amount. Shipments from exporting countries continue to be under European requirements. Stocks on passage decreased 700,000 bush. and the English visible fell away 300,000 bush. last week. On the other hand, the United States and Canadian visible increased more than 2,000,000 bush." Oats are dull on the local market, offerings are not liberal, while city dealers are alone making demands upon stocks. There is a quiet feeling of confidence displayed among dealers in regard to the barley situation, but this results more from the prospects of trade than from any actual movement. American buyers continue to request samples and ask for statistical information, but transactions are held in abeyance until the standards be fixed, which event will occur on the 14th of the month. Peas are steady, and are an exception to other cereals since in good demand.

The stocks of grain in store at Port Arthur on Aug. 24th were 776,340 bushels. During the week there were received 203,982 bushels, and shipped 173,196 bushels, leaving in store on Sept. 1st, 807,126.

GROCERIES.—With the advent of September trade should display increased activity. The volume of the distributing movement has increased, but not to the degree that it should in the normal condition of affairs. With the fruit season at hand, and an exceedingly heavy crop of peaches, with pears plentiful and receipts of grapes growing larger daily, there should be a good demand for sugars. But the consumptive demand is not so large as was expected, and merchants on the street entering into a rather keen competition have been cutting prices. Spices are cabled firm abroad. Odd stocks of dried fruit are being cleaned up, to make place for new fruit which will soon be at hand. First shipments of French prunes will be made this week, this is earlier than usual in consequence of hot weather, which has ripened the crop very quickly. Teas are firm. Japan teas have been

actively enquired for and prices have advanced 1c. per lb. Cables from Shanghai report an advance of 6 per cent. in black teas.

HARDWARE.—While orders are numerous, they are for the most part confined to small lots, and the volume of movement does not appear to be so large as that of the last few weeks. Shelf hardware and tinware for the fall trade constitute the bulk of the orders received. It is the first week of Toronto's exhibition, and already merchants from the country are beginning to make their appearance in the wholesale warehouses. Trade in wire for some time past has been very quiet, but as the season for baling hay is near at hand, it is but reasonable to expect an improvement shortly. Rope shows increased activity. Chain of all kinds is rather inactive. Orders for cow chains, halter chains and rope halters up to the present time have not been satisfactory, and, in fact, nearly all fall supplies, including axes and saws, are not up to the usual standard. Wire nails are in good demand and shipments are for the most part in 10-keg lots. The movement of cut nails has fallen off and is not brisk. Horseshoes are more active, as are horseshoe nails. Business in galvanized iron, tin plate, block sheet iron, Canada plate, is fairly good; other metals are quiet. Trade in lamp goods and gas fixtures is considered very satisfactory. There have been few changes in values. The discount on carriage bolts has been increased slightly. Glass in round lots is being sold at lower figures than the quotations made in our Prices Current, a reduction of 5c. per box being made. Metals on the whole are firm in price and no immediate change is looked for. Fall shooting has now commenced and ammunition is in good request. The city retail trade remains dull and devoid of interest; preparations for the exhibition caused some little improvement last week, but this movement is now falling off.

HIDES AND SKINS.—There is more activity in the hide market, and cured are selling at an advance of ¼c. No change has been made in the price of green hides, and some merchants are inclined to believe the advance in cured to be but of a temporary character. However, the situation in the United States appears to display considerable strength. That great sole leather corporation, the United States Leather Company, has appeared in the market to buy, and their transactions during the last week, according to the Chicago *Review*, call for the delivery of 100,000 hides and disbursing in the neighborhood of $400,000. Calfskins are quiet, and prices remain on a nominal basis. At the commencement of the month shearlings and lambskins made the usual bi-monthly advance of 5c., and now stand at 40c; offerings find ready sale. Tallow is unchanged, selling at 6 to 6¼c., with no accumulation of stocks.

LEATHER—We are inclined to think that, although prices have not advanced, there is a better and firmer feeling in the market. Western factories are beginning to send their buyers into the market for larger parcels, and some fairly large transactions have been made in consequence. The country jobbing trade appears to be quite active, and the general movement in this line shows a steady increase. There is some activity in trade with the east, and we hear of a large Montreal house buying some 11,000 sides of slaughter, the product of a western tanner. Although the price obtained on this transaction has not transpired, it is probably less than market quotations. Some sales of harness have been made this week, but trade is quiet, and the electric car and speedy bicycle appear to have discounted horses, seriously affecting the harness-leather market.

PROVISIONS.—There exists a good demand for choice fresh butter; receipts of this quality, however, are not plentiful; 18c. is the market quotation for such descriptions. Medium and common grades of butter remain neglected. Good stock of eggs is firmer at 10½ to 11c. per doz.: there is a quantity of held stock selling on the market. Cheese is firmer at 10¾ to 11c. Hog products are steady, and the market is unchanged. Stocks at Chicago are reported, 41,000 pork, 22,000 lard, 18,000,000 ribs, which was less than expected all round. Receipts of hogs at Chicago last week, 105,473; shipments, 48,767. New stock evaporated apples are in the market offering at 10c.

SEEDS.—The offerings of timothy have been more liberal, and the feeling in consequence is somewhat easier, dealers anticipating lower prices. It is expected that the coming week

OUR SPECIALTY

We also manufacture **Horse and Trail Cars** of every description o o o o o o

PATTERSON & CORBIN
ST. CATHARINES, Ont.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

The Largest Scale Works In Canada

Over One Hundred styles of . . .

Hay Scales, Grocers' Scales, Grain Scales.

will finish the demand for fall sowing and stocks on hand must be carried over until spring. Alsike is steady and unchanged; offerings are fairly liberal for this season of the year.

WOOL.—No very marked developments have taken place within the week; the feeling is just a little firmer and 17 to 17½c is being paid for desirable lots of fleece wool. The grossly exaggerated reports appearing in some of the daily newspapers as to the profits made by local dealers through the passage of the free wool clause in the United States tariff bill, have had the effect of causing country merchants to hold back their stock. Sales of coarse combing have been made to the United States at 18½c., but the American market, for reasons that we elsewhere enumerate, is not standing in the immediate need of our wool. We hear of some importations from Chicago of fine fulled wools, and, although the figures of the transactions are not disclosed, they are understood to be 18 to 19c., or considerably less than the quotations of local dealers on the same grades.

BRITISH MARKETS.

The Manchester report of S. W. Royse & Co., dated August 25th, says:—

CHEMICALS.—With the settlement, for the present, of the United States tariff question, there is expected to be some improvement in business generally, though trade there has for some time now been so disorganized that any real improvement will probably be of slow growth. The settlement of this question should, however, at least have promptly a steadying effect on trade generally, and probably cause an early improved demand for some chemicals, of which stocks on the other side have been kept running very low in the meantime. For the present the values of alkalies are remaining steady, and bleaching powder is having a good demand, some makes being well sold up to the end of this year; caustic soda has a moderate enquiry, and soda ash (especially ammonia soda), is difficult to move. Bicarbonate of soda is moving fairly well, but soda crystals are very dull, and chlorate of potash is easier. Amongst buyers of alkalies there is now more disposition to cover for next year, and some business has already been done. The Board of Trade returns for the seven months ended July 31st last, as compared with those for corresponding period of 1893, show in the exports of alkali, a decrease in weight of 29,195 tons, and in value of £311,670, and in the export of bleaching materials, a decrease in weight of 11,881 tons, and in value of £112,285. In the tar products branch pitch may specially be noted very firm, and high prices continue to be paid for both early and forward delivery, with stocks only moderate in both makers' and consumers' hands. Solvent naphtha is easier, but not markedly so; sellers seem rather more inclined to meet buyers' views, but there is no pressure of stocks. Creosote maintains its high level of value, and is expected to do so, as the Scotch coal strike is keeping supplies low. Carbolic acids of all qualities are dull and rather lower in price. Acetates of lime are quiet, buyers' wants being well covered, but prices are firm, and expected to improve before long with the customary advance in freights from America. Acetate of soda is rather dull on spot, but there is more enquiry for forward delivery, prices ruling very low and steady. Acetates of lead are quiet, and the recent reduction of £2 per ton in foreign white has caused no increased demand. Nitrate of lead is moving better. Prices of alum for export have been reduced 5s. per ton. Carbonate of ammonia has less enquiry, and muriate of ammonia is rather easier. Carbonate and caustic potash are quite firm, and prussiate of potash maintains its value. Green copperas is difficult to move. Oxalic acid is selling better, and convention prices are now more easily obtainable.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital...	$400,000 00	Government Deposit...	$56,000 00
Paid-up Capital	100,000 00	Reserve	54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

ARCTIC EXPEDITIONS.

Public curiosity is always on the alert with respect to expeditions to polar regions, and of late there have been a number of such. Contradictory reports have been issued about the progress of some of them; and even what was true in the geographical descriptions given was sometimes hardly intelligible by reason of defects in recent atlases or maps of very far north latitudes. The Winnipeg *Free Press*, knowing that Hon. John C. Schultz, Lieut.-Governor of that province, had while in the Senate given study and attention to the Polar, Arctic and sub-Arctic parts of Canada and Alaska when investigating the great resources of the country south of these regions, asked the Governor for his opinion upon the success or otherwise of pending expeditions. In a reply which covers more than two columns of that journal, and which is decidedly interesting, Mr. Schultz gives his views.

NANSEN'S EXPEDITION.

Beginning with the expedition of Dr. Nansen, the Governor praises his forethought, his sensible preparations and his great courage. His expedition differs in some respects from all the others, for with the sea king instinct strong within him, this modern Viking trusts himself and his companions entirely to the "Fram" and to the whale-boats and other craft which she carries. He, last summer, left a southern port of Norway, passed the Loffoden islands, turned the North cape, passed by the mouth of the deep inlet at the bottom of which Archangel is built at the mouth of the Volga, passed between Nova Zembla and the European Russian coast, and when last accounts reached us had crossed, or nearly crossed, the stormy and dangerous Kara sea. It is true that at a date later than that referred to, a wandering coast tribe of Asiatic Russia told of having seen his ship crushed between the ice and a precipitous island in a tidal channel [as was McClure when he found the Northwest passage]. Yet the hope is strongly expressed that he will yet emerge. There is no attempt made to ignore his perils, however, when he nears the paleocrystic ice, "which," said the Governor, "I believe continually surrounds the pole itself." When last heard from near the farther side of the Kara sea, he would have passed the mouth of the Gulf of Obi, leaving Nova Zembla to his left, to the northwest, and Spitzenbergen and Franz Josef Land still further in the same direction, passed near Cape Tamar and across Tamar Bay to and around the northeast cape, and continued his course to and southward of the Linkor or new Siberian Islands, where he may winter. . . . Wherever he has wintered his ship, she must have been some time ere this set free, and September will find him, if still alive, preparing for his final purpose of securely fixing the "Fram" in the Polar Drift.

"Leaving him there, I take next," said the Governor, "the expedition under Lieutenant Peary, which, though less bold in conception, is entitled to rank with Nansen's in that he is an officer of experience in all Arctic matters. We are justified in looking for good results from his efforts in the less difficult work he has set himself to do in the brief space between his departure and the arrival of a relief ship, which, sent by the Philadelphia Academy of Natural Sciences, has already sailed from St. John's, Nfld. He will in all probability verify, by actual survey, the assertions made even in Queen Elizabeth's days, that Greenland is an island continent.

"Jackson's is as yet the only English expedition, its commander equipping it at his own expense, and he has had, I believe, no personal Arctic experience. Like the American expedition of the Chicago *Herald*, under Wellman, he has provided himself with light aluminum sledges and boats, and hoped with these to reach the pole and return to his headquarters at Franz Josef's Land, which is the furthest north of known islands, if island, indeed, it is. . . . He will establish stations at intervals and leave caches of provisions and other necessaries to facilitate his return journey. Wellman's expedition, the cost of which is being borne by a leading Chicago newspaper, has been written up in all its details and may be summarized as the attempt of a number of dashing men, without Arctic experience, who, with their boats, stores, sledges, and dogs, landed at one of the northern harbors of Spitzbergen from a chartered steamer, to make what they called a 'dash for the pole,' with equipments as light as the substitution of aluminum for oak and iron can make it, hoping thus to avoid the difficulties which Parry encountered years ago in making a somewhat similar attempt."

Another expedition now said to be organizing is to be under Prof. Stein, of the United States Geological Survey, and although intended mainly for scientific explorations in Ellsmere Land, which joins Grinnel's Land, may send a party further to the unknown south. Still another Arctic expedition is being projected, which is to be under the direction of the celebrated Baron Nordenskjold, the discoverer of the northeast passage.

"On one occasion," continued his Honor, "Nansen allowed it to be announced that his next would be an effort in a particularly constructed ship to cross the polar basin from that part of it which can be reached from Behring Straits to known waters north of his Norwegian home. Why he changed his projected route from west to east to east to west, I have never learned, but it may have been to avoid the long journey around Cape Horn the first route implied; and why, even if this were the case, he should have followed the Lapland, European, Russian and Siberian coasts so far eastward as the new Siberian islands, and only turn towards the Polar star when little more than thirty degrees of longitude from Behring Strait, I do not understand and have seen no special reason assigned; his route eastward from Northern Norwegian waters takes him with but little northing around over one-third of the earth's circumference in that latitude. If he prove right in his opinion that there exists a cross-polar current, he is now doubtless trying to find its most rapid centre, and preparing for a long night-winter in the ice with which he hopes to be carried across the pole. Should he reach that long sought goal he must still drift where that current wills till he reaches waters south enough to unlock the 'Fram' from her glacial prison. . . . Since you press me for an opinion as to the probable outcome of the several expeditions, I may express at once my belief that after spending this and probably another summer in a vain attempt to pass the barrier which, I believe, will be offered to the northward progress of his ship by the Paleocrystic ice, which radiates in the form of an ice cap, or as at the south pole forms a flat-topped, but precipitous, side barrier two or three hundred ft. high, to all who seek to unlock this almost last of the world's geographical secrets. Strive as he may, he will, I think, encounter these grim

RAMPARTS OF THE ICE KING

wherever he may seek to pierce them, and when baffled and beaten as were Bellingshausen, Weddell, Morrell, Biscoe, Kemp, Wilkes, D'Ureville and Sir James Ross at the south pole of our earth from the same cause, he will retreat by the way he came or by one of the southern routes I have indicated.

"Jackson's success or otherwise will depend primarily, I think, on whether he finds Franz Josef's Land to be an island, or like some lands which lie without the Antarctic Circle, merely a spur of a Polar Continent. In the last case his chances are far better. . . ."

We are compelled to omit much interesting speculation as to what would happen should Peary and Nordenskjold join forces in the ship of the latter. His Honor has no faith in the light aluminum boats, which, chilled by cold, are likely to fail; with the conditions likely to be present, the thin metal will break with the slightest blow, nor can it like a wooden boat be easily and quickly repaired. But he is warm in praise of the hemispheral map published by the Canadian Pacific Railway Company, by the aid of which, new and strange as it is, the course of the several adventurous spirits commanding the various expeditions can be easily marked out. "While we admire," says the Governor, in conclusion, "the courage of these strong northern races, which produce such men as Peary, Nansen, Jackson and the others I have mentioned, it always seems to me that they are tempting Providence when they venture upon such a bootless quest into these dreaded regions, which Henry Kirke White describes as follows:—

Where the North Pole in moody solitude
Spreads her huge tracts and frozen wastes around,
. . . . . Where never sound
Startled dull Silence's ear, save when, profound,
The smoke-frost muttered; there drear Cold for ages
Throned him; and fixed on his primeval mound
Ruin, the giant, sits; while stern Dismay
Stalks like some woe-struck man along the desert way."

THE TRADE JOURNAL.

Like all other phases of the newspaper business, trade journalism is a growing institution. From being a mere advertising sheet, representing only special individual interests, the trade journal has become the great organ of communication between manufacturers and dealers and their customers, and has helped and is helping to bring them into closer relations with one another. It has become one of the best educators, and, since the general abrogation of trade mysteries—better known as secrets of the trade—it has done good work in the spread of technical knowledge among all classes, to the benefit of the entire community. So well has this become recognized that a man is regarded as behind the times who does not take and read at least one journal devoted to his own trade or profession. There are many who say—and some who actually believe—that they cannot afford to take a trade paper, when the truth is that they cannot afford to do without one. If a man is content to follow in one beaten path all his life; if he is so wise in his own conceit that he thinks he knows it all, and that nobody can teach him anything; if he is content to remain in sodden ignorance because he cannot see that the knowledge offered him is going to bring him an immediate return in cash—then, and in all such cases, a man cannot afford to pay for a trade journal. But if he would keep abreast of the times in his own calling, if he would know what new inventions and discoveries are being made that directly affect his own interests; if he would profit by the experience of others as told in print; if he would know everything possible connected with his own calling, so that he may be able to converse intelligently, not only with his co-workers, but with outsiders seeking information—then the trade journal is indispensable. It is a power in the land, and he who rejects its friendly aid will soon find himself at the rear end of the procession. He cannot know too much of his own calling.—*The British Printer*.

THE NORWEGIAN WOOD-PULP INDUSTRY.

The year 1893 was a very favorable one in Norway for manufacturers of wood-pulp, according to the *Bulletin du Musee Commerciale*, the prices having on the average been four kroner (3s. 5½d.) higher for wet pulp, and eight kroner (8s. 10½d.) higher for dry than they were in the preceding year. Purchasers hastened to place their orders, and at the commencement of the year the quantities sold amounted to 130,000 tons. The demand having again increased, the wood-pulp syndicate realized that the reduction of the production to the extent of 33⅓ per cent., which was primarily fixed upon, was too great, and at a meeting, which was held in May, the maximum reduction was fixed at 23½ per cent., but in spite of this prices continued to rise. Towards the end of the year small quantities which were available were sold at 55 kroner (£3 1s. 1½d.), and 100 kroner (£5 11s. 1¾d.) per ton respectively for pulp wet and dry.

For the current year the greater part of the production is already sold at remunerative prices. The improvement which has manifested itself in the Norwegian wood-pulp industry has led to the very considerable extension of the factories already existing, and to the construction of new works in Norway and Sweden. The home consumption has remained almost stationary; in England the consumption has increased, and also in France. As regards Germany, this country imported in 1893, 10,000 tons of Norwegian wood pulp more than in 1892, but this increase was in great measure due to the dryness of the season last year. At the present time there are 59 wood-pulp factories in Norway; of this number, one is engaged in the manufacture of casks, three manufacture cardboard, and ten paper. The quantity of wood pulp exported from Norwegian ports, that is to say, the Norwegian product, and a certain proportion of Swedish pulp, amounted in 1893 to 230,000 tons, as compared with 215,000 tons in 1892 and 207,000 tons in 1890. The above observations and figures all relate to mechanical wood-pulp.

—The Belmont, Ont., flax mill will only be run to half its capacity this year, as the acreage sown was small, only about 150 acres.

Deposit at Ottawa, $3,541,617 00

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

W. H. ORR & SONS, Managers,
Cor. Toronto & Court Sts.

Oldest Stock Company in America . .

FIRE Insurance written . . . at Lowest Rates.

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

Manufacturers Life Insurance Co.,
Toronto, Canada.

DECISIONS IN COMMERCIAL LAW.

IN *re* BROOKE, BROOKE v. BROOKE.—The principle is laid down by Kekewich, J., that creditors of a testator's business carried on after death, are, though execution creditors, entitled to have their claims discharged in priority to creditors of the testator at his death, and that the principle is applicable although the will contains no power to carry on the testator's business, and although the business has been carried on under the direction of the court in administration proceedings.

KENNEDY v. THOMAS.—The English Court of Appeal holds that although the holder of a bill of exchange may present the bill for payment at any reasonable hour of the day it becomes payable, that is, ordinarily, on the third day of grace, and if it is not then paid may at once give notice of dishonor to the parties liable upon it; yet even after dishonor he is not entitled (at least where the acceptance is general) to commence an action upon the bill before the expiration of the last day of grace.

TOTTENHAM v. ROYAL BANK OF SCOTLAND.—An acceptor of a bill of exchange is not liable to a *bona fide* holder in due course where the bill has been fraudulently altered after acceptance, unless he signs it negligently in such a shape as to render alteration a likely result, according to Charles, J.

HOGGAN v. ESQUIMALT AND NANAIMO RAILWAY.—The Privy Council decides that in order to become a "settler for agricultural purposes" within the meaning of section 23 of the Island Railway Act, 1883, of British Columbia, the claim must be in respect of unoccupied, unsurveyed, and unreserved Crown Lands under section 3 of the Land Act, 1875, and the claimant must have complied with the conditions imposed by sections 5, 9, 10 and 11 of that Act.

IN RE QUEENSLAND LAND AND COAL CO., LIMITED (DAVIS v. MARTIN).—Where a company for valuable consideration agrees to issue debentures, and documents purporting to be debentures are accordingly issued, but without the name of the obligee being filled in, such documents are not valid as debentures according to North, J., but the holders are entitled to stand in the same position as if valid debentures had been issued to them.

HANSSTAENGL v. EMPIRE PALACE.—To constitute an infringement of the copyright of a painting under the Copyright Act, the reproduction must be something which is in itself in the nature of a picture, and accordingly a *tableau vivant* after a painting, so far as it consists of a merely temporary arrangement of living figures, is not a reproduction of the painting or the design thereof within the prohibition of the section. This is a decision of the English Court of Appeal.

REISCHER v. BORWICK.—An injury to a ship may fairly be said to cause its loss, if before that injury is or can with reasonable diligence be repaired the ship is lost by reason of the existence of that injury, *i. e.*, under circumstances which, but for the injury, would not have affected her safety. Accordingly the Court of Appeal in England decides that if a policy is effected covering such an injury, it will in the supposed circumstances extend to the loss of the ship.

SKINNER v. SHEW & Co.—Where negotiations for a contract, whereby a patentee agrees to supply a certain person with his patented article to the exclusion of everybody else, are broken off owing to the threats of a third person, the patentee can recover from such third person damages in respect of the profits which might have been earned under the contract during the litigation resulting from such threats, according to North, J., but not in respect of profits which might have been earned under the contract subsequently when the apprehension of interference was removed and the patentee was free to sell to the world

PHARMACEUTICAL SOCIETY v. PIPER.—The prohibition against the sale of poisons by unqualified persons which is contained in the Pharmacy Act extends to the sale of proprietary medicines containing one of the scheduled poisons as an ingredient in such quantity to be hurtful to man or child, according to the English Court of Appeal. The exemption contained in favor of patent medicines is restricted to medicines which are protected by letters patent under the great seal, and does not apply to proprietary medicines.

THE "MAASDAM."—Judge Jeune holds that where a vessel has rendered necessary services to another, and is in a position to render further services of a valuable kind, but her assistance is dispensed with, she has a right to have the further services which she was ready and able to render taken into account in a salvage reward.

THE "SALTBURN."—An agreement between shipowners and crew that before apportionment of salvage the shipowners shall be entitled to deduct from the sum awarded for salvage the amount of any damages sustained by the ship or her gear in the performance of the salvage service and by reason of her loss of fishing, is imperative, according to Bruce, J.

CHAPMAN v. FYLDE WATERWORKS CO.—Where a water company alone has a statutory power to break up streets and repair service-pipes and the apparatus connected therewith, a duty is cast on the company to keep in repair the apparatus in the street, and it is liable to a passer-by for injuries resulting from non-repair, even though the service pipes and apparatus were laid by the company at the request and expense of the householder. This is a judgment of the English Court of Appeal

TELEGRAPH CODES

The compiler of a really reliable and comprehensive code is met at the outset of his undertaking by a difficulty that, so far, has defied all attempts at solution beyond a certain point. Despite the fact that the rules of the cable company permit him to lay under contribution eight languages, the total number of words that can be used with safety for coding purposes is only about 150,000. The reasons for this are two-fold. First, the companies decline to permit the use of any code word of more than ten letters, and it is dangerous to employ those having less than seven, owing to the difficulty of detecting an error in short words. Further, thousands, nay hundreds of thousands of words are rejected because of the similarity of the telegraphic symbols that make up the letters

Figures are rarely telegraphed The possibility of noting an error in a group of arbitrary figures is very remote. Should a letter or two be "jumbled" in a code word, there are various ways of correcting the mistake—the sense, the context, and reference to the code; but these guides do not apply to the case of figures. The only remedy for a suspected error is repetition of the message at an enhanced cost of 50 per cent. Numbers, therefore, are expressed by a code word Errors in the transmission of amounts of money are very rare A banker's code contains words of every possible sum of money, from a halfpenny up to hundreds of thousands of pounds and the authors have exhibited great ingenuity in making a limited supply of words do very extensive service.—*Chambers' Journal*

Mercantile Summary.

THE assessed valuation of property in Hull, Que., for 1894-95, is $2,171,751. The population is placed at 11,652.

THE partnership between E. H. Turner and John P. Cunningham, as the Peterborough Music Company, is dissolved by mutual consent. The business will be carried on in the future by Messrs. M. A. and E. H. Turner, under the same name.

WE learn from the Berlin *Record* that the Waterloo Farmers' Alliance Telephone Company, after three years experience, has decided to quit the business. An arrangement has just been closed whereby the whole plant is bonded over to the Bell Telephone Company.

SULLIVAN'S automatic cistern cleaner, which may be seen at the Toronto Fair, is a very ingenious contrivance for removing dirt or sediment from cisterns. The work is done by suction, which leaves the water perfectly free from impurities.

ON September 3rd the Memramcook Gold Mining Company held a meeting at Dorchester, N.B. Mr. Neily, president, occupied the chair. This meeting was adjourned until 18th Sept. Some thirty stockholders held a separate meeting in which they decided to elect new managers and run the mill again on a new scale.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

THE John Abell Engine and Machine Works Co. has obtained a license to do business in Manitoba.

IT is stated by the Truro *Enterprise* that Mr. Duncan McDonald, of the Truro Foundry and Machine Company, has the contract for erecting a $20,000 crusher at Cochrane Hill, N.S.

THE Blenheim *News* states that Mr. Horton, baker, of that place, has sold out his business to Joseph Howard. Also that the bankrupt stock of B. Eggart, at Rodney, about $4,000 in value, was purchased last week by Frank Barnard at 56 cents in the dollar.

A ST. THOMAS daily learns that Mr. John W. Alexander, brother of A. W. Alexander formerly manager of the Bell Organ and Piano Manufacturing Co., John Kidd, superintendent, and W. McConnell, traveller, have bought out the Dominion Organ and Piano Co., of Bowmanville.

THE capacity of steamers on the Great Lakes seems to increase yearly. For example, one o the new steamers, the "S. S. Curry," bound westward the other day, carried to the port of Gladstone what is termed the largest cargo ever carried on the lakes. It consisted of 4,535 tons of coal, besides 280 for fuel, and she drew seventeen feet of water.

Mercantile Summary.

A MEETING of the creditors of George Davis, confectioner at Hamilton, has been called, and meanwhile Davis has assigned, with small liabilities.—Another assignment is that of R. H. Johnston, who did a small tailoring business in London.— In the same city G. Wyatt & Son, dealers in boots and shoes, are in trouble. Six years ago the son was admitted a partner to this old established business, which of late has not been prosperous. In March last they were obliged to obtain an extension of time on liabilities of $5,600, on which they showed a surplus of $4,000. Being unable to carry out their arrangements, an assignment became necessary.

A DISSOLUTION has taken place in the firm of Hutcheson & Son, at Huntsville, who have successfully carried on a general business in that place for the past ten years; the senior member, George Hutcheson, now retires. The new firm is composed of William Hanna, of Port Carling, W. E. Hutcheson and R. J. Hutcheson, of Huntsville, and they will no doubt, in their fine new premises, secure a large share of the business in that district. Hanna & Hutcheson Bros. is the style of the reorganized establishment. Huntsville has been rapidly built up since the disastrous fire of April 18th, and the premises which the new firm will occupy are the largest and best equipped in the district.

Sample Room for Exhibition week:

No. 18 Merchants' Building, 50 Bay Street, Toronto.

Mercantile Summary.

CAHILL BROS., dealers in shoes and groceries at Alexandria, Ont., are in embarrassed shape, and, through their attorney, advise creditors of their inability to meet engagements. They will probably have to assign.

A MEETING of the creditors of A. Menzies, druggist at Arnprior, whose failure we noted lately, was held in Montreal on the 11th inst., at which he made an offer of 25 cents on the dollar in four quarterly payments, secured

THE shoe manufacturing concern of Racine & Dion in Quebec has suspended payment and stock is being taken. It is expected they will submit a statement at a meeting of creditors called for the 14th inst. The concern has always been more or less closely connected with the leather firm of F. Gourdeau & Frere, also just suspended, so that the above action was not altogether unexpected.

AN ambitious barber of Montreal, Mr. U Mallette, who has been running two cigar stores, has assigned. He recently fitted up a store on Windsor street at an expense of about $1,000, which absorbed all his capital. He owes $3,500 and has nominal assets of $4,000 ——Cyrille Bourassa, contractor, has turned his estate over to the assignee, and fyles a list of debts to the amount of $4,500.——M Aubin, a butter and provision dealer, also of Montreal, who has of late been doing business under cover of his wife's name, owing to previous troubles, has assigned, owing some $16,000

Type Presses Printing Material

GWATKIN & SON . . . . .
57 Bay Street
Toronto

Among the various items of village and township news to be found in last week's Forest *Free Press* we find a reference to the enterprise of Mr. N. Boswell of Wyoming, who, that journal says, "has added another industry to those he has already introduced for the good of the public, in completing a cider press capable of handing from 800 to 1,000 bushels of apples per day." We warn the *Free Press* that it is liable to excommunication by our good friends the teetotallers for saying that "a public cider press will be a boom to the neighborhood."

Robert Duclos, a Montreal dry goods man, with more than twenty years of a good record, finds himself in some embarrassment owing to disturbance to business through recent street improvements, &c., and is arranging an extension of time on liabilities of $21,239.——A newly-formed firm in the same line of business, Prevost, Ouimet & Co., have assigned, with liabilities of from $8,000 to $9,000. They began business in the spring of 1893, but Mr. Prevost had previously been in business unsuccessfully. ——At a general meeting of the shareholders of the Canada Meat Packing Co., Montreal, held last week, a resolution was passed authorizing the winding up of the company's affairs, as the business had not proved profitable. The loss will fall on the shareholders only.

From Quebec we hear of the suspension of F. Gourdeau & Frere, tanners and general leather dealers. The firm has been a leading one in the Quebec trade and has had its full share of ups and downs in the past. In 1884, owing to heavy losses by failures in the shoe trade, the senior partner, who was then in business alone, had to compromise at 25 cents. He resumed business on a larger scale, and for a time made money, but, owing to reverses, assigned in January, 1892, owing direct $67,000, and indirect $76,000. The liabilities in the present instance are not yet known.——F. Moisan, a shoe manufacturer in a moderate way, in Quebec, is also reported in trouble, and has called a meeting of creditors. He arranged a compromise at 50 cents last year.

The Province of Nova Scotia furnishes the following insolvencies to the week's list: Hill & Co., general merchants, at Great Village, have assigned, owing about $10,000. They have been wide-spread for some time past. The senior partner has been interested in a provision business at Boston, and they have been spending money in draining a lake to develop a deposit of silica.——A. C. Vanbuskirk, a dealer in implements at Kingston, has failed after allowing a number of judgments to be recorded against him.——At Lunenburg, J. F. Boliver has been doing a confectionery and picture-framing business for several years. Several suits have appeared against him lately, and he has now assigned.——C. H. Feltmate, doing a small general business at Whitehead, has turned his estate over to the assignee.

The suspension is announced of the firm of W. S. Loggie & Co., the extensive canners and shippers of fish, whose headquarters are at Chatham, N.B. Their general liabilities are about $25,000, but they owe some $115,000 to their bankers, partially secured, it is understood, and a general compromise will be necessary to permit of their continuance in business. ——E. C. Gooden & Co., general merchants at Baie Verte, in the same province, whose failure has already been noted, are now offering a compromise of 35 cents on the dollar, liabilities being in round figures some $25,000.——D. A. Grant & Co., carriage makers on quite a large scale at Woodstock, N.B., who were burned out a few weeks ago, are offering 40 cents on the dollar and owe some $16,000 direct.

The failures in the Province of Quebec since our last issue are as follows: C. Gelinas, a general dealer at Ste. Clothilde de Horton, has become insolvent, and shows an indebtedness of $6,726. E. M. Ives, a decorative painter of some ability, who works at his trade off and on, while his wife conducted a store business at Adderly, has assigned on demand. A lack of steadiness is the cause of his downfall, and estate will pan out very little for the creditors. ——L. N. Castonguay, of Montebello, who has done a small store and peddling business for the last three years, has assigned, owing about $2,000. His business methods were such as to create much distrust of his success.——Jules Houde, a young hardware merchant of Quebec, who started a year ago last spring, has already had to assign.——L. L. Ledoux, of Knowlton, was a custom tailor making a comfortable living. In the fall of 1891 he was induced to buy a stock of cloths, and began giving general credit. Result, his present assignment and the closing out of the estate.——A. J. Fraser was a young hardware clerk in Montreal, who two years ago bought a tin and hardware stock in Lachute. His ability to make a business success was questioned, and he has now called a meeting of creditors.——T. Blondin, a trader in hay and grain, is reported as assigned.

Mr. Geo. A. Stimson, Toronto, has just purchased the $7,000 school debentures of the village of Watford. These bonds are payable in twenty annual instalments.

India continues to steadily increase its cotton crop. For the year 1893-4, *The Times of India* estimates the crop at 2,950,000 bales of 400 pounds each, as against 2,750,000 bales for the preceding year. Of this supply, 1,228,857 bales was taken by Europe, 128,781 went to China and Japan, whilst 1,553,000 bales is estimated to have been held for home consumption.

Mrs. J. F. Lawrence, wife of J. C. Lawrence, who failed in Chatham, started a grocery in Tilsonburg last June under the management of her husband, whose habits were somewhat unbusiness like. Now we hear that the business has been closed under a chattel mortgage.——S. Jacobs, general dealer at Chelmsford, has assigned to Max Rothschilds, after a year's efforts at storekeeping.——A. C. Fraser, whose troubles in Galt we noted last week, has assigned to his former partner, James Warnock. ——In the same place S. R. Wilkins, cigar dealer, etc., has assigned.——A fortnight ago a meeting of the creditors of N. Reaburn, harness, etc., at Midland, was held, when an extension for nine months was granted him. Now he offers creditors 40 per cent. on their claims. It is probable that this will be accepted.

Something over two years ago M. C. Gray succeeded his father in the hotel business in Paris, Ont. About eight months ago two chattel mortgages were given in order to meet pressing claims. Now he assigns, which will not be a surprise to creditors.——Alex. Elliott, dealer in groceries, liquors, etc., at one time a successful man, is in trouble and is offering to pay 25 per cent. The cause of his difficulty is crediting hotel keepers too freely.——It is reported that J. R. Dickert, harness maker, Sebringville, who assigned, is away and the bailiff is in possession. ——The assets of C. J. Campbell & Co., dealers in wall paper, etc., Hamilton, will be sold next week. They owe $8,875, and have nominal assets of $6,295.——The stock of Stevens & Burns, machinists, London, is advertised for sale. They failed some weeks ago.——The stock of James Eaton was sold to C. S. Botsford at 67 cents.——The general stock of J. T. L. Orme, Port Stanley, will be sold in a week. ——The general stock of John McMaster, Perth, realized 60 per cent.——The assets of John Graham & Son, millers, Inglewood, are advertised for sale.

CLOTHIERS' TRIMMINGS

59 Front St. West Toronto

BRITISH capitalists are said to be ready with the money to complete the Chignecto Ship Canal if Canada will extend the time for two years from last July.

A SHIPMENT of 700 prime Manitoba sheep has just been made to England. This is a trial shipment, being the first of its kind, we believe, and, if successful, may lead to an extensive trade.

D. S. STONEHOUSE, manufacturer of blinds, etc., Park Hill, has assigned after being in business fourteen years.——A chattel mortgage for $1,000 given by Wm. Morse, machinist, St. Thomas, in May last, has been foreclosed and he has assigned.

THE Ontario Rolling Mills Co. has shut down in all its departments, except the forge works, which are still in operation. About 200 men are temporarily out of employment, but the works will reopen in a few weeks, as soon as business improves.

THE Ontario Government, at a council meeting on Tuesday, decided to grant a further $1,000 for the relief of the settlers in the Rainy River district who have suffered from the disastrous forest fires. This is in addition to the $500 first granted.

THE Cataract Power Company, of Hamilton, Ont., limited, has applied for incorporation. The object is to bring power from Niagara Falls. The provisional directors are: Messrs. W. H. Glassco, W. Southam, R. Fuller, W. A. Wood, J. W. Hendrie, W. W. Osborne, John Patterson.

THIS week the Fair has fully occupied the attention of our business people, consequently we have no failures to report in this city. The Province of Manitoba is in a similar happy condition this week. In British Columbia the only failure to notice is that of Allice & Ault, wholesale commission merchants, Victoria. A chattel mortgage has been the means of closing their business. They owe nearly $5,000 and have book debts of a similar amount.

AN offer of compromise at 50 per cent. is made by Silas Dawson, general storekeeper at Drumbo. In 1891 he succeeded the Drumbo Trading Co., but evidently it was more than he could successfully manage. He failed about one year later with liabilities of $13,000, and nominal assets of $6,500. Creditors were then good enough to write off 60 per cent., and he continued; but, as already stated, not successfully. His methods are not quite up to date.

A WOOLEN mill owned by McKay & Brine at Antigonish, N.S., was totally destroyed by fire Sunday morning.

H. C. BEETON, Agent General for British Columbia, has forwarded all the correspondence to the Board of Fisheries relating to the importation into Great Britain of Point Roberts canned salmon, with labels making it appear that it was Fraser River salmon. The British Customs officers in London are of the opinion that they could not make the canners change the labels. The Fisheries Committee Board considered that the question of salmon fishing at Point Roberts demanded the attention of the Government They say that the Government of the United States might be disposed in favor of regulations to prevent the destruction of salmon as it is now carried on at Point Roberts, which might result in preserving to a certain extent fishing on Fraser River.

THE Waterous Engine Works Co., Ltd., of Brantford, Ont., are exhibiting mill machinery at the Fair. They claim, and not without reason, the following points of advantages for their band saw-mills: First, the saving of timber in a large mill owing to the thin saw of not less than $40 per day; and that the lumber is much better than when cut with a circular saw. This advantage is considered to be worth no less than twenty-five to fifty cents per thousand. The experience of Mr. Heath, manager of the Huntsville Lumber Co., fully justifies their claims. He says that in their mill they are cutting an average of fully 2,000 ft. per day more than was cut with the circular power, and all other appliances remaining the same. Contrary to the general opinion "we have not since found it necessary to hire an expert or experienced band saw man to run this mill All the old hands we formerly employed on the circular are still with us In fact, so far as our view of the matter is concerned, we consider our logs worth as much to us now in the log as they used to be after being manufactured by the circular, the saving being so great that it more than pays the cost of manufacture in cutting with a band saw It is evident that Mr Heath is quite proud of their mill and any one interested should visit it and carefully inspect it while working He further says that "after months' trial with the band saw, every member of our firm are of opinion that the band saw has come to stay," and he advises that every one doing any considerable amount of business should lose no time in making the change from the old wasteful circular saw for cutting either hemlock, pine or hardwood

THE undersigned will pay cash bonus of $ [illegible] per son securing for him a situation as bookkeeper or any position of trust in some substantial business. Apply X. Y. Z., Box 450, care Monetary Times.

TORONTO, FRIDAY, SEPTEMBER 14, 1894.

THE SITUATION.

To the Canal Conference, shortly to take place in Toronto, the qualification "international" may be applied, for, besides Canada, nine or ten States of the American Union are interested in the object which it is intended to advance. But if to this extent international, the conference will in no respect have an official character. The value of its resolves will depend upon the sound reasons by which they may be enforced. The object, broadly put, is to promote an enlargement of the Canadian canals to a capacity that will enable them to admit vessels drawing 20 feet of water. Such a work would involve an enormous cost, and the question must come up for discussion at the convention, how is the money to be provided? Are the States interested to join Canada in contributing the necessary capital? But this is a question which, on behalf of the States, non-official representatives cannot decide. The resolves of men not clothed with authority would amount to very little more than an initial movement towards a practical end, which would require enormous exertions to make successful. The first question which Canada would have to consider, if a partnership in canal improvement were proposed, is whether she could agree to such an arrangement at all, and if she could, on what conditions. Then would come the question of agreement. National considerations would come up which might interpose serious obstacles to any such arrangement. On the part of Canada, no one having authority to make any agreement, even morally binding, is likely to appear at the convention; no one, in fact, could be invested with authority to make an agreement to which the country could be held. Whatever value the convention may possess will be in the light which the delegates may be enabled to throw upon the question. Whatever proposals are made will, of course, be submitted to keen scrutiny, alike by those favorable to canal enlargement on the scale proposed, as well as by those who doubt the wisdom of incurring an expenditure necessary to obtain the means of bringing from the Atlantic vessels requiring 20 feet of water.

At the same time there is a movement on foot, in the State of New York, to forward a more modest scheme of Erie Canal improvement. Ten millions of dollars is the limit of the cost, a sum that would not be sufficient to turn the Erie into a ship canal. If that sum were spent upon it, our own great waterway would still remain vastly superior to the Erie in capacity. This inferior canal does a vast deal more business than our great natural outlet, with its artificial aids, and it behooves us to consider what are the reasons for this. The difference of the business done is in the inverse ratio of the relative facilities for doing it, showing that the ruling element, whatever it is, is something else than the capacity of the canals. This fact proves that mere canal capacity alone does not and will not bring victory in the rivalry for the carrying trade of the West. Canal capacity is only the highway of the water-borne traffic; the means by which it is carried on are just as important. If Buffalo were without fixed elevators, how much of the traffic which now takes the Erie would seek some other channel? Has Canada developed her means of carrying in connection with her canal system to the utmost extent, or to an extent at all approaching what the Americans have done in connection with the Erie? These are questions which it is better to face than to seek to cover up, for they are vital to the decision of the issue. It is doubtful, however, whether they will have much, if any, light thrown upon them by the coming convention. Though the convention cannot be expected to settle anything, it may prove the prelude to some measure of practical utility, to be realized at a later date.

Ocean penny postage, long thought to be a mere sanguine dream of ardent enthusiasts, seems now to have come hopefully near to realization. Sir A. P. Caron, now in London, England, is reported to have stated in an interview with a representative of one of the daily papers that Canada would not oppose, but would welcome ocean penny postage. M. Caron is a member of the Canadian Government, and as the office he holds is that of Postmaster General, he must be presumed to have weighed the responsibility of his words. A London journal, on the strength of this utterance, points out that there is nothing to prevent a beginning being made in ocean penny postage, even though Canada and Great Britain should have to do it alone. This assumes that the Chancellor of the Exchequer, not less than Canada, is willing to try the experiment. The assumption may be translated into fact, but in the meantime we have no means of assuring ourselves that it can properly be accepted as a fact. If we mistake not, the last time a British Government pronounced on the subject of general ocean penny postage, it was in opposition. But the objection to a tentative beginning, on a limited scale, would obviously be less than to a scheme which embraced the whole range of ocean postal service. The suggestion of a limited experiment is a good one, and there ought to be no insuperable objection to its being made. While Sir A. P. Caron is in England he might do well to feel the British official pulse on the ocean postage question.

On Tuesday, the case of great public interest, the Crown v. Larkin, Connolly & Co., came to a close, in the form of a judgment in favor of the Crown for $100,000, and a counter judgment in favor of the contractor for $40,000. Though the form of judgment and counter judgment was used, the result was really an agreed settlement arrived at by counsel, Mr. Osler acting for the Crown and Mr. S. Blake, Mr. Aylsworth and Mr. Cox for the contractors. Judge Burbidge congratulated all parties concerned on the termination of the suit. He concurred in the remark of Mr. Blake, that the confession of judgment must not be taken as proof of wrong-doing on the part of Larkin, Connolly & Co. Mr. Osler, on the part of the Crown, said the result reached had been arrived at on a financial basis. If

$100,000 represents the sum wrongfully taken from the Government by a wicked partner of the defendants, Mr. Osler's language may be understood; otherwise it is not distinctly intelligible.

Some banter, more than half serious, was indulged in at a directors' luncheon, in reference to a proposed change of name of the Industrial Exhibition Association of Toronto to "The Dominion Industrial Association Exhibition." Minister Bowell, with humor in his eye, remarked on the expectation of the change of name being accompanied by a large dowry; and when he added that the change of name would not be sought, if no dowry were in prospect, he seems to have hit the nail on the head. M. Angers told the directors he thought they would gain nothing by a change of name, a remark which may imply a reference to the expected dowry or may not. But, it may be asked, what is a change of name expected to accomplish? The character of the exhibition would not thereby be changed. The defunct Provincial Exhibition should be a warning against the ambition which seeks gratification in names and official patronage. Merit is the best attribute of an exhibition; to this the Toronto Industrial Exhibition owes its success, and it would be perilous to rely in any degree upon anything else. The association is in debt, and it must get rid of the burden as best it may; but it must look for continued success to strict business methods.

News of the capture of the "Favorite," flying the British flag, for violating the sealing regulations, comes from Alaska. She is reported to have had 1,400 skins on board. Her captor was the United States ship "Shamokin," and she was, in accordance with the international agreement which regulates such cases, handed over to the British war ship "Pheasant," and was sent out to Victoria, where she will have to submit to a British tribunal. The Paris agreement has not put an end to poaching, though there is reason to believe that it has materially lessened it already, and will be more effective in this direction in future.

TIMBER LIMITS IN NOVA SCOTIA.

The natural resources of Nova Scotia have attracted the attention of New England capitalists, as was seen in the case of the Dominion Coal Company, which is operating so largely in Cape Breton. But not only has the mineral wealth of that province been taken account of by our keen-eyed neighbors. The forest areas, too, have commended themselves. There is no longer much pine timber left in Nova Scotia; but there are quantities of spruce and hemlock timber. Spruce has long found a market in the United Kingdom, and hemlock can, under the new tariff, be sent into the United States dressed, tongued and grooved. The fact is not without its significance, as we shall proceed to show.

Mr. B. F. Pearson, of Halifax, who negotiated the purchase of the Cape Breton collieries, which are now consolidated under the name of the Dominion Coal Company, with several of the same associates, has purchased several extensive timber limits and saw mills in Nova Scotia. Included in these purchases are the properties of J. Miller & Co., at St. Mary's, in Guysboro county, the limits of Messrs. Chisholm, Liscumb, the large property of the Todd estate in St. Margaret's Bay, and the important property and mills at Economy, Cumberland county, belonging to J. Miller & Co. Also all the timber lands and saw mills of McMullen, of Truro, amounting altogether to over half a million acres. Mr. H. N. Whitney, of Boston, and associates in that city and in New York, are the principal financial men. All the properties have been "cruised" over in advance of the purchase by experienced "cruisers" sent by the purchasers. In addition to this Mr. James, partner of the leading lumber firm of Boston, and Mr. McPherson Lemoine, who is well known as one of the successful lumber men on the Ottawa river, but now of Boston, also made a personal examination of the properties, with which they were well satisfied. The transaction has been closed.

CANADIAN LUMBER AND THE AMERICAN TARIFF.

It has at last been definitely decided by Mr. Carlisle, the United States Secretary of the Treasury, that Canadian lumber shall enter the United States free from duty. The decision was not authoritatively given until Tuesday of the present week, when in a letter addressed to the Collector of Customs at New York, the Secretary ruled that the reciprocity condition of the new tariff bill does not attach to the provision for the free admission of lumber from the Dominion of Canada. Mr. Carlisle bases this action upon information which he has received, said to be official, that no export duties are imposed in Canada upon the articles of wood mentioned in the free list of the new tariff bill, and also that there are no stumpage dues now imposed by the Dominion Government. This will give free entry into the United States to all Canadian lumber so long as the Dominion Government shall not impose export duties or the provincial governments stumpage dues.

What effect the rescinding of the tariff duties will have upon the Canadian lumber trade remains to be seen. Ultimately it must prove of advantage, but as yet no material improvement has taken place. Inquiries are being received from the Eastern States regarding the stocks held here, but American buyers show little or no inclination to purchase stock, and are making attempts to break our market quotations. The transactions made are upon a basis of values slightly lower than the sales at the close of last year. The better grades of lumber, however, are weak stock at the moment, and sales can only be effected by a considerable shading in prices. The operations of American buyers have so long been of a hand-to-mouth character that the lumber yards in the Eastern States must contain light stocks, and it is but reasonable to expect a good trade next spring or later in the fall.

It is a matter worthy of note that during the crisis from which the United States is now slowly emerging, there were comparatively few failures recorded among lumbermen. The year previous to that in which the depression became a crisis yielded good profits to those engaged in the American lumber industry. And taking alarm at the threatening appearance of the situation, American operators in due season began to pursue a policy of caution. They made no money; however, on the other hand, they lost but little. As a consequence, the trade is now in a healthy condition, and lumber stands out almost alone in having been sustained at something like a normal basis of value. So soon as the industrial centres of the United States begin to display activity, lumber must go into consumption, and the market will probably take an upward turn. Late commercial reports from the United States indicate a growing commercial strength, and, if free from labor troubles, the situation would doubtless show immediate improvement.

The local trade is very slow, and in fact we doubt if at any time during the past few years there has been less demand for lumber from Western Ontario in the month of September than at present. In the city of Toronto building operations have long been confined within narrow limits, and contractors have little need for lumber. It must not

be forgotten that American lumber dealers have as free access to our markets as Canadian merchants have to the markets of the United States. As a Michigan lumberman in a trade circular sent to Ontario merchants says, "the removal of duties works both ways," and Western Ontario is no longer the exclusive territory of Canadian dealers.

As to the extent of this winter's operations in the woods of northern Ontario, different opinions have been expressed. Some lumbermen say that the cut will be a large one, while others claim that even less than the usual amount of logs will be taken out of the woods. The forests of Minnesota, Wisconsin and of northern Michigan have suffered severely through recent forest fires. It is estimated that during the recent fires 62,000,000 feet of lumber and from 8,000,000 to 10,000,000 feet of logs were destroyed. This, added to the quantity burned previously during the year, brings the amount permanently removed up to the enormous total of 350,000,000 feet. It seems but reasonable that in the consideration of market conditions this loss should figure as a bull argument.

Rumor has it that one of the Canadian railway corporations proposes to increase its tariff on the carriage of lumber. If true this will be an unfortunate discrimination against the inland mills. The railway officials probably think that they should secure "a share of the dollar a thousand." But lumbermen claim that the price of lumber has not advanced, nor is it likely to do so as a result of the tariff changes. The only advantage gained by the free lumber clause is a more extended market for our products; as the duty previously stood it prohibited the export of the lower grades of Canadian lumber. The Canadian Pacific Railway in Manitoba, on the other hand, has yielded to the demands of traders and settlers, and lumber carriage charges have been materially reduced.

THE NORTH-WEST TERRITORIES.

The North-West Assembly met at Regina, Assiniboia, on the 31st August, when the estimates for the fiscal year ending with August next were presented, and Mr. Haultain moved the House into committee on supply. He explained that the fiscal year had been last year changed from June 30 to Aug. 31, so that when the session met they would not have run a month or two into the next fiscal year. The expenditure of the Territories for the ensuing twelve months is estimated at $271,657. Of this sum about 42 per cent. is for schools and more than 28 per cent. for roads, bridges and miscellaneous expenditure. Aid to statute labor districts, 86 in number, and to agricultural societies, is put down at $4,000 each. This, said the Premier, is a new departure. "We propose to allow these people in proportion to the work (road work, &c.) they do for themselves. This vote will be expended by order-in-council as a grant to each district as their work shall show." With respect to agricultural societies, of the value of whose efforts the Premier spoke none too highly, the purpose is, that instead of leaving aid to legal societies as a claim on the distinct vote, a specific part be made for them. The amount asked for a territorial exhibition is $5,000, and does not agree with the statement from the Winnipeg *Free Press* of Sept. 8, printed elsewhere, that $25,000 had been allotted for an exhibition in the Territories in 1895. Respecting the item of $5,250 for the Executive Committee, Mr. Haultain explained that this body was constituted with a view to system and economy, and that it had effected a substantial reduction ($8,570) in clerical assistance and the cost of government.

No vote is asked for immigration, it being thought not advisable in present circumstances to supplement the Dominion Government vote for that purpose. The vote of $20,000 for Legislative Assembly elections is justified in view of the fact that the present Assembly's term expires on 22nd November coming, and a general election will have to be held.

It is stated by the leader of the Assembly that the sum allotted by the Federal Government, some $200,000 a year, is insufficient for the government of the Territories. Indeed a memorial sent to Ottawa in 1891 claimed that no less than $400,000 is absolutely necessary for the proper carrying on of the government of the North-West. The language of Mr. Haultain on this matter is as follows: "We are contributing a large amount to the Federal revenue and are not receiving back a fair share according to population. While we are granted certain self-governing institutions, we have not any of the ordinary revenues enjoyed by the provinces. Everything of a revenue producing nature is controlled by the Dominion Government." Discussing the grant and the method under which it is administered, the speaker further desired the assembly to consider whether the machinery in vogue is necessary or desirable, whether it is the best under the circumstances, whether the provincial system is the best? He added his own opinion that the territorial system is not desirable. Here we are given, he said, in effect, certain duties to perform, and are not given the proper amount of money to carry them out. Should we not therefore press our claim for a larger grant?

Dr. Brett, in congratulating the leader of the executive committee on his speech, and on the departure, although small, in the manner of dealing with public moneys, regretted that the departure was so small. For the past five or six years he was aware that the present system was not a good one and was prejudicial to our interests in Ottawa.

The estimates for the twelve months ending 31st Aug., 1895, as laid on the table, was as follows:

RECEIPTS.

Balance federal vote for 1894 and 1895	$190,095 68
Estimated receipts, local sources	30,000 00
Estimated proportion of federal vote for 1894 and 1896 for months of July and August, 1895	37,500 00
Estimated balance on Aug. 31, 1894	14,061 82
Total	$271,657 50

EXPENDITURE

Executive Committee	$ 5,250 00
Clerical assistance	11,160 00
Expenditure under "the liquor license ordinance"	6,000 00
Executive Committee	5,250 00
Schools	114,000 00
Stationery, telegrams, postage and telephone	2,500 00
Newspapers and periodicals	250 00
Printing and advertising	6,000 00
Contingencies	1,000 00
Light and fuel	1,000 00
Roads, bridges and miscellaneous district expenditure	78,000 00
Elections for Legislative Assembly	20,000 00
Aid to statute labor districts and municipalities	4,000 00
Expenditure under "the agricultural societies ordinance"	4,000 00
Territorial Exhibition	5,000 00
Hospitals	4,000 00
Sundries	8,297 50
Total expenditure	$271,657 50

CANADIAN POSTAL DEPARTMENT.

When Canadians grumble because our Government does not give us a universal rate of two cents per half ounce letter, such as the Americans have, or when they find fault, as most of us do, because a two-cent letter rate instead of one is charged on city letters, we do not, perhaps, make adequate allowance for the burthen of expense our Post Office Department has to bear. From Cape Breton across the widest part of the continent to Vancouver Island is a long way, and from York Factory on Hudson's Bay to Pelee Island in Lake Erie is a far cry. Yet, over distances so enormous as these, for the most part sparsely

settled, our Postal Department has to transport letters for three cents per ounce. If transportation were as easy or letters as frequent over great stretches of prairie or mountain range as nowadays they are in the closely settled parts of Ontario, there would, doubtless, be a different story to tell of postal revenues. As it is, let us not be too hard upon the administrators of that department in the Canadian Government. The American postal administrators find similar difficulties confronting them still. In only ten of the States of the Union do the postal revenues exceed the expenditures. All the Pacific Slope States, all the Southern States, and all but two of the Western States use more postal money than they supply. So we must expect for many a day to come that the surplus postal revenues of our thickly-settled districts must go to supply the deficit of the outlying portions.

Our Post Office Department does not make ends meet by $600,000 or $800,000 a year. The total expenditure last year (fiscal year 1893) was $3,421,203, and the total net revenue was only $2,773,507, although the actual revenue, before percentages to postmasters, discounts for stamps, and other deductions were made, was $3,696,062. There is spent for carrying mails by rail $1,217,651, by land $795,682, by steamboat $67,892. A statement will show the development of the business in the last ten years :

	1883.	1893.
Number of post offices in Canada	6,395	8,546
Number of miles of post route	44,643	61,832
Number of letters sent by post	62,800,000	114,267,000*
Number of miles of railway over which mails are carried	8,114	13,702
Revenue	$ 2,264,384	$ 3,696,062
Savings Bank deposits	11,976,237	24,153,193
Money orders issued	9,490,899	12,902,975

*Estimated.

We are ahead of the United States in the matter of postal provision according to a paragraph on page 7 of the Report of the Postmaster-General, which says that our 8,500 post offices would, according to the census of 1891, give one post office to every 570 persons, while in the United States the proportion is about one post office to every 925 persons. The table on page 8 gives a return which we think a remarkable one of postal statistics by provinces :

POSTAL DEPARTMENT OF CANADA.

TABLE SHOWING THE NUMBER OF POST OFFICES IN OPERATION, EXTENT OF MAIL TRAVEL, ESTIMATED NUMBER OF LETTERS AND OTHER ARTICLES OF MAIL MATTER POSTED IN THE DOMINION OF CANADA, DURING THE YEAR ENDED 30TH JUNE, 1893.

Provinces and Territories.	Offices in Operation on the 1st July, 1893.	Extent of Mail Service. Miles of Post Route.	Miles Annual Travel Thereon.	Estimated Number of Letters, &c., posted in Canada during year ended 30th June, 1893. Letters.	Post Cards.	Registered Letters.	Number of Transient Newspapers and Periodicals, Books, Packets, Circulars, Samples and Patterns, etc.	Number of Packets of Printer's Copy, Photographs, Deeds, Insurance Policies, etc.	Number of Packets of 5th class matter, Ordinary Merchandise, open to Examination.	Number of Parcels by Parcel Post.
Ontario	3,058	19,224	13,499,398	57,500,000	15,175,000	1,830,000	15,100,000	1,050,000	516,000	205,000
Quebec	1,533	12,456	6,568,508	23,250,000	3,950,000	680,000	5,800,000	410,000	142,000	50,500
Nova Scotia	1,534	8,777	3,350,739	7,850,000	1,440,000	180,000	820,000	82,000	52,000	23,500
New Brunswick	1,140	5,562	2,758,672	5,500,000	920,000	134,000	740,000	75,000	44,000	17,500
P. E. Island	347	1,352	540,375	1,190,000	160,000	30,000	180,000	12,000	6,200	3,700
British Columbia	219	6,055	1,300,094	3,400,000	275,000	110,000	480,000	68,000	30,000	10,500
Manitoba	414	8,406	2,477,937	7,600,000	870,000	290,000	1,100,000	102,000	37,000	24,000
N. W. Territories	232									
Total	8,477	61,832	30,495,723	106,290,000	22,790,000	3,254,000	24,220,000	1,799,000	827,200	343,700

Indeed the report abounds in statistics which, if one will sit down and think what they mean, must have the effect of making him additionally proud of Canada. The Department has postal contracts with forty-one Canadian railways, whose united length is nearly fourteen thousand miles (13,703½), and use 150 postal cars, 53 of them on the Grand Trunk, 50 on the Canadian Pacific, 14 on the Intercolonial. These cars travel thirty thousand (29,827) miles a day. The Department has an advantageous arrangement with the larger roads. Over the G.T.R. and most of the C.P.R. the mails are carried at a fixed rate per train mile per annum, one of the terms of each agreement being that if the company increase its train service the P.O. people have the right to use all additional trains without increase in the cost. Thus, between Toronto and London on the Grand Trunk, and between Montreal and Vancouver on the C.P.R., by an improvement in the train service, more rapid mail service is had with no extra charge. The new railway in the Far West from Calgary to Macleod brings an old settled ranching district into direct connection with the country at large. Until this line was built mails for Macleod had to be carried 109 miles by railway and 80 by stage before they reached the main line of the C.P.R. In the Province of Quebec, again, the Quebec and Lake St. John Railway now carries the mails to Chicoutimi by the branch line from Chambord Junction. By means of this branch and the steamers on the Saguenay route, the connection between the different places remote in the Saguenay and Chicoutimi districts has been made very satisfactory.

Although it might in a sense be expected, one is hardly prepared for the statement that the miles of railway route in Manitoba and the Territories, under the P.O. Inspector at Winnipeg, number more than any other province, except Ontario. "When it is remembered," says the report, "that so late as 1879 the total number of miles of railway used by the post office [in that province, of course, must be meant] for the conveyance of mails was only 65, some idea of the immense development of the facilities at the disposal of the Department in Manitoba and the N. W. Territories may be obtained." And it is important to notice that out of a total of 2,824 miles, nearly 1,600 miles consists of branch lines of railway. This tells a tale of remarkable development of a network of rails northward and southward of the main line of the C.P.R. The water services in British Columbia are of greater extent than those in the other provinces. One of these stretches from Victoria to Naas Harbor, 668 miles, once a month in winter, once a fortnight in summer. Then there are the western mountains and their dwellers to be served. The Kootenay mining district mails are taken by a steamer running down the Columbia River from Revelstoke to Robson, and steamers run from Nelson to Kaslo, &c. Stages are replaced by steam and rail within the year in the Okanagan district of British Columbia. Thus the post office authorities have to keep pace with settlers.

How correspondence is increasing with Japan and China is illustrated by a table giving the number of letters and papers exchanged between Vancouver and the three

ports of Yokohama, Hong Kong and Shanghai. The letters and newspapers increased in number from 109,411 and 84,900 in 1891-2 to 143,878 and 42,800 in the year ended September 9th, 1893. Parcels and miscellaneous postal matter increased in a still greater ratio. And, besides all this, there were 687 through bags of mail matter forwarded to seven ports in China and Japan. The report considers the establishment of direct communication between Canada and Australia by a line of British steamships calling at Honolulu and Fiji, has completed the last link in the chain binding the two great colonies of Canada and Australia and the Mother Country together; and as affording the means of direct mail communication between Canada and Australia, "by far the most important event in the history of the Canadian Post Office since the opening of the Canadian Pacific Railway to Vancouver."

THE DRY GOODS SITUATION.

The present week has witnessed a gathering of many dry goods merchants in Toronto. Reports from the various parts of Ontario and the adjoining provinces have been interchanged, and the condition of affairs throughout the country thoroughly discussed. Although some of a less sanguine disposition than others, or coming from an unenterprising part of the Dominion, are inclined to take a gloomy view of the prospects for the fall trade, the majority coincide in the opinion that as the season advances we may look for an improving order of things.

The Canadian woolen mills are apparently not engaged in any very active operations. The changes made in the recent revision of the Canadian tariff have not resulted in any marked increase in the importations of foreign woolen goods, and "manufacturers have only their own stupid cutting of prices to blame for the existence of excessively low prices," as one of the craft tersely puts it. Recent importations of fine pulled wools from the United States have lowered the price of such descriptions in our Canadian markets by at least 2½c. per lb., which fact must prove an advantage to the mills making tweeds.

In our last issue we noted the decline that recently took place in the prices of Canadian-made cottonades, denims, and shirtings. This, as we then stated, has been occasioned by the severe commercial depression in the United States, which encouraged American manufacturers to slaughter their fabrics in our markets. When the industrial situation in the United States improves—and it is already gaining strength—prices must tend upwards in the markets of both countries. Canadian mills are already making a show of activity. This week marks the resuming of business at the Hamilton cotton mill; next Monday operations will be renewed on full time at the Cornwall mill of the Canadian Colored Cotton Company, while everything points to a renewal of activity in the mill at St. Stephen's, N.B. Orders are now being placed for next spring's supplies of cotton goods, and agents report that the orders given exceed in amount those placed in September of last year.

Recently conferences have been held between manufacturers and wholesale merchants as to the terms allowed on purchases of Canadian prints. Many merchants favored the universal adoption of four months as a time allowance, with a uniform discount of five per cent. for cash. This would place Canadian cottons in a better position to compete with those of English make. However, all persons interested did not view this proposal with equal favor; a considerable number of merchants thought that three months' time and a discount of three per cent. was quite sufficient. In consequence no common understanding was arrived at, which is very unfortunate, as many have been looking forward to this as leading to the adoption of uniform conditions of sale on all Canadian cotton goods in the immediate future.

MUTUAL RESERVE FUND LIFE.

People living in Toronto and readers of daily papers elsewhere have been treated during the last few days to column after column upon the rise and progress of the Mutual Reserve Fund Life Company. The city has been visited by the "Napoleon of Assessment Insurance," Mr. Harper, and some of his marshals, who have flattered their listeners and lunchers in graceful periods upon the greatness of Canada, the virtue of Canadians, the beauty of Toronto, and the superabundant claims and excellences of the Mutual Reserve. All this has been duly chronicled at great length in the best newspaper English, of course at the expense of Mr. Harper, for that gentleman, protector of the widow and the orphan as he is declared to be, would surely never spend the money of the company in so wasteful a way. And yet, don't you know, this sort of thing, though we may not think it good life insurance investment, is pretty good advertising, and nobody knows the fact better than the clever people of the Mutual Reserve.

The growth of the company is great, we are told, and no wonder. It has seen that numbers of people want "cheap insurance," and so it has seized upon the renewable term plan, which is a cheap method requiring almost no reserve, and eschews the endowment system, which does demand a large reserve. There are many companies which do a renewable term business; the Sun Life of Montreal, for instance, the United States Life, the Ætna Life, whose rates are all about the same, and at some ages cheaper, than those of the Mutual Reserve. Take age 25, the premium at which would be $2.30 every two months, or $13.80 in the Mutual Reserve, is only $12.64 in some of these companies. But as the age increases the Mutual Reserve lessens its rates, which is, according to conservative opinions, precisely one of the weak points of the company. A comparison of a few ages will show:

	Mutual Reserve Premium	Other Companies' Premium
Age 25	$13 80 per $1,000	$12 64 per $1,000
" 30	14 22 " "	14 67 " "
" 40	16 20 " "	21 02 " "
" 50	21 36 " "	33 17 " "

It is a significant fact, however, to those who are not carried away by the wordy arguments in favor of "cheap insurance," that the Ætna Life of Hartford, one of the oldest American companies, has lately advanced its rates to new members for Renewable Term Insurance, from $14.67 at age 30 to $16.10; from $21.02 at age 40 to $22.81, and so on. The reason for this step, on the part of this prudent concern, is that while it had been able to keep its word with its insurers on this plan during a period of high interest earning, it sees no chance of investments earning such high rates hereafter, and therefore provides for this lack by an increase of premiums. And it is only five years since the well-known Travelers' Insurance Company increased its regular rate of life assurance by some $8 per thousand after twenty years' experience. These companies, we take it, are as anxious for business as the Mutual Reserve; and surely they do not want to see that company run away with their risks at cheaper rates. Why, then, should the managers raise their premiums? It must be that they are prudent providers, who will not sell goods under cost.

The Mutual Reserve uses, if we do not mistake, the same mortality basis as the Natural Premium plan. It boasts of a reserve of over $3,000,000 and "banks" on that, as they say, but the assessments, or whatever they call the bi-monthly payments, are supposed to meet all death

claims. But we notice that its managers are shrewdly changing their methods and coming nearer to those of the old-line companies which they decry. For example, the Mutual Reserve now offers what is called the "Ten Years Distribution Deposit Plan," which is intended to get over the nuisance of bi-monthly payments. In the words of one of the Mutual Reserve's own circulars, there is "liability of unintentionally lapsing a policy through an oversight or absence of the insured, or through neglect of an employee or other person entrusted with its payment, also . . . . the annoyance of a bi-monthly call." These are condemnations of the assessment system out of the mouth of what may be called one of its leading representatives.

TORONTO TRADE FIGURES.

Comparing the month just past with August, 1893, the imports are lessened by $700,000, while the exports are nearly doubled. The imports in August, 1893, at Toronto, were $2,558,665 in value, and the exports only amounted to $130,396. In the same month this year the imports are reduced to $1,852,163, and the exports have gone up to $243,805. Free goods constitute almost a third of the whole imports, coal and the raw material for manufacture being the main items of the $526,000, thus: Hard coal, $110,535; hides and skins, $18,394; wool, $23,806; undressed hemp, $9,013; metals, $13,231: jute, cloth, $7,863; dyes and chemicals, $14,603: fruits, such as bananas and pine apples, $18,069; settlers' effects, $15,278. We give now our usual comparison of dutiable goods:

Imports.	Aug., 1894.	Aug., 1893.
Brass and manufactures of	$ 6,763	$ 7,302
Copper, "	419	3,846
Iron and steel, "	71,089	110,656
Lead, "	2,034	662
Metal composition	8,208	9,486
Total metal goods	$ 88,513	$131,952
Cotton goods	$ 77,883	$ 92,850
Fancy goods	82,088	64,224
Hats and bonnets	55,163	74,081
Silk goods	123,787	140,361
Woolen goods	355,947	462,070
Total dry goods	$694,868	$833,586
Books and pamphlets	27,939	39,163
Coal, bituminous	29,855	38,320
" anthracite (free)	110,535	.....
Drugs and medicines	15,498	17,934
Earthen and chinaware	21,373	27,338
Fruit, green and dried	18,238	21,339
Glass and glassware	30,081	36,051
Jewellery and watches, etc	42,333	33,475
Leather and manfrs. of	8,677	23,841
Musical instruments	11,143	10,883
Oils of all kinds	9,293	10,382
Paints and colors	9,225	10,364
Paper and manufactures of	28,956	32,895
Spirits and wines	6,005	7,587
Wood and manufactures of	8,081	16,367

The list is noticeable for the regularity of reduction in import. In only three items are increases shown, and these, curiously enough, are fancy goods, musical instruments and jewellery or manufactures of gold and silver, all articles of luxury rather than necessities. Dry goods show a noteworthy falling off in woolens, silks and cottons, and the next largest item, metal wares, is reduced one-half.

If we now examine the exports we shall find the $112,000 increase for the month made up of manufactured articles and animals, or the products of animals. Dead meats amount last month to $197,443, while leather goods and agricultural implements form the largest items among manufactures. Deprivation of the American market has removed the important item of barley from the Toronto export list for a few years; but now that the new U.S. tariff has modified the duty, we may expect the export to increase somewhat.

EXPORTS OF CANADIAN PRODUCTS.

Produce of	Aug., 1894.	Aug., 1893.
The Mine	$853	$269
" Fisheries	.....	.....
" Forest	25,756	26,572
" Field	4,349	529
Animals, etc	140,647	49,468
Manufactures	72,200	50,087
	$243,805	$130,925

ACCIDENT ASSURANCE.

The vitality and steadily increasing popularity of the accident insurance system in America is illustrated by figures taken from the report for 1893 of the Insurance Commissioner of Pennsylvania. In that State there were eleven stock companies and twenty assessment companies doing accident business. But the latter did only a small proportion of the insuring, namely, $2,523,000 gross income, out of a total of $8,744,000 by all companies; while their total assets were only $831,980, against the $8,459,000 assets of the stock companies. So that the assessment system has not taken a very strong hold in this direction.

The following table, giving the names and headquarters of the eleven stock companies under notice, also the date when they commenced business, together with their capital, the amount of their assets on January 1st, and their gross income for the year 1893, is interesting:

Company.	Location.	Commenced business.	Assets Jan. 1, '94.	Income year, '93.
Ætna	Hartford	Jan., 1891	$114,301	$119,392
Employers' Liability	London	Apr., 1881	1,190,977	969,875
Fidelity & Casualty	New York	May, 1876	*2,023,713	810,691
Great Eastern	"	Jan., 1893	148,707	20,745
Guarantors	Philada.	Mar., 1892	252,921	126,298
Inter-State	New York	Mar., 1893	194,969	41,062
London Guarantee	London	Nov.,'1892	396,762	119,544
Preferred Accident	New York	May, 1893	344,755	404,148
Standard L. & A.	Detroit	Aug., 1884	704,605	902,814
Travelers	Hartford	Apr., 1864	2,527,848	2,533,054
Union Casualty	St. Louis	Apr., 1893	559,518	172,551

In the course of comments upon this table it is remarked by the *U. S. Review* that seven of the eleven companies commenced business since January, 1891, while four had their start during last year. Concerning these four the showing made of their business represents the operations of a portion of the year only, and it reflects their relative disadvantage with their older competitors in point of volume of business transacted. Accumulating years tell powerfully in the achievement of aggregate results. This is strikingly shown in the case of the Travelers, the Fidelity and Casualty, the Standard Life and Accident, of Detroit, and the Employers' Liability, of London. Of the total income in 1893 of all of the eleven companies indicated, amounting to $6,220,174, the four just named received $5,216,434, or more than 88 per cent. of the entire sum. "But the notable feature of the whole exhibit is the impressive showing made by the old Travelers. By honorable dealings and enterprising effort it laid the foundation of the business as it stands to-day, and year by year has increased in strength and popularity." In the above tabulation, of the total income of $6,220,174 received by all of the eleven stock companies last year, the Travelers is alone credited with $2,533,054, or over 40 per cent., a very handsome share.

AT THE FAIR GROUNDS.

The Canadian Pacific Railway people are as usual in the front row of the procession in respect of all schemes for attracting the attention of visitors. Nor do they repeat themselves year after year, but evolve new modes of displaying the attractions of the still wonderful North-West. As the visitor to the Toronto Fair of 1894 comes down the slope from Machinery Hall towards the lake, he finds, as he crosses the main road, a glittering octagonal temple, surmounted by a globe. Within this temple is a huge stuffed moose; the pillars of the temple are hollow cylinders of glass a foot through and eight or ten feet high, filled

* Gross assets all branches.

with prairie soil from Edmonton, Calgary, the Brandon hills, or with the prize wheat of the world and flour made therefrom. A dozen steps places one within the Canadian Pacific Railway Building, adorned with products of the farm, and it is almost invariably crowded, for the letters C. P. R. are good to conjure with. An entertaining feature is the toy farm, occupying the centre of the structure. Here is a space forty feet by ten, laid out in mimic field and meadow; a brook of real water meanders through the farm; real barley two or three inches high sprouts from the soil; there are mimic trees, toy animals and pasteboard farm buildings. Under the shelter of these last are groups of cows and pigs. Fences, windmills and implements complete the imitation of a real farm. No wonder that thousands from the country, as well as from the town, are fascinated by such a pretty object-lesson.

"This is the prettiest place yet," said the maiden who accompanied her papa on a round of visits to various exhibits. She was then in the Rice Lewis & Son building, next the Press Bureau. The show this firm makes is always attractive, but this year there are some novelties in interior furnishing. One expects naturally to find and does find mantels in oak and cherry and gumwood. One expects tiles and grates, and brass fenders, and modern surroundings, and finds them. But here we are surprised with a quaint old-world fire-place, with surroundings of hammered iron, a funny old iron lantern with a candle therein, brass-mounted andirons, a brass tea-kettle simmering on the hob, dark brown German-looking tiles, and hammered iron utensils. To crown all, here is an inverted frying-pan doing duty as a clock and having brass numerals and brass hands on its face. If one cannot afford a trip to Europe, here is a chance to surround one's self with a European atmosphere, brass-mounted bedsteads, curtains, valences, onyx lamp stands and all in a lovely bed-room with blue hangings.

In a shed opposite the Carriage Building we found a part of the exhibit made by the Chatham Wagon Co. at the World's Fair, Chicago. "World beaters" they were called, these vehicles of polished oak and sycamore, with gilding and metallic gingerbread all over them, but with solid advantages of structure as well. As there are no medals issued yet by the World's Fair folks, we could not see the gold medal awarded them, but they have a diploma, and what is more, a certificate from the ladies, signed by Mrs. Bertha Palmer. What Mrs. Palmer had to do with matters of wood and iron we could not see; the assurance was given, however, by the travelling agent in charge of the exhibit, Mr. A. E. Merritt, that so manifold were the good points of these Chatham products and so valuable the Vanallen patents, that, to use his own words: "Buy a cart or a wagon from the Chatham and you are fixed for life." It was easily made clear that the patent bearing of the Chatham wagons is an advantage; also that the adjustable malleable stakes they use are handy for enlarging a load; furthermore that the simple mechanism that can in two minutes change an ordinary wagon-box to a stock-rack and that again to a hay-rack, is one that must command the attention of any modern-minded farmer.

According to a huge banner that illumines the stove building, the Toronto Radiator Manufacturing Company are "the largest radiator makers under the British flag," and there, as if in witness of the statement, was a British flag on top of a pyramid of white and gold hollow ware. The same assurance was given, in the cheeriest of tones and the loudest of voices, by Mr. John M. Taylor, the omnipresent manager; it was corroborated in a very grave, nay, almost solemn manner, by the Montreal agent, Mr. Harry McLaren, whose white hat and gold eyeglasses clearly betokened *mens conscia recti*; and it was repeated in a confidential whisper by Mr. Adam Taylor, who added, as a paraphrase of the Websterian phrase that Britain's drum-beat encircles the globe, "the sun never sets on the Safford Radiator." Truly the volume of outside testimony to the value of these heaters is such as to compel the belief that they are as satisfactory in working as they certainly are complete in structure and handsome in appearance. The display here made is an admirable one. Next them, as before, is the exhibit of Spence's "Daisy" Hot Water Heater, made by Warden King & Son of Montreal.

Half the south side of the Stove Building is taken up with a striking array of the metal products of the McClary Manufacturing Co. of London, Ont. The goods of this company bear the trade-mark "FAMOUS," and we do not stretch the truth in saying that it describes them truly as far as Ontario is concerned. Here are hall, parlor and kitchen stoves and steel ranges, among them the "Active" range (for burning coal, coke or wood), of clean casting and attractive design. This firm obtained a first premium at the World's Fair, Chicago. Its range of tinware, japanned ware, enamelled ware, zinc, steel and copper goods is large.

Clare Brothers, of Preston, have made a good name for themselves as makers of furnaces, stoves and ranges. And they have become steady exhibitors of late years at the Industrial Fair. This year they are, as usual, to be found in the Stove Building. Their Preston Furnace will heat your building by warm air, or by a combination of hot water and hot air. The Carriage Building contains many specimens of Canadian skill in vehicles made at Brockville, Chatham, Gananoque, London, Montreal, Toronto, The J. B. Armstrong Co. of Guelph, Warnock & Co. of Galt, Wm. Gray & Sons of Chatham.

The Maritime Provinces have sent some exhibitors this year, whose enterprise should not be left to be its own reward. By the west door of the Main Building is a display of products of the Truro Condensed Milk and Canning Co., of Truro, N.S., under the charge of Mr. Sutherland. A new feature is their condensed cream, one part of which to three parts of water results in a good milk. There is also put up by this company condensed coffee and condensed tea, and its trade mark is the "Reindeer" brand. We learn that Messrs. Smith & Keighley, the well-known wholesale grocers of Front street, have purchased this exhibit. Ganong Bros., of St. Stephen, have two sweet-faced girls selling their confectionery, and the soap people in the same spirited town have a large display near the west door.

A very unusual exhibit is that made by Charles Boeckh & Sons, who have been known for forty years in Canada as makers of standard brushes and brooms. Such an array and variety of brushes perplexes the eye and confuses the judgment. Here are brushes for shaving, for painting, for shoe-blacking, brushes for scrubbing, for graining, for stippling, brushes for varnishing, white-washing, paper hanging, horse brushes, dog brushes, carpet brushes. These observed, the salesman calls your attention to brooms, common and uncommon house brooms, curlers' brooms, stable brooms, bamboo-handled parlor sweepers, hearth and feather dusters. These done he begins on woodenware, and names the new improved "Globe." We should not forget to mention, in connection with painters' brushes, Boeckh's patent flexible bridle. This appliance is a great saver of time and trouble to the painter who otherwise must needs spend much of his time wrapping his brush with string in the old-fashioned way. Only Boeckh's goods have this bridle.

In the Fortress of Health is found an emblematic suggestion of how the use of nutritive foods is a rampart against the assaults of disease. This idea is worked out by the Ireland National Food Co. in a remarkable barricade of their new and neat packages of flour, meal, rolled wheat, rolled oats, pot barley, and the various preparations with which they have made the market familiar.

The fountain is gone from the interior of the main building, and in its place is a band-stand filled with women performers, who, to be consistent, must be surrounded with quiet exhibitors. And so they are, for the most part. The Bell Telephone people show their electric apparatus, fire alarms, gongs, etc., of their own production, and the Toronto Silver Plate Company have placed close by their great show-case filled with silver and crystal wares, salvers, rings, lamps, trophies, lighted with a single big incandescent lamp. The British Lion is a noble animal. He looks noble even when carved in lion-colored soap, as we find him near the main stairway in the booth of the Morse Soap Company. This particular lion, which weighs, pedestal and all, some 1,800 pounds, is made out of Eclipse soap, but there are plenty other things to be seen made out of Morse's "Mottled" and Morse's "Best." Some new brands of toilet soap are shown by this established house: the "Clematis," the "Infants' Delight" (evidently for children), and "Lilywhite." The well-known "Heliotrope" is also well in evidence.

Brown Bros., limited, have a large display of bank and commercial binding, diaries and pocket-books, of their usual reliable make; also that counting-house facility, the caligraph. Among the striking features of the main corridor is the exhibit of saws and steel tools made by Shurley & Deitrich, of Galt, at the World's Fair in Chicago, and by them transferred to the Toronto Fair. An arch in cream and gold, forty feet by twenty, extending between Corinthian pillars, bounds the area of black velvet against which are relieved the products of this firm, circular saws from three inches to eighty inches diameter, gang saws, band saws, cross-cut saws, buck saws, hand saws. The firm's product has a good name in Canada, but it will be none the worse of the certificate in blue and gold which meanwhile takes the place of the promised Chicago gold medal.

One of the busiest men in Machinery Hall seemed to be the manager of the Toronto Electric Motor Co., whose callers must have meant business, judging from the number of his motors or generators in the building marked "Sold." Besides a 6-horse motor for THE MONETARY TIMES, this company has disposed of an 8-horse to Sanderson, Pearcy & Co., a 4-horse to the Massey Hall, and a half-horse power machine for the Stratford High School. Messrs. McDonald Bros., of Winnipeg, have ordered one, and the *Canadian Post*, of Lindsay, another, Mr. Conroy, of Deschenes Mills, Que., a third. They are good motors, whether for furnishing light or power

Goldie & McCulloch's well-known Wheelock steam engines, Ronald's steam fire engines, and John Bertram & Co.'s accustomed planers, lathes and drills greatly assist the appearance of Machinery Hall. Spooner's copperine, too, finds room in the north-east corner in the thick of the hurly burly of machinery. The William Hamilton Manufacturing Company, of Peterboro', shows one of its 36-inch water wheels, whose working may be judged by the offer of the company to

guarantee that it will utilize 80 per cent, of power. Northey's pumps are well known already and the practical display made on this occasion should extend their fame. We found in motion one of their Underwriter pattern pumps 14x7x12, making 70 revolutions, whose capacity was 500 gallons per minute; besides various boiler feed pumps of the duplex pattern of small size. The products of these works go to large concerns, such as the Bertrams, of Dundas, Goldie & McCulloch, of Galt, the Rosamond Woolen Co., of Almonte, as well as to smaller factories. And all appear equally well satisfied.

Just by the door of the Picture Gallery is a booth which deserves better light than it has got, namely, that of the Whitman & Barnes Manufacturing Co., of St. Catharines and elsewhere. This firm, which has factories at Pullman, Akron, Canton and Syracuse in the States, is the largest consumer of sheet steel in the world, and professes to make "anything in the shape of a knife for reaping or mowing or woodworking machinery." Its goods are well known to many of our agricultural implement firms, but it makes edge tools which may well challenge the attention of our mechanics, since those made in St. Catharines are shipped to Mexico and South America. Upstairs from their counter we are led to H. P. Davis & Co.'s gallery show of bicycles. This firm handles the "Rudge" bicycle, made in Coventry; the "Humber," made in Nottingham, and the "New Howe," made in Glasgow. And the firm has sold 1,900 of these this year already, according to the statement of the young man in charge. Old men and maidens, young men and children, are nowadays riding bikes, and no wonder, for the cheapness and variety of them is wonderful.

An unfailing demand seems to greet the samples of tobacco and cigarettes given away at the booth of D. Ritchie & Co., the Montreal manufacturers. On Farmers' Day the crush in their corridor was constant, for the farmer dearly loves samples free. The exhibit consisted of "Derby" plug smoking tobacco, "Old Chum" cut and plug, "Old Virginia" plug, and the celebrated "Athlete" cigarette.

Among the many exhibits of fencing to be seen, the Locked Wire Company of Ingersoll undoubtedly is entitled to the first place. This fence is a combination of horizontal and perpendicular steel wires, with a flexible clamp of the same material, which holds the cross sections perfectly solid. With the posts planted at a distance of two rods apart, a heavy man may climb over the fence midway between the posts without causing the slightest derangement of it by sagging or moving out of position either way. This fence is not only durable, but can be built cheaply if necessary, especially where only large animals are to be enclosed. We are told that about 80,000 rods of this Jones Locked Wire Fence has already been erected this year.

The Page Wire Co., of Walkerville, also exhibited a good wire fence which attracted a number of visitors. Quite a striking show is made by the Ontario Barbed Wire Co., Toronto. They exhibit rolls of truss cable fence wire. It is also stretched on posts, and if neatly put up makes a good looking fence that will not suffer by expansion or contraction.

There are several self-opening gates; probably that exhibited by C. H. Widdifield, Pine Orchard, will become the most popular, as the price will be within the reach of all who want a good gate. It opens away from the approaching team. The Standard Whip Company, on Wellington street, Toronto, exhibit in the carriage building a fine assortment of whips, lashes, etc., suitable for either carriage or sulky.

BANK OF BRITISH NORTH AMERICA.

The remarks made about Canada in the course of the address made last Friday by the chairman of the Bank of British North America to his shareholders, at the general meeting, are worthy of attention. Mr. Glyn said, according to a cable despatch to the Toronto *Telegram*, that while the result of the last half year's business had been disappointing, and the bank's balance sheet reflected the great depression which affected the entire North American continent, the way in which Canada's commercial concerns came through the depression was highly creditable to that country. The banks, he said, were a credit to the Canadian banking system. Not only did Canada lead in banking, but in other respects wherein she could properly be compared with the other British colonies.

It is to be noticed, however, that the Dominion is not alone responsible for the disappointing earnings of the year in the case of the British Bank. That institution has agencies as well in New York and in San Francisco, where its transactions are usually extensive, and it is accustomed to hold large cash reserves in the former city. In the previous year it earned good rates on loans to a liberal amount. If we remember rightly, it was possible to get 5 and even 5½ per cent. net during much of that year. But in 1893-94, not only were the rates of earning often less than 1 per cent., but the aggregate of loans was but a fraction of that of the previous year. The net earnings for the half year were only £19,512 12s. 3d., which, added to the £7,618 brought forward, sufficed to pay the £1 5s. which the directors declared upon each £50 share. But the sharholders had 4 per cent. divided amongst them in the half year ended with last April, which will make 6½ for the twelve months. Additions were made to the widows' and orphans' fund of the bank, and also to the officers' insurance fund, and £1,453 was carried forward.

ENGLISH RATES OF RETAIL INSURANCE.

It has been for some time the stated intention of fire insurance offices in England and Scotland, which have smarted under a succession of bad fire years, to revise the rates on buildings and contents used for purposes of retail trade. At length the new tariff of premiums upon such risks has been promulgated, and it has not been a light piece of work, much discussion and comparison of experience taking place before prices could be set for so great a variety of hazard. It is stated by the *Insurance Spectator* of August 15th that the rate upon all retail shops where not more than twenty assistants are employed has now been fixed at the former minimum of two shillings per cent., but the lowest charge for premises of a grocer, chemist or ironmonger will be half-a-crown per cent., when no mineral oil is kept on the premises. Various other trades, such as drapers with the kindred businesses of haberdashers, costumiers, hosiers and milliners, will now be rated at three and sixpence, and the same rate will apply to dealers in brushes, china and furniture, as well as to confectioners, tobacconists and upholsterers. The minimum rate for oil and color shops and shipchandlers is ten and six pence, increasing to twenty-one shillings where inflammable oils are stored. When the number of hands employed exceeds 20, a sliding scale of additional premiums is provided, rising from one and six pence per cent. where the limit is 35, and reaching nine shillings when the total number exceeds 400. As in the old tariff, there is an extra charge of two and six pence per cent. in cases where over 50 assistants are employed and where certain trades are carried on in conjunction with others, such as dry goods and groceries.

In the opinion of our contemporary, the rates charged under the revised schedule are on the whole fair and equitable, the past experience of the companies having shown the increase to be absolutely necessary, especially on drapers' risks, and even a greater increase of premiums charged upon the immense emporiums dealing in goods of all kinds, which have been established among us of late years, it thinks would have been justifiable. "Oilmen, too, have inflicted severe losses upon the fire offices, and we look upon such risks, especially in London and large towns, as well worth a guinea per cent., an opinion shared, we believe, by several of the leading companies, who decline to write policies at a lower figure." It is admitted by the *Spectator* that this increase in the cost of fire insurances will "doubtless press rather heavily upon the smaller traders," but that journal nevertheless trusts "that the fire companies will adhere to the advanced rates in the interests of their shareholders," notwithstanding the too prevalent opinion among a section of the public that fire insurance companies are readily "squeezable" and that their business is conducted upon philanthropic rather than commercial principles. If the meaning be that the smaller traders are relatively treated unfairly under the new rule, the injustice should be rectified at once. But what is meant probably is that the advance rates will be unpopular among, rather than unfair to, small traders.

TEXTILE NOTES.

The Sanford Manufacturing Co. at Hamilton are working until 10 p.m. three nights a week.

A break occurred in the machinery of the Kingston cotton mill one day last week and operations were delayed for some little time.

The Thamesford flax mill has resumed operations. Out of the 400 acres of flax delivered at the Thamesford mills, it is estimated that the grasshoppers and crickets have destroyed nearly $2,000 worth of seed.

Last Monday the Ontario Cotton Mill at Hamilton began operations on full time. Wages were reduced 10 per cent., but as the men have been idle for a long time little dissatisfaction was expressed at this cut.

While no official statement has been made that the St. Croix cotton mill at Milltown, New Brunswick, is to resume operations soon, the fact that 4,000 tons have recently been delivered is an indication that the mill will not long remain idle.

A jute mill is being erected by an English firm, at a cost of $500,000, at Orizaba, Mexico. It is to be operated by electricity conveyed from a fall of 115 feet high, and giving 11,000 horse power one mile and a half away. Four dynamos are to be installed, and each machine will have an independent motor.

In Leeds producers of heavy woolens are better employed than they have been this season, and buyers for the English centres are placing

orders by way of forestalling a rise in prices. Up to date there has been no increase in the values of presidents, beavers and pilots, but orders for the best fancy worsted and novelties in tweeds are not accepted but at an advance of from 5 to 10 per cent. on the quotations of a month ago.

The price of print cloths reached 2 15-16 cents at Fall River, on Wednesday, with fair sales at that figure, and it is anticipated that 3 cents may be reached before the week closes. How this rise will affect the strike of mill operatives is somewhat a matter of speculation. It is claimed by some mill men that the stock, which has already been reduced over 300,000 pieces, must be nearly wiped out before the factories will start up.—*Boston Journal of Commerce, Sept. 8th.*

The factory town is now wearing a more cheerful aspect. The Canadian Colored Cotton Mills Co. employ between eighteen hundred and two thousand hands in the Cornwall factory, and announces that, beginning Monday, September 17th, they will start operations on full time. It is said that a reduction of 12 per cent. will be made on the rate of wages paid last year. But as the factory has only been running 35 hours a week for a long while, it is generally considered that work with small wages is better than no work at all.

About fifty weavers employed in the Globe Woolen Mills, Montreal, have struck, their grievance being the scale of fines imposed upon imperfect workmanship. As usual, there are two stories told of the trouble. The manager says that some of the men were careless, and that the fine was by no means an excessive one. The strikers say that they do not average 80c. a day, and claim that on Friday one of their number made a slight mistake in a piece, for which he was fined $2, although his earnings for the three days previous were only $2.30. As a result, they quitted work. New men have been taken on in place of the striking employees.

The annual return of cotton spinning and weaving mills working and in course of erection in India, June 30, 1893, shows an increase of two mills, one being situated in Bombay and the other in the Presidency. The spindle power in Bombay has accordingly increased by 106,492, while in all India the total number of spindles at work June 30, 1893, was 3,575,917, as against 3,402,232 in the previous twelve months, showing a total increase of 173,685. It will be noticed, however, that there was a decrease in the quantity of cotton consumed in Bombay, the figures being 724,200 bales, as against 728,588 bales June 30, 1892. In other parts of India the total consumption was increased by 9,398 bales over last year, while the quantity consumed in the whole of India was 5,070 bales more than that given in the preceding return.

HARDWARE AND METAL TRADE ITEMS.

A reduction of 10 per cent. has been made in the wages of the employees of the Canada Screw Works at Hamilton.

The SS. "Curry" arrived at South Chicago the other night with 5,117 tons of iron. This is the banner cargo of the great lakes, and was brought from Escanaba.

There is only a moderate business, says the London *Iron and Steel Trades Journal*, doing in tin plates. The anticipated activity has not yet shown itself to any extent; there is, however, more inquiry at a slight advance.

The total production of pig iron of the west group of the German Union of Iron and Steel Producers during the past seven months of this year amounted to 626,130 tons, as against 582,916 tons in the corresponding period of last year.

Reports from various centres of the iron, steel, and allied industries indicate a better feeling in most branches, although the improvement is not developing with the rapidity that has been looked for.—*London, Eng., Iron and Steel Trades Journal.*

A cablegram received this week in Kingston reports that a company with $450,000 capital has been organized in England to develop the mining properties in Frontenac and adjoining counties. Iron ore, mica and gold-bearing ore will be mined.

The following speeds are recommended by a French engineer for band saws cutting different metals: For wrought iron, 220 feet per minute, and for cast iron, 150 feet per minute, whilst the various bronzes are best cut at a saw speed of about 280 feet per minute.—*Chicago Journal of Commerce.*

The amount of the world's supply of tin for the year 1893 is given officially in the annual report of Dr. D. T. Day. The total amount for the year was 67,237 tons, classed as follows:—English production, 8,650; Straits' shipments to Europe and America, 38,874; Australia shipments to Europe and America, 5,579; Banca sales in Holland, 5,418; and Billeton sales in Java, 5,211.

Messrs. James Watson & Co., Glasgow, in their last letter, say: "The Warrant market has improved in price still further, although today there has been a little reaction, which is not surprising. A large business has been done speculatively by members of the trade, outsiders so far showing a reluctance to do anything. Middlesbro' and Hematite iron are both firmer, but consumers and shippers are not buying to any extent."

FOR GROCERS AND PROVISION DEALERS

A distillery is projected for Vancouver.

Prince Edward Island cheese is to be sold by tender.

New Brunswick has 81 cheese factories and nine creameries.

Sugar was introduced into England not later, it is said, than in the thirteenth century.

The Exeter, Ont., creamery has been sold to Mr. A. Q. Robier for the sum of $1,300.

Kingsville and Leamington evaporating factories are each employing about 100 hands.

The O'Kell-Morris Fruit Preserving Co., of Victoria, have commenced the manufacture of candied peel.

Belleville's cheese board has gone out of business for the season, all the cheese in the vicinity having been contracted for

The Dunmore Canning Factory, a new concern, began operations in St. Catharines last week. Tomatoes, plums and peaches are being packed.

J. Y. Griffin & Co., pork packers, Winnipeg, commenced slaughtering and packing hogs again, after having been closed down for the past three weeks.

The ship "Clan Robertson" will carry 75,000 cases of salmon, the largest cargo in the history of the industry, from British Columbia to England.

Wilson & Co., fruiterers, Winnipeg, Man., have sold out to Daniel Coates. Mr. H. Wilson has taken a position with Rublee, Riddell & Co. as traveller.

The total production of whiskey in the State of Kentucky for the year ending June 30, 1894, was 20,133,803 gallons, and about 3,000,000 gallons of this was spirits.

L'Union Sardiniere du St. Laurent has had an excellent season this year, having canned (a week ago) over 40,000 boxes of sardines since the beginning of the summer.

The catch of cod by Maritime Provincial fleets this season is estimated at not more than two-thirds of that of a year ago. Last year's catch was an unusually large one.

The *Record* reports the arrival at Windsor of 2,800 eighteen-pound baskets of grapes from Pelee Island, and adds that this is the largest single shipment ever made from the island.

The Cowan Co., of Toronto, have a very attractive exhibit at the Industrial Fair this year. It is made up of coffees, cocoas, chocolates, icings, and a choice selection of confectionery.

Recently a trial shipment of 600 Manitoba hogs was made to Messrs. Davies & Sons, Toronto. The experiment has proved a success, and it is likely the trade will be continued.

"Coffee is coming down in immense quantities to the Brazilian ports," says the London *Statist*. "The crop this year is a splendid one, and the exports are expected to be on an extraordinary scale."

Oyster pails are being made by the Dominion Paper Box Co., Toronto, at the rate of 60,000 boxes a day. This certainly indicates that there are many people in Canada with a relish for this little bivalve.

Something of a sensation has been occasioned in cheese circles here by the announcement Saturday that Mr. Howard Bissell had contracted for thirty factories, in Brockville and Perth districts, and thus secured about 20,000 cheese. The report is well authenticated.—*Brockville Recorder.*

About 600 hands will be employed for four weeks in picking hops in the Essex hop yards of Messrs. Hiram Walker & Sons, of Walkerville. The crop this year, while not a heavy one, may be considered as fairly large, while the quality is fine. A year ago 100 bales were sent by Messrs. Walker & Sons to England, the shipment giving satisfactory results.

The lack of pasturage, owing to prolonged drouth in Western Ontario, is occasioning apprehension about fall dairying. Meanwhile, however, the export of cheese to Britain keeps up, 908,904 boxes having gone forward from Montreal this navigable season, as against 870,020 boxes last year to same date. Butter shipment, on the other hand, is very slim, the exports to date having been only 7,751 packages, while last season for the like period they were 30,414 packages.

LUMBER AND TIMBER PIECES.

Men for the lumber shanties in large numbers have been making for the Upper Gatineau during the last few weeks.

The Dickson Company has upwards of ten million feet of lumber, at Harwood, Ont., ready for shipment as soon as sold.

Johan Reuter, a Spanish lumber merchant from Venezuela, is in Ottawa attempting to establish a trade between Canada and Venezuela in pine logs.

Mr. Jas. S. Fairley is building a new lumber mill near Boiestown, in Northumberland county, New Brunswick. It will be equipped with a rotary, planer and two shingle machines.

The first ship load of British Columbia lumber sent to Egypt left Vancouver a few days ago for Alexandria. The cargo goes on the barque "Verejean," which is now loaded with 1,630,000 feet.

Messrs. Hanson Bros.' mill at Durham, says the *Fredericton Gleaner*, has started a new enterprise. They have been sawing hemlock boards and have lately shipped a schooner load for the American market.

Mr. J. D. McArthur has returned to Winnipeg from Birtle, Man., where he has been engaged during the summer looking after his lumbering interests in that district. His mill has been closed down for the season after cutting 1,500,000 feet of lumber.

The plant and property of the Blind River Mill Company in Algoma have been purchased by J. Haynes, of Woodslee; W. R. Rodd, of Gesto; R. Wigle, of Essex, and R. Tader, of Windsor. The purchasers have secured timber limits near the mills.

Howry & Sons, who are running the Fenelon Falls sawmills, are contemplating two prospects, one to build a railway from their limits to connect with the waters of Pigeon Lake and thence tow the logs to Fenelon Falls. The other is to connect with the Haliburton branch of the Grand Trunk between Gelert and Haliburton.

A Washington despatch says: "The Secretary of the Treasury having received official information that Canada imposes no export duty and no discriminating stumpage duty on lumber, logs, timber and articles mentioned in the free lumber schedule of the new tariff act, has instructed collectors of customs to admit such articles free of duty when imported from Canada."

The tugs "Admiral" and "Hero" are on their way from the Fredericton booms with the last raft of the season. It is composed of pine logs for W. H. Murray, and spruce logs for Randolph & Baker. This closes the season's operations. There are 10,000,000 feet of logs in the St. John river, about a hundred miles above this city. There is no lumber above the falls.—*Gleaner.*

"The mills will not close up this year until the ice compels us to close them," said a Chaudiere lumberman yesterday. All the lumber firms have an abundance of logs that will keep them sawing until December, if it were possible to cut as late as that. All the men employed in the mills will be sure of steady employment until about the first of November this year.—*Ottawa Journal.*

The Brunette Saw Mill Company, limited, of New Westminster, B.C., recently shipped to Montreal a double car load of Douglas fir timber. Three of the largest pieces were of the following dimensions: 24x24x60, 24x36x60, square on four edges, and the largest piece without a single knot. No larger timber has ever been shipped from British Columbia. The sticks are to be used in dredge building for the Montreal harbor commissioners.

When spoken to about the outlook for the lumber cut along the St. John this season, Mr. W. H. Cunliffe, the large operator at Fort Kent, said it was not as bright as former years. There is now some 13,000,000 feet of lumber hung up along the St. John, and poor prospects for getting it out this year. Of that quantity 2,000,000 belongs to Neal McLean, about the same to Mr. Conners, 6,000,000 to Mr. McShane, and smaller quantities to other parties. It is not sold. In his opinion the price would continue low. There will scarcely be one quarter the cut the coming winter than there was before.—*St. John Telegraph.*

INSURANCE MATTERS.

Mr. T. C. Livingston, of Hamilton, well known in insurance circles, has accepted the position of inspector of agencies for the Provincial Provident Institution, and the St. Thomas *Times* calls it "a good appointment."

The Provident Savings Life Company publishes a paper named "Common Sense," which has a colored pictorial study in life insurance which sets off very clearly to the eye the relations between pure life insurance and investment.

The Fire Underwriters' Association of the North-West will hold ts twenty-fifth annual meeting in Chicago during the last week of September, beginning probably on Tuesday, the 25th. The president is Mr. Stuart, and doubtless the meeting for 1894 will be an interesting one.

About as extraordinary a case of family longevity as has come to our knowledge is exemplified in that of Mr. R. Wickens of this city, the general agent of the Commercial Union Assurance Co. Five brothers are still living whose ages, taking the next birthday, are as follows: 69, 71, 84, 87 and 90, two sisters 74 and 78, totalling 553, an average of 79 years each, and all, considering their years, in excellent health. One brother, we believe, died some years ago aged 71. What a bonanza these would have been for a life insurance company in such a case.

The Ottawa papers comment somewhat cuttingly on the alleged action of certain insurance companies in cancelling risks on lumber piles in that city, because of a suspicion that recent fires there were incendiary. The council of the Ottawa Board of Trade met last week and passed a resolution to be forwarded to the Underwriters' Association, from which we give an extract: "The council of this board having carefully investigated the circumstances surrounding the said fires, desires to express its conviction that the said rumors are totally without foundation, and its deep regret that any insurance company doing business in this city should have taken any action in the direction of suspending risks without having first thoroughly investigated the matter."

LARGEST SEPTEMBER 1 WHEAT STOCKS ON RECORD.

A grand total of 88,358,000 bushels of wheat in the United States and Canada on the 1st instant means, says *Bradstreet*, a gain of about 18,000,000 bushels compared with September 1 last year, when the increase, as compared with September 1, 1892, was about 24,000,000 bushels. On September 1 in the years 1889, 1890 and 1891 the average grand total of Canadian and American wheat stocks available was not far from 28,000,000 bushels, less than one-third what they are to-day, when they are 25 per cent. larger than one year ago. * *

Available supplies of wheat in the United States and Canada increased 14,855,000 bushels last month, the heaviest increase recorded for any month of August, the next heaviest being that in August, 1892, 14,374,000 bushels. Stocks of wheat afloat for and in Europe during August decreased 4,200,000 bushels; but in August, 1893, wheat afloat for or in Europe showed an increase of a little more than 1,000,000 bushels, while in 1892 August supplies in sight in Europe and on the high seas bound therefor increased 104,000 bushels. The grand total of stocks of wheat in and afloat for Europe, September 1, amounted to 63,264,000 bushels, 15,700,000 bushels less than were so reported one year ago, and 1,300,000 bushels less than were so reported two years ago, with which exceptions the total for September 1, 1894, is the heaviest reported for any like date.

Since June 1st last stocks of wheat afloat for and in Europe have run down heavily, from 79,873,000 bushels to 63,264,000 bushels three months later, a decrease of 16,600,000 bushels, or more than 20 per cent. Stocks of wheat in the United States and Canada on June 1st amounted to 80,520,000 bushels, and on September 1st to 88,358,000 bushels, an increase of 7,838,000 bushels net, or less than one-half as much as the loss of supplies available in and afloat for Europe during the same three months.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Sept. 13th, compared with those of the previous week:

Clearings.	Sept. 6.	Sept. 13.
Montreal	$8,459,284	$12,095,508
Toronto	3,496,267	5,332,726
Halifax	1,030,617	1,512,728
Winnipeg	769,426	741,297
Hamilton	672,403	650,147
Total	$14,427,997	$20,322,406

Aggregate balances this week, $3,100,143; last week, $2,157,550.

—An experiment is about being made in the way of importing German refined beet root sugar. A Montreal broker representing a refinery in Brunswick, Germany, has secured several trial orders, aggregating 60 tons of granulated, which will arrive in the course of several weeks, and it is claimed the cost laid down will be from a quarter to half a cent less than that of the domestic article. Despite this, however, the grocery trade as a rule are not disposed to think that any quantity of the article will find a market here. The sugar is packed in 200 lb. sacks, which for convenience of handling, cleanliness, &c., do not at all compare with a barrel, and it is also stated that the sugar itself is apt to discolor tea, &c., and will hardly suit the tastes of Canadian consumers. An outlet for a certain proportion may be found among confectioners, &c., but it is hardly thought the article will find general favor.

Correspondence.

MODERN BUSINESS ECONOMY.

NEW YORK, Jan. 23, 1894.

MR. ERNSTEIN, Columbus, O.

DEAR SIR, -Ve haf receivded your letter von de 13th, mit exbense agount und round list. Vat ve vant is orders. Ve haf blenty maps in N. Y. von vich to make up round lists, also bik families to make exbenses. Mr. Ernstein, ve find in your exbenses agount $2.50 for billiards. Please don't pay any more billiards for us; vat ve vant is orders. Also ve do see $7.50 for a horse and buggy. Vere is de horse, and vat did you do mit de buggy? De rest von your exbense agount is nix but schleebers. Vy is it you don't ride more by day times?

Ve send you to-day by frade two boxes zigars, one costed $1.40, der oder 50 cents. You can schmoke der dollar forty cents box, giv der oders on your customers; ve did sended you dem also samples of a necktie vat costed us $7 a gross, sell dem for $7.25 a dozen; if you can't get $7.25 dake $2.25; vat ve vant is orders. Dey is a noveldy, as ve haf in stock two years und aint sold none.

My bruder Louie says you should stop at Hambouldon, Ohio, his cousin Mary Blum liftes there. Louie says that you should sell Blum a good bill. Dry him on dose $7.25 neckties first. Git good brices. He is Louie's cousin. Sell him mostly for cash; tell him ve vant orders. Also Louie says vat you can leave Columbus at 11.40 in de night, und get by Hambouldon at 3.35 in de morning. Louie says do dis, und you don't need no schleebers, you schpend too much for schleebers—ve don't need schleebers, vat ve vant is orders.

Don't date any more bills ahead, as de days is longer in summer as in vinter. Louis says don't show Mark Blum, his cousin, any of de good sellers. Und remember, Mr. Ernstein, vit dis order you do bussness oder you don't do nothing at all; vat ve vant is orders.

Yours truly,

PINSKY & Co.

Keeb de exbenses down.

THE ORDER OF TONTI

"It is a matter for regret that the Supreme Engineers of the Order of Tonti should find it necessary to let that esteemed swindle go into the hands of a receiver, for it can hardly be alleged that out of a membership of 1,500 there are not enough fools to keep the thing going for a few more moons, with all the more margin to the chief pusher," says George Moffat.

And what can be thought of a concern which started out to make $350 turn into $1,000 in six or seven years, going stone broke when face to face with the comparatively easy task of making $1,000,000 equal $2,000,000 at shorter notice! Cannot these gentlemen do all they promised, or what is the matter with them?

"Matter with them! Nothing; but there is something the matter with the poor devils they have robbed, and these, if they have any use for it, can have our sympathy. Accretions from lapses and new blood, they tell us, will perform this miracle—this miracle of making $350, more or less, into $1,000, in seven years! *Accretions from lapses!* What an absurd idea! What is a lapse? Our friend Grogan, at the corner grocery, has ten customers who pay him $500 a month, $50 each for groceries and so on. That $500 a month is his trade, and out of that he has to pay $450 a month to the wholesale houses, rent, taxes, etc. One of Grogan's customers gets some sanded sugar and he doesn't go to Grogan's at all now, consequently Grogan's income is less by $50 a month. Now Grogan's customer has lapsed, and if you were to suggest to Grogan any accretion from that lapse he would throw you out of his shop (if he could). And, brethren, Grogan derives as much accretion from the lapses of his customers as an assessment society gets out of the lapses of its members—*and not a cent more.* And even suppose Grogan got another $50 a month customer the next day, he would still have lost the other $50 a month. A loss is a loss, and no power on earth can substitute a life for a life, a customer for a customer, or an item for an item.

"If people would only get hold of the idea that it is beyond the power of man (so far) to manufacture money, they would not get bit so often in their investments. An insurance company, or a building or loan company, or an assessment company, does not manufacture money, and if either of them is to pay to the heirs of every member, or to the member himself, sooner or later, $1,000, then they must on an average receive either in premiums or interest $1,000 from every policyholder; there is no charity about it, and less philanthropy. For that reason the Order of Tonti, like many other gallinaceous swindles, has found it inexpedient to go on, has stopped going on, and bust."—*San Francisco Adjuster*

Mr J H Wade's steel steam yacht "Wadena" has arrived at Yokohama, Japan Mr. Wade and party left Cleveland in August for the Pacific coast, where they will take passage for Japan, and after joining the yacht make a long cruise about China and Japan

Debentures for Sale.

The Treasurer of the Village of London West will receive proposals up to 15th September for purchase of debentures of the village, to be issued in sums of $1,000 and $500, 30 years to run under Act of Ontario Legislature, 1894.

JOHN SIMPSON, Clerk.
London West

7th September, 1894.

The Canadian Homestead Loan and Savings Association.

The Shareholders of the above Association are hereby notified that the Ninth Annual Meeting for the presentation of the financial statements, the election of directors, amendments to the rules and by-laws and other purposes will be held at the office of the association 72 King Street East, Toronto, on **Tuesday, October 2nd, 1894, at 7.30 p.m.**

By order.

A. J. PATTISON, Secretary.

Toronto, Sept. 4th, 1894.

BANK OF BRITISH NORTH AMERICA.

At the general meeting held in London on September 7th the following report of the directors of the Bank of British North America was presented to the proprietors :

The court of directors submits the accompanying balance sheet to the 30th June last. It will be seen that the profits for the half year, including £7,618 14s. 1d. brought forward from last account, amount to £26,543 0s. 5d., out of which the directors have now to report the declaration of an interim dividend of 25s. per share, payable, free of income tax, on the 5th October next, leaving a balance of £1,543 0s. 5d. to be carried forward. The dividend warrants will be remitted to the proprietors on the 4th October next. The following appropriations from the profit and loss account have been made for the benefit of the staff :

	£	s.	d.
To the officers' widows' and orphans' fund	300	4	6
To the officers' life insurance fund	288	1	5

The balance sheet on the 30th June, 1894, is as follows :

Debtor.

	£	s.	d.
Capital, 20,000 shares of £50 each fully paid	1,000,000	0	0
Resevre fund	275,000	0	0
Deposits and current accounts	2,104,324	2	11
Notes in circulation	206,620	4	5
Bills payable and other liabilities	937,574	19	8
Rebate account	9,875	10	8
Profit and loss account balance brought forward from 31st Dec., '93, £47,618 14s. 1d.; deduct dividend April, 1894, £40,000, leaves £7,618 14s. 1d.; net profits for the half year ending this date after deducting all current charges and providing for bad and doubtful debts, £19,512 12s. 3d., makes £27,131 6s. 4d.; deduct appropriation benefit of staff, £588 5s. 11d.	26,543	0	5
	4,559,937	18	1

—The minister of public works for Manitoba is calling for tenders for the excavation of a cut to be made on the Fairford River at its outlet from Lake Manitoba. The cut is to be 1,200 feet in length and 200 feet wide at the bottom, and is designed to give a freer outlet to the water of the lake, with the view of redeeming large areas of flooded land.

A CASE OF TEMPERANCE.

A Charlottetown letter of August says that the Island of Prince Edward shows much interest in a charge laid against Thomas Flynn, steward of the Charlottetown club, for violation of the Canada Temperance Act. When the case came before him, Stipendiary Magistrate Haszard gave judgment, dismissing the case. The evidence showed that the club had been regularly established in May, 1893, before the Canada Temperance Act came into force. Supplies were purchased by means of the annual subscriptions, admission fees and daily receipts. No one but a member was allowed to purchase liquor, and no member was allowed to treat another or introduce as guests persons residing in Charlottetown or Royalty. It was also proved that the club was organized for sociability, and that some members were total abstainers. The steward is paid monthly wages, and he is paid for all the liquors purchased, so that each member using them pays a proper share.

According to the evidence given, and as the club was organized previous to the coming into force of the Canada Temperance Act, the stipendiary ruled that the club was not established for the purpose of evading the provisions of the Act. The members of the club are vendors as well as buyers, and the steward had no property in the goods sold, and could not sue for the price, and there being no contract there could be no sales.

AN INTERESTING DOCUMENT.

In the course of his study of the bank note tax, Representative Springer, chairman of the Committee on Banking and Currency, discovered in the Congressional Library a treatise by Albert Gallatin, Jefferson's Secretary of the Treasury, entitled, "Considerations on the Subjects of Banking Systems of the United States." In the chapter upon the establishment of the United States Bank, Gallatin wrote as follows respecting the power of Congress to tax bank notes :

"Congress made and deemed it proper to lay a stamp duty on small notes which will put an end to their circulation. It may lay such a duty on all bank notes as would convert all the banks into banks of discount and deposit only, and annihilate paper currency, and render a Bank of the United States unnecessary in reference to that object. But if this last measure should be deemed pernicious, or prove impracticable, Congress must resort to other and milder means of regulating the currency of the country. A Bank of the United States, as has already been shown, was established for that express purpose."

—In France, at the point of production, champagne sells for from 50 cents to $3 a bottle, according to quality.

—The twenty-seventh annual Trade Union Congress will be held at Norwich, England, on September 23.

—Natal exports $35,000 worth of tannery bark annually, and Cape Colony exports $105,000 worth of dried flowers each year.

—The total exports of South Africa last year were appraised at $67,500,000. Gold valued at $22,500,000 was shipped from South Africa last year. The diamonds exported from that country in 1893 were appraised at $22,500,000. Copper worth $1,250,000 was also shipped.

Commercial.

MONTREAL MARKETS.

MONTREAL, Sept. 12, 1894.

The feature of the week in financial matters is the easiness in loanable funds, the rate for call monies being now general at 4 per cent. With the opening of the present week the stock board resumed their afternoon, as well as morning sessions, and business has been rather more active at pretty steady prices. The stocks receiving the most attention are Street Railway at 156¼, Montreal Gas at 167½ to 168, and Commercial Cable at 142⅜. In banks only a few Montreal sold at 221, and Commercial at 141

ASHES.—First quality pots are quoted at $4.15 to 4.20, and the market strong; seconds, $3 75 to 3.80, with a few brls. of good tares realizing a little more than the outside figures. Receipts are very limited, and some moderate shipments last week have reduced the stock in store. Pearls may be quoted at $7 to 7.50, with no stock here.

CEMENTS AND FIRECLAY. Atlantic freights have advanced, and as a consequence the prices of cements are firmer from 5 to 10 cents a brl For English the quotation is now $1.95 to 2.10, with a decided scarcity; of Belgian there is ample supply at $1 80 to 1.95. Firebricks range from $14.50 to $19 per M.

DAIRY PRODUCTS.—The butter market is quiet, there being but a moderate movement in either an export or a local jobbing way. The exports this season, to date, have been only 7,751 pkgs., against 30,414 pkgs. for the corresponding period of last year. We quote creamery 18 to 19c.; Townships' dairy, 16 to 17c., Western, 14 to 15½c per lb Cheese shipments to date are 208,384 lbs, as against 870,020 for last year The market rules steady We quote finest Western colored 10¼ to 10½c; ditto, white, 10¼ to 10½c., finest Quebec, 10½c There is a steady demand for eggs at 9 to 10c per dozen.

Total grain	650,620	692,314
Oatmeal	156	.....
Flour	38,653	.....

GROCERIES. The trade report a good distribution in progress on the whole, but in the matter of payments matters are not so satisfactory as they might be. Some new Valencia raisins are on board the "Labrador," now in port; they are mostly going west, and are reported not to be in first-class condition. Locally new Valencias are quoted at 6c., but further supplies due next week are offered to arrive at from half a cent to a cent less. It will be well into October before direct shipments get here, the above lots coming *via* Liverpool. Sugars are steady at 4¼c. for standard granulated, yellows from 3¾ to 4c., with a good country demand. We understand that some moderate lots of German refined sugar will shortly be placed on the market. Further reference is made to this matter in our summary columns There is continued firmness in teas; local representatives of Japan houses have no samples to offer, and freights are advanced one-third of a cent per lb. In coffees there is a fair movement at 19 to 21c. for Rio; Mocha and Java 24 to 30c., Maracaibo 19 to 22c. Canned goods are still dull. There are probabilities of a scarcity of corn and tomatoes, which are said to be slow in ripening, and packers are withholding quotations for new pack. Salmon are quoted $1.30 to 1.40 for best brands; lobsters $6 75 to $7 the case.

HIDES AND TALLOW.—There is no let up to the war between dealers, and though the ruling price for No. 1 green hides is 4c., some dealers pay as high as 4¼c., though this is the most that can be got from tanners. For heavy steers, from 4½ to 5¼c. is being paid, with tanners paying the outside figure. A few calfskins still come in, and bring 5c.; lambskins, 45 to 55c. Tallow is quiet and easier at 5 to 5½c.

LEATHER.—The market is again disturbed by reports of trouble among the Quebec trade The suspension of a large tanning concern, and a small manufacturing shoe concern, are noted in our summary columns, and there are rumors of further trouble. Locally matters move along just as about noted for the last several weeks We quote:—Spanish sole, B A No 1, 18 to 20c., do No 2 to B A, 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c., No 1 slaughter 18 to 20c No 2 do, 17 to 18c., American oak sole, 39 to 43c., waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do. small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c., russet sheepskin linings, 30 to 40c., harness, 18 to 25c buffed cow, 9 to 11c., extra heavy buff, 12½c pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c., rough, 16 to 18c; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—We do not hear of any important transactions in iron. Warrants are cabled at 43s. 7d., and there are now only four furnaces in blast in Scotland. American and domestic iron are rather firmer on spot, and Niagara No. 2 could not be laid down under $18 to 18.50 Some good lots of sheet iron have been sold since last report at quotations Tinplates were cabled the other day at threepence advance. We quote:—Coltness pig iron, none here; Calder, No. 1, $19 50; Calder No 3, $18.50, Summerlee, $19 50 to 20 00 Eglinton, $18 50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts, none here; Middlesboro, No. 3, $17; Niagara No 2, $18 to 18.50; Siemens, pig, No. 1, $16 25 to $16.75; Ferrona, No. 1, $16 50 to 16 75; machinery scrap, $14 50 to 15 00, common do., $10 00

to 12.00; bar iron, Canadian, $1.70 to 1.75; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.10 to 2.15; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to $6.25. Black sheet iron, No. 28, $2.30; No. 26, $2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.85; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3½c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¾ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3¼c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Business in these lines may be called pretty active, and most houses are well employed shipping out goods. As regards prices, there is little change in any department. Dry lead is cabled ten shillings advanced in England, but prices of ground white are unaltered locally. Castor oil, though firmer in the east, is selling at former quotations, there being considerable in stock here. We quote:—Turpentine, 45 to 46c. per gal. for single barrels; two to four barrels, 44 to 45c. Linseed oil, raw, 54c. per gal.; boiled, 57c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 39 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

TORONTO MARKETS.

TORONTO, Sept. 13th, 1894.

DRUGS.—Numerous small orders make up a fairly large total, and the business of the last few weeks is generally considered satisfactory. The *N. Y. Journal and Bulletin of Commerce* says: Opium continues to weaken. Quinine shows a slightly easier tendency from second hands. Clove oil is slightly higher. Shellac is strong and advancing. Reports received from Aden state that owing to the prevailing low prices the crop of gum is not being gathered this season.

DRY GOODS.—The city warehouses are filled with country merchants, and even a larger number of visitors are in the city than were here during the millinery opening. Some orders have been placed, but as a rule the parcels taken are small, and buyers are pursuing a very cautious policy. Dress goods, of course, attract most interest. Serges in blacks, navies and browns are leaders. Covert cloths are finding favor, while German plaids and fancy weaves are being sold,

GRAIN.—The market is dull and unchanged. The movement of wheat is mainly to millers. A quantity of wheat is, however, going into consumption for feeding purposes. Wheat is cheaper than peas, and in the United States is on much the same basis of values as corn.

These prices are wholesale by the car-load

When chopped and mixed with other grain it makes economical food for cattle. Should a sufficiently large quantity of wheat be used in this way it must necessarily decrease stocks and strengthen the market. Oats are easier; there exists a fairly good demand from the city retail trade; millers, however, are not yet making any heavy demands upon the stocks of merchants. Barley has not commenced to move to the United States; however, to-morrow, Friday, the standards will be fixed and we may then look for an export movement. Corn is quiet; recent rains were not too late to be of some benefit to growing crops. The only demand for rye on this market comes from the distillers, who have not yet begun active operations for the season, and no considerable lots will be sold until cold weather sets in.

The stocks of grain in store at Port Arthur on Sept. 1st were 807,126 bushels. During the week there were received 119,494 bushels, and shipped 227,377 bushels, leaving in store on Sept. 8th, 699,243.

GROCERIES.—The Industrial Fair has of course brought many visitors to the wholesale grocery houses. New Valencia raisins have been received, and fine off stalk are quoted at 6 to 7c. The market is in good condition to receive the new fruit, as stocks of last year's crop have all gone into consumption. Sugars are in good request, as is natural to expect with an abundant supply of domestic fruits on hand. Although no advance has been made, Japan and young hyson teas are strong, with the market all round ruling firm.

HARDWARE.—The week has witnessed a large influx of visitors, attracted to the city by the Industrial Exhibition. Some orders have been placed, but more attention has been given to settling up accounts. Obligations have been fairly well met, and merchants say that if accounts with manufacturers were as well met the situation would be very satisfactory. Retail merchants speak in hopeful tones of trade in the country this fall.

HIDES AND SKINS.—There has been no change in the price of hides; the feeling, however, is a little firmer, if anything, in consequence of Chicago reports indicating a strong market. Cured are offering at 4½c., but we do not hear of any sales made during the week at this figure. Green hides remain at unchanged quotations. Calfskins are quiet, and prices nominal. Lambskins and shearlings are still selling at 40c. Tallow appears to be a little scarce, but no advance has been made in quotations.

LEATHER.—Although the market is not an active one, there have been buyers on the street this week and some transactions made. But western shoe manufacturing houses are not exactly rushed with orders, and in consequence the parcels which they take are small in size. Jobbers report trade in the country as good, and the distributing movement is reaching fairly large proportions.

PROVISIONS.—Stocks of common butter appear to be accumulating, but choice fresh butter is in demand at from 17 to 18c. Cheese is firm at 11 to 11¼c. per lb. Eggs are firmer, fresh stock bringing 12c. Dried and evaporated apples are commencing to offer in the market, but there is considerable difference between the views of buyers and sellers, and no transactions are being made. Samples of evaporated on this market do not show the best quality. Hop picking is now in progress; reports from various parts of the country concerning the season's crop are rather indefinite, but generally indicate a "fair crop and good quality."

WOOL.—Transactions since our last report have not been abundant. American buyers have been soliciting consignments, but Toronto merchants do not care to do business upon this basis. Merchants in the United States seem to expect that they can purchase our domestic fleece wool for 18c., but 19 to 20c. is considered by dealers here as the lowest prices upon which an export trade can be done.

● **RELIABLE AGENTS WANTED** ●

E. MARSHALL, Secretary, E. F. CLARKE, M'n'g Director.

THE GREAT-WEST LIFE ASSURANCE CO.

HEAD OFFICE: WINNIPEG

Subscribed Capital... $400,000 00 **Government Deposit... $56,000 00**
Paid-up Capital ..... 100,000 00 **Reserve 54,720 00**

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

HOLIDAYING AND FISHING.

There is no denying that a well-arranged holiday will change a moody, grumpy, dispirited man into a laughing and talking member of society. We have known a simple fishing trip do this, but that is not saying any or every trip would effect it. One August week the writer of this parted from a worthy friend who was in a solemn fit over the collapse in real estate, the dulness of business, the approaching end of all things commercial. The two did not meet again for a fortnight, and *then* the solemn man's burden was gone and his talk was of three-pound bass, six-ounce rods, minnow-bait for trout. His step was light, his laugh loud, while the Wilson tariff and the Patron vote had no place in his thoughts. A week's outing at a cost of $15 had done it all.

Near the steps of a bank a grey-haired youth hailed a group of two bound for the Toronto club and "fixed them with his glittering eye," while he told with gloating iteration of the trip he had made to Heliotrope Lake, back of Bobcaygeon, and nearly swamped the skiff with 4lb. bass. The listeners looked at one another, and the narrator grew more earnest and more touchy as our faces seemed to say: "Go slow, Joseph, go slow, dear boy." But he did not offer any of the fish in evidence. The known veracity of this man precluded any open doubt as to the actuality of his story, but it did not prevent other fellows around a table at the Bodega later on going one or two better in the number and weight of bass from Ruta Baga Lake or Pons Asinorum river. "Four and a half pounds he weighed when we got back to the hotel at night," said Tom, "and I had to take him out into the deep water as far as the length of Toronto street, and play him for fifteen minutes before I dared try to land him." At that moment a bachelor school trustee crept into the talk with the advice: "Just you go up to Judge Morson's chambers in the Court House and see his fish—which they say an Orangeville man caught—and you won't talk bass any more. Jack M—— and I have just been there, and we were paralyzed at what we saw." The man was serious; he was even ardent—for a school trustee—but we were scarcely impressed, because his learning was supposed to be of the mathematical rather than the fish sort. However, three men went, and on the way met another who had heard of this find and seen it, and the wonder was in his eyes yet. In a two-foot box filled with ice and green leaves lay a speckled trout, caught far north of Lake Superior, in the Nepigon, we guessed, but the Judge was non-committal; it measured 24 inches in length, and weighed 6 lbs. 2 oz. We gazed at the huge fish, its big mouth, its strong fins, its dusky color and plentiful spots, and agreed with old Isaac that

"The trout may be justly said, as the old poet said of wine, and we English do say of venison, to be a generous fish. He may justly contend with all fresh water fish for precedency and daintiness of taste."

This spectacle of a speckled monster on ice took away all desire to dwell longer upon such inferior sport as bass or perch or pike killing. Muskoka or Niagara were not in it. Even the maskalonge grew dull. The glory of our grand old lake was gone. No longer could we sing with the Bay of Quinte poet in his *Ode to Lake Ontary*:

> Blue is thy waters, blue as bottle glass,
> Behold 'em stretched thar!
> Great muscalunges and Oswegy bass
> Is likewise ketched thar.
> Once't the red Indian thar tuck his delight,
> Fished, fit and bled—
> Now, the inhabitants is mostly white
> With nary red.

So it was resolved to go and confer with D. W. as to his experience with the ouananiche, of Lake St. John. But D. W. was out of town, and it was carried by all consent that the only thing to assuage our disillusion was to go and hear of salmon-killing in the Restigouche by the Professor, told as he can tell it, with accuracy of word-painting and particularity of dimension, plus a regard to localities and proprieties, and a gravity of demeanor which are a model to all fish historians. This pleasure, too, must be foregone, for the Professor was engaged.

But on board a north-bound car some one of the party espied "The Old Man," whose sunburn seemed as ingrained as his spunk and whose blue eyes glowed an invitation to be questioned about Pembroke and the headwaters of the Mattawa. "When did you get back? How's Billy W——? Did the Doctor go with you? How about the new hut?" And then came the crucial question: "How many fish did the party get?" It is always, with those who know him aright, a foregone conclusion that "The Old Man's" replies to questions about sport are to be accepted as final. To any manifestations or even hints of disbelief,

> O, what a deal of scorn looks beautiful
> In the contempt and anger of his lip.

With a brief but comprehensive glance at the group, which seemed especially aimed at the youngest member who had put the main question, "The Old Man" told us to "come over to The Green this evening and we'll have a chat about it." And so all unpleasantness was avoided. Fishermen's talks have been made classic by John Brown or Andrew Lang in the Old Land and by George Dawson in the New. Whether the narrator of to-day be an English guide on the Nipisiguit or a French Canadian on the Ottawa, fishing experiences or fish stories are sure of interested attention from votaries of the craft. For verily few holidays have a flavor like the fishing holiday. It may not always be that "peace and patience and a calm content do cohabit in the cheerful heart" of nineteenth century Canadian fishermen, as they did in that of Sir Henry Wotton of old time. But it is as true now as it was in his day, that "'Tis not time idly spent, for angling is, after tedious study, a rest unto the mind, a cheerer of spirits, a diverter of sadness, a calmer of unquiet thoughts, a moderator of passions, yea, a procurer of contentedness."

BILL NYE ON ADJUSTERS.

An insurance adjuster is one who stands between the insured and immediate wealth. If it were not for the adjuster the insurance company would soon give away all its money and fetch up in the poorhouse. When notice of my loss was sent in, the company wanted to pay me for the house, grounds, and barn at once, but the adjuster said: "No, you must not give Mr. Nye all your money, for you will run short and be a vagrant inside of a year."

So the adjuster came. After awhile I convinced him that I did not set the house afire, and I could see that it was a relief to him, for he was a man who loved to believe in his fellowmen.

I proved that my wife was very dangerously ill on the night of the fire, and that her life for three days had been despaired of, and so, looking into my great, deep, honest eyes, he said: "Some men might say that you had selected this time to become a wealthy widower and skip, but I am not so soured against my fellowmen as that. I believe that if the house was set afire some one else did it."

I am insured in five companies besides the one that carries my piano, and so really there should have been six adjusters and the local agent in addition to the independent adjuster; but the climate here is so pure and bracing that one man can do the brain work of two, and so they did not all come. The local agent and the adjuster, I find, are two different men. One is a social favorite and a pleasing conversationalist, while the other is a man who tells you how cheaply houses like yours can be built now-a-days.

The agent gives you all sorts of advantages over the company, and when the adjuster comes you find that these things, after all, were not put into the policy. He also takes you around behind the barn and shows you that, as a matter of fact, your policy has been vitiated seven or eight times the past year, but he will say nothing of that, because you evidently did not set the house on fire yourself, and you seem to want to do better and live a purer life, so he will give you $22 and pass receipts. Then he looks at his watch and says he must hurry away and make some other home happy with his ready John, and away he goes.

The agent and the adjuster are both lovely characters, but in a different way. One fixes it so that you will, in case of fire, be about $1,000 better off, while the other makes you feel so glad to think that the company has not slapped you into jail for fraud that you tremble all over till he goes away.

I was glad that all the adjusters did not come. If they had, I would have been a poor man.

Once I had a house insured for $15,000, and lightning struck one of the chimneys and destroyed the roof, the falling bricks cutting through the tin, so that an entire new roof had to be put on. I had planned to go to Italy that summer, but I had to stay at home and prove that I did not tip that chimney over on the house myself in order to get a new roof.

Life insurance is not quite so bad, though I expect to be dug up by seven or eight companies, in order that they may be plumb sure that I am not playing 'possum on them.

When the adjusters went away I felt from what they said to me that I was a sort of janitor for these companies, and that if I did not use more care in protecting the property I would be discharged and another man put in my place. —*Coast Review.*

LIVING ON HOPE.

Merchants in the old country are made out of about the same stuff as merchants in Canada, and it appears that as far as regards their methods of buying on credit and living on their creditors, a certain proportion of the dwellers in the old land are no better than we. The following is taken from the *Grocer's Review*, Manchester, Aug. 21st:

"On Wednesday, at the Croydon Bankruptcy Court, before Mr. Registrar Fox, Robert Meikle, a tea merchant of Addiscombe-road, Croydon, and Redhill, came up for his public examination. The circumstances of the case were of a somewhat unusual character, the debtor attributing his insolvency to the complete ruination of his business through the reports in the newspapers following the prosecution instituted against him by the Croydon corporation for serving in his shop while suffering from scarlet fever. In reply to Mr. Aitchison, from the office of the Official Receiver, the bankrupt said he had also lost a good deal of money through his sister taking criminal proceedings against him with reference to some title deeds. Although the case was at once dismissed, his business fell off considerably, and after the scarlet fever case he went a fortnight without a customer. He was fined about £5. He declared that the newspaper reports in his sister's case were almost as injurious to his business as the scarlet fever prosecution.

"The Registrar—Allow me to say that I don't believe it. The debtor went on to say that although he was continually being pressed he went on trading. Mr. Aitchison — You lived on hope? The Debtor—Yes. (Laughter.) Continuing, the debtor said he founded a sect known as the 'Gospel Messengers,' of which he was the major member. He bought a piano for £4, which was vested in the members of the mission. Mr. Aitchison—If you are mixed up with the Gospel—— The Registrar—You cannot expect a mission to be carried on without tea. Look at the Bricklaying Grand Junction United Ebenezer Temperance Society. (Laughter.) The debtor denied having mixed up his Gospel and tea dealing accounts. Unfortunately, he had been connected with two mission halls. The Registrar—Why 'unfortunately'? The Debtor—Because they ran me into hundreds of pounds. I became responsible for some clothes for the mission band, and had to pay £96 for that alone. By Mr. Cooper (for a creditor)—I was not ejected from the Gospel Messengers; I left them. In answer to Mr. Dunicliffe, who appeared for Mr. Cheatle, a trade creditor for £213, the debtor said the scarlet fever case was the last straw that broke his back. The Registrar—You do not attribute that to Mr. Cheatle's tea, I suppose? The case was adjourned."

HE SEEMED A MIRACULOUS PERSON.

A charming story is told by a Scotch contemporary of the little daughter of a gamekeeper who lives in one of the lodges at Keith Hall. Her father was telling her mother one night the arrangements for the Duke of York's visit, and how the Duke would drive round by his lodge. Next morning the little girl asked her mother with an awe-stricken face, "I say, mammy, wull ye ha'e to open the gate for the Duke, or wull he flee owre't?"—*London Globe.*

—Fifty-eight of the United States Senators and 229 Representatives are lawyers.

THERE is a project on foot to build an electric railway from Ingersoll to Tilsonburg.

—Dr. Brisson, agent general of the Colonization Society of the Province of Quebec, left on Saturday for Labelle, whence he intends starting on an extensive exploration tour. The doctor will also endeavor to induce colonists to send exhibits to Quebec exhibition.

Sun Life Assurance Co. of Canada

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

DECISIONS IN COMMERCIAL LAW

ROURKE v. THE UNION MARINE INSURANCE CO.—A vessel partly insured was wrecked, and the ship's husband gave notice of abandonment to the underwriters, whose agent caused the hull and outfit to be sold to one K. The underwriters afterwards notified the ship's husband that the vessel was not a total loss, and requested him to pay the charges and take possession. He paid no attention to the notice, and K. took the vessel to a port in Maine, U.S., and attempted to repair her, and he afterwards caused her to be libelled for salvage in a United States court and sold. R., owner of eight shares, which had not been insured, brought an action against the underwriters for conversion of her interest. Held by the Supreme Court of Canada, affirming the decision of the Supreme Court of New Brunswick, that the conduct of the ship's husband, who was agent for R. in respect of the vessel, precluded the latter from bringing such action; that by his notice of abandonment the underwriters became joint owners with R. of the vessel; that they had not sold the vessel so as to deprive R. of her beneficial interest in her, nor to destroy her; that the ship's husband might have taken possession before the vessel was libelled; and that R. was not deprived of her interest by any action of the underwriters, but by the decree of the court under which she was sold for salvage.

McKINNON v. LUNDY.—This was an appeal by the defendant from the judgment of Ferguson, J., in favor of the plaintiffs, in an action for a declaration that the plaintiffs are the owners of part of lot 9, in the third concession of the township of Chinguacousy. The plaintiffs are, the administrator with the will annexed of the estate and the children of James B Lundy and Clementine Lundy, deceased. By her will Clementine Lnndy devised the lands in question to her husband, James B. Lundy, who conveyed them to his brother, the defendant. On the 12th of September, 1892, James B. Lundy was convicted of the manslaughter of his wife, and was sentenced to 20 years imprisonment. The trial judge held that, by his felonious act in killing his wife, the husband had precluded himself from obtaining any benefit under her will, and that the defendant stood in no better position than his grantor, and there was an intestacy as to these lands. The court unanimously agreed with Ferguson, J., as to the construction of the will, but disagreed with him as to the effect of the manslaughter, holding that there was no evidence of any criminal intention on the part of James B. Lundy in killing his wife; there were no degrees in manslaughter, and for all that appeared it might have been the veriest accident; and, therefore, the case did not come within the principle contended for, that a person could not benefit by his own crime. The court below had held that by the felonious act of the defendant's brother in killing his wife he had absolutely precluded and debarred himself from taking any benefit under her will or out of her estate, and therefore, that the defendant, who was the grantee of his brother of lands, devised by the wife to her husband, took no estate in the lands. The Court ,of Appeal distinguished the Maybrick case on the ground that this case being one of manslaughter, there was no criminal intention shown, and allowed the appeal and gave judgment in favor of the defendant.

GOSNELL v. TORONTO RAILWAY CO. This was an appeal by the defendants from an order of the Common Pleas Divisional Court, dismissing the defendants' motion to set aside the verdict for the plaintiff for $1,000 in an action for damages for personal injuries received by the plaintiff, the driver of a coal wagon, on the 25th April, 1893, by reason of a collision with a trolley car of the defendants' on Yonge street, in the city of Toronto. It was argued by the appellants that they had the right under their charter to work their cars at whatever rate of speed they pleased. The Court of Appeal was of the opinion, however, that they could not do that without regard to the rights of the public, who also have a right to be on the street; and that they had no right to drive immoderately; and that there being evidence here that the car was going at an unreasonable rate of speed, the verdict could not be interfered with. The Court of Appeal distinctly negatived the proposition advanced by the defendants that they have the right under their charter to drive their cars at whatever rate of speed they please. They must go only at such rate of speed as is consistent with the safety of others, who have the right to use the roadway. In the case in hand an excessive rate of speed was deposed to by some of the witnesses, and that was regarded as evidence sufficient to support the jury's finding of negligence

SCOTT v. THE BANK OF NEW BRUNSWICK.—S., a shipmaster, before starting on a voyage, deposited $1,000 in a bank, and obtained a deposit receipt therefor, which he left with R., part owner and manager of his vessel, for safe keeping. S. was absent for four years, and when he returned and asked a settlement with R., who owed him $2,650 on ship's account, he found that R. had received the amount of the deposit from the bank and applied it to his own use. To avoid proceedings against him R. gave to S. a bill of exchange on a person in Ireland for £250, and a mortgage on an interest he claimed to have on his father's property; and S. went to sea again without stating any of these facts to the bank. In two years he returned again and found that R. had left the country, the bill of exchange had not been accepted, and nothing had been realized on the mortgage. He then demanded the amount of his deposit from the bank, which they refused to pay, and he brought an action to recover the same. The action was twice tried. On the first trial a verdict was given in favor of S., the jury having found that when R. took the deposit receipt to the bank, with the name of S. indorsed on it, such indorsement had not been written by S. and the trial judge held that the finding was, in effect, that of forgery by R., which could not be ratified. The jury also found that the security taken by S. did not include the $1,000. On the second trial the bank obtained a verdict, which was affirmed by the full court. On appeal from the latter decision it was held by the Supreme Court of Canada, affirming the judgment of the court appealed from, that the doctrine of estoppel was not involved in the case, that R. obtained the money from the bank by falsely representing that he had authority from S.; that S., by ratifying and confirming the payment, adopted the agency, and his act made the payment equivalent to one to a person having authority to receive it; and it made no difference that, by his false representations, R may have committed an indictable offence

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THE Galt *Reporter* says that the Galt & Preston S. R. is doing a good freight business.

A CHARTER is sought for the Montreal Watch Case Company. The proposed capital is $50,000.

MEN are working on the Gatineau Valley Railway between Pickanock and the Desert, a distance of twenty-seven miles. It is expected to have the road completed this fall.

AFTER many changes in the old established dry goods business of John Wall, in Chatham, the son, John Wall, Jr., took charge about two years ago, and having but little capital was obliged to lean upon his friends for assistance. No doubt they became tired of this, and after several writs had been issued against him, he assigns with $20,000 liabilities. His nominal assets are slightly in excess of this sum.

IN Hamilton there are three or four failures to notice. Among these is D. B. Dewey, coal and wood dealer, who has assigned. The coal and wood business of Robert McKeever, in the same city, has been sold by the bailiff.——The same officer is in possession of the confectionery stock of George Davis, which was advertised for sale, and of the Smart Tea Store, in that place, which has been chattel mortgaged, and is now advertised for sale.

Mercantile Summary.

THE new Ontario Bank building at Kingston will be finished, it is expected, by October 1st.

Two years ago J. T. Hutchinson purchased a general stock at Mono Road; owing to granting credit too freely he has already been obliged to assign.

A DESPATCH from London, Eng., says: Efforts are now being made in London to float two Northwest railway schemes. By the first it is proposed to run from Battleford to Lake Buffalo, and by the second a road from Calgary to Fort Churchill.

SINCE 1888 the grocery and fruit business of Mrs. J. Vandrick, at Port Elgin, has been managed by her husband, Alexander, who failed some years ago, but has since secured his discharge. Although the business was supposed to belong to his wife, we notice that the assignment has been made by him——Robert Green, dealer in hardware, Chatsworth, has been there many years, and is entitled to kind consideration for having not only improved his habits but his financial condition at the same time. However, he was unfortunate in having a loss of $2,000 by fire four years ago. Then his creditors were good enough to write off their claims 50 per cent. Still he did not succeed, and last month he gave a chattel mortgage and now assigns.

Dominion Agents.

Mercantile Summary.

AN offer of 50 per cent. is made to the creditors of D. Donaldson, who has been a liquor dealer at Sarnia. Seven years ago he bought T. R. Barton's stock, but lately he has been easy going and has not held his position in the trade. He owes $5,000 and has nominal assets of $1,500 less. It is probable that his offer will be accepted.

IN Manitoba and the West there are several failures to notice this week. In Brandon, Monroe & Co., liquor dealers, are embarrassed. Charlotte Monroe, the sole owner, became involved in April, 1892, assigned and compromised at 50 per cent. A year later she claimed a surplus of over $2,000 on liabilities of $9,000. But now she again assigns.——So does J. H. Milward, painter, at Calgary, and Abraham & Son, general storekeepers at Hartney——The sheriff is in possession of the Winnipeg wholesale liquor business of Colquhoun & Co., which is now owned by Mrs. Gertrude R. Colquhoun, wife of A. Colquhoun. He became involved in litigation a year ago, when the change took place.——The bailiff is in possession of the effects of A. B. A. Cunningham, who did a baking business at Carberry.——A mortgage sale of the general stock of W. G. West & Co. at Innisfail is advertised. Mr. G. West is sole owner, and he has been three years in business.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

Mercantile Summary.

A SALE of G. Wyatt & Son's boot and shoe stock, in London, is advertised for to-day.

APPLICATION is being made for a charter of incorporation for a company to be known as the Central Telephone Co., which intends operating a line along the route of the Nova Scotia Central Railroad, from Bridgewater to New Germany.

MONTREAL business disasters for the week are as follows: A. Thibaudeau, formerly a wholesale dry goods clerk, and since last spring in the retail shoe trade, has assigned already on demand; liabilities $4,783.——W. Richmond, saloon keeper, who has been of late the target for quite a few suits, has thought it best to assign. He owes $2,829.——Mrs. A. Guerin, dealing in a small way in ladies' underwear, is being closed up by creditors.——Calixte Chouinard, of St. Henri de Montreal, formerly a California miner, and in the hardware trade for the last ten or twelve years, has assigned on demand, owing about $13,000.——M. E. Authier, doing business in dry goods on St. Lawrence Main street, in his wife's name, under the style of M. E. Authier & Co., has been served with a demand of assignment; liabilities are about $7,000. He is also a partner in the firm of Authier Bros., doing business on St. Catherine street west.——C. Robert, hats and furs, has failed, not for the first time, and assigns.——M. Fox, saloon keeper, has been served with a demand of assignment.

Toronto

THE people of New Denver, B.C., want a branch bank.

P. T. DAGENAIS, the Arnprior tailor reported failed, is offering his creditors 35 cents on the dollar.

THE front of the Huron & Erie Loan Company's new building, which is nearly completed, is one of the handsomest in London.

AN assignment has been made by G. P. Halls, druggist in Windsor. His affairs are controlled by a London firm.——Another assignment is that of E. B. West, contractor at Brookditch.

A DISSOLUTION is announced by the Ingersoll firm of Ross & Co., dealers in coal, wood, salt and cement. Mr. John W. Patterson leaves the business, which will be carried on by Mr. John Ross.

COTE & FAGNY, dry goods retailers for the last ten years in Quebec, are feeling the hard times to such an extent that they feel compelled to ask an extension, spread over eighteen months, on liabilities of $12,000.

BELLEVILLE has been visited by four disastrous fires during the past few weeks, the losses aggregating upwards of $95,000. Sunday morning St. Andrew's church in that city was completely destroyed by fire, and the *Ontario* says there is strong evidence of incendiarism in each case.

THE Government contract for the deepening of the Lachine canal from the St. Gabriel locks to Lachine has been awarded to Messrs. F. B. McNamee and Wm. Mann. The price is $250,000, and the work, which is to be completed in three years, will be commenced in a few weeks.

A CHARTER is being applied for for the Canadian Trading and Shipping Company, of Montreal, who purpose doing a general agency business in wines, liquors and other European goods, and also an export business in Canadian products. The nominal capital is $250,000. The applicants for charter are J. S. Bousquet, A. J. Chaput, O. Marin, J. M. Beausoleil and C. J. Coursol.

FOLLOWING close upon the Quebec shoe and leather failures reported last week, comes the reported failure of R. Tanner & Son, wholesale dealers in shoes, at Pictou, N.S. They were burned out several weeks ago, and an arbitration awarded them $10,000 of insurance, though they carried policies of $30,000. They claim there is a heavy loss over and above the amount of insurance received, and ask creditors to accept 55 cents on liabilities of from $35,000 to $40,000.

THE strike of the Scotch miners is over, and 57,000 men have voted to resume work at the old wages.

THE Winnipeg *Commercial* celebrates its thirteenth birthday by appearing in a new typographical dress. Our western contemporary has always presented a neat appearance, and is doubly attractive now.

A RICH man died in Woodstock, Ont., the other day. This was Wm. C. McLeod, Sen. Deceased came to Canada from Scotland when a young man, and by hard work and good judgment acquired wealth estimated at $1,000,000 or more. He died at the advanced age of 88.

THE creditors of the British American Starch Co. met in Brantford. Mr. Elmsley, of the B.B.N.A., Mr. J. R. Vanfleet and Mr. Jas. Watt were appointed inspectors. The meeting then adjourned for a week, when these gentlemen will submit a report. Mr. Geo. Foster is said to be a creditor for $17,000, unsecured.

THE grape growers of North Essex have held a meeting at Walkerville, where matters of importance pertaining to their business were discussed. The evils of the present system of selling were talked over and the preliminary steps taken to organize a selling association. No change will be made this year, but before another season such an object may be an accomplished fact.

NEARLY two million passengers were comfortably carried by the Toronto Street Railway during the twelve days of the exhibition which closed last week, and scarcely one word of complaint was heard during that time. In the same number of days last year the number of passengers carried was 1,797,877. The exact figures for this year were 1,936,119, showing a gain of 138,242.

Two weeks have passed and there are only three assignments to notice in this city, and they are of minor importance. Mrs. G. A. Leake, confectioner, is in trouble. Two chattel mortgages have been recorded against her for $565, and she assigned.——The other is J. T. B. Lee & Co., manufacturers' agent, who has been struggling for an existence for more than a year, and now assigns to E. R. C. Clarkson. Creditors need not expect in either case a large, if any, dividend.——The third failure is that of J. Finnigan & Son, tailors, who came from Hamilton in the early part of 1889, where the senior partner previously failed. Apparently they have had no better success here during the past five years, as they now assign.

THE general passenger agents of railways in the United States and Canada arranged a convention for Tuesday last, with headquarters at the Hotel Frontenac in Quebec. A special train to Montreal from the West brought nearly one hundred general passenger agents en route to attend the convention.

J. B. TRUDEL, prominently known n Quebec, first as chief of the Water Police, next as a political wire-puller, and latterly as a hotel-keeper, is seeking indulgence from his creditors in the shape of a compromise at the rate of 70 cents on the dollar, payments spread over eighteen months.

THE total receipts of the Toronto Industrial Fair for 1894 were $68,957.95. This, owing to wet weather, is a decrease of $3,024.10 on the figures of last year. The receipts on the different days of the fair are as follows:—Tuesday, Sept. 4, $443.00; Wednesday, Sept. 5, $515.80; Thursday, Sept. 6, $2,405.05; Friday, Sept. 7, $4,500.80; Saturday, Sept. 8, $4,392.50; Monday, Sept. 10, $11,190.00; Tuesday, Sept. 11, $10,777.20; Wednesday, Sept. 12, $18,364.85; Thursday, Sept. 13, $10,403.15; Friday, Sept. 14, $5,945.60. Total, $68,957.95.

FOR twenty-two years Mr. William Park has been connected with the Paton Manufacturing Company, of Sherbrooke. Since the death, two years ago, of Mr. Andrew Paton, who was the managing director, Mr. Park has shared the duties of managership with Mr. W. E. Paton, Mr. John Turnbull being appointed managing director in 1893. Mr. Park and his brother, Angus Park, have acquired an interest in the Niantic Mills Co., an eight sett woolen mill at East Lynne, Conn., where they will take up the positions of agent and overseer respectively.

ACCORDING to the Windsor *Record*, capitalists in New York are buying real estate in that youngest Canadian city. A syndicate has purchased and secured options on $250,000 worth of property through John Curry, and other purchases will place the total value at about $450,000. These gentlemen propose to spend a large sum of money in opening up streets, asphalt paving, sewers, etc., and will improve the property, subdivide it and place it on the market. It is understood that the purchase includes a block of lots on the west side of Pellisier street, from Ann street north to Giles avenue, also taking in Victoria avenue property from Elliott street to Giles avenue, and on Dougall avenue.

MESSRS. WITHROW & HILLOCK are a somewhat prominent firm in Toronto business circles They have conducted a lumber and planing mill establishment. The firm also made refrigerators on a large scale, and was largely interested in building operations. Since the depression in Toronto real estate set in Messrs. Withrow & Hillock have been somewhat cramped financially, and now a meeting of their creditors is called. Mr. J. J. Withrow is well known as President of the Toronto Industrial Exhibition.

THE country failures in the Province of Quebec are few this week. C. Gelinas, of St. Paulin, who succeeded his brother in the stove business in 1890, has assigned on demand; liabilities, $4,818——Joseph Charest, general merchant, also doing a sawmill business at Ste. Marie de Blandford, has assigned, owing some $7,500——Eugene Lavigne, a dealer in hemlock bark, railway ties, etc., at Ste. Gertrude, has assigned upon demand——J. B. Bernier, of Sherbrooke, who has been doing a small business in groceries, shoes, etc., for the last three years, has assigned after being sued several times of late. Liabilities, about $2,000.

IN January, 1891, Price & McMurty succeeded Paulin & Price in the hardware trade, St. Thomas. At the end of the year they dissolved, the former retiring with notes amounting to $5,000. McMurty continued, and in November A. R. Simpson, a teacher, invested $3,500 in the business. It is now evident that McMurty allowed Price too much for his interest, and he has made an assignment.——A meeting of the creditors of T. R. Wilkins, tobacconist at Galt, who assigned over a week ago to T. H. Lamb, has been held, and his statement shows liabilities of $2,269 and nominal assets of $1,650. As no offer of settlement was made the estate will be sold.

WE have further information regarding the Quebec shoe and leather failures. The liabilities of F. Gourdeau & Frere, tanners, etc., amount to some $30,000, on which they propose to pay 25 cents on the dollar, secured, in four quarterly instalments.——F. Moisan, shoe manufacturer, first talked of an extension, but now thinks a compromise at about 25 per cent. would suit his case better. As he shows a surplus of $1,100 over liabilities of $4,400, however, creditors are hardly likely to accept his views.——The creditors of Racine & Dion had a meeting last Friday, at which the firm made a proposition to pay 40 cents on the dollar, in two, four and six months. Their statement shows liabilities of $37,598; assets $30,109.

QUEBEC AND THE U.S. TARIFF

A despatch from Washington, bearing date Saturday last, gives the following intelligence In view of the United Press despatch from Canada stating that the Province of Quebec imposes a stumpage tax on spruce logs, the Treasury Department requested the State Department to hold an official investigation of the fact in order that the Treasury Department may carry out the provisions of the new tariff as concerns lumber. If it should be found that the Province of Quebec is continuing to levy stumpage duty, then the duties imposed under the McKinley law will be exacted on lumber coming from that province into the United States.

Upon this the Montreal *Gazette* remarks: The matter referred to in the above despatch is evidently the order issued last month, which reads as follows:—

"Whereas, the present rate of dues chargeable on spruce logs for paper pulp is twenty-five cents per cord of 128 cubic feet, and whereas it is advisable to raise it, while allowing a reduction when pulp wood is to be manufactured in this province—it is ordered that the rate of dues on spruce logs for paper pulp be fixed at forty cents per cord of 128 cubic feet, but that a reduction of fifteen cents per cord be allowed when the pulp wood is to be manufactured in this province."

The clauses of the United States Tariff Act referred to put upon the free list, with a proviso, the following articles:

672. Logs and round unmanufactured timber not specially enumerated or provided for in this Act.

673. Firewood, handle bolts, heading bolts, stave bolts and shingle bolts, hop poles, fence posts, railway ties, ship timber, and ship planking, not specially provided for in this Act.

674. Timber, hewn and sawed, and timber used for spars and in building wharves.

675. Timber, squared or sided.

676. Sawed boards, planks, deals and other lumber, rough or dressed, except boards, planks, deals and other lumber of cedar, lignum vitæ, lancewood, ebony, box, granadilla, mahogany, rosewood, satinwood, and all other cabinet woods.

677. Pine clapboards.

678 Spruce clapboards

679 Hubs for wheels, posts, last blocks, wagon blocks, oar blocks, gun blocks, heading, and all like blocks or sticks, rough hewn or sawed only.

680 Laths

681 Pickets and palings

682 Shingles

683 Staves of wood of all kinds, wood unmanufactured

Provided, That all of the articles mentioned in paragraphs six hundred and seventy-two to six hundred and eighty-three, inclusive, when imported from any country which lays an export duty or imposes discriminating stumpage dues on any of them, shall be subject to the duties existing prior to the passage of this Act

TORONTO, FRIDAY, SEPTEMBER 21, 1894.

THE SITUATION.

In his speech welcoming the members of the Deep Waterways Conference, Mayor Kennedy traced the lines of action on which, in his opinion, success was to be sought in obtaining a 20-foot channel from Lake Superior to the Atlantic. This plan is that the Governments of Ottawa and Washington should make a joint effort to achieve the desired result. That such joint action is not impossible he suggested by reference to a Congressional resolution of 1892, looking in this direction. Broadly considered, there can be no doubt that a 20-foot water channel would offer a cheaper means of transportation than rail, or any existing channel of communication; and though there are many obstacles in the way of its realization, he would be a bold man who should undertake to foretell that it will never be obtained. It is quite true that our canal system, as it stands at present, has not been made the most of; but this can scarcely be urged as an argument against ultimate enlargement. The fact that no fixed elevators have been built to aid transhipment, at Kingston, may be due to an unacknowledged suspicion that the present system was destined to be superseded by one in which transhipment would not be necessary. On any other supposition it is inexplicable. In the absence of fixed elevators, at this point, we at least escape the possible evil, complained of in the State of New York, of an Elevator combine, and we are in a position to take a lesson from the experience of that State, if the necessity should ever arise.

Though Col. Davidson, of St. Paul, suggested a possible rival of the St. Lawrence route in the Mississippi, no real rivalry is, in the nature of things, possible. Canada, beyond all question, possesses the best route by which the produce of the Western Atlantic slope can reach the ocean. If it were developed to its full capacity, it is difficult to believe that American produce would not seek this channel in great quantities. The question of enlargement has a commercial side which must not be lost sight of. If we would fairly estimate the advantages of a scheme of enlargement, we must ascertain whether and what profit it would bring. Governments have no money except what they take from the people. And we cannot afford to ignore the anomalous fact that the little Erie canal beats the great St. Lawrence river and canals. Is this state of things likely to continue under enlargement? Can the Erie be made a great ship canal, a potential rival of the St. Lawrence for all time to come? This is one of the questions for consideration. If the improbable happens now, in canal rivalry, might it not continue to happen after enlargement? New York will do whatever is possible still further to develop the Erie; But a free, enlarged Erie might destroy the chance of making a twenty-foot water-way in Canada profitable.

Mr. Cooley, of Chicago, signalized the anomaly in connection with canal navigation, to which reference has already been made. "There had not been a time," he said, "when there was not a better route down the St. Lawrence than down the Erie Canal, and yet there had never been a time when there was not more freight down the Erie Canal than down the St. Lawrence." This state of the facts, whatever the cause, has to be looked steadily in the face. The spirit that contributes to this result is, if we may rely on this speaker, a somewhat exclusive patriotism which resolves to use a National Route. "There is not," he said, "a city west of Detroit that would not endeavor to obtain a route to the sea that would render them [the United States] independent of everybody." In this spirit Canada built her Intercolonial and her Pacific railways. It is this feeling which causes Mr. Thompson, of Duluth, to advocate a canal from Oswego to the Hudson River, in reference to the deepening of the St. Lawrence canals. And Mr. Cooley wishes to confine the local traffic to his own country; and with this object in view he advocates a canal route *via* Lake Champlain, through the New England States to New York. The Chicago canal, connecting with the Mississippi, now being constructed at a cost of about two-thirds of the Manchester canal, has his approbation, for the same reason. If we may believe delegates who take a somewhat exclusive view of the matter, the Americans are successfully fighting against geography to control fate. They are able to say, by the mouth of Mr. Cooley, that "foreign traffic [on the canals] is but a drop in the bucket."

In this canal question another element besides national sentiment plays a part. Local interests make themselves felt in the early stages of the question. One plan is to connect the Mississippi, at St. Paul, with Lake Superior; another to build the Chicago Sanitary Canal; the latter is already under construction, while the former has not got beyond the survey stage. St. Paul and Chicago are in opposition to one another, in the advocacy of these schemes, and Chicago has got a good start in the race. In Canada, canal enlargement equally arouses local interests. Montreal and Quebec are opposed to a 20 foot channel on the ground that they might both be made way ports. Toronto, if called upon to decide, would probably declare for enlargement. These local interests are potent in the early stages of a great movement like canal enlargement, but in the end the questions settle themselves. At present it is doubtful whether the Government could obtain a vote of the necessary amount, $75,000,000 probably, if it were willing to try. If the question is ever settled in the affirmative it will be settled by the teeming millions that will in future take up their abode in the North-West.

If Mr. Cooley is right in his theory that "the domestic transportation determines the line of foreign shipment," so long as the United States contains a vastly larger population than Canada, we cannot hope to divert the canal traffic to the St. Lawrence. If Mr. Cooley's theory can be established, it would rise to the dignity of a law, and might be quoted as "the Cooley law," in the same way as we talk of the Gresham law. This much is certain: The supplies necessary to support the population of the

Republic must mainly reach the consumers through domestic channels, and the only question is whether the surplus will, as a matter of necessity, follow the same channel. Mr. Cooley asserts that the canal-borne traffic follows this law. If this be found on examination to be true, with only such exceptions as prove the rule, the chief fruit of this convention will be in the conviction which this law will carry to the minds of the members and of those of the people of the two countries, of the truth of the Cooley law.

The Conference recognizing that no great work like the proposed canal enlargement can be carried out without a permanent organization for its promotion, took steps looking to the creation of the necessary machinery for that purpose. On one point the resolutions vary from the general trend of the speeches. The speakers generally spoke of a 20-foot canal; the resolutions call for nothing less than a basis of 26 feet, should the smaller depth prove inadequate. In recommending the Governments of Canada and of the United States to arrange for determining the mutual cost of the work and for international co-operation in its execution and operation, the convention did about all that could be expected from its members.

Besides appointing as leader Mr. Joseph Haycock, the Patrons have issued a post-election manifesto. If this document differs in any respect from the ante-election deliverances, the variation cannot claim the sanction of the electors, and represents only the individual views of the members. The declaration that the acceptance of a pass from a railway or steamboat company by a member of the Legislature ought to be treated as a violation of the independence of Parliament, we have not noticed before. The notion probably comes from the Revision Convention of the State of New York, which proposes to insert a provision of this kind in the constitution. Members of the legal fraternity are threatened with a withdrawal of all special privileges, which means, we take it, that men without legal education may assume the privileges of the bar; so that besides the proverbial privilege of having a fool for a client, a client may have an incapable man for counsel. The power said to be possessed by the Medical Council of annulling the certificate of any physician certified by a chartered college, is denounced. The language employed does not say that this power ought not to be exercised by anybody else. It is invidious that the Medical Council should be left to prosecute unqualified practisers of medicine, and it would be better if this duty were transferred to some one else. The suggestion that charges of fraud or wrong-doing against medical practitioners should be tried by the ordinary courts, is reasonable. The principle of payment by fees, against which so much was said in some quarters before the elections, is approved by the Patrons. To this the condition of paying officers by a fixed salary is attached, the surplus, when there is any, being paid over to the municipalities. The only thing new about this is the fixed salary, which most officials would prefer to uncertain and fluctuating gains.

In dealing with Government House, the Patrons throw out hints which might produce a revolution of methods at Ottawa any Washington, as well as at Toronto. They object to the Governor having a free residence or servants paid by the Government. Apparently they intend that he should be his own copying clerk, since they object to his being supplied with assistance of that kind. And as he is to be denied supplies of any sort, it is to be presumed that he is to be required to purchase stationery to be used in the public service. Even when clerks are required to work all day and most of the night, they are to get no gratuities of any kind. This is not in accord with the ordinary rules of remuneration for services in commercial or manufacturing life, or with the principles for which labor advocates contend. The Patrons, in binding themselves to act as a solid body on questions which a majority of them may declare to be Patron questions, divest themselves of the liberty of individual judgment and action. As has happened in Great Britain, France and Germany, so here the multiplication of parties will add to the difficulty of governing.

TRADE WITH AUSTRALIA.

The report on his mission to Australia made by the Hon. Minister of Trade and Commerce, printed as a Blue Book, and the report of Mr. J. G. Carter Troop, published recently in the *Globe*, of his visit to that colony, afford a basis for some reflections upon the prospect of our increasing trade with those distant provinces. It is to be remarked at the outset that both reports indicate a friendliness on the part of merchants and statesmen on the other side of the water which is not an unimportant feature in the establishment of commerce. And the more they are perused the more the possibility becomes apparent of a much increased trade intercourse between Canada and Australia.

The first enquiry of the manufacturer or merchant will be, "What can we sell over there, and what can we buy in return?" And he will find no lack of information in either report. The Blue Book gives lists of the goods imported by the various colonies, and pages 54 to 65 are occupied with a very valuable table giving the customs tariff of the colonies *on every item*. By the colonies is meant not only the subdivisions of the Australian continent, but also Tasmania, New Zealand and the Fiji Islands, whose total inward and outward trade reached £84,651,000 in 1891, which means $423,000,000, and represents a foreign trade of more than $100 per head of the inhabitants. Of this trade 75 per cent. is done with Great Britain, 18¾ per cent. with foreign countries, and 6¼ per cent. with British possessions. These foreign countries were chiefly the United States, France, Germany and Belgium. The total trade was pretty evenly divided between imports and exports. Taking first the largest colony, New South Wales, we may indicate the main items of import such as Canada might send, the value of articles which are now imported annually, and the tariff charged by that colony upon them. The figures relate to 1892:—

Articles.	Value.	Tarift.
Drapery	£2,086.000	10 p.c., except cotton in piece, free.
Wearing apparel	1,146,900	free
Boots and shoes	455,700	10 p.c.
Drugs and medicines	171,200	crude free.
Flour	509,985	1s. per cental.
Furniture	101,800	10 p.c.
Hardware	634,600	10 p.c.
Hats and caps	183,373	10 p.c.
Pianos and organs	80,700	15 p.c.
Whiskey	194,439	14 s. gal.
Machinery	309,000	10 p.c.
Malt	100,900	free.
Matches	58,200	free.
Paper, printing	146,600	free.
" writing	43,800	plain, free; fancy, 10 p.c.
" brown & wrapping	27,000	3s. per cwt.
Soap	41,000	2s. per cwt., toilet; 3s. per cwt. other.
Preserved fish	82,500	1d. per lb.
Timber, rough	357,000	1s. 6d. per 1,000.
" dressed	55,700	3s.
Doors	18,040	2s. each.
Tobacco, manufactured	98,200	3s. per lb.
Cigars and cigarettes	123,000	6s. per lb.

Other items are blankets, bags and sacks, bicycles, brushes, candles, carpets, carriages, cheese, confectionery, cordage and rope, bedsteads, leather, jams and jellies, plated ware, saddlers' goods, paints and colors, pickles and sauces.

Mr. Troop has gone more into detail with respect to

specific articles, four out of his seven columns in the *Globe* being devoted to detail as to possible imports or exports. He says, "for mackerel, shad and our lake fish packed in brine (like salmon) and done up in small firkins or kegs, Canadians will find in Australia a wide market." But, he adds, the fish must be of good quality and carefully packed. In N.S.W. alone over $330,000 worth of condensed milk is consumed per annum. We can supply part of this. As to field implements for farmers, the Massey-Harris Company have shown what energy can do in securing part of the trade the United States have so long held. In the articles of hardware and woodenware Mr. Troop sees an opening for us; chopping axes and pick axes, and hickory handles for these; edge tools, hammers, saws, locks, brooms, tubs, wringers and mangles are only a few of the articles in his list. The Americans have a good hold in these and other like wares, and we cannot displace them without an effort. United States makers have glutted the market with buggies and light two-wheeled vehicles, while as for farm wagons and carts the Australians make them for themselves. Fine carriages they mostly procure from England. But carriage materials are an item of extensive import, and these we might send. Upholstered furniture does not offer much encouragement, although "plain furniture, shipped in a 'knocked-down' condition, has a good chance." Australians do not import mahogany, preferring walnut for this purpose. Very little of oak or ash should be sent; wooden bedsteads are not used in that country. Canadians have the best prospects for office, library and school furniture, all shipped "knocked down." American boots and shoes of stylish make are taking well in competition with English, and no wonder. Inasmuch as our best makers produce foot-wear closely resembling the American, we, too, should have a part of this trade. High prices will be paid, but we are warned "to send only the most superior make." Seal jackets are much worn by Australasians, while black and white Astrachan furs are both popular. Bass' ale and Guinness' stout are everywhere used in those colonies, and German beer and lager have obtained a strong hold, having displaced the American, which did not keep well. "Canadian beer is practically unknown in Australia. It has only to be well introduced and pushed to gain an enduring hold on the market." Whiskey does not appear to be liked as a beverage by our far away cousins; its consumption is decreasing. Perhaps this is in some degree a result of the views of the physicians, who consider the use of whiskey in that climate dangerous, and who, like the dear sisters of a British Methodist Episcopal Church on a certain occasion, "hab done expressed a prefrunce foh gin." Walker's Club whiskey is however on that market. Bell organs from Guelph are well known there; why not also Canadian pianos? Wearing apparel is another item in which there seems to be encouragement for our exporters.

One thing which Mr. Troop has not mentioned in his list of Australian imports is paper. We can hardly compete just yet with Great Britain in furnishing writing papers, but we ought to be able to furnish more cheaply than any other nation, except perhaps Sweden, printing and wrapping papers, and so get a share of the $2,500,000 worth of "paper and manufactures of" that Australasia imports annually. Printing paper is almost everywhere admitted free of duty; other kinds pay from 12½ to 25 per cent.

We have given as much space as we can to-day to this subject. But we shall take an early opportunity of discussing Mr. Bowell's report, and hope to present some considerations that may increase the interest of our commercial bodies in the matter. It is satisfactory to know that Mr. Larke is shortly to visit Australia as a commissioner from our Government. He has a fair knowledge of the general subject, which he is taking pains to increase; and what is more, he has some business-like ideas of how he should proceed when he gets there, which has much to do with the success of any errand such as that on which he presently goes.

AN ASSESSMENT ASSURANCE COMPANY FAILS.

Another of the Canadian assessment organizations has succumbed, showing the weakness of the system for life assurance purposes. The Canadian Relief Society was organized in April, 1886, and incorporated in November of the same year. It undertook to give sick benefits as well as funeral benefits, and made contracts for endowment assurance. For seven years the society went on, and reached a membership of almost 2,000. At the close of 1891 it had 1,758 contracts in force, representing $1,764,888, and added during 1892 contracts, new or renewed, 268 for $239,850. Thus they had a total liability of $2,004,188 for contracts on foot at close of 1892. Fifteen members died in 1892, and funeral benefits to the amount of $650 were paid. Six members' wives died in the same year, and $550 was disbursed for their funeral benefits. And there were 201 members who received sick benefits during 1892. The number of weeks of their illnesses aggregated 1,482, and the aggregate sum paid that year in respect of sick members was $8,687. Considering this state of things, and the obligations it implied, one naturally would expect to find more assets in sight than the $1,287 in bank and the $3,465 represented by furniture, stationery, and unpaid assessments, totalling $4,702. The immediate recorded liabilities at that date [end of 1892] were $3,558, being $568 for various sick claims, and $2,990 for "supposed or reported" claims. But they are much more now.

It appears that the scale of sick benefits was begun on too generous a scale by this society. The more sanguine or soft-hearted among the managers had too much charity, were very free with the money of the members, and in their excessive generosity placed the figure at $10. Later this was reduced to $7; but the more level-headed ones began to see that even this was more than the concern could stand; for unexpected ailments developed, sick claims came in at a rate quite unexpected, and death claims were more frequent than the surviving members liked, and the sum was further reduced. Then the usual thing happened, as it must always happen in "pass the hat" societies: "the country members kicked," as one of the managers expressed it, at the too frequent assessments, or else they refused quietly. In any case the assessments levied did not come in, the membership fell off, and troubles began to accumulate. Puzzled to know what was best to be done to face a growing liability and prospective law suits, some of the members went in June last to Mr. Hunter, the Ontario Inspector of Insurance, to ask his opinion, and he, it appears, advised them to cease operations.

The membership of the Canadian Relief Society has shrunken to the neighborhood of 600, while there is a liability resting upon them of some $25,000. This, it appears, is to be collected by means of the courts if necessary. The situation is a commentary upon the system of so-called cheap assessmentism. So far as we can learn, the finances of the society have been administered with honesty, and its management has striven to carry out what was promised to its members. But when the financial strain overcame the philanthropic instincts of the contributories, they began to leave the ship; and it appears that the six hundred who are left can, according to the judgment of an American court, be compelled to make good the liabilities of the asso-

ciation. The founders of this, as of many other societies of the kind, meant well, no doubt, and believed that they could go on swimmingly, making assessments when needed and getting them responded to. The event has shown, in a surprisingly short time, that human kind are not unselfish enough to carry out such a benevolent scheme when too great a drain is made on their pockets. The true way is to get sound insurance and pay the price for it.

RETIRED FARMERS IN MUNICIPAL POLITICS.

It sometimes happens, when farmers turn to the town, intending there to retire and live upon earnings gathered during years of toil, they become good citizens. Having little else with which to occupy their minds, such persons naturally give much attention to municipal politics. The government of not a few villages and towns throughout the older provinces, in consequence, lies largely in the hands of retired farmers. This, in many respects, is an unfortunate circumstance. For, as a general rule—of course every rule has exceptions—these men do not bear the marks that should distinguish ideal town fathers. In the first place, not having had a business training, such men are strange to business-like principles or methods. Having previously secured a competence, they have no living interest in the advancement of the town. Their investments in real estate are generally small, and confined to the residential part of the place wherein they live.

In no way does this fact make itself so apparent as in the matter of fire protection. Store after store is burned, and occasionally a mill or a factory, the whole business district being exposed the while to the ever-threatening disaster of a general conflagration. After each serious fire a mass meeting is called, committees are appointed, the town council gravely debates the question of fire protection, but on each occasion it will be strange if there is not a retired farmer or other objector present ready to throw cold water on every scheme proposed. He has no heavy insurance rates to pay, his residence, in a secluded quarter, is the only property he holds in the town, and pays an isolated risk rate—why should he assist in protecting the premises of down town merchants? The outcome of the matter usually is that no fire extinguishing appliances are purchased, the insurance companies refund the losses, but the community is so much the poorer. If manufacturers and merchants cannot enter municipal councils they certainly should exercise greater influence upon local affairs through boards of trade.

THE AMERICAN PUBLIC DEBT.

In the September issue of the Chicago *Bankers' Monthly* is an article upon the United States debt, together with tables, which we shall copy nearly entire. Inasmuch as the regular monthly financial statements of the United States Government show no change in the public debt, it may be concluded that the administration's supporters will meet the elections of the present year with no further issue of bonds, depending on the expected increase of revenue, and that the usual excess of imports after harvest will enable the Treasury to retain a fair stock of gold; and, further still, that a gradual forgetting of the calamities of 1893 and their causes, may lead to there turn to circulation of a part of the immense amount of gold that has been hoarded since November, 1892, if not the whole of it.

"So far as the Government is concerned, and if it were not the pivot of finance," says the *Monthly*, "it would be creditable in a sense that it has struggled along without further increase to the debt, or getting Congress into a feeling again of estimating and appropriating regardless of the material ways and means, to keep within which is its highest fiscal duty to the States for whom it is trustee and agent. So far good. Only time can tell how receipts and disbursements will balance in future, but by another July 1st, the country will have at least a clearer view as to the Government's own position and the fitness of its policy to foster, not mar and stunt, the industry of a country whose only public solace in life is constant industry, and the bread, butter, and shelter, and clothing that come of it. It is an easy thing to operate the Federal Government, if the wise and experienced in business were permitted a share in it, and it will be still easier when it is out of banking. So long as it is in the business of issuing paper, cranks will elect cranks to inflate the currency, as has been attempted in the last two sessions, and as before with short money and fiat paper. If once out of paper issuing on its own account, cranks could not send cranks to Congress for the special object of mere chimerical sentimental per capita legislation in currency, and men of business sense and balance of mind would take their place.

"The total holding of all the variegated currencies in the Treasury foots the same almost exactly as at last regular periodical showing, $774,538,965, the cost of the care of which, common.sense nations have long ago dispensed with, and its power dominance, and temptations for class-legislators, and its bias tendency at the polls. Every one in private life denies to the dog that he should be wagged by his tail, but applying the homely but prevalent saw, the dog is the country and the Treasury is the tail, and that it wags the Nation is palpably true, and has been so for a long term of years. The gold holding has gone down and out over $10,000,000 since last statement, wholly Government gold! We need scarcely say that fiat paper has been run in for it, and the reserve is short $45,000,000, of the very least amount that should be kept, while the fiscal reserve is short also:

WAR DEBT BEARING INTEREST.		
Bonds on demand at 2 per cent.		$ 25,364,500
Bonds at 4 per cent., loan due 1907		559,676,880
Bonds at 5 per cent., loan due 1904		50,000,000

Reserves short		$119,222,379

". . . The novel phenomenon of over $104,000,000 of treasury notes in the Treasury at this time is startling and worthy of pause to thinking men of finance, to say nothing of other paper, $18,500,000. The stock of gold belonging to the Government in March, 1893, plus the proceeds of the gold loan at 5 per cent. since made, and compared with present figures, shows about $100,000,000 outgo, which is more or less connected with the paper in the Treasury and a policy that put out, until it was stopped last year, over one billion of paper resting for credit and redemption on less than a 10 per cent. reserve."

PATRIOTISM INDEED!

What a multitude of sins have been committed under the guise of patriotism! We believe in patriots, men who love their country and its institutions; but so frequently have men wrapped themselves in the national flag to hide their selfish ends, that upon a patriotic outburst we naturally look to see if some self interest be not at stake before pronouncing the expressions of patriotism genuine. A case in hand is the following letter which we find in an American contemporary:

"If every patriotic American will purchase American goods only for his consumption, he will lessen the disastrous effects of the free trade Gorman tariff bill. The American Protective Tariff League invites all to join in such a movement, and to sign the following pledge: 'I hereby pledge myself to buy American goods only, whether of the farm, mine or factory, and to use my influence to have others do the same.' Please sign the above, giving your post office address in full and send same to W. F. Wakeman, general secretary, 135 West 23rd street, New York."

Who has brought the American Protective Tariff League into existence? American manufacturers, we venture to say, who have everything to gain by arousing a national enthusiasm for goods produced in the United States. Such a circular is considered necessary only since the products of some foreign country are either better or cheaper, perhaps both, than those of domestic make. If possessed of true patriotism, it should be the aim of American producers to better the quality of their goods and cheapen their cost to consumers. If this be found impossible, the next wisest thing is to turn their efforts in some other direction, leaving their countrymen free to buy to the best advantage in the cheapest market. What a test of patriotism to drink bad beer because the good article is made from Canadian barley, to wear shoddy clothes because the best fabrics are made in England, or to pay a high price for American glass since glass can be made at less expense abroad. We are aware that not infrequently there is a prejudice against goods of domestic make. Something made in England, Germany, or France is without further investigation considered superior to that made in Canada or the United States. This is unfortunate for the new country; the thing to do is to advertise on every possible occasion the national products. An attempt to coerce people to sign a pledge of abstinence from the use of foreign products is at once childish and vain.

IN THE TORONTO FAIR GROUNDS

An unusual and a welcome feature of last week's Toronto Exhibition was, as we have already said, the appearance in the Main Building or in Machinery Hall of a number of the exhibits made by Canadian manufacturers at the World's Fair in Chicago. Prominent among these is that of the celebrated biscuit-makers, Christie, Brown & Co. This was some 50 feet in length and about 30 feet high. It contained 420 boxes of as many different kinds of biscuit, and was the first striking erection that met the eye of the visitor who entered by the east door of the main building. Farther along in the same corridor, moving westward, one was arrested by the glitter of steel from a pillared arch in white and gold, 40 feet by 24, surmounted by the word "GALT." This town, we need not tell our readers, is known as the Shelfield of Ontario, and its edge tools and woodworking machinery are known far beyond our borders. And the fame of Galt was worthily upheld here, as in Chicago, by Shurly & Dietrich, saw manufacturers. Here were saws of all possible kinds and sizes, from a 90-inch circular to one not exceeding a dime in dimensions; from cordwood or cross-cut saws or gang saws to the mighty modern band-saw, which the Messrs. Waterous tell us effects so great an economy of saw dust. These goods are made out of Jessop's steel.

A space as big as a country hardware store was taken up with the products of the Wrought Iron Range Company of St Louis and Toronto. The Canadian works of this concern are on Pearl street in this city, and their specialty is hotel-kitchen outfitting, though they furnish private dwellings and boarding houses, steamers and railway stations. Their ranges are made of wrought iron instead of cast, a valuable feature so far as regards durability, and the principles of their construction, in which asbestos is used, as explained by the gentleman in charge, formed an interesting and instructive little family lecture. Many a family man and woman listened to it with benefit. "Home Comfort" ranges and furnaces were on display, and they are pretty as well as durable. Then their "Laundry stove," in various sizes, for use in laundries, public or private, is an attractive utensil. This exhibit was brought all the way from the Midwinter Fair, at San Francisco.

Under a rubber tree, twelve feet high, close to the band stand, and where traffic was thickest, Mr. Walker had "pitched the moving tent," so to speak, of the Canadian Rubber Company. The goods of this company have been before the Canadian public for many years in great variety, and well do they bear the test. The "Star Brand" has distinguished their fire-hose for years; their patent process seamless tube is a newer feature of the great Montreal establishment. It does not need that we should enumerate all the array of belting, matting, camping covers, horse covers, garden hose, tubing, packing, springs, etc., that this company makes. A visit to the warehouse, opposite the Board of Trade building, will, however, repay the sight-seer. Among the exhibitors from the Province of Quebec the Terrebonne firm of M. Moody & Sons, who showed an ensilage cutter and a horse power in Agricultural Hall, deserve a word of mention.

Not every one knows a good wine when he tastes it. And there are some Canadians who will not believe that really sound wine is made in Canada. Such persons have never visited the county of Essex, where 1,000 acres of land are covered with grape vines, or Pelee Island, where the Catawba flourishes. Nor have they seen the vineyards of Lincoln and Welland, where Mr Bright procures his grapes. The

would not credit the fact that on Kelly's Island in Lake Erie there exists a 20,000-gallon tun for holding wine, a receptacle that will bear comparison with the Great Tun of Heidelberg in Germany. It might prove a revelation to doubters if they should taste the Medoc claret produced from Canadian grapes and sold by J. S. Hamilton & Co., of Brantford. It is made from the Virginia seedling grape, which grows best on the islands of Lake Erie, and is a delicious wine. The St. Augustine of this firm, a red wine, and the Catawba, which in delicacy resembles a Chablis or a Haut Sauterne, are beverages deserving the attention of Canadians who believe that the juice of the grape is one of the good things of God.

Millions of dollars worth of carpets are imported into the Dominion, principally from England. And many of us have long been under the impression that our manufacturers were unable to produce anything but the commoner kinds of carpets. Through the enterprise of Mr. James P. Murray and his coadjutors in the Toronto Carpet Manufacturing Company, limited, this notion is being dispelled. Not only does this factory produce three-plies, but good Axminster in dainty patterns, and parlor and bedroom rugs that are meeting with most encouraging sale. Their "Oriental" is a new carpet, of a description produced by only one maker, we are told, in all the United States. The extent of the carpet display, covering a space of 48 feet in length, made by this house, is surprisingly creditable. And the show case filled with the products of the Worsted & Braid Company, of Toronto, was a revelation to thousands at the Fair, though it was not new to the wholesale buyers of such goods.

The Steel Clad Bath Company, which has factories in New York, London, Detroit and Toronto, and warehouses in four or five Canadian cities, showed in the Main Building their unique productions. A word of praise is due to the display made of cereal products by E. D. Tillson, of Tilsonburg, Ont.

The Canadian Office and School Furniture Co.'s desks, and office, school, and household furniture, has assisted to spread the good name of Preston, Ontario, for reliable manufactures. Their display had not this year so good a position as on other occasions, since many were indisposed to climb stairs to get at them. Mr. John Hallam was to be seen supervising, in his bustling way, an exhibit of Central Prison binding twine in the Implement Building. The Copp, Clark Company exposed, among other stationery wares, winter games in boxes for children. Their booth was made the more attractive by being in charge of two young ladies. Many could be seen in various parts of the grounds examining the special issue of THE MONETARY TIMES illuminated as it was with pictures of the Canada Life Building, Montreal, the Toronto Radiator Co.'s ware-rooms, and the various cards or pages of other advertisers.

In the Carriage Building of the Toronto Exhibition, George Lugsdin & Co., Toronto, exhibited a splendid assortment of beautifully finished harness, suitable for carriage and sulky. Close by it might be seen a great collection of horse furnishing goods, shown by Charles Brown, of this city. Among the assortment were blankets, whips, boots and all the novelties known to the trade. A striking variety of colored furniture leathers was displayed by Marlatt & Armstrong, of Oakville, along with their black cover carriage and patent enamelled leathers. Smith Bros., of this city, makers of vehicles, showed a large lager beer lorry, beautifully finished, also a hose wagon for the use of firemen.

THE QUEBEC EXHIBITION.

The Quebec Exhibition is over. And it appears to have been a very fairly successful one. The number of exhibits was larger, it is said, than the last held at Montreal. Our correspondent writes that the attendance was good, reaching 75,000 in the whole duration of the Fair, while we see that some news reports place the total numbers even higher. On Wednesday there were over twenty thousand people in the grounds. On Thursday, which was Montreal Day, perhaps eighteen thousand. Friday was Farmers' Day, which brought a crowd. At nights there were balloon ascensions and other attractions, and the fireworks are said to have been the best ever seen in Quebec.

The Gurney-Massey Co., of Montreal, had a good exhibit. Their Oxford heaters attracted notice, as handsome stoves as well as good heaters. Their other attractions were Duchess of Oxford ranges, the Art Countess base burner, the Oxford wood furnace, the John Bull range, and a line of gas and coal oil cooking stoves. The Wm. Clendinneng & Sons' foundry had a very creditable display of hollow ware, which showed that this old established concern is well to the front with respect to modern systems of heating and cooking. A striking exhibit was that from the extensive premises of Carrier, Lainé & Co., shipbuilders and engine builders, of Levis.

A special tent had been erected as an annex to the industrial department of the show, and in this were agricultural implements made in Joliette, Laprairie, Quebec, Montreal. Such articles as churns, harrows, cider mills, ensilage cutters, of improved device, bore testimony to the awakened interest in dairying and modern agriculture in Quebec Province. Here were also a number of the well-known planing and drilling machines and lathes of the John Bertram & Sons' factory at Dundas.

The Mechanics' Supply Co., of Quebec, made a very complete exhibit of plumbing and gas and steam fitting supplies, with a specially good exhibit of Safford radiators, steel-clad baths, and latest sanitary appliances. This exhibit occupied a large space, and was tastefully arranged. Several firms in Quebec made good displays of leather, and the exhibit of the Canadian Rubber Co. was universally admired. The Nichell Chemical Co., of Capelton, covered a large space with specimens of copper ore and phosphates and other products, while a Quebec firm had an interesting exhibit of timber knees and futtocks for shipbuilding, an industry for which Quebec was in old times more distinguished than she is to-day.

Among the awards made to exhibitors were medals to the Canadian Rubber Company; to W. Clendinneng & Son, Montreal, for stoves; to Gurney, Massey & Co., Montreal, for radiators and stoves; H. R. Ives, Montreal, stoves, etc.; Warden King & Sons, Montreal, stoves and Daisy heaters; the Canada Paint Co., for paints; Colin McArthur & Co., for wall papers; Robin & Sadler, for leather belting.

PETERBORO BOARD OF TRADE.

At a meeting of the Peterboro Board of Trade last week, Mr. Fair the president, in the chair, a number of matters which had accumulated for disposal were brought up. In reference to the subject of municipal fire insurance, a circular from the Guelph Board was read, suggesting that towns of 5,000 population or over should become insurance companies and assume the fire risks of the citizens. This, Mr. Dumble reminded the meeting, was the old question of state insurance. It was assuming that the municipalities could run their insurance themselves. He did not believe in municipalities taking part in everything. Councils were not as careful as corporations and companies. In his opinion the board ought not to rashly decide upon anything they did not understand, for he was sure they were not thoroughly posted on fire insurance. Mr. Hill considered the scheme impracticable. The Ontario Government had insured their own buildings, and when the University buildings were burnt a year or two ago it was found the insurance was inadequate. If Peterboro had a loss of $1,000,000 in insurance by fire, he asked, where would they be under municipal insurance? A committee was proposed by Mr. Davis to consider the question. A gentleman who had some experience of the mutual insurance plan, Mr. Meldrum, said that municipal insurance would be unfair to the people, and he hoped the town would never enter into such a responsibility. It was then moved by Mr. Dumble that in the opinion of the board they had not sufficient knowledge on this question to take action. This was seconded by Mr. Meldrum, and Mr. Davis withdrew his motion, when Mr. Dumble's motion was adopted.

On consideration of the communication from Toronto, asking that the board send a delegate to the Deep Waterways Convention, the matter was dropped in consequence of a motion that no such action as requested be taken. The Ontario Government having requested the board to nominate a representative on the board of arbitration to settle disputes between employers and employes, Mr. D. W. Dumble was the representative selected. Discussion ensued upon a motion "that the navigation of our back lakes, and the manufacturing interests of our town, demand that the water of the lake and of the river Otonabee should be kept up as near to uniformity as possible. A great number of the reservoir lakes in the back country have dams which, by reason of the cessation of lumbering operations, have been allowed to get out of repair, and in consequence the water, which would have been sufficient to keep up the flow, was allowed to run off in the spring and when most required; very low water proved a great inconvenience and loss. This board therefore memorializes the Ontario Government, and respectfully prays that the dams shall be repaired and the management of the waters put under intelligent control and management." This motion carried and the meeting adjourned.

OTTAWA LUMBER PILES AND FIRE PROTECTION.

The recent destructive fires in the Ottawa lumber yards of Mr. J. R. Booth have aroused the authorities of that city to the need of precautions which may prevent such disasters. On Friday last a report on the subject by the Chief of the Fire Brigade, Mr. Young, was laid before the Fire and Light Committee of the City Council, and the suggestion was made that a by-law to provide the necessary sum should be submitted to the people at the January elections.

In the first place the report recommends that as it seems almost impossible to remove the lumber piling outside the limits, a by-law should be passed to enclose by a good high fence all lumber yards, with

gates to be closed at nights and proper watchmen in the yards, especially during the summer months, to prevent tramps from using them as camping grounds or boys and loafers from loafing or drinking in them. The changing in all dangerous localities of the present fire alarm boxes for non-interfering boxes is advised, also that no more small mains be put in, and that more hydrants be placed all over the city, as the more hydrants there are the quicker can a fire be caught and less hose used, which will improve the streams. The streamer "Conqueror" should be provided with horses, and that another 1,000 feet of 3½ inch hose be procured and a wagon therefor, as well as three extra reels. Citizens having asked for a fire station in the neighborhood of Catherine and Bank streets, the chief recommends the granting of the same, and the placing of a hook and ladder truck in the same station.

"During my visit to the Chiefs' Convention, held in Montreal," said Mr. Young, "I was still more than ever convinced by the discussions that took place of the value of chemical engines, and one of them should be provided just as soon as the finances of the city will permit."

HIDES AND LEATHER.

Canadian hide markets are ruled from Chicago, although local features are always elements of consideration. About six weeks ago the Chicago packer hide market began to strengthen; the United States Leather Company, a very strong corporation, entered the market to buy. Quotations of heavy cured country hides on the local market made a slight advance, but the price of green hides continued unaltered. Last Saturday, however, green hides were advanced ½ cent a pound, and market quotations are now: Green cows, 3½c.; steers, 4c.; cured and inspected, 4½c. a pound.

The question, of course, now is as to the permanency of the advance. For the greatest part this depends upon Chicago, and dealers are looking to the source of supply. Within the last few years the receipts of cattle in Chicago stock yards have reached enormous figures. The cattle receipts for six years past are given as follows by the *Review*, an excellent authority:—

Year.	Cattle.
1888	2,611,543
1889	3,023,281
1890	3,490,596
1891	3,251,622
1892	3,571,796
1893	3,133,406

Up to September 15th, 1,932,359 cattle had been received at the Chicago yards. Unless the remaining 15 weeks in 1894 average more than 72,000 head—and last week's receipts were estimated at only 64,083 head—this year will show the smallest entry since 1888.

On consideration of the supply side of the market, the situation certainly wears an aspect of growing strength. But the demand, the needs of the leather trade, must be taken into account. Tanners, although the price of their raw material has advanced to a considerable extent, have not raised the price of leather to a corresponding level. There has, however, been much talk of advanced prices; and harness leather is bringing from 1 to 2c. a pound more than it did a month ago. We are told that a large western sole leather tanner has raised his prices of slaughter by 1 to 1½c. a pound, but this advance has not become general, although there is no longer a shading of prices in market transactions. It is a difficult task for tanners to obtain higher prices from boot and shoe manufacturers in face of the depression now existing in that industry. Not only have western factories decreased their output, but our reports from Montreal say that the fall trade there has been a disappointing one, and the volume of shipments will fall short of that of last year. In Quebec there have recently been three failures among leather and boot and shoe firms; the failure of a large jobbing house is reported in Pictou, N.S., while the assignment of an Ottawa shoe firm is also announced this week. If the advance in hides is finally to be borne by the wearer of boots and shoes, it will only be after a strong, united endeavor all along the line.

WOOL.

The interest of the trade has been drawn this week to the London wool sales, which opened on the 18th inst. There was a large attendance on the opening days of the auction and all eyes were naturally turned to the American operators. But buyers from the United States were pursuing a policy of caution, and most of the wool sold went to English merchants. French and German buyers took only a small part of the quantity sold. The bulk of offerings on the first day consisted of New Zealand wool of but indifferent quality. On the second day of the series 12,449 bales were offered, but 1,000 of these were withdrawn. So far the business done has been upon a basis of values from 2½ to 5 per cent. higher than the prices obtained at the last auction. This, however, gives but little room for congratulation when we consider that the last series of sales were held in the midst of a most severe industrial depression.

The local market has developed little that is new during the week. Some lots of domestic fleece have changed hands with 17 to 18c. paid for select combing, and 19 to 20c. paid for clothing. A considerable quantity of Manitoba and Territorial fleece wool has been stored in the Toronto warehouse of a large city merchant this week. Pulled wools are slow of movement, and since the sale of 15,000 lbs. at 22½c., which we reported in a previous issue, no considerable lots have been moving. The domestic mills are not active, and Americans can afford to sell us fine pulled wools, rather than buy the product of Canadian millers.

THE APPLE TRADE.

The apple buying season is now well in progress. Until the last two weeks the outlook for the Western Ontario crop was not of the brightest description. Severe drought threatened to seriously affect the yield, and certainly has done a great deal of damage in many localities. Rain came at last, and although late has been of immense advantage to the growing apple crop. Dealers who were paying $1 55 per barrel have come down in their views, and are now offering $1 00 to $1.25. Late crop reports from the United States do not differ materially from those published earlier in the season, and the yield promises to be a large one.

W. N. White & Co., of Covent Garden, have been collecting information and statistics with reference to the growing crops, and say that the bulk of the English crop will be marketed during the present month. Already the scarcity of the crop is being felt, and apples are selling for higher prices than have prevailed in September for years. The Continental supplies are becoming exhausted. Most of the Continental apples, with the exception of those of Southern France, are marketed in September, and the United States and Canada must therefore be depended upon for supplies during the remainder of the season. The Nova Scotia crop will reach a total of 120,000 barrels, and the Canadian crop about 600,000 barrels. It is expected that Boston will be able to ship between 300,000 and 400,000 barrels, and New York about 1,500,000 barrels. England has the lowest crop of apples that she has had in 20 years. London wants American apples. The first consignment was sold here Monday, and brought from 17s. to 20s. per barrel. Freights are now lower than they have been for years, and carriage can probably be secured at 3s. per barrel.

THE SHERBROOKE FAIR

Mr. H. R. Fraser, secretary-treasurer of the Eastern Townships Agricultural Association, gives the following figures in connection with the exhibition held at Sherbrooke: This was the tenth annual fair of the association, and lasted for five days instead of three as in previous years. The following figures closely represent the attendance: First day, 3,000; second day, 4,000; third day, 13,000; fourth day, 12,000; and fifth day, 6,000—a total of 37,000, or about double last year's number.

The entries in the live stock department this year outnumbered, in all classes, the entries of any previous year. There were 500 head of cattle on the grounds, 300 sheep, and, in spite of the large amount of space provided for them, more sheep and swine than could be accommodated.

The poultry and the industrial and manufacturing departments had larger representation than they have had heretofore, and the miscellaneous class in the main building was well up to the average.

"SLOW AND STEADY WINS THE RACE."

There are plenty of people on this continent who scoff at this adage, and will tell us that no slow-going and conservative people need apply. Their aim is speed—rush, bang, rattle, make a fortune or make a smash, but anyhow "hustle," even if you ruin your health or land in an asylum. Or, if one is an artizan, the cry is apt to be: "Agitate for more pay, or shorter hours, or something; make it hot for the masters. We rule the roost, we want the best of everything, and if we can't get it on two dollars a day we must have three. Economy be hanged. We are not going to work more than eight hours a day, either." There are some compensations in the lot of a deliberate, easy-going man, however. In an interesting and comprehensive report recently furnished to the British Labor Commission, and presented to Parliament, it is stated from recent enquiry into the habits and ability of the general run of the artisan class of Holland, that "The Dutch printer is thorough and steady, but not remarkable for speed in his work; hence the long hours of labor which prevail in most occupations are not felt to be burdensome, provided that the laborer may work in the leisurely fashion that suits him best. Infrequency of strikes is attributable partially to lack of excitability and to steady common sense, which prevents its possessors from being led away by any schemes not of a distinctly practical nature."

The Dutch people have been slow to recognize or require State interference in trade questions, but during the last twenty years laws have been passed in regard to the employment of women and children which have turned attention in that direction. The Dutch printer, it appears, does passing well on about 2s. 6d. per day, for he lives cheaply. In other lines of industry the Dutch artisan is found to be equally contented and equally thrifty. If any one objects that the Scottish idea of

Contented wi' little and cantie wi' mair,

is degrading, unworthy of the free and independent spirit of the latter-day American working man, it may with perfect propriety be replied that simplicity and economy of life are not inconsistent with happiness and good morals, but rather favorable to them. Smaller earnings and lesser expenses may serve quiet people quite as well as bigger wages and more extravagance do the "hustlers."

CANADIAN TIMBER DUES.

Timber dues on pulp wood are to be raised by the Quebec Crown Lands Department, which has given the following notice in the official *Gazette*: "Whereas, the present rate of dues chargeable on spruce logs for paper pulp is 25 cents a cord of 128 cubic feet; and whereas it is advisable to raise it, while allowing a reduction when pulp is manufactured in this province—it is ordered that the rate of dues on spruce logs for paper pulp be fixed at 40 cents per cord of 120 cubic feet, but a reduction of 15 cents per cord be allowed when the pulp wood is to be manufactured in this Province." The New Brunswick Government is also putting restrictions on cutting lumber by the following regulations, which apply to all timber logs cut on crown land: "No spruce or pine trees shall be cut by any licensee under any license, not even for piling, which will not make a log at least 18 feet long and 10 inches at the small, and if any such shall be cut the lumber shall be liable to double stumpage and the license be forfeited."

COFFEE PROSPECTS.

From circular issued by W. H. Crossman & Brother, of New York, in reference to this year's production of coffee, we take the following: "The coffee production universal this year is, without doubt, the largest ever known, even if we judge by the figures published by a highly respectable house in Europe, which names the total of 12,000,000 bags. This estimate, however, while taking as a basis Rio and Santos at 6,500,000 bags, calculates only 3,000,000 bags for Mexico, Central America, West Indies and Venezuela, which places last season gave fully 500,000 bags more and show a constantly increasing production. At any rate we maintain our figure of a total production of 13,500,000 bags, but whether our esteemed friends in Europe are correct, or we with our larger figures, it is certain that the world's coffee crops this year will be the largest ever raised, the crops of 1891-92 so far leading the record with 11,750,000 bags."

DRY GOODS JOTTINGS.

The Grenoble glove strike is over.

Millinery openings are now on with the retail trade.

St. John, N.B., journeymen tailors are about to form a union.

The outlook for fur in the millinery department continues to improve.

Bows of enormous size are popular with Parisian milliners as a hat trimming.

Manchester manufacturers are busily preparing patterns in ginghams and other fabrics for the spring of 1895.

The *Saint Croix Courier* expects that the cotton mill at St. Stephen, N.B., will start up early in October.

A large quantity of furs are being repacked at Selkirk, Man., for the Hudson Bay Co. They will be sent to London, Eng.

Messrs. John Murphy & Co., Montreal, are moving their stock from Notre Dame to their new store on St. Catherine street.

It is reported that the hat factory recently burned out at Truro, N.S., will not be rebuilt there, but that the plant will be taken to Belleville, Ont.

"What's the price of these goods?"

"Eighty cents a yard, madam."

"Why, that's quite reasonable!"

"Oh—er—I must have made a mistake!"—*Puck*.

Three more cars of silk passed through the city yesterday, in bond for New York, attached to the Atlantic express. This makes eight cars of these valuable goods that have gone through in forty-eight hours, the value of the contents being $320,000.—*Winnipeg Free Press*.

After the fair comes a reaction, and Toronto merchants are now in the midst of a dull week. Monday, however, witnessed the departure of the travellers that had been recalled during exhibition weeks, and an improvement may be looked for soon. A spirt of cold weather is needed to draw out a demand for the heavier fabrics.

Tuesday of the present week was millinery opening day at the establishment of W. A. Murray & Co., King street east, Toronto. The display was not confined, however, to hats, bonnets and millinery supplies, but extended over the whole range of dry goods. Rich, and costly too, were many of the fabrics displayed, and we doubt that one, even with the most luxurious taste, went away dissatisfied.

The *Commercial and Financial Chronicle* places the values of the cotton crops since 1890 as follows:

	Value of pounds.	At.	
1890	3,628,500,000	11.07c.	$401,674,950
1891	4,326,400,000	8.60c.	372,070,400
1892	4,508,300,000	7.71c.	347,589,930
1893	3,357,500,000	8.35c.	280,351,250
1894	3,748,400,900	7.70c.	288,606,800

The Berlin correspondent of the *Dry Goods Economist* writes:—"The following is a well-liked model for winter capes: Two long capes falling over each other, 28 and 36 inches long, the lower one with square ends and running all round, while the upper cape is open at the back up to the middle, and has round ends in front and in the back. On both these capes strapped seams may be added. Dark and not too contrasting color combinations are the rule this season. It is no longer considered sufficient, as it was in the summer, to mark the seams by plain straps; palm designs, Greek effects, hussar braidings, etc., are added to them."

FOR GROCERS AND PROVISION DEALERS.

Teas continue firm, with American buyers making enquiries in this market.

The close season for oysters expired on the 15th inst. in the Maritime Provinces.

The Buctouche, N.B., butter factory has turned out already 17,000 lbs. of butter this season.

Messss. Hall & Gibson's new brewery at Edmonton is now complete and ready for brewing.

On September 9th, fourteen car loads of salmon were shipped to the East from New Westminster.

There are over 100 acres in the vicinity of Georgetown under hop culture, and the yield will be a large one.

Refiners have made no change in their quotations on sugar, but Ontario jobbers are reported to be cutting prices.

The Ontario Creameries Board is discussing the advisability of uniting with the Western Dairymen's Association.

A 100-barrel flour mill which is in course of erection at Prince Albert, Sask., will be completed within the month.

Mr. James Hughes has between 60 and 70 hop pickers at work in his hop yard. He expects to gather eight tons of hops.—*Perth Expositor*.

The main shaft at the Windsor salt works, which has broken several times, is again fractured, and work has been suspended while a new shaft is being put in.

Messrs. J. & R. Robson, millers, of Brantford, have opened up a trade in the West Indies, and recently shipped 300 brls. of flour to Trinidad, *via* New York.

There have been further receipts of new Valencia raisins in Montreal by mail steamship from London. But the quantity received has not been large, and the market has lost little of its strength.

British Columbia butchers are purchasing sheep in the State of Washington. This trade should naturally belong to the ranchers of Manitoba and the Northwest Territories, but it is rendered unprofitable by high railway tariff.

Recently a consignment of fruit, numbering several hundred baskets, pears, plums and peaches, was made from Grimsby to Winnipeg, and being refused by the consignees, was auctioned off by the express company at a considerable loss.

The British Columbia salmon fleet for 1894 is now complete. It will consist of but six vessels; there were ten vessels in the fleet last year. This is due partly to decreased shipments, but more especially to the larger size of the vessels employed this year in the trade, the average capacity of carriage being 1,500 tons.

Controller Wood and Mr. Gerald, of the Inland Revenue Department, are interviewing the leading grape growers of Essex county, with the idea of making a report to Parliament next session. The grape growers, it will be remembered, were dissatisfied with the French treaty,

and believe that the information which the department will obtain as to the extent and value of the wine industry will be such as to cause Parliament not to renew the treaty when its time expires, or probably to bring about its termination.

After holding the market steady for about three weeks refiners have made a reduction of ⅛c. per pound on pretty much the entire list This will probably catch some holders with stock on hand still unsold, but, in view of the protracted dull trade, the drop in price is not particularly surprising. There is, however, a bit of rumor that the Trust is considerably worried over reports of considerable increase of foreign refined tendered on firm offers of which they can obtain no particulars. —*N.Y. Journal and Bulletin of Commerce.*

The bakers doing business in the eastern part of the city of Montreal have decided to organize. A petition seeking incorporation will be presented to the Quebec Legislature at its next session. The price of bread will be fixed by the executive committee to harmonize with the market value of flour. The following officers were elected: President, Edmund Chaput; vice-president, Arthur Lemieux; 2nd price-president, L. Papineau; secretary, Jos. Vincelette; cor.-sec., Leon Chartrand; treasurer, Real Page; collecting treasurer, Norbert Laurin. Executive Committee—Narcisse Gaudet, Jos. Lafrance and Ls. Senecal.

Exports of salt from Great Britain during seven months ending August 31st, 1894, aggregated 548,789 tons, of which 263,876 tons went to British East Indies, 40,902 tons to Australia, 58,949 tons to British North America, 39,783 tons to the United States, 21,952 tons to Belgium, 12,482 tons to Germany, and 110,485 tons to other countries.

Though "riches have wings,"
A man cannot fly
To his home in the sky
With the aid of such things.
—*New York Journal.*

SHOE AND LEATHER ITEMS.

Sporting boots are in demand.

Spring samples will be out in the second week of October.

John Reyh, of Vancouver, is opening a boot and shoe store at Union, B.C.

J. O. Trotter, St. Catharines, has disposed of his boot and shoe business to Messrs. Wood Bros.

The sorting up trade of fall goods is naturally expected to be rather a large one, since primary orders were so cautiously given.

Don't forget to show customers the slow sellers; the new lines sell themselves, but it requires energy and tact to dispose of the stickers.

Nothing adds to the attractiveness of a shoe window more than mirrors. These should be arranged to reflect all parts of the display.

E. S. Neill, a dealer in boots and shoes at Lindsay, has sold out to Robert Neill, of Peterborough, and will open a similar business in London.

The outlook for the rubber goods business this winter is good, although wholesale men report payments for stock already purchased as slow.

At present the operations of western shoe factories are conducted in a very modest way. Manufacturers are confining their output in ordered goods, and do not favor anticipating future wants.

A men's shoe made in calf, which can be purchased at $2.25, is a good seller. Some of the manufacturers are stamping the retail price $3 upon this shoe, which they think allows sufficient margin to retailers

Kangaroo skins are shipped from Australia, tanned and finished in the United States and then reshipped to the source of their origin, bearing the brands of American manufacturers. This leather is remarkable for its toughness, fine grain and finish.

Firms handling rubber goods are preparing shipments for the lumber camps. One house has named their brands after the various lumber districts; for instance we have the "Nipissing," "Muskoka," "Mattawa," "Algoma," "Nepigon," and "North-West."

The fallacy about the narrow toed shoe injuring the foot is apparent in the modern footwear, that is long enough to bring the narrow part beyond the toes. Formerly the sharp toed shoe was obtained by a very short reach from the ball to the front end. But a glance at the sharp toed shoe on the foot to-day shows plenty of empty forecastle room.—*Shoe and Leather Reporter.*

It is impossible to particularize one Canadian industry and say that it has made greater progress within the last few years than the manufacture of rubber goods in Canada. In conversation with Mr. Walker of the Canadian Rubber Co., the other day, speaking of American competition, he said: "The people of Canada wear cheaper and better rubber shoes than do consumers in the United States. Last year American manufacturers advanced their prices from 20 to 40 per cent. In Canada, however, prices were advanced but 5 per cent. It is worthy of note that most American firms confine themselves to particular lines, while the company which I represent makes rubber goods of nearly every description, including shoes, beltings, hose and all kinds of hard rubber goods."

PRESCRIPTIONS FOR DRUGGISTS

Chinese goods continue to advance steadily

The crops of Sicily and Bari mustard seed will probably be large this year.

The next public sale in Amsterdam of cocoa butter will be held on October 2d

Mr J H Nicholson is leaving Essex for London, having sold out his drug business there.

Messrs. W. H. Cole & Co., under date of 8th instant, report the stock of quinine in London as 2,925,776 ounces.

The crop of California mustard seed this season is estimated at 25,000 to 30,000 bags of yellow and 10,000 bags of brown seed

Latest cables from Calcutta point to a probable crop of 156,000 to 165,000 maunds indigo, provided the weather continues favorable

At the cinchona bark sales in London, on the 19th inst., lower prices were realized. Two-thirds of the total quantity offered was sold

The shipments of shellac from Calcutta during the first half the current month include 2,400 cwt. to United Kingdom and Continent, and 1,100 do. to America.

Mr. T. J. Bolender has sold his drug business at Chatham to Mr R. P. Reekie, formerly of St. Thomas, who has been acting as manager for the past three months.

The low prices at which senega root has been selling have had the effect of bringing out a stronger consumptive demand, and the market shows an upward tendency.

In France the crop of domestic celery seed is placed at 2,500 to 3,000 bags. Notwithstanding this liberal quantity, reports to hand indicate a speculative movement at primary sources, accompanied by higher prices.

It was the general opinion that the war in China would decrease the demand for ginseng, which is consumed entirely in that country; but, contrary to expectations, it has had the effect of advancing the market. The Chinese use this root as a medicine and as a protective talisman for the soldiers.

The Japanese crop of peppermint, this season, according to all reports, will be a large one. Forward deliveries of oil are now being offered from Hamburg at 13 marks, or say the equivalent of $1 40 f.o.b The prevalance of this low value will probably lessen materially the exports of our domestic product to Europe *N Y Bulletin and Journal of Commerce.*

The *Reporter* lists the following drugs as having advanced: Quinine, fir balsam, coriander seed, anise oil, cassia oil, oil cloves, cocoa leaves, D. C. shellac, cassia, cassia buds, cloves, white pepper, pimento. On the other hand, these goods are lower in price: Opium, morphine, arnicas, canary seed, caraway seed, oil peppermint, mustard seed, rape seed, carb. ammonia.

METAL AND HARDWARE TRADE NOTES

A bicycle factory may be established in Kingston, Ont

In August 200,000 tons of coal were shipped from Cape Breton ports This is the largest quantity for one month ever sent from the island

The council of the Board of Trade are making efforts to secure the re-opening of the E Broad & Sons' axe factory —*St Stephen, N B. Courier.*

Bradford & McKillop, hardware merchants at Saltcoats, Manitoba, have dissolved partnership The business will be continued by T. J Bradford

P. M. Feeney, of Toronto, has written to Ottawa stating that he, associated with others, contemplates placing an industry in that city to make saws of all kinds

The large iron bridge being constructed between Calais, Maine, and St Stephen, N B., is now ready for the iron The stone will cost $10,000, and the iron will cost $14,000

Messrs James Watson & Co., Glasgow, in their weekly letter say "Business continues fairly active on the Scotch pig iron market, and prices are well maintained A few malleable iron works have resumed operations with English coal, but the greater number of works remain closed."

Our Montreal correspondent says:—"Moderate sales of domestic iron have been made at $16.50 to 16.75, with a little firmer tone to the market; for Summerlee $20.50 is asked for small lots ex-yard."

The shipments of coal this year, says the Stellarton, N.S., *Trades Journal*, will probably reach 2,100,000 tons. Of this Cape Breton's contribution will be 1,220,000, Cumberland's 480,000, and Pictou's should be 400,000 tons.

Seven months ago the market price of Bessemer pig iron was $1 a ton lower at Pittsburgh than at Chicago. Now, says the Chicago *Tribune*, "the value of Bessemer is $1 a ton less at Chicago than at Pittsburgh." Pittsburgh advanced from $10.25 to $12.25 a ton, while Chicago maintained the old quotation of $11.50 a ton.

The London *Times* says: Despite the ignominious failure of the syndicate which engineered the corner in tin in 1887, another combination of French and Dutch speculators is now trying to obtain control of the tin market. It is asserted that they already hold about sixteen thousand tons of tin, but the actual quantity is thought to be nearer twelve thousand tons.

LUMBER AND TIMBER PIECES.

The exports of lumber products from St. John, N.B., during August were valued at $378,366.

The mill of Thomas Conlon, at Little Current, is being rebuilt, and will have a capacity of 125,000 feet daily.

Basswood is in good demand. Merchants in New York and Boston are the principal enquirers after stock.

Some fairly large shipments of 1st and 2nd grades of birch have been made from Toronto to Detroit during the week.

Ship-lap has been reduced $2 a thousand by the Winnipeg Retail Lumbermen's Association, while lath is lower by 25c. a thousand.

A large lumber and stave mill is being erected at Wheatley, Ont., for the Sutherland-Innes Company. The mill, it is expected, will be running in a few weeks.

The prospect is that the mills will have to shut down from four to six weeks earlier this fall than usual, as there is not a sufficient stock of logs in the boom to keep them going. Men and teams have begun to go into the woods to begin operations for the winter.—*Chatham World.*

The Fredericton Boom Company has rafted 96,005,245 feet of logs and 262 tons of timber. The logs are divided as follows: Spruce, 87,282,435 feet; pine, 4,441,120 feet; cedar, 4,271,240 feet; hemlock, 10,450 feet. There are 10,000,000 more to come in. Last year the company rafted 140,000,000 feet.

The United States Treasury has issued a circular to officials on the Canadian border directing them to dispense hereafter with all inspection or certification of American lumber, or any of the manufactures thereof included in paragraphs 672 and 683, inclusive, of the free list, which goes through Canada in transit to another point in the United States. Very cumbersome regulations have been in force up to this time in certifying the country of origin.

INSURANCE NOTES.

The hat factory of Messrs. Craig & Sanluier, at Truro, N.S., was burned recently, and Messrs. G. Clish and W. P. McNeil were appointed appraisers to settle the loss, Mr. F. B. Butcher, of St. John, N.B., being the adjuster for the insurance companies. The amount agreed upon that the companies should pay was $5,202. This factory will in all probability be, says the Amherst *News*, refitted and re-opened in Truro, though already the proprietors have had offers from one or two towns in Ontario, holding out inducements for the removal of this factory to that province.

The Fire Committee has succeeded in getting through the Montreal Council a project which will meet with the approval of all the members of the Fire Department. Formerly when a member of the department was killed in the course of duty he must have been ten years in the department before his heirs could claim $1,000. According to the by-law passed by the Council in January, 1875, the scale was fixed as follows:—4 years' service, $300; under 5 years, $400; under 6 years, $500; under 7 years, $600; under 8 years, $700; under 9 years, $800; under 10 years, $900. Now this has been changed, and if a fireman—no matter the length of service—is killed at duty, his heirs will receive $1,000.

It is recommended by a committee of the St. John Board of Trade that the city procure at once a Hayes extension ladder truck, seven hand ladders, hooks, crowbars, rope, tackle, wrenches, etc., and a Detroit door opener for the fire department. There should be also, says the report, the Callahan water tower attachment, which would enable the fire department to flood a building on fire from above should this be necessary. The committee look upon the purchase of a chemical engine as a matter next in importance only to that of an extension ladder. "If through the purchase of such extension ladder and chemical engine the further extension of the water works system can be deferred and an advance in the rates for fire insurance prevented, a very large saving would be made."

As good a testimonial as could be asked to the effectiveness of a fire extinguisher is the following letter from a Stratford manufacturer, dated September 17th, Monday last: "At half-past three this afternoon there occurred a fire in Dufton's woolen mills, this city, which would have proved disastrous but for the use of the extinguisher, which put out the fire promptly. It started in a picker, and had they not used your extinguisher the whole mill would have gone. The fire was all out, and every one of the employes working when the brigade got there." It refers to the Wilson extinguisher, whose machines were seen putting out fires in varnish-soaked wooden structures at the Grand Stand of last week's Toronto Exhibition. Mr. Wilson appears to have invented a really serviceable hand machine.

BOOKS RECEIVED.

Annual Report, Collingwood Board of Trade, for the year 1893, etc.—The Collingwood Board of Trade does not hide the light of that blue-skied, brisk-aired town under a bushel. On the contrary, it sends out a pamphlet of 120 pages, containing "Brief Annals of Collingwood" from the pioneer days onward, "Collingwood's Industries," and the claims of the town as a summer resort. The compilers are frank enough to do what some towns would not, *i.e.*, mention "Collingwood's wants." And the first want mentioned is a waterway 20 feet deep from Collingwood to Lake Ontario. Nothing modest about this. Perhaps Mr. Moberley was at the elbow of the compiler when this was written. Mr. Long's presidential address to the board is reprinted. There are a lot of statistical contents as well, and illustrations are numerous. If we understand correctly that the pamphlet is the production of the *Enterprise* printing office, we regard it as one of the best specimens ever turned out of a country press. Mr. F. T. Hodgson, the compiler, seems to have done his work lovingly and well.

The Canadian Mining Review.—This August issue of 72 quarto pages, twenty of them illustrated, shows, among other things, to what lengths mineral development has attained in this country, and how far the enterprise of the journal that is "the representative exponent of the mineral industries of Canada" keeps pace with this development. As is to be expected of the official organ of the mining societies of Quebec and Nova Scotia respectively, reports are given of the meetings of these bodies. And this is quite regular and proper. The proceedings of the banquet at Sydney are reported in natural—not at all reportorial—English. The speakers speak in the first person, as they ought to do, and not in the third as a stenographer would have them. And they speak as they feel—that is, the report does not smell of the lamp and the dictionary. But we would rather have been on that "Trip to Cape Breton," described by the Junior Reporter, than at any official banquet in Sydney or elsewhere. That is, if the incidents of the aforesaid trip were real, and not elaborated from the inner consciousness of that tall, handsome athletic J. R., when he "was try for to get soam slee-ep." The pages on the Sydney Coal Field, and the various enterprises of the Dominion Company, that on gold mining in Nova Scotia, and on silver mining in Kootenay, will doubtless commend themselves to the mining expert. The editorial articles on The Memramcook Fiasco and on Copper Mining in Cape Breton, are deserving of faithful perusal. Mr. Bell is to be congratulated on this admirable issue, the only disappointing pages of which are those facing 164 and 148, for which, let us hope, the sun is to blame. Good-looking men, whether they be colliery officials or lesser mortals, do like to have their physiogs worthily reproduced.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Sept. 20th, compared with those of the previous week:

Clearings.	Sept. 13.	Sept. 20
Montreal	$12,095,508	$12,097,597
Toronto	5,332,726	4,743,964
Halifax	1,512,728	1,023,995
Winnipeg	741,297	929,753
Hamilton	650,147	743,326
Total	$20,322,406	$19,538,635

Aggregate balances this week, $2,935,394; last week, $3,100,143.

Correspondence.

ADULTERATION OF FOOD.

Editor MONETARY TIMES:

DEAR SIR,—I should like to see you draw the attention of the public, as well as that of the authorities of the Inland Revenue Department at Ottawa, to something that, without some good explanation can be made, looks very much like a serious defect in the laws as applied to the adulteration of food. I refer especially to the publication in the Government Blue Books of the names of the persons who are found selling any adulterated goods at retail, without any reference whatever to the names of the parties who manufacture the fraudulent stuff. Surely it is quite as important to the general body of consumers to learn the names of those who are first of all responsible for the manufacture and sale of the goods by wholesale, as to get the names of the retailers, who may and probably have no knowledge whatever that the goods are not perfectly pure, and what the labels on the packages represent them to be.

Turning over the pages of the Auditor General's report for last year, I was somewhat surprised to see the name of a local grocer figuring on the list of those who had been fined or charged with costs, when as a matter of fact the amount that appeared against his name had been paid by the parties who manufactured and sold the stuff in a neighboring city. I am constrained to make these remarks because the transaction came under my personal knowledge and the names of all connected with it are known to me. When goods are taken out of a store by an inspector of the Inland Revenue Department and sent to Ottawa for analysis, does the matter end when a certificate is sent to the retailer stating that the goods are adulterated, and to what extent, and enclosing a bill for the fees charged for the analysis? Is no effort made by the authorities to follow up the matter, and having discovered who the guilty manufacturer is, put the law in operation against him? If not, whose duty is it to take action in such cases? If the intention of the law is to protect an innocent purchaser, it would appear that a defect exists somewhere, or the law should be amended in such a way that the manufacturer in all cases should be, when detected by the department, treated as a criminal, and sent to prison without the option of a fine, and full publicity given to the facts. Otherwise the law as now administered is a perfect farce, and no use whatever as a protection to the public against frauds of this kind. The same remarks would apply to the makers of adulterated liquors when found in the country.

I trust you may consider the subject of sufficient interest to refer to in the columns of your paper.

Yours truly,
SUBSCRIBER

Annapolis, N.S., 13th Sept., 1894.

Windsor merchants say that the business outlook is improving in their town.

—The Richelieu and Ontario Navigation Company are considering, it is said, the advisability of adding two new steamers to their fleet.

—The new steamer to be built for the Great Northern Transit Company during the coming winter will be 220 feet in length, 35 feet in beam and 12 feet clear in hold.

—At a special meeting of the Fire and Water Committee of the Hull Council on Saturday morning it was decided to recommend an expenditure of $30,000 in an extension of the water works system.

—The Marine Department has received a telegram from the British Columbia Sealers' Association, stating that they would be willing to receive from the United States Government the $425,000 offered as compensation, under the Paris award, for illegal seizures of sealers in Behring Sea by United States cruisers.

THE AUGUST FIRE LOSS.

The fire loss of the United States and Canada for the month of August, as estimated from our daily files, aggregates $10,432,800, which is a gratifyingly smaller sum than the total for August, 1893. The following comparative table of losses by months demonstrates the improvement of the present year's record over that of 1893:

	1892	1893	1894
January	$12,564,900	$17,958,400	$10,568,400
February	11,914,000	9,919,900	11,297,000
March	10,648,000	16,662,350	9,147,100
April	11,559,800	14,665,900	11,540,000
May	9,185,000	10,427,100	10,777,800
June	9,265,550	16,344,950	8,282,900
July	11,530,000	12,118,700	16,307,000
August	10,145,300	13,222,700	10,432,800
Total	$87,112,550	$111,324,000	$87,453,000

There were 204 fires in August of a greater destructiveness than $10,000 each and in another column a list of these in detail appears. They may be classified as below:

$10,000	to $20,000	81
20,000	to 30,000	31
30,000	to 50,000	32
50,000	to 75,000	27
75,000	to 100,000	11
100,000	to 200,000	16
200,000	to 450,000	6
Total		204

The following August fires are specially noticeable:

Marion, Iowa, business portion of town	$153,000
La Moure, N. D., various	200,000
Chicago, Ill., lumber yards and factories	450,000

The Canadian Homestead Loan and Savings Association.

The Shareholders of the above Association are hereby notified that the Ninth Annual Meeting for the presentation of the financial statements, the election of directors, amendments to the rules and by-laws and other purposes will be held at the office of the association, 72 King Street East, Toronto, on **Tuesday, October 2nd, 1894,** at 7.30 p.m.

By order,
A. J. PATTISON, Secretary

Toronto, Sept. 4th, 1894.

Toronto Radiator Manufacturing Co., Ltd., Toronto,

MONTREAL, QUEBEC, ST. JOHN, HAMILTON, WINNIPEG, VICTORIA, B. C.

Cleveland, Ohio, salt works	150,000
Pueblo, Col., wholesale grocery house.	250,000
Cincinnati, Ohio, freight sheds and railroad property	300,000
Memphis, Tenn., drug house and other	400,000
Bergen Point, N. J., agricultural implement factory	250,000
Bowling Green, Ky., various	150,000
Vesper, Wis., saw mill and other	150,000

It will be noted that the Western States figure abnormally in our detailed list of losses, and this fact again directs attention to the need of improvement in the methods of Chicago underwriters. It is very clear that they should take more business-like steps for reducing the fire hazard by enforcing punitory charges for defective construction, carelessness, etc. The Western losses have been a severe drain upon not merely the fire underwriting institutions, but the country at large.

MERCHANTS' BANK OF HALIFAX.

It has been resolved by the authorities of the Merchants' Bank of Halifax that it shall have a new Montreal office. The site chosen is the corner of Notre Dame and Seigneurs streets. The building will have a frontage of 36 feet on Notre Dame street and 87 feet on Seigneurs street, and judging from Mr. Maxwell's design, it will be a handsome one. The basement is to be of fine cut and molded gray granite from Stanstead, P.Q. The entresol, to a height of nineteen feet, of dressed and molded Miramichi buff stone from New Brunswick. Above it is intended to use buff colored pressed brick made in Toronto. The trimmings, panels, columns, main cornice string courses, and all ornamental work will be of terra cotta from the Perth Amboy Terra Cotta Co., New Jersey, of a light buff color. The advantages of this material are its absolute fire-proof qualities, its density, there being a skin or crust on the surface of the brick, which prevents the absorption of soot, dust and dirt. In a smoky, manufacturing district this is a most important consideration. Its color being of a creamy buff, fulfils the ideal of color for a public building of this character. Many of the modern buildings in the American cities are of this material. There are several in Toronto, and they form a bright and cheerful contrast to red brick or weather-beaten stone.

The banking room on the ground floor will be 50 feet by 33 feet and 15 feet high. The manager's office will be separate, safe deposit, book and specie vaults, coat room, etc., and in rear will be a store in which it is also proposed to have the Post Office branch for this district. Floors will be of mosaic, counters of marble with wrought iron screens, ceiling in panelled quartered oak, wainscot and other interior finish also in quartered oak. The first floor will be divided into offices, with wide, light corridor, and two upper floors are designed for Masonic or assembly halls and with high ceilings. Access to these floors will be given by an electric elevator of the most modern equipment, running at a high rate of speed. In the basement are the bank messengers' quarters, storage vault, lavatories, coal and furnace rooms, and storage room for the bank. No expense is being spared to make the building a first-class one in every respect, and one that will be a credit and ornament to Montreal.

MONTREAL MARKETS.

MONTREAL, Sept. 19, 1894.

ASHES.—We report a further advance in values, first quality pots being now quoted at $4.25 to 4.30, seconds $3.85 per cental; pearls would readily bring $7.50 to $8, and the purchaser of a single barrel would probably have to pay $8.50. The Liverpool market for No. 1 pots is firm at 22s. 9d. for standard tares. Receipts this month at this port have only been 30 barrels, and stocks in store 47 barrels pots.

BOOTS AND SHOES.—It is well established by this time that the volume of boot and shoe orders from country retailers is materially behind that of last autumn. The result is of course slackened activity in manufacture. The spirits of either shoe manufacturers or leather dealers are not stimulated by the details just to hand of the three shoe and leather failures in Quebec and one in Pictou, as our summary columns show. Compromises, apparently, are to be the order of the day.

DAIRY PRODUCTS.—Butter is on just the same level as at last report, and trading is quiet. We quote creamery 18 to 19c.; Townships' dairy, 16 to 17c.; Western, 14 to 15½c. per lb. Butter exports for the season to Saturday last are only 13,803 packages, where last year they were 41,103 packages. Cheese shipments last week were pretty liberal, and the aggregate for the season thus far is 1,059,500 boxes, about 80,000 boxes ahead of last year at date. We quote finest Western 10½ to 10⅝c.; Township, 10½ to 10⅝c.; Quebec, 10½ to 10⅝c. Eggs are in good demand, and choice stock command 11c. per dozen.

DRY GOODS.—The "tween season" period is hardly over yet and business runs on the past side, but some houses report quite a fair proportion of letter orders. For city retail trade the weather has been too warm. September payments do not as yet show much improvement on the past month, but some parties who follow the run of affairs in the country profess a belief that some improvement in collections is not far off.

GROCERIES.—A better feeling is noted among buyers and the improvement in the volume of trade is keeping up pretty steadily. There have been some further receipts of new Valencia raisins by mail steamship from Liverpool, but not the quantity expected, and prices are not so easy as some calculated they would be from 5½ to 7½c. being the asking price the latter figure for layers. Advices from Denia announce a short crop, but fullest confidence cannot always be placed in these trade reports, and with California fruit available at moderate figures, it is hardly likely prices could be put up very much. Sugars are without recent change, granulated being quoted at refinery at 4½c.; yellows from 3¾ to 4c. Complaint is heard of Western houses cutting prices in the country. The New York market is strong, and above our level. Barbadoes molasses is held at 27½c in lots, car lots 29c., single puncheons 30c., but there is no special demand. Teas are quite as firm, if not firmer than last noted. There is further American enquiry, but the bids made do not meet the views of holders. Some offers cabled to Japan the end of last week have not yet been responded to. In canned vegetables there is still a lack of interest. Lobsters are rather scarce, and are firmer at about $7.

HIDES AND TALLOW.—The stiffness in hides we noted last week has been further intensified. It is true the American market is rather stronger, but probably the great jealousy between local dealers has more to do with the advanced prices than anything else. The general price for No. 1 green hides being paid by dealers is now 4½c per lb., though it is hard work to get 5c. from tanners; heavy steers 5c., with some sales to tanners reported of cured at 5½c. Lambskins are worth 45 to 50c. each. Tallow dull, at 5 to 5½c. per pound.

LEATHER.—The local trade is quiet at the moment, for the factories are not doing much. Prices, however, tend to firmness, and tanners are naturally talking in a stiffer tone as hides are firming up. English mail advices just to hand report an improved demand for light waxed splits, and ask consignments. In hemlock sole they report transactions on a more liberal scale. Rough splits are in fair request, and finished stock has sold with more freedom. Buff still low in price. We quote:—Spanish sole, B. A. No. 1, 18 to 20c.; do No. 2 to B. A., 16 to 17c.; No. 1 ordinary Spanish, 17 to 18c.; No. 2, 15½ to 16½c.; No. 1 slaughter 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do. heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 15c.; do. small, 10 to 12½c.; calf splits, 27 to 30c.; calfskins (35 to 40 lbs.) 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; polished cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—We do not find much to make note of in these lines. We hear of some moderate sales of domestic iron at $16.50 to 16.75, with a little firmer tone: for Summerlee $20.50 is asked for small lots ex yard. Scotch warrants are firmer at 44 1d., and there are now only two furnaces in blast in Scotland. The stock in Connal's yard Sept. 8th was 300,697 tons, as against 334,582 tons at same date last year. Canadian bars are being cut to some extent, and $1.70 is now the outside figure even for small lots. Some holders of tinplates seem to think that better prices will prevail shortly, but quotations are unchanged as yet. We quote:—Caltness pig iron, none here; Calder, No. 1, $19.50; Calder No. 3, $18.50; Summerlee, $19.50 to 20.00; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $18; Shotts none here; Middlesboro, No. 3, $17; Niagara No. 2, $18 to 18.50; Siemens, pig, No. 1, $16.50 to $16.75; Ferroma, No. 1, $16.50 to 16.75; machinery scrap, $14.50 to 15.00; common do. $10.00

to 12.00; bar iron, Canadian, $1.70; British, $2.25; best refined, $2.40; Low Moor, $5.25; Canada plates—Blaina, or Garth, $2.10 to 2.15; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $6.00 to $6.25. Black sheet iron, No. 28, $2.30; No. 26, $2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.85; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5⅜ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6⅓ to 6⅝c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.10 to 2.15; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.85; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100 lbs., pig, $2.60 to 2.75; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10⅓ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18¼c.; bar tin, 25c.; ingot copper, 9½ to 10c.; sheet zinc, $5.00 to 5.25; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3¼c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4¼c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3¼c., ⅞ in., and upwards.

Oils, Paints, and Glass.—Business in these lines continues of a pretty lively character. In values there are no marked changes. A cable received at the close of last week reports linseed oil very firm in Britain Turpentine is a shade easier. Fish oils dull, and steam refined seal easy at 38 to 40c. per gallon. Leads and paints are without change. We quote:—Turpentine, 45c. per gallon for single barrels; two to four barrels, 44 to 45c. Linseed oil, raw, 54c. per gal.; boiled, 57c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6¾ to 6⅞c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

Wool.—A little more business has been doing this past week or so, and there has been some American demand, resulting in the sale of some moderate lots of ordinary Cape at 15c. for the U.S. A new series of sales began on the 18th in London, and cable advices report a firm market there. The cargo of Cape wool spoken of some time ago is due in about ten days. We quote Cape, 14 to 16c.; B.A. scoured, 30 to 34c.; no North-West here; there is a little Australian at 16c.; Canadian fleece, 17 to 20c.

TORONTO MARKETS.

Toronto, Sept. 20th, 1894.

Boots and Shoes.—Orders for the fall trade are pretty well filled, and until the advent of wintry weather sorting orders will not be received in any plenitude. Designers are busy getting out spring samples, which they expect to place in the hands of travellers about the middle of October. In the meantime the factories are quiet, manufacturers showing no disposition to make stock for the warerooms. The rubber trade is fairly active; orders are for small amounts, but, being fairly numerous, the total will not fall far, if any, short of that reached last year.

Drugs.—One who has made a survey of the general business situation must conclude that trade is on the mend. Drugs do not form one of the exceptions to this improved order of things, and jobbing houses report a fairly active movement. Payments, however, are just a little slow. Values remain very steady, with most of the staples ruling firm. Further improvement is looked for in a number of articles, especially those coming from China, Japan and other silver countries, and holders as a rule are disposed to offer sparingly; at the same time, however, there is no inclination to force prices to an abnormally high level.

Dry Goods.—Few visitors are in the city this week, as most of the country merchants anticipated their wants, purchasing during the exhibition weeks. However, a few merchants who disliked the rush always experienced during the fair, have been in the wholesale houses and purchased some small parcels. Dress goods are attracting most attention, with serges and tweeds well to the front. Travellers are again upon the road, most of them having left the city on Monday. Values are holding very steady, but we hear a rumor that after next Friday dry goods, such as dress linings, will be advanced in price.

Grain.—There has been a general decline in the wheat market of 2c. in all grades. Local buyers are getting wheat from the farmers, and since there is no outlet by way of export the

PATTERSON & CORBIN
ST. CATHARINES, Ont.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

These prices are wholesale by the car load.

demand is naturally weak. The standards on grain have been fixed since our last report, and more active movement is expected soon. Barley has not commenced to move yet; stocks here are reported light. Oats are moving freely, and in this are an exception to other cereals. Peas are coming in slowly, selling outside at 55 to 56c.

GROCERIES.—Trade has been quite brisk during the week, and from this time forward until Christmas we may expect activity. The fruit preserving season is now pretty well over and the consumptive demand decreasing; prices show no alteration. Some small shipments of Valencia raisins have been received at Montreal, but not in sufficient quantities to alter quotations. Teas are brisk and selling at good prices, with stocks of Hysons and Monings rather scarce.

HARDWOOD AND LUMBER.—Since the removal of duties upon entry into the United States many enquiries after stock have been received. Birch in 1st and 2d grades is in good demand, and some good shipments of these qualities have been made to Detroit. Some red birch has been sent to Boston and New York. Ash finds but fairly good movement. Merchants in Boston and New York have also been taking some basswood; inch appears to be in best demand; the consumptive demand probably comes from the manufacturers of moldings. Cherry remains dead. Soft elm is sluggish in the market, while stocks are large. There is a fair demand for plain red oak from Toronto manufacturers. Prices run from $20 to $22.

HIDES AND SKINS.—Last Saturday the prices paid to butchers for green hides were advanced ½c. a lb., and quotations now stand as follows: Green cows 3½c., steers 4c.; cured and inspeted, 4½c. It is easier, however, to ask an advanced price than to get it, and we hear of car lots of cured selling this week at 4c. Elsewhere we refer at length to the situation in hides. Calfskins are unchanged. Lambskins and shearlings have advanced another 5c. and stand at 45c.; merchants, however, are handling them very carefully, as buyers are not anxious to take stock. Tallow appears to be scarce, although prices are unaltered.

METALS.—With the near advent of the fall season there is a decidedly better feeling in trade. Ingot tin has advanced ¼c. a lb. Ingot copper is higher at an advance of ¼c. a lb. While in other metals no higher quotations are offered, in many there is an improved feeling. Our quotations on galvanized iron are ½c. less in the various grades. In general lines of hardware the movement is growing larger, and although a boom in trade is not expected the outlook for the fall is considered satisfactory.

PROVISIONS.—For choice butter there is good enquiry, but buyers are accepting fall dairy packed only; medium and common stock is accumulating, with no apparent outlet. In hog products the feeling is a firm one; long clear stands quoted at 8¾ to 9c., new cured breakfast bacon at 12½c., new cured rolls at 9½c., hams 11½ to 12½c. Lard is steady and without change. Eggs are firmer, new stock bringing 14c. Beans are commencing to offer at $1.45.

WOOL.—Some small lots of fleece have exchanged hands this week at 17 to 18c. for select combing, and 19 to 20c. for clothing. In pulled wools there is little or no movement. The mills are not taking stock from merchants, and no buyers have been on the street for the last several days. We hear of some shipments of pulled wools now on their way to Toronto from Cleveland, Ohio. During the week the warehouse of one large Toronto merchant has received large quantities of Manitoba fleece wool. The London sales, which opened on the 18th, have brought out no great strength in the market. Prices are from 2½ to 5 per cent. better; this is but little satisfaction, when we consider that the previous sales were held in the midst of very severe industrial depression.

HEAD OFFICE: WINNIPEG

Subscribed Capital...	$400,000 00	Government Deposit .	$56,000 00
Paid-up Capital .	100,000 00	Reserve	54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

THE BRITISH TIMBER TRADE.

"The stock is ample;" "stocks are too heavy;" "arrivals are large;" "the stock is sufficient." Such are the phrases used in the circular of Farnworth & Jardine to indicate the supply of certain woods in the Liverpool market on 1st September. The arrivals from Canada during August were 54 vessels, 57,055 tons, against 53 vessels, 48,592 tons, during the same month last year, and the aggregate tonnage to date from all places during the years 1892, 1893, and 1894 was 272,123, 240,011 and 272,716 tons respectively. "Business during the month has been quiet," says the circular, "and imports, although not excessive, have been quite sufficient; there has been a fair enquiry for most of the leading articles, but prices generally rule low, though with a slightly firmer tone. Stocks on the whole are quite ample." We quote further:

Canadian Woods.—*Waney and Square*—The arrivals, consisting mostly of the former, have again been large, but, being chiefly on contract, have gone direct from the quay into consumption. There is no change in value to report. 1st class waney maintains its position, but square is difficult to move, even at low prices. Stocks are moderate. Red pine has not been imported; prices rule low, and the stock is sufficient. Oak has moved off slowly; first-class wood for railway work maintains its value, but inferior quality is quite neglected; the stock is too heavy. Ash has been in fair demand, but has come forward too freely, and the stock is now too heavy; late sales have been at lower rates. Elm has come forward freely; the demand, however, has been good, though values have slightly given way; the stock is moderate. *Pine Deals.*—The arrivals have again been large, viz., 5,309 standards, against 3,985 standards same month last year; the deliveries have been on a corresponding scale, viz., 5,454 standards, against 5,574 in August, 1893. The stock is much too heavy, viz.,* 10,190 standards, against 7,421 in 1893. There is little change in value to report, although prices are rather firmer.

New Brunswick and Nova Scotia Spruce and Pine Deals.—Of spruce deals the import has been 15,565 standards, against 12,964 standards; the demand has continued fair throughout the month, and prices steady; the stock is sufficient; owing to the reported short supplies for the remainder of the season, coupled with the higher rates of insurance, shippers are not anxious sellers.—*Pine Deals.*—There are no sales to report.

Birch.—The import has been too heavy; there is a fair enquiry, but prices rule low, and the present stock is still too large. Planks have been imported more moderately, but notwithstanding the very low prices ruling, have moved off slowly, and the stock is excessive.

United States Oak.—Only a few small parcels by steamer have been imported; the demand continues very dull and values unchanged; the stock is too heavy. *Oak Planks.*—The arrivals have been small, viz.:—50,000 feet against 111,000 feet same month last year; the demand has been disappointing, and prices are still very unsatisfactory, although shippers are holding for higher rates; the stock is still too heavy.

Pitch Pine.—The arrivals during the past month have been 8 vessels, 12,037 tons, against 7 vessels, 10,091 tons, during the like time last year. Of hewn there has only been one arrival, and that on merchants' account. The consumption has been small, but the stock is reduced to a more reasonable compass, and the outlook is somewhat better. Sawn timber, on the other hand, has arrived much too freely. It has consisted largely of consigned cargoes by steamer, which have been forced off by auction at declining prices. This has induced a large consumption, but stocks are very excessive, and no early improvement in value can be expected. Planks and boards have arrived too freely; values have had a downward tendency, and the stock is heavy.

Sequoia (Californian Redwood).—There has been no import. The consumption for the month has been quite of a retail character, prices rule low, and the stock is ample for months to come.

British Columbian and Oregon Pine.—There has been no import. The demand has slightly improved, but the stock, though held firmly, is sufficient.

United States Staves continue to arrive freely. The consumption of the better class has somewhat increased, but there is no change in value, and stocks are still too heavy.

Baltic and European Woods.—The arrivals during the past month have been 33 vessels, 22,274 tons, against 22 vessels, 12,924 tons, during the like time last year. Of fir timber the only arrival has been a small parcel from Riga. The deliveries have been on a somewhat larger scale than of late; stocks are moderate. *Red and White Deals.*—There has been a heavy import from Russia and Sweden, mostly on contract. The demand has not been so active as could be desired and stocks have greatly accumulated. Of flooring boards several contract cargoes have arrived. There has been a good consumption, prices have been fairly steady, and stocks are sufficient, though not excessive *Masts and Spars.* — The arrivals have been chiefly for mining purposes, and, as usual, go direct from the quay into consumers' hands.

THE NEW POST-CARD SCHEME.

It has been arranged that from the first of September next the public will have the privilege of sending through the Inland post, as post-cards, private cards bearing halfpenny adhesive stamps. The following are the regulations:—The cards must be composed of ordinary card-board, not thicker than the material used for the official post-card. The maximum size, having regard to the variety of form, must correspond as nearly as may be to the size of the ordinary Inland post-card now in use. The minimum size must not be less than 3½ inches by 2¼, and the cards must not be folded. With regard to the address side, the rules differ very little from the rules which relate to the present cards. But the modifications introduced in the new warrant give rather more latitude than is permitted by the warrant which it supersedes. On the address side, which must bear the postage stamp, the sender may add the words "Immediate," "Forward," "Local," and also may attach by gum or paste a small label as at present. Nothing else may be attached on the address side, except a postage stamp, and on the reverse side nothing but a receipt stamp. The arrangements, of course, apply also to reply post-cards. Now that the size has been definitely decided, stationers can go ahead in producing suitable cards, and as a good field is offered no doubt some very excellent goods will be on the market.—*British Trade Journal.*

A GOOD CRITERION.

A mortgage company doing business in a municipality chiefly settled by Mennonites lately applied to the municipal treasurer for a statement of all taxes unpaid on 197 parcels of land that they were interested in. The statement has just been returned, and shows that all taxes had been paid on these lands to the 31st December last, with the exception of twenty-three parcels. Against these twenty-three parcels less than $190 is due, and represents small balances unpaid for 1893, with the exception of $3.69 due on 31st of December, 1892. Not one of the parcels had ever been sold for taxes. The above is a very good indication of how farmers in the west are prospering.—*Winnipeg Free Press.*

SUSANNAH IN TOWN.

There's somethin' strikes me as dreadful in the city, an that's folks squanderizin' money that ought to pay their debts. There's women at seaside places, cuttin 'round fit to kill, an' their dresses ain't got their makin' paid fur, an' sometimes the sewin' women had to get the findings an' trimmin's with their own good money. An' there's folks off pleasurin' what owe butchers, an' bakers an' grocers. They're the ones that are so s'prised when the storekeepers give up and fail. Aint it mean of 'em? Honest debts is an awful load to honest folks an' I pity them that owe more'n they can pay, but my sakes, it don't seem right to skite around and not go on scratchin' hard to give folks their own.

In the country they owe some store bills an' settle up when they sell the grain. Ef they go on owin' somethin' happens an' they lose their farms or their fifty-acre lots or whatever they've got. But here they move around an' don't pay rent, an' borrow from Peter to pay Paul, an' all the other 'postles, an' they keep borrowin', an' cheatin', an' failin' and gettin' the best of folks, an' it takes a long time fur anything to hurt 'em much. They're so dreadful cute in the wicked ways of hangin' on to what ain't they're own. They're worse than Becky Sharpe, which wuz a woman that lived on buyin' 'thout payin', but she was in a book.—*Grip.*

AMERICAN ESTIMATE OF SCOTTISH BANKING.

As reported in the *Industrial Herald*, of Philadelphia, the Rev. Robert Ellis Thompson, in the course of a speech at an insurance meeting in that city, referred in the following appreciative terms to banking in Scotland: As a political economist, I have had occasion to study closely the methods of Scotch banking, which differ so widely and so wisely from these English methods which we have, for the most part, copied in America. I have been greatly impressed with the transformation which that system has effected on the Scottish character. The Scotchmen of the seventeenth century were the most headstrong, quarrelsome, hot-blooded, thriftless people in Europe, and their country was nearly as poor as Kamschatka. Under the influence of the principle of mutual responsibility which their banks established and extended to all industrial classes alike, and with the help of the instrument of industrial association furnished in the Scottish bank notes, there has deen developed the douce, farsighted, thrifty Scotchmen of our own times, and Scotland has risen to a foremost place in point of general prosperity.

N. W. T. EXHIBITION AT REGINA.

In explanation of the vote of $25,000 for an exhibition in the Northwest Territories in 1895, Mr. Haultain said in the assembly that it was not given at the request of the executive committee, but they had certainly approved of it. He explained that the amount voted for the Territorial society was a vote for an amount not chargeable against the Territories, and, so far as this amount is concerned, it has nothing to do with the ordinary vote of the Territories. He also showed that as it is decided by the federal vote that the exhibition be held at Regina, the large amount rendered necessary by this expenditure would go a long way towards alleviating any distress in this part of the country. As an inducement to the exhibition being held in Regina, the council had voted $10,000. The C.P.R. had agreed to make reduced rates during exhibition time, and this, he contended, would be a great inducement for other states to send delegates to examine our products and resources.—*Cor. Winnipeg Free Press*

FRUIT CROPS IN NOVA SCOTIA.

A Halifax despatch of last week says that J. W. Bigelow, president of the Nova Scotia Fruit Growers' Association, writes from Wolfeville: "We can now report with some certainty respecting the Nova Scotia fruit crop, and although many well-cultivated orchards have small crops, as a whole there is a good crop of very good quality, which may be estimated as follows: Apples, 120,000 brls.; plums, 110,000 baskets, 10 lbs. each; pears, 5,000 bushels. Strawberries and small fruits have yielded $50,000, and with prospects for good prices the Nova Scotia fruit crop will give a revenue of $600,000, besides that used for home consumption. Several orchards in King's county have over 1,000 barrels each, for which owners can take from $2,000 to $3,000 in orchard, and some plum growers have been offered $1,000 for their crop."

—"Assessment assurance is so cheap," said the agent. "Yes," answered the careworn young man with frayed wristbands. "My father's life was assured in the St. Souvenir Association. He paid his assessments for nine or ten years, the concern exploded, and so he applied to a regular company, and was told that there was something the matter with his heart. It was then too late for him to remedy his blunder, and he died without assurance. I was a law student at the time and could have inherited my father's practice if the original insurance had not been of that cheap variety. As it is, I could not complete my education, and lost my chance."

Sun Life Assurance Co. of Canada . . . . . .

Head Office—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance, the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers L.I. Co. which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company ?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to

SLOW PAY

And Bad Accounts are specialties with our collecting department.

Don't write anything off until we see what we can do with it.

R. G. DUN & CO.
Toronto and Principal Cities of Dominion.

DECISIONS IN COMMERCIAL LAW.

MORRIS VS. DINNICK, ET AL. The defendants, trading as a company, agreed with the plaintiff as follows: "We hereby agree to pay you a commission of . . . on all sales of goods manufactured by us . . . You are to use all diligence to make sales . . . and for that purpose you are to act as our agent. . . . The above commission to be paid to you from time to time as collections are made. . . . In one year from this date it shall be at the option of yourself or ourselves to determine this agreement." Soon after the agreement was made one of the defendants bought out the other two, and notified the plaintiff that the agreement was at an end, alleging that the company had ceased to exist. Before the year had expired the plaintiff brought an action for wrongful dismission. Held by the Court of Chancery that there was no express contract of employment for any term on the face of the contract. That the relation was not that of master and servant, but expressly one of agency. That there was no undertaking to manufacture any defined quantity of goods, or to manfacture at all, and that no such term should be implied, and that the plaintiff was to get a commission as agent on the sale of goods manufactured, and the continuance of the manufacturing was left at large to be determined by the interests of the principal, and the action was dismissed with costs.

SHEPPARD VS. BONANZA NICKEL MINING COMPANY OF SUDBURY (LIMITED).—The Court of Chancery holds that where a mining company has power to acquire land for the purposes of its incorporation, it has power to give a mortgage for and to bind itself by covenant to pay the purchase money.

THE MOBILE AND OHIO RAILROAD CO. V. THE STATE OF TENNESSEE.—The term dividend means that portion of its profits which the corporation by its directory sets apart for rateable division among its shareholders, according to the Supreme Court of the United States. Dividends can be rightly paid only out of the profits; the term "profits" denote what remains after paying every expense, including loans falling due, as well as interest on such loans. Shareholders are entitled only to dividends out of the net earnings derived from the operations of the company. The payment of the annually accruing interest on the bonded debt of a railroad company is a proper charge against the net earning, to be paid before dividends can be declared.

THE ANVIL MINING CO V HUMBLE The Supreme Court of the United States declares that whenever one party to a contract prevents the other party from going on with it, the other party is at liberty to treat the contract as broken and abandon it, and recover as damages the profits which he would have received through the full performance of it. Where a contract is not performed the party who is guilty of the first breach is generally the one upon whom rests all the liability for the non-performance.

UNBUSINESS-LIKE PROCEDURE.

A scandalous state of things is revealed in the following comment, by the Huntingdon *Gleaner*, on the proceedings in the Boyd-Somerville case, at Beauharnois, Que.: "The tediousness of legal procedure at Beauharnois is proverbial, but this surpasses all precedents. The examination was a mere killing of time. The court was set to open at 10 o'clock in the forenoon The prosecution was rarely ready to begin until 10.30. It would sit for an hour or so, and then adjourn to half past one It generally resumed at 2 and rose at 4 The average length of the daily sitting for the 21 days was 3½ hours As already stated, this case of Boyd and Somerville is only a recent instance of what has been going on at Beauharnois for years It suits the lawyers, but it is death to their clients When a man becomes involved in a lawsuit he counts on loss of time, but he ought not to be made a victim of deliberate delays. Scores of farmers could testify to the great loss they have suffered by being kept dancing attendance at Beauharnois courts."

VIEWS UPON CURRENCY

The Controller of the United States Currency, Mr. J. H. Eckels, has been stating some truths to the members of the fourth annual convention of the Ohio Bankers' Association, last week Mr. Eckels reviewed the history of the national banks, and declared that the system under which they were conducted was the best that that could be devised, and one which would be changed only when circumstances made a change necessary. He went on to say that the problem he met to-day was how to secure a more elastic currency and still maintain it solely upon bonds deposited to secure the same. The serious difficulty in the way was the idea to which so many of the people clung, that it was essential to the people's prosperity that there must always be a large volume of money regardless of its representation or intrinsic value

He then said: "Our colonial history is replete with attempts to make the people rich through a great volume of currency which had neither representative nor intrinsic worth. It is a history of financial failure and distress. Later, under the articles of federation, is recorded the same attempt, and the same series of failure and financial loss. There was scarcely a State in the Union before the war whose history was not marked by efforts to enrich a people through such currency, and the outcome was disaster If the result of such attempts was so prolific of ruin to the people, then why will they not fall with equal ruin now? The laws of political economy do not change with changing ages or changing people, and the same causes find fruition in the same effects, whether the century be the eighteenth or the nineteenth; the form of government colonial or republic.

"There is no sentiment embodied in the laws of money, and no matter how great may be the volume of the currency, if each and every dollar of that currency is not of value to pass current in the world of business, it cannot add to the blessings of the people. To be productive of the people's good, it must, whether of gold, silver or paper, in the very order of things, be of unquestioned and unvarying value, and when called into requisition, discharge, without the aid of legal tender acts at home or abroad, the obligations of the holder. But with such a currency our people have yet much to learn, and most important is the lesson that no matter how abundant it may be, it will not be able to find its way to those who are wanting in credit It can give no relief to those who have neither the means to pay their obligations, or having it, cast suspicion upon their willingness to maintain their financial integrity by making their abiding place the home of all the financial vagaries which are bred by those who have no property of their own and are unmindful of the property rights of their fellows."

—Woodstock's rate of taxation is 20 mills this year. Norwich pays 20 mills. Delhi 19 mills. Waterford, 18 mills Port Rowan 17 mills

D. Morrice, Sons & Co'y.

MONTREAL & TORONTO.

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

SUPPEMENTARY letters patent have been issued to the Ames-Holden Company (limited) increasing the capital of the company from $40,000 to $200,000.

THE partnership between H. C. Lawson, H. Le Jeune, and Thomas A. Christie as bankers and financial agents at Regina has been dissolved by mutual consent.

A SPECIAL from Shediac to the St. John *Sun* announces the prospects good for a brisk business in that town this autumn. R. C. Tait, the principal shipper, sends annually to Bermuda and the West Indies over 2,000 barrels potatoes, besides other products and live stock. The opening of the Cuban market will be a decided advantage to this trade. Prices are ruling fair, and potatoes command a higher price than last year. The crop is of good quality, though below that of 1893.

LAST week we noticed that a bailiff was in possession of the assets of A. B. A. Cunningham, of Carberry, Man. Now we hear of his assignment.——A fortnight ago we stated that several judgments had been obtained against Carley Bros., dealers in clothing in Winnipeg. They, too, have since assigned.——To-morrow the sheriff will sell the liquor stock of A. Colquhoun, in the same city. His troubles have also been noted.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

A NEW building is being erected in Magog, Que., to be used as an office by the Eastern Townships Bank branch. The site is on Main street, at the east end of Mr. Moore's garden. It is hoped that the building will be ready by 1st December next.

THAT there is not business enough for those who are selling drugs, is evident enough from the numerical relation of druggists to population. The *Pharmaceutical Journal* says that in January, 1894, at which time the population of Toronto was 188,323, there were about 135 drug stores, or one to every 1,395 people. And this journal, it is added, is sent to 885 druggists in Ontario, whose population is say 2,114,321, showing one druggist to every 2,389 persons.

A DESPATCH of Saturday last from Port Arthur states that Mr. John Shand, representative of Messrs. Bartram, limited, Edinburgh, arrived. His company expects to furnish the machinery for the pulp and paper mill at Kakabeka Falls. The mill is expected to be the largest in the world, taking fourteen thousand horse-power to operate it, and the product will suffice to load a C.P.R. train every day in the year. Presuming this somewhat large statement to be true, it seems natural to enquire what will be done with the product. The intention, it seems, is to ship the wood-pulp to Britain. Assuredly it could not be used here.

Mercantile Summary.

THE directors of the Rhodes-Curry Company (limited) are N. Curry, N. A. Rhodes, J. C. Robertson, T. R. Black, M.P.P., J. M. Townshend and J. T. Smith.

THE Provincial Mining and Dredging Company has been incorporated with a capital stock of $1,000,000. Hugh McLean, Norman McLean and William F. Gore are the trustees, and Vancouver the place of business.

THE paints and wall paper stock of J. C. Campbell, of Hamilton, which was sold recently, realized only 32 per cent., while the boot and shoe stock of W. Wyatt & Son, of London, brought 60 per cent.——J. G. L. Orme's dry goods stock at Port Stanley realized one per cent. more.——The general stock of G. A. Moore at Sudbury is advertised to be sold.

A FEW weeks ago we noted the troubles of Wm. Grimm, carriage maker, Victoria, B.C. Since then the sheriff has taken possession of his premises, and the stock will be sold.——Henry Jewell, dealer in crockery in the same city, is in difficulty.——E. C. Davison, dealer in harness, etc., Kamloops, B.C., has become involved, after being in business six years. He was supposed five years ago to be worth over $3,000. Not content to do a moderate business, he opened a branch store at Clinton. Now we hear of his assignment.

Mercantile Summary.

WE learn that the style of the grocery business carried on for some time in Palmerston in the name of J H Shields has been changed to Shields & Co., and that Mr. R. Shields is the manager thereof.

THE sheriff is in possession of the assets of A L Burke, general agent, Hamilton——An assignment has been made by James Hamilton, lumberman at Thessalon. For some time past he has evidently been going behind with his payments, and in December last he was obliged to give a chattel mortgage for $3,000. W J Milling, sometime a general merchant at Stamford, has assigned.

AT a meeting, held on Monday last, of the creditors of Withrow & Hillock, extensive builders in this city, their statement submitted showed liabilities of $120,000 and nomina assets slightly in excess of this amount. The bulk of the firm's assets consist of real estate which is mortgaged for $77,000. On this there is also $6,000 due for unpaid taxes. The firm have assigned to A A Wright——Thomas Sharpe, provision dealer here, also assigns.——A meeting of the creditors of the estate of A. Dorenwend, dealer in hair goods, is called for next Monday.——The creditors of Thomas J Best, saloon keeper, have held a meeting, when it was ascertained that his liabilities were far in excess of his assets. The meeting adjourned until to-day to see what offer the insolvent would make

SUGARS are easier in Ontario markets.

YOUNG HYSON teas show continued strength, and Japans are decidedly firm in both New York and Montreal.

THE Scott Mining Co., capital $100,000, and the Columbia Mining Company, capital $1,000,000, both of Seattle, have been registered in British Columbia.

IT is understood that John McDougald, M.P., has sold his gold mine at Fifteen Mile Stream to J. D. McGregor, of New Glasgow, for $10,000. —*Halifax Chronicle.*

THE Canadian Packers' Association met this week for the purpose of discussing prices. After October 1st corn and tomatoes, in consequence, will be advanced 2½c. per doz.

SHIPMENTS of new Filiatras and Patras currants have been received by Toronto houses this week, while second shipments of new Valencia raisins are arriving.

WE have to chronicle, with sincere regret, the death of Mr. David Goldie, the well-known miller of Ayr, Ont. The circular announcing his demise states simply that it took place in Ayr on Monday last, 24th inst., in his sixty-fourth year, and that the funeral would take place on Wednesday, 26th.

LETTERS patent incorporate the Melbourne Steamship Company, for a line of vessels between Montreal and Duluth. Capital $45,000. Charter members: C. A. Cantin, James B. Cantin, shipbuilders; George E. Jaques and Chas. Arthur Jaques, forwarders, all of Montreal; Frederick Elliott, Denver, Colorado, master mariner.

APPLICATION is made for letters patent to incorporate the Phœnix Printing Ink Company, Montreal; capital, $20,000. Applicants: J. D. Rolland, manufacturer; Louis de Poliniere; Maurice O'Diette; Romeo Prevost, gentleman; and Francois Joseph Bisaillon, advocate, all of Montreal, who are to be provisional directors.

AS long ago as 1852 Stewart & Thompson started a clothing store in Guelph. Fifteen years afterward they were succeeded by Thompson & Co. In 1869 Shaw & Murton occupied the premises. They were succeeded by Shaw & Grundy in 1882. Ten years later Grundy retired and one Turner took his place, when the style was changed to Shaw & Turner, quite a number of metamorphoses in forty years. Since 1892 the latest proprietors have found it difficult to meet their payments and were gradually going behind. Now they have assigned to E. R. C. Clarkson, with $10,000 liabilities.

IT is only a few days since J. Hutton, of Smith's Falls, Ont., supposed to be a very well-to-do farmer, who assumed the book and stationery business of his son-in-law a year ago, under a chattel mortgage he held, surprised his friends by making an assignment.

A MONTREAL manufacturer of card clothing and general dealer in mill supplies, James Leslie, who has evidently been in much straitened circumstances for some time back, judging from the number of suits entered against him, has been forced to assign. His liabilities foot up to some $25,900, a considerable proportion being due in England.

AN old and esteemed English citizen of Quebec, Mr. W. G. Wurtele, died last week. Deceased was for many years engaged in the wholesale hardware business on Peter street, retiring but a few years ago.——Mr. Antoine Dassylva, a well known merchant and shoe manufacturer of St. Roch, died suddenly last week.

THESE are the days of big projects. A despatch, dated 24th instant, from Pittsburg, says that the first real move in the project which it is hoped will result in the connection of Pittsburg and Lake Erie by water, is now being made by the engineering committee of the Chamber of Commerce. "The committee in charge of the inspection of the various routes for the proposed ship canal left Pittsburg today. The work of inspection will not be completed before the last of this week."

THE announcement that A. Sweet & Co., general merchants of Winchester, Ont., were preparing a statement of their affairs to submit to creditors, has created much surprise in Montreal and Toronto wholesale circles. The firm in question are the leading traders in their section, and have always been regarded as a first-class mark. It is understood that some complications have arisen with the heirs of the late Wm. Broder, Mr. Sweet's old partner, and that this is the main cause of the present trouble.

THE country failure list for the Province of Quebec includes the following cases:—A tanner at Joliette named A. Bock is reported an absentee. He realized all he could on his assets, selling in some cases the same article twice over, and is supposed to have some $1,500 away with him.——L. N. Castonguay, of Montebello, is now offering 40 cents, secured. He owes $4,300.——Achille Genest, general merchant of Gentilly, has arranged liabilities of $4,700 at 25 cents.——Napoleon Cote, general store, St. Fabien, whose business record is not altogether favorable, is reported to be compromising at 25 cents. It is just about two years ago since he made a similar arrangement, and in the interim he has been fined several times for selling liquor irregularly.——F. Urquhart, an Englishman, who has done a tailoring business at Cookshire for several years, has gone into bankruptcy, and is said to owe some $3,000.

WE note below a few failures in Ottawa. J. Litle, a retail and jobbing grocer, has assigned, having repeatedly been sued, and being under seizure by landlord. He is said to have allowed a love for sport to involve him in considerable loss.——Wm. Stanford, who succeeded in 1893 to the old established dry goods business of Elliott & Hamilton, has already assigned, with liabilities put at $26,000.——Russell, Gardner & Russell, the dry goods jobbers, whose failure we have noted, are now offering 60 cents in the dollar.

THE firm of Gilman & Bryan, who do a small printing business in this city, are somewhat involved. Mr. Gilman died a few weeks ago, and now the bailiff has taken possession of the premises under the power of a chattel mortgage. It is said that the matter will be arranged satisfactorily in a few days.——Alfred Harris, a real estate dealer, is said to have been left with $30,000 or $40,000 a few years ago, but evidently the money has almost taken wings. A number of writs have been issued against him, one of which was for $9,000, and now he assigns to W. A. Campbell.

AMONG the Montreal failures for the week is a group of small grocers, who have all assigned on demand. Their names are J. Lafontaine who owes $2,770; Napoleon Galarneau, $1,114; and F. J. Durkee, $1,550. In the same city we also note the following business troubles; C. Robert, hats and furs, has been put into insolvency. His liabilities this time are $7,900 ——Edmond Roy, plumber, has been requested to turn his estate over to the assignee, and owes the very respectable figures of $8,145.—— Adam & Son, a firm which only recently began a small shoe manufacturing business, have been put into insolvency, and the partners are reported away. They owe about $1,500.—— Majorique Marchand, a young dry goods merchant, supposed to be doing pretty well, has been canvassing his creditors with the view of getting a settlement at 70 cents on the dollar, payable in monthly instalments. He owes some $19,000 and shows an apparent surplus of $3,500.——J. T. Bolt, a manufacturing jeweller,

has made a settlement at 33⅓ cents on the dollar in instalments spread over twelve months. General liabilities are $6,300, privileged $1,100.

THE Jacques Cartier Bank, in pursuance of a policy of progress, has just opened a branch at Edmonton, N.W.T., in the heart of a fertile district where French Canadians settled years ago, and have prospered. This is a movement in the right direction, and speaks well for the discernment of the bank management. The manager of the new bank is Mr. S. R. Benoit, heretofore of the staff of the branch at Ste. Anne de la Perade, and there is reason to believe that he will make a prudent manager. Hon. A. Desjardins, president of the Jacques Cartier Bank, visited Edmonton for the purpose of installing the new agent.—*Tr. from Le Moniteur de Commerce.*

LATE Nova Scotia failures are of no great moment. J. McLennan, general dealer at Judique, and previously at Margaree, a trader of twenty years' good record hitherto, has been obliged to assign.——N. S. Matheson, men's furnishings, New Glasgow, has failed with light liabilities.——Lawrence & Mosher, grocers, Windsor, a new firm last year, succeeding Lawrence's old business, have now been pressed to assignment.——A hardware firm of some prominence in Charlottetown, P.E.I., R. B. Norton & Co., are asking a compromise at 50 cents on the dollar; liabilities are $22,000, about half of which are preferred; assets apparent $26,400.

CREDITORS have finally accepted the offer of 50 per cent. made in July last by H. F. Buck, furniture dealer at Listowel.——A farmer named George Bingham came from near Orono and opened a livery stable at Toronto Junction four years ago. He has now assigned. ——So have Mondeau & Perras, hotelkeepers at Sudbury. They have been in partnership since 1892, and were reported to be doing a good business in the hotel; but it is feared that they have been dealing too freely in outside matters.——John Ewens, harness maker at Huntsville, is also in the hands of an assignee. ——An offer of 50 per cent. is made to the creditors of Todd & Co., general storekeepers, Bowmanville, who succeeded Todd Bros. three years ago.

THE frank face and the hearty manner of John Rochester, M.P., will no longer be seen in Ottawa, for that worthy man and good citizen passed away last week, after a fortnight's severe illness, in his seventy-third year. He was born at Rouse's Point in 1822, and moved to Ottawa, then Bytown, with his father about 1827, when the Rideau Canal was begun. The family settled Rochesterville, then "in the woods," and at the father's death John began lumbering, which prospered for some years, and he retired with a competence. He was several years mayor of Ottawa, and represented Carleton county in parliament. For the last few years deceased has spent much of his time in philanthropic and charitable work.

IN New Brunswick the following recent failures are to be noted: A. B. Avery, hotel keeper at Fredericton, has assigned. Liabilities about $1,500; assets little or none.——W. H. Francis & Co., boot and shoe retailers of St. John, have turned their estate over to the assignee.—— From Winding Ledges, in the Madawaska district, comes word of the failure of Pelletier & Cyr, general merchants. The liabilities are $4,170 direct, $1,300 indirect, while nominal assets are $14,000, but of said assets there are some $8,000 in poor book accounts, which will be very difficult of collection. A compromise will probably be necessary to enable them to continue.——W. A. Mowatt & Co., of Campbellton, already reported insolvent, are now making a proposition to pay their creditors 50 cents on the dollar.

LONDON AND ONTARIO INVESTMENT CO., LIMITED.

The business of this company shows a slight shrinkage compared with that of the previous year. But this is a result of the deliberate policy of the directors, who were more than ever cautious in choosing loans both in the older province and in Manitoba. The net earnings were sufficient to pay seven per cent dividend and to add $14,000 to property suspense account, though owing to reasons which the chairman explained they were less than the year preceding. The directors showed a self-abnegation that is unusual when they volunteered to accept for their year's services $500 less than the amount commonly voted them. Mr. Beatty stated that agricultural prospects in Ontario are more hopeful by reason of good crops, and that there were of late more enquiries for farm lands. In Manitoba, that gentleman added, the prospects are steadily improving; no hail or other storms having this year interfered with the growing crops. The vice-president was able to make the agreeable announcement to the meeting that Sir Frank Smith, the president, whose injuries from collision with a trolley car had confined him to his residence for a fortnight, was progressing favorably. We are pleased to add that since that meeting was held Sir Frank has appeared at the Dominion Bank board.

TORONTO, FRIDAY, SEPTEMBER 28, 1894.

THE SITUATION.

Treasurer Hall, of Quebec, is reported to have resigned on a difference with Premier Taillon in regard to a portion of the public debt. The Canadian Pacific Railway is shortly to pay the Government $7,000,000 owing on account of the North Shore Railway purchase, and the question arose how the money was to be disposed of. This money was pledged to go to reduce a particular loan, and the Premier wished that arrangement carried out, but the Treasurer thought $4,106,461, obtained from the Credit Lyonnais and the Bank of Paris, should be paid in preference. The Premier cut the knot of the dispute by telegraphing to these French banks the acceptance of a new loan to replace the old one on terms to which Mr. Hall could not agree: 3 per cent. interest on a loan to be made at 77. The Premier pointed to the reduction of interest as an advantage; the Treasurer objected that the operation would add $1,266,603.13 to the public debt.

Japan and Corea have entered into a formal alliance to expel the Chinese troops from Corean territory. While the war lasts, Corea is to give every facility for the movement of the Japanese troops and the preparation of their provisions; when peace is concluded, the treaty will expire. If the account of the rising of the Corean population, in some parts of the country, against Japan, be true, the Corean Government may have some difficulty in enforcing the obligations which it has assumed.

In the international organization formed at the late canal conference, the American representatives have a commanding majority and can make their views prevail, when the division bell rings. The constitution of the international representation may be regarded as containing a radical vice. It was, it is easy to conceive, found difficult or impossible to make it otherwise. Equality of representation between the two countries might have led to a deadlock; a swinging majority on one side scarcely offers a fair promise of equitable decision. A foretaste of what may be expected is to be found in the decision of the conference on the question whether Canada should ask the right to navigate the New York canals, which the Washington Government was to urge the State to give her, as one of the conditions of the Treaty of Washington. The convention did not deem it prudent to ask for more than the navigation of the Whitehall Canal, and refused to include the Erie. It is true that one of the Canadian delegates, Mr. Dobell, took this ground strongly. But the nature of the decision warns us what to expect from the international organization to which the convention gave birth.

Water has been turned into the Sault Ste. Marie Canal. More than forty years ago there were advocates of a canal, which has now been achieved, on the Canadian side of the Sault Ste. Marie river; but there was at that time no justification for Canada undertaking so costly a work. Some opponents of the scheme alleged that a canal on this side was impossible, and other enthusiastic advocates of the scheme could see in the refusal of the Government to undertake the work evidence that the Premier had been bribed by foreign gold to let the Americans get a strategic advantage over us. During Riel's first rebellion, the want of a Canadian canal was felt, troops having to incur incredible hardships on the overland route. But a misunderstanding with the United States, leading to discrimination aginst our commerce at the American Sault canal, showed the necessity of an independent channel, and led to its construction. Proof, if proof were needed, that commercial hostility giving itself the name of retaliation, when there was nothing to retaliate, was short-sighted. The new canal has a draught of 20 feet 8 inches on the sills. Being of greater capacity than our general canal system, of which it is the first step in the echelon, it will for some time contribute more to the Buffalo route than to ours.

Any one who takes at its face value Lord Macaulay's depreciatory estimate of prize literature, will not expect any great result from the *Statist's* offer of 1,000 guineas for the best scheme for an Imperial customs union. But the mere discussion of the offer has done some good. It has led the *Times* to say that such a union ought to be divested of all political features and should be wide enough to admit the United States. The advocates of an Imperial customs union would divide on this proposal; some would be willing to accept, while others would bitterly oppose it. That the United States would consent to enter into a customs union with Great Britain and her colonies is more than doubtful, in spite of the fact that the central country of the group buys half the domestic produce which she has to sell. The proposal to include the United States, though not unreasonable, gives somewhat of an airy and unreal aspect to the whole thing. Without the United States, the difficulties of realizing the object of an Imperial customs union is so serious as to put the greatest strain on the faith of rational men in its success; with the United States, most people would regard the difficulties as insuperable. In any case, the United States is a great stumbling-block in the way; it is almost equally difficult to leave it out or take it in.

At the same time that Japan is taking her position as a military power, she is being admitted into the brotherhood of civilized nations, because she has given proof of those humane qualities which fit her for the partnership. Civilized nations will not consent to subject their citizens, who may have occasion to sojourn in countries whose codes of laws are barbarous and bloody, to the mercy of the native tribunals, and these countries, of which Turkey is the type, have to be dealt with on exceptional principles. Courts formed of the consuls of the civilized countries claim, and are conceded, the privilege of trying their own subjects and citizens on charges brought against them. Japan is one of the countries in which consular courts have existed; but by a treaty concluded with Great Britain they are henceforth to cease to exist, and British subjects in

Japan, charged with crime, will be tried in the native courts. Other countries are expected to follow the example of Great Britain, and Japan will henceforth enjoy the full privileges of a civilized country. Some commercial advantages are gained by the treaty; instead of the trade of Great Britain being confined to a few specified ports, it will be free to enter the ports of Japan generally. The duties on British goods are not lowered, but somewhat increased by the new treaty, but they are put at a more moderate figure than in almost any other conntry.

At this distance, and without fuller details, it is not easy to understand the exact meaning of the result of the Victorian election. One result is that the Patterson Government has resigned. They appealed to the electors as moderate tariff men, willing to retain protection, but bound to reduce the high tariff. The leader of the Opposition, now called upon to form a Government, had taken the ground that great caution should be observed in reducing the tariff. The Free Traders, pure and simple, formed a third party, and only elected 14 members in a House which counts 95 members. Their defeat does not appear to be the defeat of either of the principal parties. Whether the leader of the Opposition in the late House meant that some reduction of the tariff was desirable, when he said that was a course in which to make haste slowly, may be a matter of inference. But what the electors have decided will be the rule for the new Government. As far as we can judge, with the present information, there is a majority in favor of reducing the high tariff of 1892, though we cannot pretend to be certain that this is the case. Defeat of the Free Trade party does not appear to be accompanied with a warrant in favor of high protection.

LIFE ASSURANCE IN THE UNITED STATES.

How great the extent of life assurance transactions are in the aggregate in the United States may be illustrated by a few figures. In that country last year fifty-one life assurance companies doing business wrote over a thousand millions of life indemnity, and the average amount of each policy was $2,500. But three-quarters as much assurance ($775,996,000) terminated in the same twelve months, nearly half of it by lapses. Thus:—

BUSINESS OF 1893 IN THE UNITED STATES.

Business written.....	421,748	policies for	$1,090,002,107
Termination by death ..	20,223	" "	59,395,844
" " maturity	4,808	" "	8,999,241
" " expiry ..	8,626	" "	27,372,317
" " change..	2,401	" "	37,294,614
Total natural terminations,	36,058		$133,062,016

Thus the natural terminations were 17 per cent. of the whole amount insured. The surrenders were $113,842,507 under 37,678 policies, and the lapses formed the great aggregate of $305,424,149, the number of policies being 126,107. Furthermore, we observe that the great proportion of 115,592 policies, representing $224,627,000 of assurance, are put down as "not taken." What a flattering, deceptive, flash-in-the-pan sort of business is this that coaxes or bribes people into agreements they do not carry out? As the *Indicator* puts it, this makes the total chargeable mainly to hot-house forcing methods, 279,877 policies for $643,894,360.

Comparing 1893 with 1892, it appears that the gain in insurance in force in the year was 143,029 policies for $314,741,506, being about 29 per cent. of the new issues and nearly 8 per cent. of the amount in force at the beginning of the year. Industrial companies wrote 2,791,003 policies in the States for $344,546,648; terminated 2,282,824, for $259,575,912, and gained in the amount in force 630,880 policies for $79,113,619, being about 23 per cent. of the new issues and 18 per cent. of the amount in force at the beginning of last year.

THE BANK STATEMENT.

We give below a condensation of the figures of the statement of Canadian banks for the month of August, which bears date Ottawa, 19th September. It is compared with the bank statement for the previous month, and shows capital, reserve, assets and liabilities, average holdings of specie, and Dominion notes, &c.

CANADIAN BANK STATEMENT.

LIABILITIES.

	August, 1894.	July, 1894.
Capital authorized.....	$ 75,458,685	$ 75,458,685
Capital paid up.....	62,189,585	62,156,255
Reserve Funds.....	27,166,850	27,160,750
Notes in circulation.....	30,270,366	29,801,772

Other assets.....	1,642,628	1,570,586
Total assets.....	$308,085,634	$308,105,729
Average amount of specie held during the month.....	7,832,980	8,021,844
Average Dominion notes held during the month.....	15,500,434	14,005,096
Greatest amount notes in circulation during month.....	31,088,197	30,913,384
Loans to directors or their firms.....	7,973,633	8,104,682

There is no striking change in the liabilities side of this statement. Circulation had begun to show a trifling increase in August, but will this month and for several months be swollen to greater figures in the natural course of things. There is virtually no alteration in the aggregate of public deposits in the banks, which remains at $176,400,000; demand deposits are increased about a million and a half, and deposits at notice are lessened by about the same amount. The sums due by our banks in the States and Great Britain are smaller than in the previous month.

Among assets, several items indicate diminished volume of business; notes and cheques of other banks, for instance, are less in amount. The shrinkage of current loans and discounts in Canada from $202,720,000 to $199,908,000 is just about offset by the increase of $2,650,000 in balances due from the United States, indicating that this much

money, not wanted by customers in the Dominion, had found use across the Lakes. The bulk of this is represented by the Bank of Montreal, whose Chicago business, it is natural to suppose, increases about this time. It is noticeable, however, that the Banks of the Province of Quebec represent most of the shrinkage of the month in current loans, for Province of Ontario banks instead of lessened, show increased transactions. The item "other securities," made up of municipal, foreign and railway securities, shows a decline. The holdings of municipal bonds and debentures are naturally smaller, for some blocks of these have been sold lately on the English market.

As to the outlook for business generally, it is possible to report a slightly improved feeling in mercantile circles from this time last month. In minor items of agricultural export the settlement of the American tariff has had a directly stimulating effect, and at several Ontario points there is more export business doing in consequence. But a pall hangs over the wheat trade, which shows still lower prices than we mentioned in this column in August; 51 cents per bushel at Port Arthur for No. 1 Manitoba is the point it has touched as we write, on Wednesday, while Argentine wheat sold yesterday in London at 18 shillings the quarter. And so great is the stock and so abundant the harvests in wheat countries, that no prospect can be discovered of higher values in the near future.

The lumber business manifests a healthy tone, and though as yet it is too soon after the crisis in the United States for activity in building across the line, our dealers have reason to expect a fair demand. Not alone is our pine a good asset, but our hemlock and our spruce are bound to come into market to an increased extent, and our hardwoods are sure of their turn. The condition of the cattle trade, on the other hand, is neither satisfactory nor hopeful.

WHAT OUR EXCHANGES THINK.

The new dress of THE MONETARY TIMES, and the autumn special issue in particular, have called forth a number of kind and often laudatory remarks from a number of our exchanges, as well as from various advertisers. We have selected from several dozens the following encouraging testimonials from our brethren of the Canadian press:

"THE MONETARY TIMES has issued a very fine Trade Edition, which is a great credit to the publishers."—*Berlin News*

"THE MONETARY TIMES has issued a handsome special edition, dated August 31st. The cover is a specially elegant sample of the printers' art."—*Owen Sound Advertiser.*

"THE MONETARY TIMES' special edition has reached us. It is an exceedingly well printed journal, full of interesting matter, and should be in the hands of every business man in the country."—*Brandon Sun.*

"THE MONETARY TIMES, one of the leading trade journals of Canada, has donned a new dress, and comes out this week in a neatly printed special edition, in honor of its twenty-seventh birthday."—*Belleville Intelligencer.*

"A very elegant cover encloses that king of trade journals, THE MONETARY TIMES. The paper is handsomely printed throughout, and its contents are, as in keeping with the character and reputation of the TIMES, of the utmost importance to business men."—*Picton Times.*

"The last number of THE MONETARY TIMES is resplendent in an illuminated cover, and is a special edition. This journal has lately come out in a new dress of type that greatly improves the appearance both of its advertising and general news columns."—*St. John Daily Sun.*

"That excellent trade journal, THE MONETARY TIMES, Toronto, is out in a new dress of type, which greatly improves its appearance. THE MONETARY TIMES is one of our most welcome exchanges. Not only is it indispensable to every business man, but it might be read with profit by every progressive farmer in the country."—*Forest Free Press.*

"NEW DRESS.—That excellent journal, THE MONETARY TIMES, has donned a new dress in honor of its twenty-seventh birthday. It has also made other improvements which greatly enhance the appearance of the journal. Last week it issued a special number of 52 pages, which was a model of typographical neatness and a credit to the publishers."—*Ingersoll Chronicle.*

"Probably there is nobody in Canada who knows more of the early days of telegraphy in this country and the United States than Mr. Robert F. Easson, superintendent of the press in the G.N.W. Telegraph Co. * * The chapter of reminiscences over his name in the special number recently issued by THE MONETARY TIMES is a very interesting story. The present article is only one of a number Mr. Easson has written on the subject."—*Daily Globe*

"THE MONETARY TIMES.—The special edition of this, the leading trade journal of Canada, was received on Saturday, and fully bears out the reputation which these special editions have now attained. In addition to the valuable information and editorials bearing on trade and commerce, there is quite a variety of excellent miscellaneous matter of interest to the general reader. THE MONETARY TIMES holds a high position as an authority on trade matters, and it was never more popular or trusted by the mercantile community than it is at the present time."—*Guelph Mercury.*

"Nos meilleures félications à notre confrère LE MONETARY TIMES pour ses succès constants. Son édition du 31 août est tout simplement magnifique, comme fond et comme forme. Sans conteste, il tient le premier rang comme publication commerciale de langue anglaise en Canada et figure avec avantage à côté des meilleures publications du genre faites hors de notre pays. La rédaction du MONETARY TIMES fait autorité en matières d'économie politique et d'appréciation des faits de la finance et du commerce et il est toujours profitable d'en faire la lecture."—*Le Moniteur du Commerce.*

"It is a pleasure to note Canadian enterprise—especially enterprise in Canadian journalism—and we beg to offer our able contemporary, THE MONETARY TIMES, our best congratulations on the enterprise ever noticeable in its management. It is not long since that journal came out in a new, clear-faced type and a superior paper. Like the fat boy in 'Pickwick,' we were moved to remark on beholding it, 'My! how nice you look!' And now comes a special holiday number of many pages, handsome cover, and varied contents. It is a credit alike to the genial editor, Mr. Hedley, and to his editorial and mechanical staff."—*The Week.*

"THE MONETARY TIMES has passed its twenty-seventh birthday, and donned also a new dress of beautifully clear-faced type, which makes mighty easy reading. The special issue dated Aug. 31st. is stated to

be an example of what their printing staff can do in holiday time, and certainly, without prejudice to any other printer, either here or elsewhere, we don't think that particular issue could be beat. THE MONETARY TIMES has always a flavor about it, both in its method and manner, which we find in no other commercial journal, and its make up from week to week is always characterized by a comprehensiveness of which those concerned may well feel proud."—*Our Monthly*.

"EARLY DAYS OF TELEGRAPHY.—The early days of telegraphy are graphically described in a most interesting article written by Mr. R. F. Easson, which appeared in the special August number of THE MONETARY TIMES. Mr. Easson commenced his career as a telegraph operator in Toronto over fifty years ago. He went to Chicago as soon as he became proficient at his calling, being then only fourteen years of age. In Chicago he was employed by Mr. Ezra Cornell as one of the very few operators then employed in Chicago. His experiences in that situation are most interesting. He was sent to the far South to instruct new operators. No linemen were then employed and he had the experience of repairing the lines in all parts of the country. In Chicago he used to assist Mr. Cornell, since become many times a millionaire, to clean up the battery at the Chicago office. His stories of what Chicago and its surroundings were fifty years ago show the wonderful growth of the West in that period of time. Mr. Easson is now the superintendent of the United Press Reports in Canada."—*Montreal Witness*.

"We heartily congratulate THE MONETARY TIMES on its improved appearance in its new dress of type and new 'make-up.' Before this improvement it was still the only commercial weekly which could be called attractive in typographical appearance, but its wide columns and clean type, and its artistically set advertisements, now challenge comparison with the best commercial papers of the United States or England. But it is not for this reason merely that we admire THE MONETARY TIMES. 'The apparel oft proclaims the man,' it is true; but it is only because the clean exterior may sometimes symbolize the inner character that attention is called to it. What the mercantile community of Canada may feel proud of is that it has one commercial journal which in its twenty-seven years of life has never wielded the club of the blackmailer. It has always regarded its own integrity as of more value than an advertisement, and hence the powerful influence it now exerts in commercial circles. Under the broad-minded editorship of Mr. Hedley, there is no danger that these traditions will be departed from." —*Journal of Fabrics*.

MONTREAL GAS COMPANIES AMALGAMATE.

The attempt to establish an independent gas company in Montreal, in opposition to the Montreal Gas Company, has not succeeded. The president of the new concern, the Consumers' Gas Company, complains that that enterprise had not received the support from the public and the press to which it was entitled. Especially was this the case in connection with the recent injunction whereby the Consumers' Company was compelled not only to stop the supply in the city, but to cut off from 150 to 200 consumers. The company, he said, was surprised and disheartened at the inaction of the press in the litigations and decisions against it by the courts. Again, he said, the public did not welcome the new enterprise pluckily. So long as the Consumers' Company's price was lower than that of the old company, there was no lack of applications, but when the latter reduced its price to the level of the Consumers' Company, many of these applications were cancelled, even after the mains were laid to supply these very customers.

The result has been the abandonment of the effort to carry on an opposition concern and the amalgamation of the new with the old. On Monday last a contract of amalgamation was signed by Mr. H. S. Holt, president of the Montreal Gas Company, and Mr. John Coates, president of the Consumers' Gas Company. The price paid the latter is $387,500. All the plant of the Consumers' Company, including their gas holder at St. Henri, pipes, mains, etc., would go to the amalgamated company, as well as a large number of subscribers who never used gas before, but who had been induced to do so by the reasonable terms offered by the Consumers' Company when it started. Gas stock has advanced during the week as a result of the amalgamation.

HOPS.

Reports from Prince Edward county are to the effect that this year's yield of hops will be fairly large. Early pickings were of good quality, but bad weather has injured later pickings, and some of the hops are showing discoloration. Growers' prices vary from 10 to 14c., according to quality, but transactions were difficult to make. This is because of the opinion that the season will be one of surplus stock on both sides of the Atlantic. The *N. Y. Journal & Bulletin of Commerce* says that the popular estimate for New York State is about 175,000 bales. Some anthorities claim that the yield will be nearer to 200,000 bales, despite the drawback of unfavorable weather latterly for picking, and that the Pacific coast will really do better than late revised estimates of the crop indicate. Letters received a short time ago estimated the German and Continental crop at 900,000 cwts. The same authorities have since raised their estimate to 1,000,000 cwts., and figure out a surplus of about 500,000 cwts. in Europe over the probable consumption there. Under the circumstances the weakness of the market is not surprising.

THE PALMY DAYS OF COTTON.

A Toronto gentleman recently came into possession of an interesting slip of paper, which he has handed to THE MONETARY TIMES. It helps to illustrate the changes in price of commodities during the American war, especially the great advance in cotton. To-day a sample of cotton, such as this bill of sale represents as disposed of for one dollar and forty cents the pound, would sell for probably eight cents the pound. The document is as follows:—

Account Sales of 25 Bales Cotton received from Louisville and sold for account of

MESSRS. CLAFLIN, BIGELOW & Co.,
Pro Cr. A. Hamilton & Co.

1864.

Nov. 14. Sold for Cash B.B.L. 25 B/ Cotton, weighing 12,410 at $1.40		$17,374 00
CHARGES.

E. E.
New York, December 5/64
Robert L. Maitland & Co.

FOR GROCERS AND PROVISION DEALERS.

California wine is to be sold at auction in New York.

Large quantities of Ontario apples are being sold in Winnipeg.

J. McCormick, Listowel, has bought a bakery in Woodstock.

Large shipments of Nova Scotia plums are being made from that province.

Malpecque oysters at the opening of the season cost $7 a barrel laid down in Montreal.

Over 400 barrels of cucumbers have been shipped from Maugerville, Sunbury Co., N.B., to St. John this season.

From Amsterdam comes word that arrivals of nutmegs are small, and in consequence an advance in price may take place.

The average annual rice product of China and Japan is 250,000,000,000 pounds; that of the United States only 156,000,000 pounds.

"It's a good thing this chicken can't talk," remarked the cross boarder. "If it could, its language would be too tough to print."

Shipments of apples from Montreal to Liverpool are beginning to get heavy. The "Sardinian" left last Saturday with over 3,000 barrels.

The licensed maple sugar producers of Vermont will unite in instituting a suit against the United States for earned bounties on the crops of 1894. The amount of claims involved exceeds $60,000.

In apricots, peaches, and prunes, says the California *Grocer*, holders and buyers for the most part stand and look at one another. The grower wants from 1 to 2c. more for his goods than the buyer can handle them at. One won't yield and the other can't.

This year has been the greatest cattle exporting year in the history of the North-West, and thousands of dollars have been received by the farmers from this source. Several more train loads are expected in the C.P.R. yards this week.—*Manitoba Free Press*.

There are plenty of apples in sight now. Half a dozen schooners are in with whole or part cargoes, two full ones arriving yesterday. There are many hundreds of barrels to chose from. Good Gravensteins can be got at about $2.50.—*St. John, N.B, Sun*.

A late estimate of the British Columbia and Northern pack of salmon this season puts Fraser River at 300,000 cases, Skeena River at 60,000 cases, Rivers Inlet at 40,000 cases, Naas River at 20,000 cases, Lowe Inlet at 8,000 cases, and Alert Bay at 1,500 cases.

The Pelee Island Wine and Vineyards Company of Brantford carry in their cellars over two hundred thousand gallons of matured wines. At one of their five wine houses they have pressed annually more than 1,000,000 lbs. of grapes. This certainly is an industry deserving of every encouragement.

Oyster fishing, says the Summerside, P.E.I., *Journal*, began on Monday, 17th inst., and the first shipment was made Tuesday morning. Owing to the heavy rain Monday afternoon, and other causes, the quantity caught was not nearly so large as on the opening day of previous years. Fishermen complain that the oysters are getting scarce in some sections of Richmond Bay, where they were formerly very plentiful.

From Ogdensburg, N.Y., comes the following:—"A novel question has arisen in the administration of the new tariff at this port. The Seattle Fish Company imports annually large quantities of Columbia river salmon, a fish which spawns in the upper estuaries of the Columbia river. Although in strictness a salt water fish, yet being hatched and killed in fresh water, the question comes up whether it is to be admitted free or is to be subjected to the duty of ½ cent per pound, which is prescribed for salt water fish. Collector Von Kinnon holds that they are dutiable, but in his letter he advises that the Department be asked for a ruling, intimating that it will probably decide in the importers' favor."

WHIFFS FOR SMOKERS.

In Portugal the tobacco tax brings £900,000; the land tax £700,000.

The harvesting of tobacco on the Walker farm, Essex county, was finished this week.

Canadian imports of cigarettes last year were valued at $15,122; the duty amounted to $17,229.

Tobacco five feet in height, says the *Edmonton, N.W.T., Bulletin*, is one of the novelties of the Stony Plain Mission district.

About 20 per cent. less heavy leaf tobacco was planted in the Southern States this year than in 1893, 100,000 acres.

"How do you like that cigar?" asked the man who had just presented his friend with a weed.

"Excellent. One of the best I have smoked in a long time."

"It was presented to me by a friend."

"Yes. I thought it must have been."—*Washington Star.*

No countries take much of our high cost tobacco. Great Britain pays on the average but ten cents per pound for the tobacco we send her. Considerable of our Kentucky stock finds its way into England, but more particularly Germany and other Continental countries. With the diminution in the demand from Chili for low grade Kentucky tobacco, Boston's exports have been considerably reduced. That country now takes higher grade tobacco on the average and is raising some. Of the tobacco we export Australasia takes the highest cost, averaging about 15 cents per pound, the West Indies pay 10 cents, Canada about 9 cents, Germany and France slightly less than 3 cents.—*Boston Commercial Bulletin.*

LIFE ASSURANCE MATTERS.

The New York Insurance Department has withdrawn the license of the Commercial Alliance Life Assurance Company, of that State. The company's name resulted from a deal between the Commercial Union and the National Alliance (assessment society) a few years ago. The company's capital is gone, it seems, and there is a deficiency of $76,115 in its assets. It is estimated by the department that the company's liabilities to its policy holders are $350,512, while its remaining assets only amount to $273,396.

One of the neatest bits of printing that have recently come our way is the morocco-covered book of Autograph Letters, issued by the Confederation Life Association. It contains a hundred or more letters, a number of them in *fac-simile*, from a hundred or more policy-holders of the company, expressing their satisfaction with the methods of the company and telling the profits their policies have earned. One man says: "More than seventeen years ago I took out a policy for $1,000 in your company, and the dividends paid were so satisfactory that in 1890 I took out $5,000 on your annuity endowment plan. I am a true believer in insurance." This man's faith is shown by his works.

Referring to the recent splurge in Toronto of the Mutual Reserve, the last issue of *Our Monthly*, under the heading of "A Great Man in our Midst," has this to say: "Edward Bascombe Harper, the great president of the Mutual Reserve Fund Life Association of New York, struck this town last week and had a high old time. He came presumably for the purpose of presenting the mayor with a portrait of himself (the mayor's self) done in oils, by Mr. Forster. We have long wished to see this great man Harper, and we have seen him and are satisfied. In appearance he is a cross between a western bull-puncher and a ship's crusher, the outward clay of course giving no indication of the greatness inside of it; and yet the man is well groomed."

The supreme lodge of the Ancient Order of United Workmen has just given a definition of fraternity which must be quite interesting to those who, fleeing from the grasping selfishness of legal reserve companies, thought that in the A. O. U. W. perfection had been attained. The definition of fraternity we refer to is as follows: "Members over forty-five years of age who are suspended for non-payment of assessments, cannot be reinstated." What a lot of old blood can be got rid of in hard times through this new definition of fraternity, says the *Argus*. It may also keep out young blood, which the A. O. U. W. and other organizations of a like nature cannot live without

FIRE INSURANCE MATTERS

Many Canadians who have known the late George M. Greer, of Halifax, first in connection with the branch of Dun's Mercantile Agency in that city, and of late years as a successful insurance agent, will have learned with regret of his somewhat sudden death. The management of the insurance agencies which he held has been finally settled, Mr. Geo. E. Faulkner and Mr. Fraser Cameron having received the appointment, the firm to bear the name of Faulkner & Co. This appointment, we understand, practically includes all Mr. Greer's agencies, namely, those of the Western, the Manchester, the Connecticut, and the Canada Accident.

The recent forest fires in Minnesota and other North-western States, with their shocking results in loss of human life and loss of property, have caused the people of those States to look more carefully into the causes of fires, and to search for the most convenient and effective means of suppressing a blaze in its early stages. Messrs. MacLeod & Co., of Woodward avenue, Detroit, tell us that the orders for their recent invention, MacLeod's Portable Fire Extinguisher, have been numerous since those fires. The lumbermen want the machine for their shanties, the railways want it to protect their stations, and the farmers are arousing to think that it must be a good thing for their barns and outhouses. Mr. MacLeod's invention consists of a zinc or copper cylinder or barrel containing nested buckets, each having communication with alum water in the tank, so that they may be withdrawn successively, each being filled with the fluid. There are wheels on the tank, which can be wheeled to where the fire is, and the buckets taken out of the tank one after another with great rapidity, enough water being quickly available to meet any ordinary emergency. The tank contains cans of ammonia, which in case of fire can be easily poured into the water, making an excellent fire-fighting fluid. The machine is intended for use in warehouses, factories, mills, lumber yards, railway stations, stores, hotels. It has been approved by the fire authorities of several States, and we understand is to be made in Canada, where the inventor has had it patented.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Sept. 27th, compared with those of the previous week:

Clearings.	Sept. 27	Sept. 20
Montreal	$12,006,890	$12,097,597
Toronto	4,944,346	4,743,964
Halifax	1,174,374	1,023,995
Winnipeg	1,272,022	929,753
Hamilton	546,477	743,326
Total	$19,944,109	$19,538,635

Aggregate balances this week, $2,069,094; last week, $2,935,394.

—There is to be held, on October 1st to 27th, in the Mechanics' Building, Boston, a World's Food Fair. George H. Bond is general manager, A. C. Dowse, press representative, and J. H. Wright, secretary. This food fair, the circular tells us, is held under the auspices of the Boston Retail Grocers' Association, and is an honest effort to improve the method of distribution, selection and preparation of our food supply

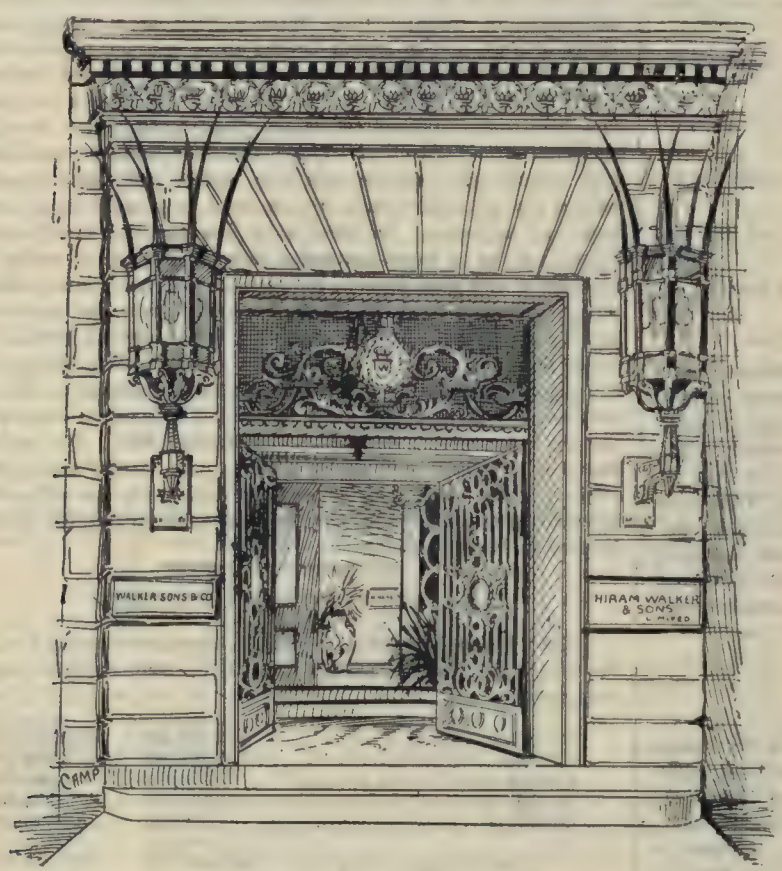
The appointment of Mr John Torrance to a seat on the Board of Montreal Harbor Commissioners appears to have given satisfaction. It was felt, and not without reason, that it was due to the shipping interest that ship owners or agents should have a larger relative representation on the board. This lack the appointment of Mr. Torrance will in a measure fill.

—Our readers are aware that perpetual 4 per cent. debenture stock of the Canada Permanent Loan and Savings Company is held in the Old Country. We learn from the last issue of the London *Post* that this stock is now quoted on the London Stock Exchange at 100 to 102, which is an advance on the previous week's quotations, and an indication of the trans-Atlantic standing of this old Canadian mortgage company.

A MODERN OFFICE OPENING.

It has long been known by hearsay to the dwellers in Western Ontario that Walkerville is a busy town on the Detroit River, the seat of a number of manufacturing and other industries, notably those of Hiram Walker & Sons, limited, which have given the place its name. But very few of the thousands who pass and repass near it by boat or rail have visited the town. Few, even among the friends and customers of Walkerville firms, had up to Thursday last any notion of what the seat of their works was like. But on that day thousands of business men from the United States and Canada visited the place on the invitation of the great distilling firm, the occasion being the opening of their new offices. And a fresh and pleasing idea of Walkerville has been the result, even to those who had some slight acquaintance with the town.

The formal opening was fixed for Thursday, 20th September. On the day previous, or on the morning of Thursday, invited guests began to arrive from a distance, and were domiciled at the Crown Inn or at Windsor hotels. About two p.m., the Grand Trunk brought two special cars of Chatham, London, Hamilton, Brantford, Toronto and Montreal mercantile men and professional men to do honor to the enterprise of their western neighbors and friends, the Walkers. They were met at the train by Mr. Frank Walker and Mr. Wm. Robins, the secretary of the company, and at once escorted to the Music Hall, where covers had been laid for 150 people. New York, Boston, St. Louis, Chicago, and other American cities furnished their quota of visitors. With appetites sharp enough to be appeased with almost anything, the diners were regaled with one of the most—not elaborate, not tedious, not formal, but—elegantly simple and wholly delicious repasts that any man need desire.



THE MAIN ENTRANCE.

Before it began, and the moment the guests were seated, Mr. F. H. Walker—who sat at the head of one of the tables, while Mr. Robins, the secretary, and Mr. Lund, travelling representative of the Company, occupied like positions at other tables—made a brief address of welcome. In the name of the house he thanked them for their presence, and bade them enjoy themselves. "It may seem strange to you, gentlemen," said Mr. Walker, "that I should choose this moment to address you. But your train being late, and arrangements for festivity elsewhere in the grounds calling me to leave you shortly, I must say a few words now. Possibly many of you do not know, I confess I do not yet know, what an office-opening is. But with your kind assistance it is proposed that we shall find out. We are desirous, gentlemen, that as many of you as can shall take a look round Walkerville, and judge for yourselves of its progress and its present condition. This is essentially a town built up by, and largely dependent upon, the spirit-distilling business. When you see within its borders and in its outskirts how many industries cluster around the main distilling industry, you may perhaps conclude that there is more of good in the whiskey business than our teetotal friends give it credit for. I again bid you welcome, gentlemen, and trust you will enjoy your visit to Walkerville."

As the lunch proceeded under the deft attentions of the twenty Chicago waiters, the guests at the tables began to fraternize. And although no arrangements were made for toasts or speeches—for, indeed, what the hosts seemed to desire was to avoid speech-making and modestly to offer no opportunity for it, Mr. Gilmore, of Louisville, Ky., who had come on to represent that leading trade organ, "Bonfort's Wine and Spirit Circular," rose and proposed "the health of Mr. Hiram Walker," to which some one added, "and of his sons and associates." This brought forth hearty huzzas and the singing of "They are jolly good fellows." Mr. Robins acknowledged the toast, and made the announcement that the Messrs. Walkers' steam-yacht "Pastime" was at the service of the visitors, who, however, owing to their number could not all go on board at once. It had, therefore, been arranged, he said, that those guests should be divided into two parties, one to take the four o'clock trip and one that at five.

These trips on the water were very delightful. The day was one of the most beautiful of Canadian autumn days, with clear sky and just breeze enough to be pleasant. Up the noble Detroit River went the swift boat, through the drawbridge, past Belle Isle Park, towards Lake St. Clair, her occupants chatting and singing as they went. Returning passed *Isle aux Peches*, on which is the summer residence of Mr. Hiram Walker; passed, too, many a stately steamer, of wood or steel, bound to the farthest ends of the Great Lakes, and reached the Walkerville wharves to find them crowded with ferry-boats, pleasure steamers, steam-yachts, containing Detroit people, who streamed up the green sward, whose gentle ascent led to the new office buildings, the occupancy of which the guests had come to celebrate. The invitations to this opening had numbered thousands, and it seemed that the thousands had all come. The Detroit yachting fleet, of which Mr. Frank Walker is a member, had evidently desired by the presence of representatives to do honor to the occasion; and the United States Druggists' Association, in session at Detroit, had taken occasion to land from their excursion steamer, the "Sappho," a brass band of twenty-five pieces to play upon the lawn—a very graceful compliment. The parterres of flowers were sometimes in danger from the crowds, but the arrangements were so good, the heads of the firm and their assistants had so carefully provided for the disposition of each new group arriving, that there was no confusion. The great marquee in the grounds was a centre of attraction, decorated as it was with flowers and shrubs and its tables laden with delicacies.

Three persons out of four stopped in spite of themselves, on the way to enter the new office building, struck by the harmonious beauty of the structure. The river front has two stories, and the first is entered by means of an exterior double stairway of pink stone, whose steps curve round a fountain spreading water from its lion-like gargoyles. The exterior of the building resembles an Italian palace of the severe Florentine style. The walls are of Potsdam sandstone and Canadian terra cotta of a pinkish brown. There is no attempt at elaborate decoration; indeed, the only features of the front apart from the enriched cornices and bases that mark the architectural style and the graceful effect of the curving stairways and railed landing, are two cartouches bearing the firm monogram, and the name on the topmost frieze:

HIRAM WALKER & SONS, LIMITED.

Over the building floated a red and yellow ensign, bearing the trade mark with which the product of this house has made people familiar. And over several of their adjoining buildings floated the Union Jack or the British ensign. Owing to the necessity for skylights in the large general offices on that side, the south, or town, front is of but a single story, which faces the main street of Walkerville. The entrance is through a lofty archway with heavily-grated doors of hammered bronze, above which the firm monogram appears in bold relief in a bronze design. These ponderous doors admit you to a roomy vestibule, the halls and ceiling of which are of majolica. Up a few steps a pair of heavy oak doors, studded with bronze rosettes, divide the vestibule from the corridor entrance. A great blue vase on a pedestal stands at the entrance. The floor of the vestibule is a mosaic, after the design of San Miniato, the old church at Florence. Its curious arabesques are illuminated at night by an antique lamp like that of the Borghesi palace. A directory on the corridor wall, with distinct brass letters, gives the names of the various corporations with headquarters in the new building. There you read:

Hiram Walker & Sons (Limited).
Walker, Sons & Company.
The Walkerville Land and Building Company (Limited).
Hiram Walker.
The Walkerville Gas and Water Co.
The Mettawas Summer Resort Co.
The Lakeside Navigation Co.

The Messrs. Walker are the controlling spirits and principal, if not sole, stockholders in all these concerns, each of which has a separate office and a distinct staff.

Inside the building the strains of music floated through the rooms from Valesi's mandolin orchestra, placed in the clerestory overlooking the main offices, and the mellow sunshine streamed from the great central skylight framed in oaken beams interlaced like the ceiling of an ancient castle. Here and there in the corridor were palms and ferns, making rich contrast with the marble pillars.

The general offices are on the street level, and their fittings are those of a metropolitan banking house. All the desks and vaults are in enclosures, formed by polished oak wood-work and great panes of plate glass with railings of ornamental brass-work. Every desk and chair exactly matches the wood-work, and conforms to the style of architecture in which the room is finished.

The wood-work, in quartered oak, of the public offices, in its joining and carving does great credit to its executants, the Globe Furniture Company, of Walkerville. Indeed the entire woodwork was done by them, including the exquisite carving which is seen throughout the reception room and private offices. Behind the general offices and extending the entire length of the building is a ten-foot corridor on a level some

two feet higher than the main floor. From this doors open into the series of private offices and the reception and sample rooms. A stairway also leads to the clerestory above, and to the board room and the gymnasium and the cafe. This story is supported from the main floor by pillars of Numidian marble. The general reception room is separated from the corridor by double doors, and into this room is the entrance from the river side of the building.

The architecture of the reception room is in the French style of Francis I., patterned after the interior of Chateau Blois. The great red mahogany fireplace has its original in the Chateau of Chenonceaux. It extends from the floor to the ceiling, and in the centre is a fine oil painting of Hiram Walker, the founder of the business. The furniture in this room was secured from the Italian exhibit at the World's Fair, and was for the most part made in Venice. There are richly carved tables and numerous chairs of exquisite design and workmanship. Rich rugs decorate the floor, and several great urns have positions in which they add new suggestion to the elegance of it all.

For two years and a half these beautiful quarters have been slowly reaching completion. The general scheme of the interior is that of a central square for the main offices, the sky-lighted ceiling of which is supported by Corinthian pillars of Numidian marble, while a colonnade of smaller pillars of like material bounds the clerestory above. No glare of gilded capitals offends the eye: the color scheme is admirably subdued; a pleasing tone of rich simplicity everywhere declares the belief of the proprietors that beauty and elegance of surroundings are not incompatible with business. Still more, that Messrs. Walker have shown their desire for the comfort and health of their employees in the provision made throughout this building for pure air, abundant light, and the greatest possible convenience of structural arrangement. The basement contains a labyrinth of ventilating pipes, electric wires, heating apparatus, refrigerating plant, air fans, engines, dynamos, drains—whatever modern science has revealed as conducive to health and good spirits. The architects, Messrs. Mason & Rice, of Detroit, have demonstrated in a marked degree their knowledge of the requirements of a great and busy concern, and their ability to provide for them. They have been allowed to illustrate as well, through the aid of wealth liberally and intelligently applied, the charm of artistic surroundings for commercial pursuits.

No description would be complete which omitted to describe, as well as pen and ink can do, the private offices. These are semi-separated, as has been said, from the public chamber by a raised corridor, running east and west along the north side of the building, each room commanding a view of the main offices. The reception room has already been mentioned. Most of the adjoining chambers illustrate in their fittings the Renaissance period of architecture.

Mr. Hiram Walker's office, for example, is finished in old English oak in the style of Francis I. The elaborate fireplace is a *facsimile* of the one in the Museum of Orleans, France. This, as well as the other private offices, overlooks the river.

E. C. Walker's office is also in English oak, very dark. The front of the fireplace is of yellow Numidian marble, above which is a richly carved frieze. It was patterned after the fireplace in a chamber of the Doge's palace in Venice. The paintings are framed in gilt to brighten the dark wood and heavy colors of the rugs.

J. Harrington Walker's office is finished in the same wood and style of Italian architecture. The fireplace here is inspired from the one in the ducal palace at Urbino, Italy. Its front is a marble mosaic.

Frank H. Walker's private apartment is finished in rich red mahogany, in the style of the sixteenth century. The fireplace is of elaborate design, with a front of Mexican onyx.

The largest and most business-like of the private offices is occupied by William Robins, who holds the important post of secretary of the firm. It overlooks the general offices where the clerks are at work, and is in communication with every other room in the building by electric call bells. Its design is after the style of the Elizabethan period, and the high wainscotting is of gum wood. There is an immense fireplace with a front of serpentine marble.

In every one of these offices the roll-top and flat chairs, desks and other furniture are of the same wood as the wainscotting and mantels, and the chairs are carved with the familiar trade mark. They are furnished with rare bits of bric-a-brac, and excellent paintings. Apparently there was a determined striving after the beautiful and artistic. There is scarcely an electrolier, fireplace, urn, ceiling or panel about the various apartments which is not a faithful copy of a famous original in some palace or public building of the old world.

There is one more interesting room in this series which is called the sample room. It has cases with glass doors on the walls, and on one side an immense sideboard. The wood is gum wood stained very dark—almost black—and the furnishings are of the ancient German pattern. Its wrought iron antler lamp and quaintly carved chairs are such as one might find in a prosperous Nuremberg wine-room. The cases on the walls are to be filled with all sorts of sample bottles, showing in what quantities and forms the produce of the great Walkerville distilleries is prepared for the market.

On the second floor is a large room where the directors of the various Walker corporations will hold their meetings. On the table in that room on the occasion of the opening were a dozen elaborate prize cups given by Walker & Sons to champion athletic organizations of the Dominion, such as those of curling, bowling, race meetings, cricket, and the like. There is provision also for a large gymnasium, fitted with every modern appliance to build up muscle and health, shower baths, etc. At the other side of the clerestory is the lunch room, kitchen and pantries for the private use of the heads of the concern and their visiting friends.

An unusual modesty on the part of the principals of the house characterized the proceedings. They seemed to wish visitors to see the town and its many industries, but they shrank from ceremony and gave no opportunity for speech-making or glorification of the hosts in this unique house-warming. Some few of the visitors, it is true, were allowed the pleasure of a hand-shake with the venerable founder of the business, Mr. Hiram Walker, in his private room. But these were almost exclusively those whom the old gentleman had known long and well, or whose business relations with the house were intimate. Old age and delicate health were probably the reasons why he found it unadvisable to take a more prominent part in the opening.

An agreeable feature of the occasion was the entertainment given to the employees of the house and their wives. The afternoon reception was designated from two to six, though it was more nearly seven when the last of the visitors left. But at eight o'clock the doors were again thrown wide, the marquee was again opened and the bands played, this time for the pleasure of the Walkerville folk to the number of four or five hundred, who were escorted through the various rooms by the younger Messrs. Walker, Mr. Robins, Mr. Ambery and office staff, and were afterwards given a bountiful repast in the marquee on the river bank. The fulness of this evening gathering, and the warmth with which the guests were received bore eloquent testimony to the friendly relations between the heads of the establishment and their work people. It was true, as a shrewd observer said, that the men seemed to take as much pride in the magnificent headquarters of their employers as if their own fortunes were invested in them, and the long life of Hiram Walker & Sons was pledged and drunk with right good will.

It may be guessed that the catering for so great a throng of people was no ordinary effort. But the scale on which it was gone about showed the resources of the caterer, who was Kinsley, of Chicago. His manager is alleged to have said, "We came here to-day prepared to serve seven hundred people without washing a dish." At any rate everybody was well served, and there were no signs of dish-washing. A manager, a chef, and twenty waiters were brought from Chicago, together with several car-loads of material, and such table appointments one does not see every day. "Thishyer's Sh'cago ice-cream, sah," said a coaxing waiter. "It's right nice, sure—made thah yistiddy by machin'ry. Better hev sum, sah."

The day was one long to be remembered by those who took part in the festivities.

—Toronto's share of the receipts of the Bell Telephone Company for the quarter ending 31st August was $1,855. The gross receipts amounted to $37,099.

Meetings.

LONDON AND ONTARIO INVESTMENT COMPANY, LIMITED.

The seventeenth annual meeting of the shareholders of this company was held on the 20th day of September, 1894, at the company's office, No. 84 King street east, Toronto. The following shareholders were present: Messrs. W. H. Beatty, John Catto, E. M. Chadwick, John I. Davidson, Henry Gooderham, W. B. Hamilton, Charles Hooper, A. E. Lee, James Mason, J. F. Michie, Alex. Nairn, Charles Stuart, John F. Taylor, Fred Wyld and others.

At the hour of twelve o'clock, noon, the chair was taken by the vice-president, Mr. W. H. Beatty, and on motion to that effect, the manager of the company, Mr A. M. Cosby, was appointed secretary of the meeting. After reading the published notice calling the meeting, and confirming the minutes of the last annual meeting, the following report and statements of account were presented and adopted.

REPORT

The directors beg to submit to the shareholders their seventeenth annual report, with the usual accounts for the fiscal year, which closed on the 30th day of June, 1894.

The business of the past year has, on the whole, proved satisfactory, but in consequence of the reduction in the rate of interest obtainable here, and the great decline which has taken place in the price of farm produce, affecting the whole world, including the Dominion of Canada, the net earnings are somewhat less than those of the previous year. The directors congratulate the shareholders that, notwithstanding these drawbacks, the company has been able to maintain the usual dividend at the rate of seven per cent. per annum, and place a substantial sum to the credit of Property Suspense account. The figures, as shown by the accounts submitted, are as follows:—

Net earnings, after providing for interest on debentures, municipal tax, and all expenses		$52,751 37
Paid two half-yearly dividends	$38,500 00	
Addition to property suspense account	14,251 37	
		$52,751 37

It will be further seen that the amount under investment shows a slight decrease compared with the amount at the end of the previous fiscal year. This is the result, in a great measure, of the conservative policy adopted during the period under review, in the selection of new mortgage loans.

The two provinces in which the company's business is transacted, Ontario and Manitoba, show signs of healthy improvement in business conditions, owing, in a great measure, to the abundant harvest of the present year.

The usual care has been given to the work of inspecting properties under mortgage, and the books of the company have been regularly examined by the auditors, whose report is appended hereto.

All of which is carefully submitted

FRANK SMITH,
President.

PROFIT AND LOSS ACCOUNT FOR THE YEAR ENDING JUNE 30TH, 1894

Expenditure

Expenses of management, directors' and auditors' fees		$ 12,486 61
Office expenses, rent, postage, advertising, etc.		3,404 68
Expenses in connection with debentures issued		1,513 08
Inspection charges		1,882 99
Manitoba expenses		5,246 11
Paid during year for commissions		
On loans	$1,025 21	
On debentures	2,259 66	
		3,284 87
Interest paid and accrued on debentures		95,595 80
		$123,864 09
Balance—Net revenue		52,751 37
		$176,115 46

Receipts.

Interest on investments	$176,115 46

A MORGAN COSBY,
Manager

Toronto, Sept 4th, 1894

To the President and Directors of the London & Ontario Investment Co., Limited :

GENTLEMEN,—We beg to report our completion of the audit of the books, accounts and vouchers of the London & Ontario Investment Company, Limited, for the year ending June 30th, 1894.

The mortgages, debentures, and other securities have been inspected in detail, and the amounts correspond with the totals as set forth in the ledger.

The accompanying statement of assets and liabilities, receipts and expenditures, are hereby certified as correct.

We also verify the balance of cash in the banks

Yours respectfully,
W R HARRIS,
THOS HODGETTS, } Auditors

The vice-president, Mr. W. H. Beatty, moved, seconded by Mr A B Lee that the annual report and statements of account for the year ending June 30th, 1894, be adopted by this meeting

In moving the adoption of the report, the vice-president expressed his regret that the worthy president—Sir Frank Smith—who had during the past sixteen years occupied the chair on similar occasions to the present was not with them to-day. He had met with a rather serious accident on one of the public thoroughfares of the city, an electric car having struck the carriage in which he was driving. He was glad to say that he was progressing favorably and hoped to see him convalescent in a short time.

He stated that the accounts and report required no explanation or comment from him, they spoke for themselves. He had, however, something to say regarding the city of Toronto. A few years ago the value of property was very much inflated, and this was followed by a depression which has occasioned some anxiety to loan companies. Our own company has suffered only very slightly. The directors were careful and prudent in making loans in the city, and the result is that at the present the properties now in the company's hands held for sale amount only to $17,000, on which a very small loss is anticipated. Alluding to the Province of Ontario he stated that although the effects of the general depression and depreciation in the value of farm produce affecting other countries as well as Canada are felt to some extent,

Continued from page 421.

nevertheless the crops this year are excellent, and in consequence, more enquiries are being made for farm properties than for some time past.

As to the Province of Manitoba, he thought that the prospects are better this year than ever before, no storms or damage of any kind having interfered with the ripening and harvesting of the grain crops, and that this certainly was a good augury for the future of the province. Like other companies taking investments in the Province of Manitoba, we have some properties for sale owing to default on the part of the mortgagors. To realize upon these, the company has adopted the plan of appointing a special salesman, who has disposed of some of the properties at the prices they were held by the company, and he states further that he has good reason to think that he will show a favorable result as regards those now in his hands for sale.

He also alluded to the fact that the gross receipts from interest this year amounted to $12,000 less than the similar item for the previous year. He pointed out that this was offset to a large extent by a reduction in the amount paid as interest on debentures, $7,000, and a reduction in the amount paid for commission, $3,000, on placing debentures and loans, leaving the net revenue $2,000 less than the net revenue of the year ending June, 1893.

Mr. A. B. Lee, after also expressing regret at the absence of the president, stated that he did not know that he could add to what had already been said. The directors had experienced more difficulty than formerly in securing satisfactory investments.

The rate of interest obtainable on loans is now much lower than it was five or six years ago, and no better securities are now offered. In consequence of this the directors have had to exercise more care and attention, and have closely scrutinized all applications for loans before accepting any.

Taking the report as a whole, he thought it ought to be satisfactory to the stockholders. The directors have not added to the Rest account, which remains at about 30 per cent. of the paid-up capital, but have placed over $14,000 to the credit of Property Suspense account This he considered a wise thing to do, because if any losses are incurred in selling properties, such losses will be amply covered by the amount at the credit of that account Although the profits are less than those of the previous year, the expenses have also decreased, and the future, he thought, was most hopeful. He had much pleasure in seconding the adoption of the report.

The following resolutions were also adopted:

Moved by Mr. Charles Hooper, seconded by Lt.-Col. Davidson, that the thanks of the shareholders are hereby tendered to the president, vice-president, and directors for their personal attention to the business of the company during the present year, and that in recognition thereof the sum of $2,500 be awarded them.

Mr. Hooper, in rising to move the above resolution, stated that he did so with very great pleasure. He also regretted the absence of the president, and was pleased to hear that he was progressing as well as could be expected. It was gratifying to know that the Rest account was nearly one-third of the Capital account, and he thought it a wise thing to place the profits to the Property Suspense account. He had much pleasure in moving the resolution, and he desired to thank the directors for the care they had taken of the affairs of the company.

Lieut.-Col. Davidson seconded the motion, and expressed himself to the effect that the directors instead of having $2,500 awarded them this year, should have had the same as last year, $3,000. In these times of depression the directors had to give more time and attention to the affairs of the company, and instead of their remuneration being less, it should be more.

The vice-president stated that the matter had been discussed by the directors prior to the meeting, and they were satisfied with the smaller amount. The resolution then passed at $2,500.

Moved by Mr. John Catto, seconded by Lieut.-Col. Mason, that the sum of $400 be appropriated for the services rendered during the past year by the auditors, and that Messrs. W. R. Harris and Thomas Hodgetts be reappointed for the current year; and in case of the death or resignation of either or both of them, the

Board be and are hereby empowered to appoint others in their places.

Moved by Mr. J. F. Michie, seconded by Mr. Henry Gooderham, that the poll be now opened for the election of directors, and that the same shall be closed whenever five minutes shall have elapsed without a vote being tendered, and that Messrs. E. M. Chadwick and James Mason be the scrutineers, and that they report the result of the election to the meeting, and be paid the sum of five dollars each for their services.

The election of directors was then proceeded with, the members of the retiring board being re-elected unanimously, as under: Hon. Sir Frank Smith, Messrs. W. H. Beatty, William Ramsay, W. B. Hamilton, A. B. Lee, Alexander Nairn, Fred. Wyld, Henry Gooderham, and John F. Taylor.

The meeting then adjourned.

At a meeting of the new Board, held at the close of the annual meeting of shareholders, the Hon. Sir Frank Smith was re-elected president, and W. H. Beatty, Esq., vice-president of the company.

BANK OF ENGLAND.

The semi-annual meeting of the directors of the Bank of England was held in London on the 13th instant. Mr. David Powell, the governor of the bank, announced a slight decrease in the dividend, which was due to the low value of money. The net result of the operations of the Baring liquidation, he said, had been to reduce the liabilities of the bank to £2,481,985.

After the resolution declaring a dividend was passed, Mr. Clark, one of the principal shareholders, moved an enquiry into the irregularities of the late cashier of the bank, Frank May, especially with reference to his treatment of customers of the bank who lost £250,000 through May. He also charged that May had misled customers in many ways. He cited three instances in which May had induced customers of the bank to make large investments in Chicago and Great Western bonds, and was proceeding to refer to the case of another client having lost tens of thousands of pounds upon May's advice, when Governor Powell interrupted him, and replied that the bank had arranged the affair of Mr. Hope. Mr. Clark said the bank's honor had been seriously affected apart from the case of Hope, and it could not be set right without enquiry. Mr. Powell declined to debate the matter, and the motion was dropped without being seconded.

Commercial.

MONTREAL MARKETS.

MONTREAL, Sept. 26, 1894.

The stock market opened this week very active, and almost with an old time boom, the feature being the advance of four points in Gas, due to the accomplished amalgamation of the rival companies. Quite a heavy amount of trading has been done, at figures going up to 183½, but which eased off to-day to 182¼. A good business has also been done in Commercial Cable, which advanced from 141 to 144½. Richelieu advanced from 85 to 88½ under reported ten per cent. earnings. Banks and industrials dull and without notable change. Money very plentiful, and all the call money wanted can be had at 4 per cent., provided security be first-class.

ASHES.—The English market is very strong, showing an advance of 1/3d. from recent lowest point. Local values are stronger, and we again advance quotations for No. 1 pots to $4.35; seconds are wanted and would bring $4; of pearls there are practically none here, and $8 would be a nominal quotation. Receipts for the month so far are 85 brls. of pots.

CEMENTS AND FIREBRICKS.—Not a great deal has been done in cements for the last week or so, but stocks are comparatively light, and prices are steady at $1.95 to 2.05 for English, and $1.85 to 1.95 for Belgian. There are only three or four more steamers to arrive this season carrying cement, and there will be nothing like the stocks carried over this winter that there were last winter. Firebricks are firmer, and Scotch makes are somewhat difficult to get, owing to the coal strike; prices range from $15 to $20.

DRY GOODS.—Sorting orders are beginning to come in fairly from country districts, and with some colder weather, such as the last few frosty nights, business will no doubt become more active. City retailers have had a particularly poor summer, and will gladly hail the approach of cold. Many first-class marks among city traders, who have been generally cash buyers, are now taking full credit terms, and it will have been noticed from our summary columns of late that failures have been much more numerous than usual at the season among

OUR success at the recent fairs is unprecedented. Every practical farmer who examined our fence was captivated, and declared that he would build no other.

the weaker class of city traders. Letters from buyers now in England report much firmness in woolens in British markets, and they anticipate higher prices. Quotations for domestic cottons for spring delivery are somewhat revised. Denims and cottonades are lower, the former about 15 per cent., the latter from 5 to 7½ per cent.; flannelettes are also a shade lower; grey cottons are subject to slight advance, whites are stationary.

Total grain	692,334	694,102

GROCERIES.—We note a continued steady distribution of goods to country buyers, though not in any very large parcels. The main interest still centres in teas, of which holders are very firm in their ideas. Advices from New York announce a strong market there for Japans, and a private letter just received from that city states that all reports from the East are very stiff in character. One leading New York house, generally reputed to be pretty shrewd operators, have been liberal buyers of stock on spot and also to arrive. A New York tea man who was in this city last week took back samples of Japans available here. Sugars are quoted exactly the same as a week ago. Barbadoes molasses is quoted at 27½c per gal in lots, and 30c. by the puncheon. California loose muscatel raisins have apparently been received with favor in this market, and we hear of some fair orders being placed for new crop, which means the displacement of just so many Valencias. These goods will sell at 6 to 6½c. Canned goods dull; packers are quoting tomatoes at 90c., but are withholding quotations for corn.

HIDES AND TALLOW.—Hides are scarce in the local market, and the firmness of price is maintained. There is more demand for heavy steers than there has been for some time, and also a good enquiry for ordinary. Dealers are buying No. 1 green at 4c. per lb., and sales to tanners are reported at 4½ to 5c. for cured, some dealers being inclined to be stiff on the latter figure; heavy steers are bought at 5c., and tanners are asked 6c.; lambskins 45 to 55c. each. Tallow 5 to 5½c. per pound.

LEATHER.—There is a hardening tendency in prices; holders are firmer in their views, believing that the advance in hides will stand, and anything in the way of a fair demand would lead to higher prices. As it is some [illegible] the larger [illegible] manufacturers are [illegible] purchases ahead, but there is [illegible] doing to warrant a general revision of quotations. Splits are in light supply, and 16c is now asked for best. The English market is evidently in better shape and quotes a trifle better. Letters have been received by last mail asking for consignments, and stating there is an improved demand there with steadier prices, though no decided advance has yet been established. Shipments of sole go steadily forward. We quote: Spanish sole, B A, No 1, 18 to 20c; do No 2 to B A, 16 to 17c; No 1 ordinary Spanish, 17 to 18c; No 2, 15½ to 16½c; No 1 slaughter, 18 to 20c; No 2 do, 17 to 18c; American oak sole, 39 to 43c; waxed upper, light and medium, 24 to 26c; do heavy, 20 to 24c; grained, 24 to 26c; Scotch grained, 25 to 27c; splits, large, 13 to 16c; do small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c; imitation French calfskins, 60 to 70c; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 14½c; russet shoepacks linings, 30 to 40c; harness, 18 to 25c; buffed cow, 9 to 11c; extra heavy buff, 12½c; pebbled cow, 8 to 12c; polished buff, 9 to 11c; glove grain, 9 to 11c; rough, 16 to 18c; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Scotch warrants are cabled easier at 43s. 6d., but on the spot there is additional firmness in pig iron, and $21 is now being asked for Summerlee in small lots, and $19 50 for Carnbroe, which are about the only brands of Scotch now available here. Domestic iron is also a shade firmer at $16 50 to $17. Canadian bars are now regularly sold at $1 65 in small lots. There is again reported to be trouble in the nail trade, and a meeting of manufacturers is about being held, so that some revision of prices is not improbable shortly. Tinplates are perhaps a shade firmer. In Canadas there has been some sag, and they are quoted as low as $2.05; Ternes also easier at $5.75 to 6.00. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here, Summerlee, $20 50 to $21; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19 50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18 to 19 00; Siemens, pig No 1 $16 50 to $17.00; Ferrona, No. 1, $16.50 to 17 00; machinery scrap, $14.50 to 15 00; common do., $10 00 to 12.00; bar iron, Canadian, $1 65; British, $2 25; best refined, $2 40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2 05 to 2.10; all polished Canadas, $2 75; Terne roofing plate, 20 x 28, $5 75 to $6 00. Black sheet iron, No 28, $2 30 No 26 $2 20 No 24, $2 10; tin plates—Bradley charcoal, $5 25 to $5.50; charcoal I.C., $3 50; P.D. Crown, $4.00, do I X, $4 75 to 5 00 Coke I.C. $2 85 to 0.00; coke wasters, $2 75; galvanized sheets, No. 28, ordinary brands, 4½ to 4¾c.; No 26, 4c.; No 24, 3¾c., in case lots. Morewood 5½ to 6c; tinned sheets, coke, No 24, 6 to 6½c No 26 6½ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2 30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2 00 to 2.15; ditto, three-sixteenths inch, $2 60; common tank iron, $1 65 to 1 85; heads $2 85 Russian sheet iron 10 to 10½c lead per 100 lbs., pig, $2.85 to 2.95; sheet, $4 00 to $4 25, shot, $6.00 to 6 50; best cast steel, 10½ to 12c; spring, $2 50; tire, $2 50 to 2.75; sleigh shoe, $2 40, round machinery steel $3 ingot tin 18 to 18½c., bar tin, 25c ingot copper 10 to 10½c, sheet zinc, $5 00 to 5 25 spelter $4 50 to 4 75, American do., $4 50 to 4 75 Antimony 10 to 12c bright iron wires, Nos 0 to 8, $2 65 per 100 lbs; annealed do $2 70 galvanized $3 35 the trade discount on wire is 20 per cent; Barb and twisted wire and staples 4p. Coil chain, ¼ inch, 5c ⅜ inch 4½c 7-16 to 4½c ½ in., 3¾ to 4c., ⅝ in., ¼c; ¾ in., 3½c; ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Wholesale men report a satisfactory movement. Prices are about as last quoted. Linseed oil is if anything firmer, but hardly quotably so. Turpentine a little easier, and can be bought at 44c in small lots. Fish oils dull and easy. Glass steady at quotations and not likely to change this fall. We quote: Turpentine, 44c. per gallon for single barrels, two to four barrels, 43 to 44c. Linseed oil, raw, 54c. per gal.; boiled, 57c. 5-barrel lots, 1c. less; olive oil machinery, 88 castor in lots, 6½c single cases 6¾ to 6¾c; 7c. Nfld cod, 38 to 40c per gal Gaspe cod 48c per gal steam refined seal, 48 to 50c, in small lots. Leads (chemically pure and first class

TORONTO MARKETS.

TORONTO, Sept. 27th, 1894.

DRUGS.—While a fair number of orders are being received, there is no general buying of large quantities. Demands appear to be made only as immediate requirements suggest. Values on the whole are steady and characterized by no special change. Opium is steady. Quinine has not altered, and holders do not appear anxious to push business. Foreign advices regarding Norwegian cod liver oil indicate a strong market with an upward tendency in prices. Trieste colocynth apples are scarce abroad. Mercurials are slightly easier. Camphor is firmer, with the market unsettled.

DRY GOODS.—Orders from travellers are most satisfactory, but the house trade is small and few merchants are in the city from the country. The cold spirt of the last few days has served to brighten things up, and if continued for any length of time trade should be good. Textiles have not altered in value within the last few weeks, but the general opinion appears to be that the next change must be an upward one. Reports received from Manitoba and the Territories are of a better tenor than those last received.

GRAIN.—Wheat values have been easy since our last report, and prices are lower by 1 cent per bushel all around. The world's visible supply increased 2,250,000 bushels. Farmers' deliveries throughout the countries are increasing. There has been little or no movement of barley to the United States, although some considerable transactions have been talked of. Oats are firm. Peas are easier.

The stocks of grain in store at Port Arthur on Sept. 17th were 753,538 bushels. During the week there were received 339,158 bushels, and shipped 153,984 bushels, leaving in store on Sept. 24th, 992,712.

TORONTO STOCKS OF GRAIN.

	Sept. 24, 1894.	Sept. 25, 1893.

Oats, "	17,074	....
Peas, "	400	....
Total grain "	103,436	108,798

VISIBLE SUPPLY OF GRAIN.

The visible supply of grain in the United States and Canada, with comparisons, is as follows;—

	Sept. 22, 1894. Bush.	Sept. 23, 1893. Bush.	Sept. 24, 1892. Bush.
Wheat.....	70,189,000	50,693,000	44,957,000
Corn	4,192,000	7,630,000	9,726,000
Oats.....	7,844,000	4,099,000	6,676,000
Rye.....	319,000	383,000	772,000
Barley	1,746,000	582,000	460,000

Wheat increased 975,000 bushels the past week as against an increase of 1,330,000 bushels the corresponding week of last year. Corn increased 92,000 the past week, oats decreased 377,000, rye increased 7,000 and barley increased 234,000 bushels.

GROCERIES.—A fair degree of activity has characterized wholesale grocery houses this week. Second shipments of new Valencias are to hand; quotations range from 5 to 6c. Merchants predict higher prices for Sultana raisins. New currants arrived on Wednesday, and are quoted all the way from 4¾ to 9c. a lb. The fruit preserving season is pretty well over now, and the sugar market begins to show easy tendencies. There is a fair movement of teas;

Fine Electric . . Street Cars

OUR SPECIALTY

We also manufacture **Horse and Trail Cars** of every description o o o o o o

PATTERSON & CORBIN
ST. CATHARINES, Ont.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

The Largest Scale Works In Canada

Over One Hundred styles of . . .

Hay Scales, Grocers' Scales, Grain Scales.

Improved Show Cases.

Reduced Prices.

C. WILSON & SON,

These prices are wholesale by the car load

young Hysons continue to gain strength, and some holders are talking big prices; choice Monings are also advancing in price. In canned goods the feature of the week has been a meeting of the Canadian Packers' Association to discuss prices. After Oct. 1st corn and tomatoes will be advanced 2½c. per doz. In the meantime other canned goods remain unchanged.

HARDWARE AND METALS.—The fall trade is opening out nicely and jobbers are fairly busy. Although there is an increasing demand for fall supplies, the movement is not as considerable as that at this period last year. In general hardware and tinware lines there is a good demand. Heavy hardware is moving freely. In the country plumbers' supplies are showing more life, but the city trade remains dead. Dealers are busy shipping lamp and gas fixtures. The metal trade is not so active as it has been during the past several weeks. Galvanized iron and tin plate moving in smaller quantities. No important change in values have occurred. Horseshoes have been reduced 15c. a keg. Bar iron, in round lots, is selling at 5c. a keg less than quotations in our prices current. Fair quantities of cutlery and ammunition are being called for. Reports from the country are encouraging for the fall trade.

HIDES AND SKINS.—Althongh the advance made on the 8th inst. in the price of hides is maintained, no further strength has been added to the situation this week. From Chicago reports are of a bull nature. The *Review* of the 21st says: "The packers have the market easily under control and are in a position to dictate terms, but they have such small stocks on hand, and are making hides so slowly, that they are not realizing much money out of the boom. The tanners have bought on a rising market, but the size of their purchases was reduced as the prices advanced. There have been times when the market was started upward and the packers unloaded large accumulations of hides at the top price. To-day we find values and stocks have moved in an inverse ratio. As we stated on Thursday, the receipts of cattle this year have fallen behind the entry of 1893 at East St. Louis and South Omaha, as well as at the Chicago stock yards. Kansas City, however, really shows a small increase in the kill. The actual slaughter there this year, up to Sept. 15, was 578,627 head, against 575,453 head for the same time last year." There are some, however, who cannot see how a permanent advance is to be sustained. To make an advance in the hide market permanent higher prices must be realized for leather. But the burden of the advance must be borne by the consumer. The industrial situation, although gaining strength, is not yet in a position to exact higher prices for finished leather products. Calfskins are slow and without change. Sheepskins remain at 45c., with the movement fairly good.

LEATHER.—The developments of the last seven days have not been of the most satisfactory kind, and enquiries for leather are not brisk. The western factories are not actively engaged, and although there is some show of movement in the east, operations are largely confined to low grades. The country jobbing trade is only fairly good. Some exports of Spanish sole leather are being made to England this week. Stocks are not large, and difficulty is found in filling orders for certain descriptions. Values are unchanged.

PROVISIONS.—Trade is fairly active. Choice selections of butter are not abundant and in consequence 19c. is being paid for fall packed dairy; medium and common qualities are accumulating and there is but a very weak demand. Cheese is quiet and steady among local jobbers, with the feeling if anything a shade easier. Hog products are in good demand; long-clear brings 8¾c.; hams, 11½ to 12½c; rolls, 9½c.; lard 9½ to 10c.; dressed hogs are coming to the market and stand quoted at $6.80; this is a lower price than at the beginning of last season. Some dried apples have been received and from 6 to 6¼c. is being paid. Samples of evaporated received here are not showing good quality, and merchants are holding off from the market; from 7 to 8½c. is being asked; evaporators are now commencing on fall apples, and further shipments will doubtless show improved quality. Reports received from Prince Edward county say that early picked hops were of good quality, but later pickings are windwhipped and show discoloration. Growers are asking 10 to 15c. for new hops, according to quality, but we hear of only a few sales being made.

WOOL.—No special features characterized this week's proceedings. We do not learn of any considerable sales of fleece wool. The requirements of Canadian mills continue on a lim ed basis. The results of the London sales have not been up to expectations. American buyers are pursuing a waiting policy, but we cannot well see how wool can be expected to reach lower values than at present.

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

BUSINESS MATTERS IN THE STATES.

Under the date of Saturday last, the Wall street circular of Henry Clews says, with respect to railway earnings, etc. :—

"The wheat crop is regarded as bringing a more valuable amount of freight to the railroads than any other cereal; and as the wheat surplus available for export this year will probably exceed that of any previous period, large expectations are based upon this source of through traffic. The corn crop is so largely consumed at the point of production, or after comparatively short hauls, that the decrease in this year's product of that staple is of less importance as affecting the railroads than might at first sight appear. The country's exports of wheat and flour is valued at $170,000,000, while that of Indian corn amounts to only $25,000,000; a decrease of 25 per cent. therefore in this latter crop must be a comparatively small matter to the traffic of the roads dependent on their cereal export trade; and any loss on that account is likely to be fully set off by the gain in the export movement of wheat. The traffic, however, that brings the most profitableresults is the carriage of manufactured articles and of passengers; and what the improvement in those classes of traffic is likely to be, may be inferred from the current active revival in every branch of trade and the general starting up of industrial production. Intelligent observers see in all this a sure coming expansion of the earnings of the railroads, and they are consequently unwilling to part with any securities of that class. It seems reasonable to expect that, with such a revival in near prospect, a buying movement will soon develop with a view to profiting by the higher prices which these considerations foreshadow.

"London begins to show more interest in American securities. As our change of tariff policy is a movement in the direction of British ideas, it is natural enough that the reduction of customs should predispose Englishmen to our investments. The first effects of this change are apparent less in any open speculative demand than in a stream of inquiries from London to Wall street investment houses, evidently in contemplation of careful and solid investments. This tendency may be expected to grow as business here revives and railroad earnings improve; and later it may easily become the incentive to more active dealings in 'Americans' on the London and Continental exchanges. Indeed, there is already a visible improvement in the demand from London speculative houses, although it is cautious and tentative and follows closely the fluctuations in the home market. The probability is that, when our own people 'set the pace' by more active buying, London will be found willing to follow us as far as we may choose to go.

"It is difficult to see how England can well escape a liberal return to transatlantic investments. The London rate of interest stubbornly remains unprecedentedly low and the Bank of England is literally overflowing with idle gold; England's home investments are relatively high and yield exceptionally low returns; neither in her colonies nor elsewhere does she find her new enterprises of a character to attract capital; in the outlying countries where she has so enormously and unwisely sunk her capital, such as Argentina and Brazil, the beginnings of a slow recovery may be apparent, but nothing is presented sufficiently meritorious to attract new outlays; Australia has disgusted the lenders whose hundreds of millions of capital have been sunk there, and must expect to raise its future loans at home; in short, criticise our methods of finance, our democratic institutions and our legislative policies as they may, Englishmen can nowhere else find investments on the whole so desirable as those procurable at New York at about the present range of prices."

ASSESSMENT LIFE ASSURANCE.

The Canadian Relief Society, with headquarters at Toronto, is the latest assessment life association to go under. Its story does not differ materially from those of other concerns of like aim, which have been started without proper consideration. It has had a life of six years. Once its membership roll included two thousand names. Then it began to fall away, deaths occurred with greater frequency than was calculated on, and at the present moment, with 600 members, it has a liability of $25,000, which the courts, without much prospect of success, have undertaken to collect. The plan of insurance of the Canadian Relief Society meets with much favor among many people who think the regular line companies charge extortionate rates and make great profits. They are learning by experience, however. The first consideration in life insurance contracts is the certainty that in return for the payments made the insurer will get insurance. When he does not it matters little how small the charges are represented to be. Six hundred members of the Relief Society are not insured to-day.—*Montreal Gazette.*

HOW IT LOOKS IN PRINT.

It would puzzle a stranger to judge of the conversational abilities of Chicago men by the chat which usually follows a meeting of friends on the street. This is one chat taken verbatim :

"Hello, old man."

"Hello yourself. How's tricks?"

"Oh, so so; can't kick. How's things coming with you?"

"Right along. Haven't seen you for a month. How you taking it?"

"Easy. Anything new with you?"

"Not a thing; same old song. Well, so long."

One of the men was a bank president, the other a wholesale dry goods merchant.

A board of trade leader met a prominent insurance manager. Both are well read men of wide information and are accounted good after dinner speakers. It was :

"Hello, old man!"

"Hello, Billy. How's tricks?"

"Nothing extra; about the same. How's the world using yon?"

"Can't kick in these times. How's your conduct?"

"Same as usual. Anything new up your way?"

"Not a thing; same old song. Going my way?"

"No; so long."

"Well, so long. Look out for yourself."

A Dearborn street lawyer met a La Salle street lawyer. They are high in legal circles, have a fine standing in court, and are cultivated, refined gentlemen. It was :

"Hello, old man."

"Why, hello. How are you?"

"First-class. How's your corporosity?"

"Haven't a word to say. Business good?"

"Some coming in; nothing to brag of. How's the world using you?"

"Can't complain. Don't see much of you. What's new with you?"

"Nothing; same as usual. How's it coming with you?"

"So so; getting a living. Well, so long, old man. I'll see you later."

"So long. Take care of yourself."

"Sure."—*Chicago Record.*

CARELESSNESS AND FIRES.

The average American is careless in regard to the care of his property. He leaves the matter of details to subordinates and servants, and, if the results are satisfactory in a general way, is not over curious as to means employed. He is aware that such a policy is expensive, but absolves himself from the charge of carelessness by saying that his time is worth more for other purposes than bothering with petty details. This way of looking at the care of property has begotten a like carelessness in those to whose care it is entrusted, and to-day we are probably the most careless nation in the world. We make much money, but we also waste much property. The man who builds our houses, and cares for them, has thoroughly learned the lesson that he can use poor material and indulge in careless work so long as he covers it up.

* * * * *

We have several times alluded to what this carelessness, coupled with the idea that property paid for by fire insurance companies is not a loss, has wrought in the way of annual fire loss, but we wish to call attention to it again and to give some data concerning the cost of carelessness. The figures used are taken from the '94 edition of the *Chronicle* Fire Tables, the only work published giving the information we desired. In using the Fire Table figures we have confined ourselves to fires in original risks, believing it fairer to exclude exposure fires. We give both the property and insurance loss, or the burden borne by the country and the insurance companies, respectively :—

	No. Fires.	Property Loss.	Insurance Loss.
Ashes and hot coals	246	$2,044,229	$1,397,143
Defective flues	3,241	7,155,323	4,266,987
Defective heating apparatus	25	105,486	55,558
Explosions, gasoline stoves	475	282,516	191,944
Oil stoves, explosions and accidents	413	238,898	165,596
Open fire places and grates	161	385,916	163,936
Over-heated and defective kilns and ovens	198	1,363,914	774,278
Stoves	1,448	1,951,856	1,292,957
Stove pipes	147	129,261	81,722
	6,349	$14,660,399	$8,390,101

The causes given in the above table are the ones where carelessness plays an important part. We would not be understood as saying that all these 6,349 fires were due to carelessness, but we believe it to be an indisputable fact that the majority of them were so caused. This, of course, includes fires consequentially as well as directly due to carelessness. The first cause given is that of ashes and hot coals. In a majority of cases these would be due to direct carelessness in taking up or storing ashes, a matter that could be guarded against by proper handling and keeping in proper receptacles. Take the second cause, that of defective flues, and the carelessness may be either direct or consequential, direct in the matter of poor inspection or none at all, and consequential in the matter of construction where several years are often necessary to bring about the proper conditions for a fire. We have building departments, but the average dwelling is not inspected at all in regard to anything but the most glaring defects in flues. The matter of joists built into the chimney is overlooked, and the observing whether hot air flues come up close to pine wood is evidently considered superfluous labor. We have called the attention of several builders to cases where it would be hard to put a knife blade between the hot air flue and the pine studding, but we were laughed at for our pains. It may be years before such a defect causes a fire, yet it is constant danger. The man who is having the house built either neglects these details or else does not care, relying on his insurance to make the possible loss good to him.

To summarzie: The property loss on original risks in the United States in '93 was $120,046,746; of this amount the table given above accounts for $13,660,399, or over one-ninth the total sum. The insurance loss on these original risks was $75,629,023, and the table accounts for $8,390,101, or one-ninth as much as in the other case. A little carelessness which causes a little fire does not seem very much, but these "littles" combined is a large factor in the total aggregate.

How shall this unsatisfactory condition of things be changed? It is not new, for an examination of the Fire Tables for several years shows the same tendency, so that this phase of the annual fire loss may be called chronic. To cure it the source of the trouble must be sought, and this we think is quite largely found in the education of the people by the agents, and the education of the latter by the companies. The company says, in effect, to the agent that his first duty is to get business, as good business as possible, but business, and we know that many times the agent overlooks visible defects rather than have another agent get the risk. Knowing this, the agent does not pay much attention to what may be termed carelessness. The assured, on his part, knowing that inspection of dwellings is generally a mere form, more like to be forgotten than not, is careless in the care of his property.

It is not alone the companies who are interterested in this matter, but the public generally. We cannot stand this drain of millions of loss annually without feeling the effects. We must try to stop some of the loss, not simply to distribute it. Let companies, agents and policyholders ponder over this immense annual tribute to carelessness, and see if a little personal effort on the part of each person interested will not stop a portion of the unnecessary loss. —*The Argus.*

—Midland, Ont., is to have an incandescent electric light plant.

—The C.P.R. is carrying forward to the Fort William elevators about 175 cars of wheat daily. This does not represent the quantity being received every day at the interior elevators, as a good deal is being held in store to await the fixing of the grades. This will be done next week, and the shipments are then expected to exceed 500 cars per day.—*Winnipeg Free Press,*

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

Cor. Toronto & Court Sts.

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

DECISIONS IN COMMERCIAL LAW.

CONSTABLE v THE NATIONAL STEAMSHIP COMPANY.—The Supreme Court of the United States decides that the rule that a delivery of cargo, to discharge the carrier from his liability, must be made upon the usual wharf of the vessel and actual notice be given to the consignee, if he be known, may be varied by stipulation. The carrier may extend his statutory exemption from fire to such loss by fire as occurs after the discharge of the cargo, by special stipulation to that effect in the bill of lading. The delivery of goods from a ship must be according to the custom and usage of the port, and such delivery will discharge the carrier of his responsibility. The provision in the bill of lading that the goods shall be taken from alongside by the consignee immediately the vessel is ready to discharge, is inconsistent with the idea of personal notice of the discharge of cargo. A deviation which is a customary incident of the voyage, and according to the known usage of trade, neither avoids a policy of insurance nor subjects the carrier to the responsibility of an insurer. Where the pier of the carrier was so blocked that the vessel could not obtain access to it to discharge her cargo, it was not a deviation, but a matter of ordinary prudence to select a neighboring pier for that purpose. A stipulation in the bill of lading that the carrier should not be liable for a fire happening after unloading the cargo, is reasonable and valid, and exempts the carrier from liability for loss by fire to the cargo, while in his possession, after unloading, where there was no negligence on his part. The discharge of the cargo of a ship at a pier other than the usual one, but near by, is not a deviation such as to render the carrier an insurer of the goods so unloading.

NORTHERN PACIFIC RAILROAD COMPANY v HAMBLY.—A common day laborer in the employ of a railroad company owning and operating a line of railway, who was, at the time he received the injury complained of, working for the company under the direction of a section boss or foreman on a culvert on the line of its road, was a fellow-servant with the engineer and conductor operating and conducting a passenger train on the company's road, in such a sense as exempted the company from liability for an injury inflicted upon him by and through the negligence of said conductor and engineer in moving and operating said passenger train, according to the Supreme Court of the United States.

THE MISSOURI PACIFIC RAILWAY COMPANY v. MCFADDEN.—The Supreme Court of the United States holds that a carrier is not liable on a bill of lading for property which at the time of the signing of the bill remained in the hands of the shipper for the purpose of being compressed for the shipper's account, and was destroyed by fire before the delivery to the carrier had been consummated. A bill of lading does not partake of the character of negotiable paper, so as to transfer to the assignees thereof the rights of the holder of such paper, and such transfer does not preclude enquiry into the transaction in which it originated.

DUNHAM v. THE DENISON MANUFACTURING COMPANY.—A patent cannot be re-issued to include structures and improvements which were neither described nor claimed in the original patent. A patent cannot be lawfully re-issued for the mere purpose of enlarging the claim unless there had been a mere mistake inadvertently committed in the wording of the claim, according to the Supreme Court of the United States.

SLEEBERGER v CARTER.—Clippings from the ends of cigars and pieces broken from the tobacco of which cigars are manufactured in the process of such manufacturing, not fit for any use except for cigarettes and smoking tobacco, are not manufactured tobacco within the meaning of the tariff Act of 1893, and are not liable to a duty of forty cents per pound, according to the Supreme Court of the United States.

ADVERTISEMENT SUITS.

In the case of Smith v. Jarvis the action was brought by the plaintiff, Mr. Thomas Smith, trading as Smith's Mutual Advertising Agency, 132 Fleet street, London, Eng., who sought to recover the return of the sum of £3 15s. The plaintiffs' representative said that the defendant was formerly in their exclusive service, and after he left he improperly obtained an order from one of their customers. They paid him the commission on the order by mistake, and now asked for the return of the money. They refused the order which the defendant brought them when they found out that they had formerly done business direct with the advertiser It was further stated that the defendant had promised to refund the money. The latter admitted this, but added that the promise was made because he thought that he would be able to do further business with the plaintiffs. When he found out that he would not, he stood upon his strict rights. Originally he had taken the order with the plaintiffs' permission, and had nothing to do with the carrying of it out. Mr Commisioner Kerr non-suited the plaintiffs, but said that they might bring another action and try it before a jury, if they liked. The Local Time Table Company sued Mr. Joseph Hand to recover the price of an advertisement inserted in a local time table. The defendant said he had not paid because there had been a breach of contract. He only signed the order on condition that he was to have fifty of the time tables sent to him every month, and they had not come. The plaintiffs pointed out that nothing of that sort was contained in the order Mr. Commissioner Kerr said the defendant must pay the money. In another case, the company sued a Mr. Burton, and the defence raised was the same, the defendant adding that he had countermanded the order in May. The plaintiffs alleged that they had not received the countermand, and judgment was given in their favor.—*Stationery Trade Journal.*

AN ELECTRIC LIGHT FIRE

Mr. Justice Archibald, at Sherbrooke, has given a judgment in the case of the Stanstead and Sherbrooke Mutual Fire Insurance Company vs. the Bell Telephone Company. On the 25th June, 1892, between three and four o'clock in the morning, the building then used as an exchange office at Richmond by the Bell Telephone Company, and occupied by John Hamilton, was destroyed by fire The plaintiffs paid the insurance on the building and contents, $1,900, and sued the defendants to recover this amount on the ground that they were legally responsible for the fire. Plaintiffs alleged that through the negligence of the defendant company there was a cross between one of the Bell telephone wires at Dr Brown's and an electric light wire, thereby causing a deflection of the strong electric current from the electric light system to the telephone wire, and from thence to the exchange office, where it burst out into a flame. The court decided that the plaintiffs had fully made out their case and the judgment should go against the defendants who were responsible for suffering such a state of things to exist. Judgment against the defendants accordingly for $1,900 and costs.

Mercantile Summary.

A CARRIAGE MAKER at Iberville, Que., named Pierre Benoit, has made an assignment, owing about $5,000, half of which is a mortgage liability. An extravagant family has had much to do with his failure. The estate will yield very poorly for the general creditors.——Alex. Challoux, a trader at East Hereford, has made an abandonment of his estate.

A WESTERN exchange states that the total value of exports from the port of Chatham for the three months ending June 30, 1894, was $175,815, which is an increase over the corresponding period last year of $67,025. The bean export, which for several years has been the largest export from this port, amounted to $100,000. Staves was the next largest, amounting to over $50,000. The remainder was made up of logs, lumber, horses, hides, etc.

A STATEMENT appeared last week in a St. John daily to the effect that the directors of the Memramcook gold mine had settled all matters pertaining to the pay of the employees. The treasurer, Mr. Freeman, would be at the mine this week and pay off the men, and other bills would be paid as soon as the treasurer receives the vouchers. Work was to commence about October 1st, under the management and supervision of an expert in mining, one whose character cannot be impeached.

Mercantile Summary.

THE Customs receipts at Montreal for September were $469,121, as compared with $628,078 in September, 1893, a very decided decrease. At Halifax and St. John also the Customs receipts were less than in the corresponding month of 1893.

THE *Manitoba Free Press* is informed that after Oct. 6th lake and rail rates will take a jump, the new basis being 60 cents per 100 first-class. The rate at present is 30 cents. Rates on iron will advance 90 per cent., placing them back where they were earlier in the season. An advance in transcontinental rates is promised. These will be announced in a few days.

THE Manitoba *Liberal* hazards the estimate that the stock shipments to the Old Country during the past three months have netted Manitoba a third of a million dollars. "It is not long since the shipment of cattle from Manitoba east was a very rare occurrence, but it seems that many Manitoba farmers who have found wheat unprofitable have found themselves better able to compete with the world in stock raising."

ACCORDING to present-day custom, J. B. Bernier, whose failure at Sherbrooke, Que., we noted in a late issue, is now offering his creditors 25 cents in the dollar, cash. And if they wish to accord with present-day customs of creditors, they will compromise and let the man go on.——

Mercantile Summary.

From the same town is reported the failure of E. Boucher, a hardware dealer, who last spring asked and obtained an extension of time. He then owed $3,500.

QUEBEC city is furnishing its full quota to the failure list. A somewhat unexpected one is that of Provost & Larose, grocers, a firm dating from March last, though Mr. P. was previously of the well-known St. Roch firm of Turcotte & Provost. Grain speculations are assigned as the cause of their troubles. They owe about $12,000,——L. N. Allaire, a prominent piano and organ dealer, who has been making an uphill fight for some time, has had to succumb, with liabilities of $16,600 direct, and $16,700 indirect; assets are put at $33,840.——Jules Chisian, furniture dealer in a small way, owes $900, which he cannot pay, and the assignee has taken possession of his little assets.——C. Belanger, grocer, has compromised liabilities of about $7,000; assets estimated at $5,500.——Cimon & Vignola, a small shoe manufacturing concern, dating from August last year, have suspended with an indebtedness of $4,000, and make an offer of 35 cents.——The estate of the late A. Dassylva, a retailer and jobber of shoes, who died about a fortnight ago, is trying to effect an arrangement of 50 cents on the dollar on liabilities of $24,000. Creditors are disposed to accept 60 cents.

Special Notice to you who Sell Oysters in Bulk

This season we are giving away to every purchaser of 1,000 oyster pails a very handsome window display card with the words "Bulk Oysters for sale here," printed in gold leaf on heavy morocco board, size 19x12, or a handsome chromo lithographed in fifteen colors. The retailer will find it greatly to his advantage to use these cards as a notice to the passing public that he is in the oyster business.

We are offering this special inducement to obtain your trade, as our facilities are 60,000 per day, and every pail guaranteed uniform, perfectly liquid tight and second to none on the market. Our prices are as low as any. Send in a trial order for your pails and get one of these cards.

THIS Company will sell its instruments at prices ranging from $7 to $25 per set. Its "Standard Bell Telephone Set," (protected by registered Trade Mark) designed especially for maintaining a perfect service and used by the Company in connection with its Exchanges, is superior in design and workmanship to any telephone set yet offered for sale.

This Company will arrange to connect places not having telegraphic facilities with the nearest telegraph office, or it will build private lines for firms or individuals, connecting their places of business or residences. It is also prepared to manufacture all kinds of Electrical apparatus.

For particulars apply at the Company's Offices as above.

Mercantile Summary.

WE hear from Montreal that the Bell Telephone Company of Canada has purchased the lot at the south-east corner of Notre Dame and St. John streets for between $55,000 and $60,000. It will tear down the present buildings thereon and erect in their place a new structure for the offices of the company.

THE council of the town of Rat Portage will submit a by-law to the ratepayers to raise $60,000 to put in a system of waterworks and a short sewer system. Deacon and Wm. Kennedy, jr., of Owen Sound, have prepared plans and specifications, and the estimated expense of the system is about $50,000.

THE St. Thomas street railway has changed hands, Messrs. Strathearn, Hendrie & Currie having sold it to Mr. Henry Everett, of Cleveland, who is largely interested in the Toronto, Montreal, London and Cleveland street railways. It will be converted into an electric railway in the spring, and possibly be extended to Port Stanley.

MESSRS. HAY & CO. is a new firm at Woodstock, which occupies almost the entire premises of the late Paterson Agricultural Works, which are situated at the east end of the town. They manufacture wood work, principally for the Singer and other sewing machine companies. Seventy-five hands are now employed. Mr. James Hay, formerly for many years of the James Hay Co., is the manager of the new concern.

GWATKIN & SON . . . . .

57 Bay Street
Toronto

A RECENT letter from Barrie says: "The demand for men to work in the lumber woods this fall is greater than for a number of years back. This will have a good effect on our business generally."

THE Bank of Hamilton, which has opened a new branch at the eastern end of the city of Hamilton, has tastefully fitted up offices on the corner of Wellington and another street. Mr. T. H. Brown is the manager.

THERE has been an advance in Armour's corn beef, and prices are higher by 20 to 35 cents per dozen on tins, 1's and 2's; $1.50 per dozen on 6's, and $2.50 per dozen on 14's. This is the result of large contracts received from one of the belligerents in the far East.

THE Royal Distillery, in Hamilton, has changed its name. It is now the Hamilton distillery. The proprietors have been making large additions to the premises lately. These include a two-story building on Jarvis street, which is fitted up into a board room and other offices.

TWENTY thousand dollars was paid out by the city treasurer of London, Ont., on Wednesday last, to retire a number of debentures issued in 1872. This issue bore 7 per cent. interest, while the city now borrows money readily at four and a quarter per cent.

THE Canadian Relief Society, which became insolvent some time ago, had liabilities amounting to $25,000. To meet this, the Master-in-Ordinary has issued instructions for action to be brought against some 1,000 members who were in arrears of assessment at the time the society wound up its business.—*Toronto Empire.*

FAILING to arrange with creditors, A. C. Fraser, of Galt, will find his hardware stock sold on Thursday next, and the boot and shoe stock of F. Chalmers at Woodstock will be sold to-day.——The hair goods stock of the Dorenwend estate will be sold by auction here on Monday next, unless it is otherwise previously disposed of.

AN offer of 20 per cent. is made to the creditors of the Vise Pants Co., which is a partnership composed of J. Vise and G. H. Sackman, of this city. The partners write that they have lost money since they started a year ago, and that their assets are insufficient to pay the above, but that they can raise the amount necessary.——Next week the boot and shoe stock of Peter Habel, at Wiarton, will be sold by auction.

M. BOSSIE & Co., of Napanee, have bought the stock of boots and shoes of Hamilton Bros. of Woodstock, and will take possession of the premises and stock in a few days.

THE sale of about $70,000 city of Winnipeg bonds has just been completed by Mr. George A. Stimson, of Toronto. We understand that they were purchased to yield in the neighborhood of 4½ per cent. interest. The same purchaser has just secured $14,000 city of St. Thomas local improvement debentures, for which we are told a good premium was paid.

ABOUT fourteen years ago John Ogden removed from Palmerston to this city, started a drug store, and practised medicine. This season he became interested in pleasure steamers, and dropped some money. Now he assigns, with liabilities of $3,000.——J. Sinclair, tailor in Toronto, has been in business here about ten years, and not many months ago claimed to have a surplus of $6,000. He has assigned, however, to John McClung.

ABOUT ten years ago W. W. Matthews opened a jewellery shop in Winnipeg, and a short time ago got into difficulty, and his stock was sold to his wife. She has since continued under the style of Matthews & Co. Now we hear that the sheriff has taken possession of the premises.——J. B. Abraham & Son, who kept a general store at Veleau, Man., and assigned last month, have arranged an extension of time with creditors, and will continue the business.

WE have some additions to Quebec city failures. Beland & Martineau, a lumber concern of some importance, have decided to consult their creditors. It is understood they claim a surplus of somewhere about $40,000——Daly & Co., pork and provision dealers, have been asked to assign. The concern is of comparatively recent formation. One of the partners has been credited with more or less connection with smuggling operations in the Gulf of St. Lawrence.

BY the death of John Rochester, of Ottawa, the Dominion Methodist Church is relieved of $3,000 of debt upon the building. Some years ago when the church trustees required a loan for building purposes, they borrowed from the Star Life Assurance Company of England, and as additional security gave policies upon the lives of Messrs. Thomas Hunton and John Rochester. Mr. Hunton died in 1875, and the premiums, no inconsiderable sum, have been since paid by the church upon Mr. Rochester's policy.

LAST week we noted the assignment of Shaw & Turner, clothiers at Guelph, who at a meeting on Tuesday last offered their creditors 40 per cent., which was refused. Next week the stock will be sold. They owe about $12,000.——After making wagons for nearly 30 years at New Dundee, J. M. Webber has at length found it needful to assign.——At Petrolia, Robert Houston, oil dealer and farmer, also assigns.——P. Chenette, general storekeeper at Cache Bay, has been in business two years, and fails with small liabilities.——The dry goods stock of Salter & Co. at Niagara Falls has been mortgaged, and now it is advertised for sale.——Mrs. M. F. Allan, general storekeeper at Muirkirk, was burnt out a week ago, and now assigns her insurance to creditors.

Two small assignments have taken place in Guelph; A. A. Cutting, grocer, and Alexander McMillan, dyer, are the parties.——About five years ago Peter Habel opened a small shoe store in Wiarton, but never made material progress. We now hear that he has assigned.——Tod & Co., dry goods dealers, at Bowmanville, after an effort, have failed to induce their creditors to accept 40 per cent., consequently they assign to Henry Barber.——An assignment is made by M. Cochrane, dealer in implements at Durham.——Another by John Marshall, of Forest, who at one time was an extensive dealer in cattle and has made heavy losses by shipping them abroad.——A second failure is made by Donald Angus, formerly of the firm of Boyes & Angus, confectioners, at Chatham. Last March his creditors were kind to him by writing off 75 per cent. on liabilities of $2,800. He again assigns.

THE Montreal *Gazette* remarks editorially upon the number of conventions of various bodies held in that city this year: "The meeting of the Society of Civil Engineers will probably end the conventions in Montreal for this year. The record of the season has been a somewhat remarkable one. Beginning in June, the convention of the American Society of Mechanical Engineers was followed by that of the American Flint Glass Workers, by the General Baggage Agents' Association, the International Association of Fire Engineers, the Canadian Electrical Association, and the American Public Health Association. Besides these conventions, the Railway Ticket Agents' Association paid a visit to the city, and the Michigan Press Association held a session here." Not only will these various gatherings be a good

thing for Montreal, whose citizens and authorities have given them a hearty welcome, but they will prove valuable in divesting the American mind of misapprehensions about Canada.

THERE are two assignments by traders in Brantford this week. They are R. O. Snider, coal and wood dealer, who has been sued and a judgment obtained against him, and Miss J. M. Smeyd, milliner, who made an offer of compromise in August last, which was declined by her creditors. —— Jacob Lovell, builder, has been at Niagara Falls for about nine years. But he had an unfortunate fire three years ago that wiped out his surplus. Since then he has struggled along, and now makes an assignment.——M. J. O'Hearn, of Orillia, had failed before he removed to that town, and not having arranged with his creditors, he carried on his tailoring business there in his wife's name. Owing to keen competition, she now assigns.

AMONG latest Montreal failures we note the following: N. Vermette, formerly the secretary-treasurer of the municipality of St. Louis de Mile End, lately annexed to the city, started in the planing mill business a year or so ago. He lacked the necessary experience and ability, and after being frequently sued, has consented to assign, owing about $22,000.——W. J. Burke, druggist, has assigned to the court after a business experience of a couple of years. He owes $3,781, and the estate will be a poor one. ——Louis Deneau, a suburban grocer, finding it impossible to continue business with any benefit, has put his affairs into the hands of his principal creditor for liquidation; liabilities $3,000. He was formerly in the crockery business unsuccessfully.——Prevost, Ouimet & Co., dry goods, whose failure, after a year's experience, we reported a week or two ago, are canvassing signatures to a composition deed at the rate of 55 cents in the dollar, liabilities being $9,600.

WE learn that the Montreal firm of O. Corbeille & Co., dealing in hardware and paints, in the Point St. Charles district, have been granted an extension of 4, 8, 12 and 16 months. Mr. C. has been tied up in some property operations, which have absorbed a portion of his business capital. He owes $7,890, and has made a transfer of his real estate as security for the due fulfilment of extension obligations.—— Bedard & Vincent, a dry goods firm, who began about two years ago, making a specialty of mantles and costumes, have been asked to assign. Their stand was badly selected and had other disadvantages, and though they were liberal advertisers, the business could not be made to pay.——D. Brunet, a shoe retailer of some twenty years standing, has been obliged to assign, and owes $2,500.——Authier Bros., dry goods, have made abandonment of their estate.

JAMES LITLE, jobbing and retail grocer, Ottawa, whose failure we noted last week, is offering his creditors 40c. cash.

FAILURES FOR NINE MONTHS.

The total number of failures in Canada, as reported for *Bradstreet's*, shows an increase for the nine months just ended. The Provinces of Ontario, Quebec, New Brunswick and British Columbia all report more failures for the past nine months than in a like portion of 1893, together with increased liabilities. According to that authority the number of failures in the provinces, with assets and liabilities, was as follows:

	No. of Failures. 1894.	Liabilities. 1894.
Ontario	608	$5,266,986
Quebec	523	5,179,065
New Brunswick	76	896,250
Nova Scotia	92	480,397
Prince Edward Island	6	47,250
Manitoba	53	656,067
North-West Territories	8	33,633
British Columbia	48	744,552
Totals	1,414	$13,304,201

There are 9,251 business failures reported throughout the United States during the past nine months by *Bradstreet's*, compared with 11,140 in nine months of last year, a decrease of 1,889, or 17 per cent. The total amount of liabilities of failing individuals, firms and corporations, in the past nine months is $110,674,034 a falling off from the corresponding total of last year of 66 per cent.

The total assets were $5,847,908 against $7,552,157 in 1893. The number of Canadian failures in those nine months of 1893, *Bradstreet's* tells us, was 1,323, with liabilities of $13,102,843 and assets of $7,552,157. The proportion of assets is low this year compared with last.

—I have known men who have had an income of $3,000 $4,000, $5,000 a year who did not leave one farthing to the surviving household. Now, that man's death was a defalcation, an outrage, a swindle. He did not die; he absconded.—*Talmage*

A REAL CURIOSITY.—"And what is that man over there?" inquired the visitor in the dime museum. "That," replied the museum manager with manifest pride, "that is a man who says he is satisfied with the new tariff bill."

—The Montreal Grocers' Association held a meeting lately and voted to send a petition to the council asking that the tax on street peddlers be placed at $100 for either wagon or hand cart, and that this tax be collected in advance.

TORONTO, FRIDAY, OCTOBER 5, 1894.

THE SITUATION.

A French law, such as has just been promulgated, against the adulteration of wines, has an interest for every country in which these wines are used. The penalty for this offence is made severe and includes fine, imprisonment and loss of civil rights. The evil against which it is directed is enormous, only one-twentieth part of the wine used in Paris being genuine. But it must not be hastily concluded that the falsification of exported wines bears anything like this proportion. The false article is largely made for domestic consumption, especially at the tables of French domestics, each servant being allowed from one to two bottles a day. But the so-called clarets which are sent to other countries, at a cost of less than 25 cents a gallon, are of course purely the product of the chemist. It is against these wines that Canadian vintners express fears of having to compete, under the new Franco-Canadian treaty. In this respect we owe ourselves the duty of self-protection, and some means of discovering the adulteration of imported wines should be employed. It is probable that the necessary machinery for this already exists. France first became self-accusing in this particular through the Municipal Bureau of Paris, which detected and exposed the imposture, in this way rendering great service to France and to her customers in other countries.

In Toronto the tide of population has once more taken a favorable turn. The assessment census shows an increase in numbers of nearly 6,500, which is equal to two-thirds of the increase at the height of the boom. When 10,000 a year was added to the city's population a great increase of house-room was necessary; but as building proceeded at random, and without any estimate which aimed to adjust house accommodation to probable wants, the supply outran the demand. The new comers are visibly reducing the surplus houses; in some residential streets a vacant house would be sought for in vain. Three years have passed since the boom collapsed, and now the end of the consequent disaster is looming into view. Adjustments between mortgagees and mortgagors, in hopeless cases, have been going on quietly during the past two years, nearly always without the intervention of legal proceedings. In some form or other the property has, in a great number of cases, gone to the mortgagee. The return to a normal condition will be found in the process now going on, an increase of the population from natural causes in conjunction with an influx, but it will probably take more than two years to restore the balance between supply and demand. It still remains true that the large city attracts, and large numbers desire to take up their residence therein.

At a dinner at the London Chamber of Commerce, Congressman Wilson explained that the object of the tariff reformers of the United States was to prepare American manufacturers for competition in all the markets of the world. He told his hearers frankly that the British had no cause for rejoicing in the freer policy of the Republic which the new tariff evinces, except at the triumph of a principle. The protective policy of the past has, he thinks, helped rather than hindered the trade of other countries. His meaning is, of course, that while it restricted exports to the Republic, it left outsiders a freer hand in neutral markets, which are not generally entered by the United States as formidable competitors. In seeking monopoly profits, American manufacturers do not accept conditions necessary forsuccess in those markets where the competition of the world must be faced. When they are put on their mettle by the removal of restrictions which make them pay too exclusive attention to the home market, they are likely, in the language of Mr. Wilson, to cease to be "underlings." What they have occasionally done, by pursuing "a sacrifice policy," is no test of what they could do generally, so long as high protection lasts. A sacrifice policy is an aberration from the general line, and it is quite in keeping with the methods of Trusts aiming at monopoly. But when the monopolists grew bad enough to defy the law, and wicked enough to debauch electors and corrupt legislation, Mr. Wilson and those who act with him thought it time to call a halt.

After receiving tenders for electric street lighting, the city council of Toronto finds that it can get the required street illumination cheaper than by putting in a plant of its own, anda recommendation for the acceptance of the tender will be considered by the aldermen. On ordinary business principles its acceptance is in order, unless it can be shown that collateral advantages are to be obtained by the city which would more than counterbalance those of accepting. Beside street lighting, electric lighting for houses is one of the necessities of city life. Is it true that competition in electric lighting can be got only by the city putting in an electric plant? Would competition in electric lighting further bring down the price of gas? In connection with electric light for the streets, the charge is made, in the gross and anonymously, that half a dozen of the aldermen have attempted to blackmail one of the companies tendering for this service. The aldermen are not named, though the amounts said to have been demanded, which varied at different times, are. The charge will of course be investigated. Meanwile, it is proper to say that the accusation, when it was allowed to escape, should have been accompanied with the names of the culprits, for in its anonymous form it may cause suspicion to perch on innocent heads.

It is not easy to understand the reason that induced the Quebec Government to add $1,320,000 to a debt of $4,000,000, on what is in fact a renewal of the loan. True, the transaction is spoken of as a new loan to replace an old one, but that does not alter its nature. The one patent inducement to add to the debt is the reduction of the interest to the extent of $4,000 a year; but it would be a long time before this amount would equal the increase of the debt, and it would never do so during the ordinary term of a loan. The difficulty of taking for this purpose $4,000,000 out of

the payment to be made by the C.P.R. Company on account of the North Shore road, need not be underestimated. On the supposition that the amount to be received was to go towards paying another loan, a new arrangement would have to be made if $4,000,000 of the amount were proposed to be diverted to pay the Paris loan. The question is whether such an arrangement could be made, and on what terms. If the terms which could be made in this case would be no better than in the other, an amount of $4,000,000 having to be renewed in any case, one operation would be as good as the other. Till we know all the facts, a definite opinion on the case cannot be formed.

CANADIAN COPYRIGHT.

Interest in the copyright question continues to manifest itself from time to time. Mr. F. R. Daldy, Hon. Secretary of the British Copyright Association, in a letter to the *Times*, states that at the Berne International Copyright Convention "the United States Government made the consent of Canada that American copyright should run in that Dominion a leading condition of their conceding it to the British nation." But he forgets to say that the British Government had previously renounced the right of binding Canada by commercial treaties without her consent. The statement of this essential fact is necessary to a proper understanding of the question. A right to consent or to refuse to consent to be bound by a particular treaty carries with it the correlative right to ask that a treaty to which assent has been given shall be renounced. Mr. Daldy is on false ground when he complains that "Canada has asked the Imperial Government to repeal the British copyright" so far as it affects Canadian printers and publishers, "and also to denounce Canada's connection with the Berne convention." Canada is not going beyond her strict rights in demanding that, so far as she is concerned, the Berne convention should be denounced. Canada is a self-governing country, having by her constitution, which was assented to by the Imperial Parliament, the right to legislate on copyright. The only question is whether the British Parliament has a concurrent right of legislation, to a limited extent, on this subject, or whether Canada's right of legislation is exclusive. If ever that question is forced to a settlement, the settlement, while it will be political, can only be made in one way; our right of legislation will not be subjected to any more limitations on this than on the other subject. We can understand why British authors should resent the treatment of the question in this country. The British Copyright Association, as Mr. Daldy reminds us, think and act as owners of copyright, not in the interest of publishers. Canadian printers interest themselves in copyright from the opposite point of view. A sane view of copyright extends scant sympathy to them; but if they fight the question on the higher ground of constitutional right, and of what belongs to a self-governing people, their co-operation must be accepted by those who simply demand that our autonomy should, in this matter, be made complete.

ELECTRICAL SCIENCE.

The recent convention of electricians in Montreal was of a nature which demonstrated that its members were in earnest over their work, and that they had come together for no mere holiday occasion. In respect of the topics discussed and the spirit displayed, it may be termed an important practical gathering. Electrical work has now so wide a field, and so many applications of electricity are now either in actual work or in sight, that such occasions as these for electricians among us to come together and compare notes are likely to be of service to the body politic. The work of the convention was set about in a business-like way, the whole of the dozen papers submitted being printed and illustrated and distributed among the members before the meeting.

The first paper was that of W. B. Shaw, of Montreal, on the application of electricity to the purposes of oculists, dentists, throat specialists, and those of general practitioners, with a word of warning as to the curative methods of electric quacks. The lengthy paper of Mr. John Galt, C.E., of Toronto, respecting the possibility of securing better regulation at central light and power stations by means of fly-wheel accumulators of improved construction, was discussed. Mr. Galt dwelt upon the recently expressed opinion of Dr. Edward Hopkinson, of London, of the necessity for an efficient accumulator capable of working as a regulator, which would save 30 to 40 per cent. in the cost of a generating plant. And he thought that the new method of fly-wheel construction, invented and patented last summer by Professor Sharp, of London, went far towards "filling the bill." The steel spokes of this wheel are tangential, like the spokes of a bicycle, instead of radial. "A powerful and light fly-wheel, deriving its power from its high speed, should satisfy both those who advocate heavy fly-wheels because of their power and those who condemn them because of their weight."

A practical paper on telephone cables, their construction and maintenance, was read by Mr. F. J. Schwartz, of the Bell Telephone Co., Montreal. This concluded as follows: "The amount of underground work in Montreal is at present small, and there has been no destruction caused by electrolysis. There is, however, considerable difference of potential between the cables and the earth at different points, and it is probable that trouble will be experienced. With overhead construction faults will continue to occur, and with underground cables the troubles, though fewer in kind, are no less destructive. To meet these special means will have to be adopted as occasion requires."

Mr. Rosebrugh read a paper on duplex telephony, which created much interest and is of no small importance. The method has been demonstrated in Toronto, where it is now in successful use. As we understand it, by the use of a return wire circuit a phantom circuit is created, which can be used for duplexing. Next came the paper of Mr. E. A. Sperry, of Cleveland, on the electric brake in practice. The writer contended strongly that the present hand brake for street cars was ineffective, and that the increasing cost to companies of the item of "damages" showed very clearly the need of an improved method of stopping the cars. He asserts that "under proper and standard conditions any car or train may be brought from a speed of ten miles an hour to absolute rest inside of ten feet," and adds what is quite true, that "it is not generally appreciated that the wheel brake has ample capacity to accomplish this." He was strongly in favor of an electric brake with which he had been experimenting, which is entirely independent of the current that impels the car.

The *Electrical World*, of New York, in its editorial on the convention, says that "the papers of Professor Rosebrugh, Mr. John Galt, and Mr. E. A. Sperry are important contributions to professional literature. . . The paper of Professor Rosebrugh is perhaps the most important on the programme, dealing as it does with an aspect of telephony to which, apparently, little attention has thus far been given." The paper of Mr. Carl Breithaupt, of Berlin, upon the subject of municipal lighting, created quite an animated discussion.

As to the place of the next convention, Ottawa and Peterboro had each sent an invitation. On a ballot, Ottawa

was chosen. Mr. T. D. Lockwood, of Boston, chief electrician of the Bell Telephone Co. in the United States, briefly expressed his appreciation of the courtesy which had been shown him by the association during the convention. Then came the election of officers, which resulted as under :—

President—Mr. K. J. Dunstan, Bell Telephone Co., Toronto.

First vice-president—Mr. A. B. Smith, supt. G.N.W. Telegraph Co., Toronto.

Second vice-president—Mr. C. Berkeley Powell, mgr. Electric Light Co., Ottawa.

Secretary-treasurer—Mr. C. H. Mortimer, *Canadian Electrical News*, Toronto.

Executive Committee—Messrs. Geo. Black, Hamilton ; E. C. Breithaupt, Berlin; L. B. McFarlane, Montreal; T. R. Rosebrugh, Toronto; John Yule, Guelph; O. Higman, Ottawa; J. W. Taylor, Peterboro; D. A. Starr, Montreal; J. J. Wright, Toronto; and J. A. Kammerer, Ottawa.

THE CANADIAN BANKERS' ASSOCIATION.

The Association of Canadian Bankers has given evidence, since it was organized, of a resolve to be something more than a nominal body. It has shown active life and determination, and as a consequence has accomplished something by concerted action. The journal issued by the Association is now in its second year, and is gradually being made more interesting and more valuable. Such a work should manifestly be something besides a record of bankers' meetings and a record of banking statistics. It should contain such features as correspondence ; questions and replies ; experiences or suggestions as to bank practice, and excerpts from banking literature that might prove of practical service to bank officials. It is agreeable to find that the members of the committee to whom its compilation has been entrusted take a broad view of its mission, and we shall be glad to see their self-denying labors lightened by the assistance of members of the Association who can, if they will, greatly lighten the task of the editors and contribute to making the journal the comprehensive pamphlet it should be.

The first issue of the new volume, that for September quarter, is largely occupied with the proceedings of the annual meeting of the body, which, as our readers know, was held in Halifax in July. The report of the executive council then submitted described the efforts of the association with respect to insolvency and other legislation at Ottawa and Toronto, bankers taking strong ground in support of the contention that no discharge should be granted an insolvent whose estate did not pay 66⅔ cents in the dollar. Also the action of the executive with respect to the Dominion Note Act, which resulted in the addition of an important modification in the draft bill. Some suggestions made by this body of Canadian bankers to the Government "as to legal tender notes, have also been approved by the Deputy Minister of Finance. The greater interest of younger associates is shown in the increased number of these. Whereas the subscription list to the journal in December last contained less than 500 names, close on 700 are now receiving that publication regularly. It is of interest to know that the editing committee has arranged to print in its pages shortly Mr. R. M. Breckenridge's comprehensive essay on "The Canadian Banking System." Reports were made by the Winnipeg sub-section and by the Ottawa sub-section of the board.

Arising out of a statement by Mr. Lash, Q.C., as to the consideration of the Insolvency Bill at Ottawa, a discussion was had upon the general subject, which resulted, after the expression of their views by Mr. Fyshe, Mr. Schofield, Mr. De Martigny, Mr. Burn, Mr. Thorne, Mr. Henderson, and the president, Mr. Walker, in the appointment of a committee to embody the views of the meeting in a resolution. This affirmed "that the main object of any bankruptcy law should be the discouragement of reckless trading, which produces bankruptcy; that the best way to accomplish this object is to render it impossible for a bankrupt to gain any advantage out of his bankruptcy." It further recited that while not affirming that a general Bankruptcy Act is beneficial to the community, such Act would not be opposed if it embodied these principles and did not unjustly discriminate against the rights of banks. But, resolved further, that "any provision compelling the holders of negotiable instruments to treat the liability of the parties primarily liable thereon as security for the payment thereof, and to value such alleged security and deduct the amount thereof from the claim made upon the estate of the other parties, would unjustly discriminate against the holders of such instruments," and therefore any such bill should be opposed.

Papers were read by the secretary, at the meeting, which had been prepared by the following gentlemen: By Mr. E. Stanger, of the Bank of British North America, on "Some Popular Fallacies Concerning Banks," and by Mr. L. P. Snyder, of the Traders' Bank of Canada, Elmira, on "The Need of a Universal Canadian Bankers' Cipher Code." And we find reproduced in the journal a valuable paper by Mr. Lash, on "Warehouse Receipts, Bills of Lading and Securities under Section 74 of the Bank Act of 1890." Mr. Arnaud has contributed a paper upon a subject which, in his opinion, "has a troublesome, unprofitable, and even a dangerous side," namely, that of "Abuses in Connection with Bank Collections at Remote Points." Although he writes from the point of view of a Maritime Province banker, the practice he condemns is by no means unknown to Quebec and Ontario, indeed it is a nuisance to many a bank branch in those provinces. Says Mr. Arnaud :

"You are all aware of the severe competition between wholesale houses, you know how thoroughly every nook and corner of the Dominion is covered by their travellers, and how goods are sold right and left to village and wayside storekeepers living miles away from any banking point, and without any definite, clear, business-like bargain or understanding as to how the goods will be paid for, beyond the simple fact that 'the firm will draw.' This drawing is done not at all seldom before the goods are received, and sometimes before they are even shipped.

"In most instances a 'No Protest' instruction is attached, so that the drawer at least may not be put to expense. In many cases the drawees can only be reached by mail at stated times, twice, thrice, or once a week. Delay, proverbially dangerous, is more than ordinarily dangerous in a matter of this sort, not to speak of the very much greater than ordinary draft on the care and attention of the officer in charge of correspondence and collections. The uncertainties, anxieties, the chances of accident are often aggravated by the absence, indifference, procrastination, or deliberate neglect of the drawee, and more than one, more than two or three requests for the prompt return of the document are unheeded. It will happen not infrequently, also, that acceptance is refused because of some alleged difference in terms, or that goods are not up to sample, or according to order."

The question he wants to raise is whether there is any good reason, anything not visible to the country banker, why a provincial bank or branch should continue to transact such collection business, and at rates, even when accept-

ance is obtained without delay, altogether inadequate for work performed and risks assumed. . . .

"But even in their case" [the large banks, with many branches], he concludes, "I would humbly suggest that they are overdoing the thing, that they are assuming work which belongs to the credit and corresponding departments of their wholesale customers, and that they are making, when the bills are not discounted, debt collectors of themselves, and sinking the banker, and that when the bills are discounted they are assuming risks which do not belong to legitimate banking."

THE INDEPENDENT ORDER OF FORESTERS.

The greatness and grandness of assessmentism as life assurance, the glory and pride of the Independent Order of Foresters—the picturesque palaver of its representative, Dr. Oronhyatekha, have been pretty well exploited in the Old Country since the daring resolve was taken to open "courts" there, and get the slow-going English and Scotch folk under the benefits of the Order. But somehow the people over the ocean are not so easily dazzled. Some there were who no doubt were misled by the resemblance of this new concern to the Ancient Order of Foresters with which they were familiar, and so the English branch got a lot of members. But the advertising and the boasting and the promising were apparently over done, for the attention of practical people was directed to the extraordinary terms offered, and misstatements were discovered in the literature published. Then the Registrar-General got upon the track of the Order, and brought the *Times*, the *Economist* and other journals down upon it.

Now it seems that the affairs of the Order are not going smoothly in Great Britain. A Belfast paper, which is not much impressed with uniforms and sashes or with boasts and pass-words as factors in the safety of a life assurance scheme, has lately disposed of "the tomfoolery which attends the initiation of members into this so-called secret society of benevolently-minded simpletons." Mr. Brabrook, the Registrar-General of Friendly Societies, threatens it with severe penalties and with cancellation of its registry. The London *Review* of 19th ultimo says that "the affairs of this Order appear to be progressing rapidly towards a crisis." The same journal hints that the projected dissociation of the English branch from the Canadian parent society—in pursuance of which it seems Lieut.-Col. Paterson, who has been its representative in Britain, is about to leave England for good—is a bit of humbug. If it were true, and the British Order were to be entirely separate, what sense is there in all the wily Doctor's harangues about community of blood? "As a matter of fact," the *Review* goes on, "the Independent Order of Foresters represents one of the worst forms of the assessment or collecting societies. It is in its nature unsound. . . . it appears to us as if the promises of the Order in Great Britain should be viewed with the utmost misgivings."

But still, entrenched behind his rampart of cheek, smilingly confident in the willingness of people anywhere to be humbugged, so long as they are humbugged pleasantly and with appropriate speech or ceremony, the shrewd Chief Ranger tells the people of England that he is a Mohawk chief—that he represents a nation loyal to the British Crown—that the wearer of the Crown aforesaid is at this moment sovereign of Canada by reason of the aid and influence of the Six Nations. And so on at some length. And the *Standard* and *Daily News* take the Doctor seriously, and his Order gets a puff thereby. The apparent brief success of the Doctor's visit moves the *Review* in righteous wrath to ask if these newspapers ever read Parkman's histories about the Iroquois Indians, and to declare that "the Chief Ranger's statements with regard to the assistance rendered by the Six Nations to the English Crown are as void of respect as are his tables of mortality, his rates of premiums, and his claims for the Order he represents to be a safe, solvent, and enduring institution, worth the attention of the British public, and more especially of the working classes."

WOOL.

The Canadian wool trade shows no animation. Domestic manufacturers of woolen goods, while expressing confidence in the future of the industry, are not at present carrying on active operations. They are wisely waiting for the consumptive demand to come back again to normal conditions. In the meantime, they do not appear alarmed at the wool markets, and evidently expect that, if prices do not decline, they will at all events not advance. Values of domestic woolens remain on a very low basis, one class of Canadian tweeds selling at the unprecedented price of 20 cents a yard.

As a consequence of the waiting policy of manufacturers transactions in the wool market during the last several weeks have been of inconsiderable amount. Again this week merchants from the United States have been in Toronto endeavoring to sell fine wools; the demand for Canadian fleece from American markets, however, is not strong enough to lead to transactions in these descriptions. There is much diversity of opinion throughout the country as to the value of domestic fleece wools. One country merchant writes this week that he has 10,000 lbs. of wool on hand and expects to get 20 cents the pound for his fleece, and 18 cents for his unwashed; 18 cents for the former description and 10 cents for the latter would be prices more nearly approaching the market situation. It is impossible to get at the quantity of fleece held in the country; we know of several dealers who are holding considerable quantities, and should prices take an upward turn it would surprise no one to find a large quantity of fleece wool offered in the market. One Ontario merchant is said to be carrying 500,000 lbs. of North-West Territorial wool.

The London wool sales have failed to develop anything new since we last noted their progress. The expectation that they would establish a positive basis of valuation has not been realized, but although no very material advances in the market have been made, on the other hand, prices are not declining. Operators show an inclination to hold off until the November series. The series now in progress will end on October 15th. The first series of wool sales for 1895 will begin on January 15th, and the second on March 7th, without fixed limit to quantities offered.

FIRE INSURANCE RATES.

The Manitoba *Liberal* calls the Winnipeg Board of Underwriters some names, because it proposed to charge Manitobans, after 1st January next, a special rate of 5 cents per $100 over ordinary premiums, to provide for the provincial tax imposed on insurance companies. The board aforesaid is, according to the *Liberal*, "the visible head of one of the most odious monopolies and combines imposed upon the Province. . . . Taking outrageous premiums out of our people, it meanly undertakes to load this little sum (the tax) on its insurers." And then it is suggested that the legislature shall "pare the talons of this vulture," and somehow to solve the cheap insurance problem, "even if the Government has to go into the insurance business itself." Possibly the *Liberal* has not heard that

other institutions than fire insurance companies, and elsewhere, notably in the Province of Quebec, have taken like means of resenting and overcoming the exaction of provincial taxes. Should the "odious vulture" of a board, and the concerns it represents, withdraw from the insurance field of Manitoba, and leave the legislature of that province to do the insuring for the people, it would not take long to convince the *Liberal* that municipal governmental insurance is a will-o-the-wisp. That journal has a fling at the loan companies, too, for requiring their patrons to insure in stock fire companies, and then the stock companies "exact outrageous premiums." When the *Liberal* has exhausted its rage and its strong language, perhaps it will stop to reflect that the loan companies are doing business in Manitoba because Manitobans want the use of their money. Similarly, if insurance companies are doing business in Manitoba, it is because Manitobans want indemnity for losses by fire. If the loan companies are mulcted in taxes by provincial governments over and above what they have to pay at their head offices, they are likely to add these taxes, either avowedly or tacitly, to their ordinary rates. And the insurance companies have the right to do likewise. The *Liberal* would be the first to complain if an insurance company charged one per cent. on certain risks in Winnipeg because its experience of losses had been light in that city, and charged two per cent. for like risks in Portage la Prairie, because it had experienced heavy losses in that town. As to the incidence of fire loss, it would be an endless task for a company to discriminate in rates of premium over a thousand different places, great and small, in proportion to individual loss or immunity from loss. And so the science of fire insurance, by the teachings of long experience, has decreed that the fairest way, indeed the only practical way, is to charge an average rate for a certain kind of risk all over a country. The rates of fire insurance now charged in Canada were not calculated to include federal, local and municipal taxes. And if these various authorities wish to drain the underwriters as milch cows in the matter of taxes, they must be prepared to find the cows ask for more fodder.

PRODUCTS OF FIJI.

The placing on view in Toronto of an array of specimens of the commercial products of the Fiji Islands is an interesting circumstance. This exhibit was intended for the Industrial Fair last month, but arrived too late for that event. This being the case, its consignees, Messrs Murdoch, Barber & Co., have placed it on exhibition at 28 Wellington street east, near the Ontario Bank, and we take pleasure in advising our readers to go and see it.

Truth to tell, most of us know but little of this Crown colony of the Pacific, which indeed has only belonged to Britain for some twenty years. The islands number almost 200, and over 80 of them are inhabited, the total population being about 120,000. "The aggregate area of the colony," as the Hand Book tells us, "is greater than all the British West India islands put together." The Bank of New Zealand has branches in the towns of Suva and Levuka, and the Union Bank of Australia one in Suva. The imports of 1891 were $1,260,000 and the exports $2,370,000 in value. What these exports mainly were may be learned from the exhibit which has just arrived, and which we shall briefly describe. It may be added, as an interesting fact, that the letter from the Chamber of Commerce of Suva which accompanied them bore date 24th August, and arrived here from that once remote archipelago on the 18th September.

First in the list is sugar, which is the principal item of their export, next in importance being copra and green fruit. Raw cotton is an item of Fijian growth which may be expected to increase in export. The sample here shown is very fine of fibre, and it is claimed by the Suva Chamber that it stands at the head of the list of kidney cotton in the London market. Copra, which is an outer covering of the cocoanut, is used for the production of oil and oil-cake. The candlenut, which somewhat resembles a walnut, is used by the natives for lighting purposes; it is rich in oil. There is maize in enormous cobs, and native-grown tobacco; the tobacco plant was taken to the islands years ago by American whalers.

Rice is grown in Fiji, but has never yet been marketed abroad. It is not well prepared for market, and its appearance does not attract; but we are told that a good deal of money is being expended on machinery that will turn out the kernel in fine marketable shape. The sample of arrowroot sent is a handsome one, so too is their desiccated cocoa. Vanilla, as it is shown, is a curious looking product, looking more like slender sticks of licorice or attenuated twists of tobacco than anything we can think of. The root ginger is very attractive in appearance, and the native gum, of which a plentiful sample is sent, looks as if it might make not a bad substitute for gum arabic. Chili or cayenne pepper is another product of these prolific islands, and yagona is a substance with properties resembling the cola nut, said to be "good for one's head in the morning," if too much juice of corn had unhappily been partaken of over night.

The list possesses further interest for our manufacturers in that it includes sandalwood, that perfumed and closely fibred tree out of which my lady's fans have so long been made, and which is stated to yield an essential oil used to imitate attar of roses. Also tortoise shells, which even in their rough state are beautifully marked, and shells which yield mother of pearl in all its iridescent beauty. Coffee, apparently somewhat of the Laquayra character, is another item of as yet small extent in Fijian exports. Tea has also been grown. The substances entitled beche-de-mer and coir fibre are to be found in the list, and peanuts appear to the extent of some thousands of pounds sterling.

A PRACTICAL STEP.

In connection with the subject of Australian trade it is of service to have a letter like that of Mr. Wardlow in to-day's issue. That gentleman, being an importer of leather, was doubtless aware that the United States had been buyers of Australian hides and skins to the extent of a million dollars to a million and a half per year. And he rightly judged that what suited the American shoe and leather trade was likely to suit the Canadian. Therefore he bought kangaroo skins, wallaby skins, bear skins, merino sheepskins, sheep pelts, salted hides, and also tanned leather from New Zealand and various Australian provinces, and brought them to Montreal by steam and rail at a cost of $1.30 per hundred pounds.

Mr. Wardlow tells us what is probably true, that this is the first direct importation of this kind from Australia into Canada. It is safe to predict that it will not be the last. Such practical steps as this towards trade interchange must rejoice the hearts of Minister Bowell and others who have worked hard to further intercolonial exchanges, for they at once take enlarged trade with Australia out of the region of the theoretical and rhetorical and make it a live issue. We congratulate Mr. Wardlow on the public spirit with which he tells the whole story of his purchase, freight rate and all, without any mystery or secrecy. It will encourage other people to make like ventures in perhaps different lines of merchandise.

THE SALMON INDUSTRY

Salmon fishing has been resumed on the Fraser and the canneries are now packing cohoes. Latest reports say that the fish are not very plentiful, and in the presence of a good demand for salmon from the east and from salters, high prices are being paid for fish. Messrs. R. P. Rithet & Co., Ltd., furnished the following estimate of the British Columbia pack for this season:

Fraser River	300,000	cases
Skeena River	60,000	"
Naas River	20,000	"
Lowe Inlet	8,000	"
Rivers Inlet	40,000	"
Alert Bay	1,500	"
Estimated pack of province	429,500	"

The total pack of British Columbia last year amounted to 576,584 cases. Should the estimate of Messrs. Rithet & Co. be correct, this would leave a very considerable shortage in the pack of 1893 as compared with that of a year ago, and indeed canners are almost unanimous in claiming that there is a difference of 100,000 cases between the two packs. But the season has not been without its advantages to canners, and those who did not make early contracts for their output are well satisfied with the season's operations. Some of the canneries have put up twenty thousand cases, but some of the smaller concerns did not pack half the quantity for which they had made arrangements.

Concerning prices realized for this year's output, the Victoria *Times* says: "Over one half of the pack was contracted for in advance at 17 shillings for talls, 18 shillings and 9 pence for flats, and 25 shillings for half-pound flats. Some of the canners who held on have sold talls for 21 shillings, flats for 25 shillings, and half pound flats for 32 shillings, while others are still holding. These high prices have been brought about by competition between the London and Liverpool buyers. The Liverpool buyers bought in advance, while the London

buyers did not. One having purchased salmon at low prices can afford to pay higher prices for any more they require, and the London buyers having none on hand can pay good prices. While the London and Liverpool men continue to raise one another, the canners who have salmon to sell sit quietly by and wait until the highest price is reached. There are about 80,000 cases still unsold, but all of these will go to England. The Canadian buyers have offered $4, and in some cases $4.25 has been paid. The supply in the east is very short. The Australian market is the worst the canners have, although there has been a marked improvement this year. About 23,000 cases will go to that market in small batches on each steamer."

HOW TO PACK APPLES.

In an export trade there is always an element of international competition. Careless or dishonest individual firms may bring the whole export trade of this country into disrepute. The export trade of apples is a source of considerable profit to Canadian horticultural and mercantile interests. But negligence or carelessness or both threaten the trade with disaster. An old apple shipper has written some paragraphs upon the subject of "How to ship apples to Europe," which we repeat:

The most important point to be observed is the packing. The barrels should be new and made for the purpose. The filling should be done on a platform of boards and not on the bare ground. All wormy or bruised fruit should be rigidly rejected. The size of the apples is not a matter of prime importance. The first one or two layers of the fruit should be very fine and uniform. They should be placed in the barrel with their stems downward, as the bottom of the barrel becomes its head when the barrel is filled.

The remainder of the barrel should be filled by pouring in the apples slowly from baskets, care being taken not to bruise the fruit. The barrel should be gently shaken after each basketful has been poured in, until loosely filled. A layer should then be placed on top, with at least one-half the thickness of the apples in the layer projecting above the chine of the barrel. The head of the barrel should then be placed on top and the apples gently forced into the barrel by using a screw-press The barrels should be well nailed, and lining hoops securely fastened around the inside of the chines of both ends of the barrel.

EVAPORATED APPLES.

When an industry is struggling into existence those interested in its success are careful that its products shall be exclusively of the first quality. When, however, a certain amount of prosperity has been realized carelessness creeps into the methods of manufacture, and sometimes even dishonesty This has repeatedly been the case everywhere; it will, we suppose, continue to be so until the end of time. These reflections have been called forth by the remarks of a commission merchant regarding evaporated apples. "Some of the samples we have received of this year's evaporation," remarked our informant, "have been good, but a large proportion have been far from reaching the proper standard. Evaporators are looking for weight; they are not using good stock; they are not thoroughly drying the apples; in fact, they are only imperfectly evaporating them. A sample which we received a short time ago did not please me. I sealed it up again, and, opening it after the lapse of a couple of weeks, found the apples mouldy. There is trouble ahead for some one. We predict that many consignments will be rejected, and in some cases the stock will prove worthless." Everything points to a large pack this year, and it is too bad that such a state of affairs as this merchant reveals should exist.

AMERICAN BANKERS' ASSOCIATION.

The twentieth annual convention of the American Bankers' Association will be held in Baltimore on October 10th and 11th. In view of recent events great interest attaches to the meeting. Important business will engage the 500 delegates expected to be present. The mode of entertainment will not be a banquet, we are told, but a grand reception in which the ladies can take part.

We learn from the Rand-McNally *Bankers' Monthly* that the membership of the Association is increasing rapidly, and its prospects for extended usefulness are encouraging. "Under the present able management, and with changes in policy we hope to see attained at Baltimore, the future of this grand Association should be one to tell with inevitable force in favor of orthodox reform of the present crude and unstable system of currency and banks, more especially as regards the unconstitutional and uncommercial share the Federal Government has in these great concerns of our unsegregated nation. Next session of Congress may be named in advance the currency and banking session, and Congress will be the theatre of such wild, green, and crazy funambulation in these directions as to make the world stare. The bankers must come out of their tents and, no longer sulking, sail in for the battle of pure finance and common sense."

In connection with the coming convention, our contemporary tells us, Mr. Charles C. Hosmer, president of the Second National Bank, and W. T. Dixon, president National Exchange Bank, Baltimore, were appointed a committee to confer in New York with the Executive Committee of the Association. It was stated at a dinner given by Horace White to the gentlemen here named, that for the last fifty or sixty years Baltimore has never lost a bank by failure, and that this applies to both registers, State and National.

INSTITUTE OF ACTUARIES.

The next examinations of the Institute of Actuaries of Great Britain are announced elsewhere in this issue, to take place on the 19th, 20th, 22nd and 23rd of April, 1895, at the colonial centres, Melbourne, Sydney, Wellington, Montreal and Toronto. As heretofore, the examinations in Toronto will be conducted under the supervision of Mr. A. G. Ramsay, F.I.A., president of the Canada Life Assurance Company, and Mr. Wm. McCabe, F.I.A., managing director of the North American Life Assurance Company. The percentage of successful candidates of those who wrote in Toronto and Montreal last April was higher, we are told, than the percentage of successful candidates who wrote at the other points where the examinations were held. The same questions are submitted to all candidates in the examinations, and their answers are valued by the same examiners. The relative success of Canadian candidates should serve as an incentive to other young men in life insurance offices, who intend to make that business their life's work, to prepare themselves to take up the course of study prescribed by the institute.

DRY GOODS JOTTINGS.

A plain season in gloves.

Fur-gone conclusion—a moth-eaten sealskin.

Golf capes are bidding for popular favor in Canada.

New York kid glove importers are actively engaged with orders.

Are you preparing for the holiday trade? It's coming, remember.

The Irish linen factories of Ulster are still working on short time.

Serges, tweeds, cheviots, amazons and covert coatings are looked upon as good sellers for the fall trade.

Last year 170,000 pounds of whalebone was secured by the Arctic fleet, and this year only 30,000 pounds.

All wool serges are reported by Bradford manufacturers to form "the backbone of the dress goods trade."

Jacquard effects are receiving a good deal of attention at the hands of French manufacturers for next season.

Messrs. Chamberlain & Loranger, Sherbrooke, Que., have added part of the neighboring store to their establishment.

An appreciation of 10 per cent. has taken place in the price of Japanese raw silks in consequence of the war.

The Montreal Silk Mills, which were burned out last May, are again in running order with some new improved machinery.

Foreign advices respecting the leading grades of carpet wools are reported strong, and in this connection especial reference is made to Donskois.

There were three millinery openings in Waterloo last Friday night. The band played, crowds promenaded the streets, and the town presented a very animated appearance.

A reduction of 10 per cent. has been made in the wages of the employees of the Moncton cotton mill. This is the second decrease in wages made within the last several months.

Mrs. Youngbit—"There, a lady has taken the very hat I had selected. What shall I do?"

"Go and tell her you had had it put aside for your mother."

Tippie—"I don't see what you want with so many handsome silk stockings."

Sibyl—"Oh, I don't know. I'm saving up for a rainy day."

Chollie—"I'm going to have my dog's tongue split!"

Reggie—"Why, deah boy?"

Chollie—"Doncherknow, I think it would put creases in his pants."

In laces, says the *Drapers' Record*, there seems to be a strong feeling for Vandyke and half-points for dress trimmings; and there are indications that there will be a great demand for Nottingham, black beurre and cream lace.

We learn from the Perth *Expositor* that Messrs. Gemmill & Co., tweed manufacturers, of that town, are enlarging their capacity. They have ordered an additional set of machinery for their woolen mill and intend to employ about fifteen more hands.

Seal jackets in three-quarters and full lengths are regarded as the proper thing by those who can afford them for winter wear. Prices, in consequence of a recent decline in the value of raw material, will be somewhat lower this year than they were in 1893.

The dry goods firm of J. & W. Mickleborough, St. Thomas, has been dissolved, Mr. William Mickleborough retiring; his interest has been purchased by his brother, who will continue the business. The retiring partner has been for 39 years in the dry goods business.

The issue of a trade journal special number is becoming an event of frequent occurrence, but the autumn number of the London, Eng., *Drapers' Record* is of unusual excellence. With a tastefully designed cover, advertisements wondrously well displayed, and editorial matter of more than ordinary merit, the publishers may well be proud of their autumn effort.

Ladies in Paris are to wear velvet loose coats similar to gentlemen's smoking-coats. The coats are wadded, and the silk linings are most elaborate. These will be accompanied with a velvet vest in the same shade—or a lighter one than the coat—without sleeves, and furnished down the front with a wide box-pleat with three handsome buttons down the centre.

A report received from Bradford, England, says: There is great firmness in the matter of prices, as spinners do not expect to find any relief in wool. In pieces rather more has been done lately for Australia, and the Canadian buyers are operating with encouraging confidence. The Levant trade has also looked up a little. In the American trade a good deal of hesitation prevails as to what is likely to be wanted.

It is interesting, remarks the *Economist*, to note comparisons made by European manufacturers with reference to the diversity of styles of gloves required by the London, Paris and American markets. Auguste Reynier, of the firm of Reynier Freres, said in this connection: "The difference between styles demanded by various countries is widely marked. Many suede gloves, in lengths ranging from 15 to 30 buttons, pique glaces and plain staple goods are manufactured principally for the Paris markets. In London and America the demand for four-button glaces with heavy embroiderings is more pronounced. European consumers only purchase gloves that correspond to the actual measurements of the hand. In this market [we presume he means the American] a narrow, tight glove, which is necessarily less durable, is demanded."

FOR GROCERS AND PROVISION DEALERS.

About 15,000 barrels of oysters are sent to Montreal yearly.

A trial shipment of fish has been sent from the city of Quebec to Buenos Ayres.

The Aylmer Canning Company is canning apples at the rate of 250 bushels a day.

The movement in lumbermen's supplies is commencing to show considerable volume.

Recently some considerable shipments of beans have been made from Chatham, Ont., to the Maritime Provinces.

The potato crop in the vicinity of Quebec city is almost a complete failure. On the other hand, a splendid crop is reported throughout the Rimouski and Gaspe district in the far East.

The Victoria Canning and Oilery Company, with works near Ladner's Landing, B.C., are sending salmon and other oil to England. The shipment consists of oil put up in large iron drums, securely bolted.

Tuesday of this week the Delhi Canning Company, says a western exchange, packed the largest number of cans put up in one day since they have been in business. At night when they finished work the indicator stood at 39,976 cans.

An idea of the importance of the dairy industry in this province may be formed from the fact that last year there were in operation here 21 butter and cheese factories, 189 butter factories and 1,063 cheese factories.—*Quebec Chronicle.*

There is a cranberry bog at Auburn, in King's county, N.B. The entire crop, consisting of 150 barrels, says the Hants *Journal*, will be sent by car load to Montreal, where a market is already assured for them at prices in the neighborhood of $10 per barrel.

By way of a specimen of bucolic spelling a friend hands us a note addressed in a toil-worn hand to "Mr ——, grosser, Meadvill," which is evidently from a Scotchman, and reads as under: "Dear Sir,—i had the Patotes for Fall. a canna get a team tell ed firese up & all [I'll] tak it in so soon is I can—John McGachan."

Our Montreal correspondent tells of the arrival in that market of samples of a choice fruit in new California muscatel raisins, and he gives the prices of 3 Crown and Peacock brands. What with the importation here of California wines, of which Mr. Philip Todd speaks so eloquently, and California lemons and oranges and now California dried grapes, we are surely annihilating the distance of the Pacific coast.

The *New England Grocer* says of cranberries: The total crop of 1893 was over 1,000,000 bushels. This year it will only be about 400,000 bushels. The Cape Cod crop, which includes the crops of both Plymouth and Barnstable counties, Mass., is nearly or quite two-thirds short. The entire New England crop this year is only about 200,000 bushels, against over 500,000 bushels last year. The New Jersey crop has fallen off from over 300,000 bushels to not more than 177,000 bushels, and the Wisconsin crop from 80,000 bushels to 21,000.

Latest mail advices bring record of exports of sugar from Phillipine Islands for first seven months of year as follows:

	1892 Pounds.	1893 Pounds.	1894 Pounds.
United States and Canada	1,169,052	1,250,338	790,455
Great Britain	1,151,398	1,790,116	792,995
Continent of Europe	99,852	42,752	42,524
China and Japan	638,207	874,200	634,339
Total	2,998,509	3,967,406	2,260,784

At a meeting of dairymen held in Brockville recently the following resolution was passed: "That, whereas it is the general opinion of this meeting of Dominion butter manufacturers that something should be done towards having our butter placed in better condition on the British market, with a view of securing for us a larger portion of the trade with that country."—Resolved, that Mr. F. de L. Tache, John H. Croil, E. Castel and D. Derbyshire be named a committee to lay the views of this meeting before the Dairy Commissioner, Prof. Robertson, in order that he may bring the matter before the Minister of Agriculture and members of the Dominion Government."

Prince Edward Island fishermen complain of a scarcity of oysters this fall. However, says the *Summerside Journal*, a few years of strict enforcement of the regulations which provide that all small oysters must be returned to the water, and that mussel mud must not be dug within a certain distance of a live oyster bed, will doubtless have a good effect. In fact the regulation regarding small oysters may largely account for the great decrease in the catch this season, as it takes the fishermen considerable time to assort the oysters, where formerly they used to ship all they secured, both big and little. One thing is certain, this regulation must be enforced, and the oyster beds must receive all possible protection, in order to prevent their entire depletion.

HARDWARE AND METAL TRADE ITEMS.

The Russian Admiralty have resolved to use petroleum as a fuel for war ships.

The world's steam engines aggregate more than 26,000,000 horse-power, equivalent approximately to the work of 1,000,000,000 men.

The Stevens & Burns foundry, London, is again in operation. Mr. Burns has retired, and the firm will be known as the Stevens Manufacturing Company.

Brownell & Kennedy turned out their first bicycle on Saturday. It is a twenty-six pound wheel, and first-class in every particular.—*St. Thomas Journal*

Owing to the recent reduction in coal rates on the C.P.R., Lethbridge coal will be laid down at many Northwest points about two dollars cheaper than last year.

We have this year imported 3,750 tons more tin than in 1893, but the value of the larger import is about £150,000 less.—*English Iron and Steel Trades Journal*

During the first eight months of the year the 29 furnaces in blast in Belgium have produced 592,710 tons, as compared with 465,600 tons in the corresponding period of 1893.

More confidence is noticeable in the finished iron trade of France. The majority of the producers, however, have to content themselves with running their plants five and even four days a week.

All the tinplate mills in the United States have shut down, throwing thousands of employees out of work. The steel works at Scranton have shut down, throwing thousands of employees out of work.

Exports of hardware and cutlery from England this year to Aug. 31st are valued at £1,197,000—about £200,000 less than in 1893, and $250,000 less than in 1892. The value of United States trade in this branch declined more than 50 per cent.

There is some nervousness apparent on both sides of the Bessemer pig iron market. The disagreement in views that generally precedes a run of buying is apparent, and the probabilities are that the next ten days will witness some good transactions.—*Iron Trade Review*

There were 15,090 ovens in blast in the Connellsville region, according to the *Courier's* report for the week ending September 15. The

production is estimated at 147,025 tons of coke, while shipments were more than 1,200 cars a day, and an increased shipment of 357 cars over the preceding week.

An application is being made for a charter for La Compagnie de Carrosserie de Montreal, or, to put it into English, the Montreal Carriage Mfg. Company. The capital proposed is $100,000, and the applicants are Messrs. P. A. Lariviere, Paul Chartrand, E. Tougas, Adelard Robert and Israel Charbonneau.

Messrs. James Watson & Co., Glasgow, writing Sept. 21st, say: "The Scotch pig iron market has been flat this week, and prices have receded all round. A considerable business, principally in Scotch warrants, has been done, the general impression being that holders have been selling. The prospects of an early termination of the coal strike are not so good as they were a week ago."

It is interesting to note the displacement of cut nails by wire nails in recent years. The production of nails in the United States for a series of years is reported as follows, representing the number of kegs of 100 pounds each.—

Year.	Cut Nails.	Wire Nails.	Total.
1888	6,493,000	1,500,000	7,993,000
1889	5,811,000	2,435,000	8,246,000
1890	5,641,000	3,136,000	8,777,000
1891	5,002,000	4,114,000	9,116,000
1892	4,508,000	4,719,000	9,227,000
1893	3,049,000	5,949,000	8,091,000

BOOKS AND STATIONERY NOTES.

It is said that Raymon Moore, who wrote the words and music of "Sweet Marie," has already made $20,000 out of it.

He—"Can you remember the names of Howells' novels?"

She—"Oh, yes; Aunt Beaconhill makes me memorize them. But I can't remember the stories."—*Truth*.

"Hill-Crest" is a new book, the first issue of a new Toronto publishing firm, Cooper & Co. The book is after the style of the "Pansy" series. It relates the struggles of a motherless family of four girls; written by Mrs. Flewellyn, who is Canadian born, it deserves a place in many Canadian homes.

William Briggs, the Methodist Book Room, Toronto, will issue, probably next month, an important contribution to our biographical literature, in a "Life of Major-General Sir Isaac Brock, the Hero of Canada," from the pen of Mr. D. B. Read, Q.C. This gentleman, who has already written the "Life of Governor Simcoe," will have doubtless found a worthy subject for his pen in the life and character of Brock.

Sir Charles Tupper, the High Commissioner for Canada, has had under consideration the large number of essays on the history, geography and resources of Manitoba and the Northwest Territories of Canada, submitted by scholars in the schools of the United Kingdom, in the terms of the offers published in December last, by direction of the Hon. T. Mayne Daly, Q.C., Minister of the Interior. Much difficulty was experienced in awarding the prizes from the fact that so many of the essays were of considerable merit. Several of the papers that have not gained prizes were nearly up to the standard of those to which prizes have been awarded. They all indicate the attention that must have been devoted to the study of the history, geography and resources of the colonies. A total of 225 papers were received, 169 from England, 23 from Wales, 30 from Scotland, and 3 from Ireland.—*Canadian Bookseller*.

FIRE INSURANCE MATTERS.

The ratepayers of Huntingdon, Que., have met to consider the purchase of a steam fire engine. The fire committee had made a careful estimate and believe the steamer would cost only $20 or $25 more than the present system. No increase of taxation would be called for. After some conversation, it was moved by Dr. Cameron, seconded by R. Sellar, and carried unanimously, that the council have the approval of the meeting in the action it proposes taking.

Last year's losses by fire in the States have been computed by the eminent statistician and economist, Mr. Edward Atkinson, at more than $150,000,000. The waste of property in smoke, Mr. Atkinson says, "is increasing year by year in undue proportion to the increase of property at risk." An exchange thinks we ought to add to the $150,000,000 loss the cost of sustaining insurance companies, which is about $70,000,000, and the cost of sustaining fire departments, which is fully $30,000,000. Then the real measure of the fire tax of the United States during the past year may be placed at not less than $250,000,000. Is it not time the people of this continent learned how to lessen the ravages of fire?

While some municipalities take umbrage at practical suggestions from the underwriters as to the preparations for fighting fire, others are very glad to accept hints that may save them loss. In Cornwall, for instance, when some requests were made by the fire underwriters, the officials of the fire brigade took steps to put that organization in the highest state of efficiency. People are pressing upon the town council the urgent necessity of providing a hose wagon capable of carrying 1,000 feet of hose, and a horse or two to draw the same. On several occasions heavy losses have been sustained because the firemen, when they reached the fire, found they had not enough of hose and had to wait over until more was brought from the station. The *Standard* makes some further suggestions to the brigade with respect to the disposition of their coats and helmets.

BOOKS RECEIVED.

THE INSURANCE FILE.*—We have received another issue of this annual, which reproduces in *fac-simile*, photographically reduced, the latest issued yearly reports published by Life Assurance Companies doing business in the United Kingdom, and by the principal offices transacting insurance in its other branches. The reports are about 150 in number. One needs a magnifying glass to read them, in which respect they are even worse than the modern American daily newspaper, but for purposes of special record and reference they are valuable. There are other parts of the 250-page book which are legible by the ordinary man, not an entomologist or a watchmaker. For example, "Salient Features of Insurance Offices," in which the various schemes of insurance upon which the several companies pride themselves are tersely set out in a series of paragraphs, which are preceded by an explanatory editorial introduction.

IRWIN'S CANADIAN TARIFF HAND-BOOK.—Published by C. W. Irwin, Customs broker, Toronto. Price 50 cents. This new edition of an established work will be welcomed, no doubt, by many merchants. As Mr Irwin says in his preface, almost every branch of the importing trade has been affected by the recent tariff changes, and some carefully revised version of the law is a necessity for importers. The present edition, we are told, has had the advantage of revision by experts. It contains the latest tariff changes, departmental rulings, sterling and foreign money tables of francs, marks, lire, florins of Austria, florins of the Netherlands, showing their equivalents in dollars and cents, and other tables, such as metric weights and measures. There has been added a resumé of commercial law. "Other tariff books have been issued in advance of mine," says the compiler, "but I have preferred to be sounder and surer and not quite so headlong." The book has now reached 178 pages, and is a valuable adjunct to an importing merchant's outfit. Mr. Irwin has also handed us a copy of "Downing's United States Customs Tariff for 1894," a book of 530 pages, published by R. F. Downing & Co., William street and Exchange place, New York, which he says is the best compilation of the kind of which he has knowledge.

JOURNAL OF THE CANADIAN BANKERS' ASSOCIATION.—Vol. II., No. 1, September, 1894. Pp. 92. Published for the Association at 62 Church street, Toronto. Sent without charge to Associates. Any one not an associate may subscribe at $1 per annum. Communications for the *Journal* should be addressed to The Editing Committee, Journal of Canadian Bankers' Association, Toronto. Printed by THE MONETARY TIMES Printing Company, Limited. Noticed elsewhere in this issue.

ANSWERS TO ENQUIRERS.

EXPOSITOR, CITY.—Nothing of the kind was stated or inferred. The men are decent men. All there is in it is that they think they can accomplish a certain thing by stated methods in a given time. THE MONETARY TIMES, after enquiring into the matter, does not think so.

G.C.B., Detroit.—One element in the success of the Toronto Industrial Fair assuredly is the low price of admission, 25 cents, which induces more than double the number to attend who would do so if the charge were 50 cents, as in the case of the Detroit Fair. The first three years' total admissions, 1879 to 1881, averaged $25,000 annually; the next three years, $33,000 each; the next, $43,000, then $60,000; then in 1891 to 1893 the average figure reached $68,700, and this year has been $68,930.

H. B., Indian Head.—While it is usually a pleasure to furnish information to our patrons, we have never promised to search out statistics and make a lot of enquiries in order to oblige a person who does not even subscribe $2 a year for the paper. And we have no intention of doing this in your case.

EUROPEAN AGROUND, Cornwall.—The man who wrote you must have been mistaken. It is not livres that are meant, but lire, which are Italian coins worth about 19 cents each. Write to the consul at Montreal, or consult a banker. If the parties are respectable you should have no trouble.

*THE INSURANCE FILE. London: W. J. West, 21 Godliman street, and Page & Pratt, Limited, 5, 6 and 7 Ludgate Circus Buildings, London, Eng. Price 1s.; cloth boards, 2s.; by post 4½d. extra.

MANILA HEMP AND BINDER TWINE

Manila hemp, the Latin name of which is *Musa textilis*, is a product of the Philippine Islands, owned by the Spanish in the China Seas Mats, cordage and sail cloth are made of the coarser fibres, whose brilliancy and strength render them fit for carpets, tapestry, network, hammocks, &c. In its dry condition it is the manila hemp known to commerce and from which the best rope is made. Each stalk yields on an average one pound of fibre. When ready for market, it is carried on poles on the shoulders of the natives from the hilly interior of the country to the sea coast, to be gathered by small coasting vessels and delivered to the port of Manila, which is the great market from whence manila hemp is supplied to all parts of the world. A circular issued by Mr. John Hallam states that the Central Prison purchases its hemp from Manila direct, and by ordering only the better grades, has been able to produce a capital quality of binder twine. This runs an average of about 600 to 650 feet to the pound, is put up in bales containing 50 pounds net, or about 31,250 feet of twine to each bale, and will bind on on average upwards of 50 acres of grain, or over 15,000 sheaves, and, taking the price at 8c. per pound (the selling price of the season just closed), at a cost of about 18c. or less per acre.

PATENT RECORD.

The following list of United States patents granted to Canadian inventors, Steptember 4th, 11th, 18th, 25th and October 2, 1894, is reported by James Sangster, patent attorney, Buffalo, N.Y. :—

Hervey Tallman, Beamsville, Ont., double disk harrow.

Alfred E. Trevithick, St. Henri, Que., street clearing apparatus.

Henry Whiteside, Susex, Canada, sofa-bed.

James Woods, Newton Brook, Ont., farm gate.

Frederick H. Kinder, Strathroy, Ont., self-supporting attachment for bicycles.

William Borbridge, Thomas Fraser and William Prenter, Ottawa, Ont., assignors of one-fourth to Henry Bush Spencer, of the same place, air-brake coupling.

Gilbert Gagnon, Nanaimo, B.C., cable-grip for logging and other purposes.

James W. Provan, Oshawa, Ont., hay carrier track.

John W. Coyne, Ridgetown, and John A. Shannon, Dutton, Ont., churn.

Cyrus S. Dean, Fort Erie, Ont., assignor of one-half to Charles O. Rano, Buffalo, N.Y., boiler flue cleaner.

John Ross, Halifax, Nova Scotia, animal trap.

James Tomlinson, Granby, Que., apparatus for dispensing liquors.

Joseph A. Bisceglia, Waneta, Canada, means for raising sunken vessels.

John Brown, Weston, Ont., clothes dryer.

Harry Fowell, Belleville, Ont., aerator.

Peter McKellar, Fort William, Ont., machine for pulverizing rock.

Walter H. Morden, Toronto, Ont., file.

Samuel Roman, Montreal, Que., cigar package.

John W. Taylor, Peterboro, Ont., apparatus for the manufacture of carbon brushes.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Oct. 4th, compared with those of the previous week:

Clearings.	Oct. 4.	Sept. 27.
Montreal	$13,321,508	$12,006,890
Toronto	5,863,376	4,944,346
Halifax	1,405,056	1,174,374
Winnipeg	1,489,922	1,272,022
Hamilton	658,189	546,477
Total	$22,738,051	$19,944,109

Aggregate balances this week, $3,643,818; last week, $2,069,094.

—Hamilton continues to make progress in wealth as well as in population. The returns of the assessors for 1894-5, which have just been made public, show an increase over the previous year in both real estate and personal property. The assessment for income, is, however, materially lessened, which probably represents a true state of affairs in Hamilton as well as elsewhere. The total assessment is shown to be $26,349,820, an increase of $687,170 over last year's figures. The real estate assessment is $22,662,450, an increase of about $700,000 over the figures for 1894. The assessment of personal property amounts to $2,998,560 as against $2,896,055 for 1894. The assessment for income, however, is $719,810 less than in 1894. The population of the city is 48,491, an increase of 253 on the year.

—In spite of all the talk about business depression amongst us, and the fact that people have been "feeling poor," and therefore economizing, there are some hopeful indications. Mr. Power, the general passenger agent of the Grand Trunk, states that the business of his road has been very good, considering the widely-spread depression in the United States Tourist travel commenced about July, and has continued only in larger volume until now. But there was a decrease in through travel, short trips being much more general than last year. Then, again, the Canadian summer and seaside resorts were much more patronized this year than before. Now that the tariff difficulty across the lines has been settled, says Mr. Power, the outlook for winter business is good. And he adds that passenger business on the Grand Trunk has exceeded expectations. The Muskoka and Georgian Bay resorts, which are advertised extensively, had a large increase in the number of tourist visitors.

—In its column entitled "The Passing Hour," the last issue of the *Canadian Wheelman* has the following paragraph on the subject of stolen bicycles: "In Toronto thefts are of daily occurrence. An organized gang of these gentry of notoriously easy virtue must exist, for sometimes as many as two and three bikes a day are swiped by persons plainly well up in the business, for they effect their seizures with such neatness and despatch, and cover up their tracks so effectually, that but a small proportion of the wheels so mysteriously disappearing are ever recovered." In the opinion of the journal quoted the laxity of the police or rather the want of some system on the part of the detective department, is at the root of the evil.

—The importance of the cheese industry to this country lends interest to the statistics which show its continued activity and the increase of export. Our advices from Montreal show that 67,527 packages were shipped across the Atlantic from that port last week, making the total shipments of cheese from Montreal during the present season of navigation 1,199,815 packages, as compared with 1,085,682 packages for the corresponding period last year. In butter we have not yet "made a strike" in the Old Country. Progress is being made, however, in educating dairy women, and in establishing creameries, as well as in getting country storekeepers out of the bad habit of buying butter indiscriminatingly and mixing all qualities in their cellars.

—The annual outing of the General Mining Association of the Province of Quebec has been in the neighborhood of Sherbrooke. They went on Friday last per Quebec Central Railway to East Angus, where the visitors were taken over the pulp and paper works by Mr. F P. Buck, president of the Royal Pulp and Paper Company. Next came the marble and lime works at Dudswell, and then the chrome iron deposits of Black Lake. The party afterwards divided, some going over the Black Lake and the others over the Thetford asbestos mines. The convention was brought to an agreeable close by a banquet given to the members by the Hon. W. B. Ives, M.P., at his residence.

—Public opinion in Montreal has been thoroughly aroused to the inefficiency of the police organization in that city, and especially to its blindness to various evils in the current life of the city which it should have combatted. An investigating committee has at last been appointed by the city council. Furthermore, a committee of citizens has been organized for the presentation of evidence at the police investigation, and has secured the services of Messrs. J. N. Greenshields, Q.C., A. W. Atwater, and R. C. Smith, B.C.L. An office has been opened, where the evidence already in possession of this committee is being prepared for presentation. Mr. A. G. Jones has been engaged as a permanent secretary.

—The idea has suggested itself to some Halifax merchants to determine by means of an ocean race what particular build and rig of fishing schooner is the best. It has been proposed to get up a race, say, from Halifax harbor to Cross Island and return, if say twenty vessels of the kind named, from 80 to 100 tons burthen each, will enter. The *Herald* says it is proposed to raise the sum of $500, and then the vessels entering to form a sweepstake of $20 a piece, which, with the $500, would be divided into three prizes, the race to be run in October of this year. The object is to prove which build of vessels is the fastest, and also to encourage owners of vessels to have speed combined with safety.

—We learn that Mr. Thomas McDougall, manager of the Montreal branch of the Quebec Bank, has been promoted to the position of assistant general manager of that institution. The change of position will not, we understand, require Mr. McDougall to change his residence immediately from Montreal to Quebec

Correspondence.

DIRECT TRADE WITH AUSTRALIA.

Editor MONETARY TIMES:

DEAR SIR,—I give you as an item of news in connection with what business may be done with our sister colony, Australia, that I have lately made an importation of some goods, which comprise about all that can be used in the leather trade in this country.

Raw kangaroo skins.
Raw wallaby skins.
Merino sheep skins.
Sample lot of bear skins.
New Zealand pickled sheep pelts.
Sydney and Queensland salted hides.
Australian tanned sole leather.

I think this is the first direct importation of this kind from Australia into Canada, and I may add the goods were all bought from first hands, and were brought out by the S.S. "Warrimoo" on a through bill of lading from Sydney, arriving at Vancouver on the 11th ult. and in Montreal on the 22nd ditto.

Through rate of freight in car-load lots was $1.30 per 100 lbs., which, however, I understand is about 25 per cent. more than the Canadian Pacific Railway has actually carried goods for.

Yours very truly, J. H. WARDLOW.

Montreal, 1st October, 1894.

CAMP LIFE IN THE MINES.

Those who have never had to "rough it" far abroad, deprived for long terms of the usual surroundings of civilized life, scant of food, with only one mail in a month, have little idea of the sort of life persons are compelled to lead when they go to far countries as surveyors, engineers, miners. A brief description of the daily routine of a pair of Canadians who have for half a year or more been buried alive in the interior of Mexico, some hundreds of miles from the Gulf of California, now buoyed up with hope of a small fortune, now cast down by the desertion of their men or the failure of their rude machinery or the miscarriage of their supplies, may prove interesting. These two mining engineers, according to their letters, have not seen a white face except their own for four months, being surrounded, if they have companions at all, by faithless "greasers"; and they live as cheerily as they may their lonesome lives, plodding away in the endeavor to demonstrate what they, or some one before them, had predicted about the possible yield in gold of a certain location. Here are some extracts from the letter of one to relatives in Ontario, replying to a letter which had been six weeks on the way:

"San Marco's Ranch, Soyopa,
"Mexico, August 27th.

"I think I have the date right, and that to-day is Monday. We have a note made that we arrived at this particular spot on the 1st August, Wednesday, and a slight calculation produces the desired result.

"To-day is rainy, and we have not started work yet. We should call it Sunday. Our arrestra worked one day and broke. The centre post was not strong enough, and we have only just got it nearly repaired. Fixing required a piece of timber 18 feet long, and we don't find them so easily. Finally we got a sycamore about two miles and a half from here, trimmed it up and snaked it home in two days. Lott and I are entirely alone, with not even a Mexican within six miles of us. It makes progress very slow to have no men, as I find I am not fit for hard work, though apparently in the best of trim. With a very little work my back plays out. Still I can do a little. I used to think it must be grand sport to fell a tree; now when I have to do it occasionally, I think Gladstone an old fool. We have done very little mine work yet, but every stroke done makes things look better. There is evidently plenty good ore.

"The other day when we were up a canon after our timber it came on to rain heavily, and we had to take to a cave for three hours. Arrived at home the house indicated the heaviest rain yet. Our quarters were just pools of water, the largest being my bed.

"We have amusing things happen occasionally. For instance, after a fortnight, Lott thought he needed a shave, and finally settled down to it with a plate for a mirror. Again Lott had told how coffee should be roasted—slowly. Then he tackled a pound and spent 2½ hours stirring it over the fire. Next time, however, he did it in twenty minutes. Grub don't improve. Rice and milk have twice varied the monotony of beans and cheese for breakfast, and venison and onions for supper, since I last wrote. Our deer still holds out. [A previous letter had told of the shooting of a deer.] I find I use the term canon promiscuously and ill-advisedly. As a rule they are mere ravines on a large scale, but we have some of the finest box canons. In these, as a rule, one finds sycamore, and it makes a very pretty spot.

"We have an incident. A dog, mauled by a tiger, which they left at the ranch to die, has just crawled up in a dreadful state. Fortunately we have some bread left for him.

"Last Monday I thought San Marcos had its advantages, when I turned out to work in the rain with my dirty pajamas on, but a little went a long way and did not even wash the pajamas. Tuesday, Lott and I washed; Lott all his wash, I only a change. To-day he had the laugh at me, when I had to wash another change.

"The arrestra has been going fairly this week and seems to be doing something, but very slowly. It is badly paved and the drag stones are too small. Yesterday we finished our venison, and to-day tackled canned goods. To-morrow we go to Soyopa for provisions. Three days successively we have been out after deer and found none. Two men arrived the other day and will remain to work awhile. I rather like their style. R. R. H."

THE UTILITY AND VALUE OF SOME COMMON MINERALS.

The September issue of the *Canadian Mining Review* contains a paper bearing this title, read before the Ontario Mining Institute at its meeting here last month. We subjoin some extracts:—Five or six years ago a young man came to this city from one of our finished country villages to seek an occupation which might afford larger scope for his energies than the little annex farm at home appeared to promise. He took counsel with one or two friends, and after the merits of a number of projects were discussed, the general conclusion was reached that no business was as sure or safe as one which undertook to supply the common and everyday wants of the people. Food, clothing, and shelter, are necessaries of life, and whatever else man in a civilized state may do without, he cannot, or will not, dispense with these. Our young man had been a producer of foods on a small scale, and naturally he inclined to keep on in that line of business. But his heart was set on a specialty, and so he decided to establish a dairy farm and supply the city with milk. He reasoned in this way: "Every family in the city wants milk, and wants it every day. Being a cheap and nutritive food, and, for children especially, an almost complete diet, many people will buy as much as they require, and the poorer classes as much as they can afford. I am therefore sure of customers if I can supply a good, wholesome article, and the cash will come in as the milk goes out." This young man was wise enough to learn his trade in a well managed dairy before starting on his own account; but it was only a matter of a few months, and he began right. To-day he sells in the city the milk of nearly 150 cows, he has one of the cleanest and best equipped dairies in the province, and he is worth $25,000.

The story illustrates the wisdom of selecting a business that deals with the steady wants of the people, and while intelligence and diligence cannot be dispensed with in any calling, it is worth a good deal to remember that progress is always easiest along the lines of least resistance. Under some circumstances a business runs itself, to use a common phrase; under others it requires a vast expenditure of force and oil, and often then it fails. But many persons are so constituted that they have no pleasure in what are called the meaner pursuits of life. Nothing has a charm for them but to undertake the difficult or the impossible, wherein to succeed is glory and perchance a fortune, and wherein to fail is loss and disappointment without, it may be, a compensating grain of gathered wisdom.

The two most abundant minerals in this country are clay and lime, and they are likewise among the most useful. They furnish the raw material too for mineral industries of the first importance, in which a large amount of capital and many laborers are employed. Yet in the vulgar opinion, clay and lime are not worthy of being called minerals, and the seekers after gold, silver, copper, nickel and iron would corn to recognize the workers in clay and limes as fellow-miners. I think it will not be hard to show, however, that these very common minerals possess a value not in any degree inferior to the metals, and that they are deserving of much greater attention than they have yet received in this country, at the hands of moneyed men, and men of the best technical training in the mineral industries. But let it be premised that in this paper lime (using the term in its colloquial sense) will be dealt with only as material for the production of cements.

The statistics of the two industries in Canada and the Province of Ontario respectively, are given in the census reports for Canada and Ontario. We select the former:

	Canada.	
	1880.	1890.
Cement—		
No. establishments	9	19
Hands employed	115	243
Wages paid.....	$38,151	$85,960
Value of product	$91,658	$251,175
Brick and Tile—		
No. establishments	560	697
Hands employed	4,129	6,737
Wages paid.....	$608,690	$1,428,489
Value of product	$1,541,892	$3,584,713

Why, asks Mr. Blue, should we remain dependent on foreign sources of supply for Portland cement? And he replies: "We have in Ontario abundance of raw material for producing it. In scores of localities beds of white shell marl of large extent and excellent quality are found, some of them at the bottom of lakes in which myriads of fresh water shells yet survive, to add to the thickness of the deposit, as one generation follows another; others of them on the sites of lakes long ago filled up with peaty mould, or drained by continual elevatious. This marl, if unmixed with sand, clay, peat, or other matter of mineral or vegetable origin, is almost pure carbonate of lime, and furnishes the principal material for the manufacture of Portland cement. The necessary proportion of clay is a matter of experiment, but in all cases the purer and more uniform the quality of the marl, the easier it is to get a rich mixture. Our manufacturers in Ontario have acquired their experience slowly and dearly.

"Mr. Rathbun told me that it cost him five years of testing, with the aid of a chemist, before he was convinced that it would be safe to start his works. Mr. Butchart also told me that it cost his company several thousands of dollars, a visit to some of the best Portland cement works in England—where he was admitted as a special favor—and the services of two experts in the construction of a suitable plant, before they could produce a commercial article. But the Rathbun Company and the Owen Sound Company have succeeded, and during the last two years they have been producing a Portland cement which satisfies every requirement.

"In the strong and fine-textured shales of our Hudson river and Medina formations, conveniently situated and easily quarried, Ontario is favored above most provinces and states in America, and these are valuable for producing brick and terra cotta. The same shales are also found to be suitable for the manufacture of sewer pipe, with proper mixtures, and last year the output of two establishments employed in this industry was $230,000. Another clay industry is now on the eve of commencement, and if successfully established it promises to be a great boon to our towns and cities, viz., the manufacture of vitrified brick for street paving. In Ohio, Illinois, Iowa, and other American States, this has now grown to be a very important industry."

A HAND-BOOK OF CANADA.

American hand-books on Canada are now to be had everywhere. But for Europe no convenient hand-book was as yet accessible. There were, indeed, elaborate works with great names on the title pages. But of trustworthy, handy volumes, cheap and ubiquitous, there was none. Seeing this void, it was a happy thought of Mr. Karl Baedeker to send a qualified representative of his establishment to all parts of the Dominion to collect materials for a new hand-book for travellers. This representative, Mr. J. F. Muirhead, M.A., was no stranger within our gates, and he knew how to make his way to sources of information that left nothing to be desired. He had served a valuable apprenticeship in preparing the United States "Baedeker," and he has the gift of condensing lucidly. His

book is history, geography, constitutional *vade mecum*, sporting index, and railway and steamboat guide. It would be difficult to mention any matter of real interest touching the country, its people, its resources, its scenery, its historic and romantic associations, to which Mr. Muirhead has not given intelligent attention corresponding to its importance.

Horace long ago indicated the peril of excessive brevity in a pregnant line. Mr. Muirhead, though necessarily brief, is not obscure, and, for such a work, it would be difficult to improve his style. Beautiful maps and plans, due largely to the co-operation of the Surveyor-General, Capt. Deville, increase the value of the letterpress. In this respect the book is without superior, perhaps without peer. Monographs on the Constitution of Canada, by Dr. Bourinot, C.M.G.; on Canada's Geology and Geography, by Dr. G. M. Dawson, C.M.G.; on Sports and Pastimes, by Messrs. Fuller and Chambers, with several pages of chronology and bibliography, add to the reader's obligations. Special information on a variety of subjects was communicated by the Rev. Abbe Verreau, and Messrs. W. McLennan, W. D. Lighthall, Mr. J. M. LeMoine, Drs. A. Johnson and and S. E. Dawson and several other gentlemen, while the labors of Mr. George Johnson, Dominion statistician, have been utilized throughout.

We consider the appearance of this little book, so egg-full of precious knowledge, attractively imparted, an event in the growth of our country's reputation. Like all the great historic lands of the old world, Italy, Palestine, the Rhineland, the Nile country, the region of the Alps, Greece, the homes of the Vikings, the Troubadours, of Paul and Plato, of Dante and Shakespeare, of Burns and Scott, of Goldsmith and Moore, Canada which, since the days of Cabot and Cartier, has been the destination and the starting point of many a fruitful guest, has at last found its rank as a shrine of pilgrimage for the lovers of what is grand in nature and in human endeavor.—*Montreal Gazette.*

—The Westminster & Burrard Inlet Telephone Co. are about to replace a new cable across the Fraser, the old one having been washed away during the floods.

SENTENCED TO GO TO SCHOOL.

A youth's peculiar punishment for stealing is thus described in a paragraph from Larned, Kansas:

"Ray Vaughan, aged 14 years, pleaded guilty to the charge of petty larceny in Judge Van Divers' court this morning and received a most unique sentence. It was six months attending the city schools, and if without an excuse he absents himself from school, is to be taken into custody by the sheriff and incarcerated in the county jail for the full period named in the sentence."

Re Ontario Coal Company

The extensive docks of this company at the foot of Church street are offered for rent up to the 1st of May next.

Particulars on application to the undersigned.

E. R. C. CLARKSON,
Liquidator.

No. 26 Wellington St. East, Toronto.

—Effects are already felt of the change in the United States tariff. One Toronto firm has made a sale for 100,000 lbs. of Canadian fleece combing wool at a good profit. There is a better demand for wool at Ontario points, and prices are firmer, with purchases of fleece combing within a few days as follows: 15,000 lbs. at 17½c., 5,000 at 17c., and 4,000 at 18c.

CONSUMERS' GAS CO.

A FINANCIER.

There are plenty of ways of raising money in these hard times, but very few of them are as original as that of the impecunious German, a citizen of Munich, who, finding himself short of funds, had recourse to the following novel scheme for raising the wind. He ordered a confectioner to make a pie for his wife's birthday, containing, as a surprise, a lining of new twenty-pfennig pieces. The man's financial stringency was relieved, but the confectioner, at last accounts, was still waiting for his money.

—Money is tight, business is dull, and men are inclined to retrench in their expenditures. Some luxuries are given up, and there may be temptation to give up the life assurance policy—which is not a luxury. But these hard times furnish three additional reasons for life assurance, to wit: First, the life policy is the safest investment of money; second, the difficulties facing the family in case of the death of the assured are greater than in ordinary times; third, the rate of mortality is higher during a period of business depression like the present.—*Coast Review.*

—It took an Irishman to get a Governess-General (as Ragged Philosopher styles her) as saleswoman in his store, yet this is what Mr. Murphy, of the eminent firm of John Murphy & Co., Montreal, did recently. The Messrs. Murphy are agents for the sale of Irish domestic lace, and as Lady Aberdeen has set her heart on the encouragement of this industry in order to improve the condition of the Irish peasantry, she opened the lace department of Murphy's handsome new store, and actually herself sold some of the goods.—*St. John's News.*

—Inquirer—"Does a fish diet strengthen the brain?"

Philosopher—"Perhaps not; but going fishing seems to invigorate the imagination."—*New York Weekly.*

—An English paper publishes the following: "A good story is told of a country clergyman whose finances do not, apparently, extend to banking operations and experience. Going to the bank with a check, the clerk handed it back with a request that he would endorse it, and it should then be cashed. After much deliberation the reverend gentleman came to the conclusion that he could, without violation of his conscience, accede to the request. So he took the treasured piece of paper, and wrote across the back of it: 'I heartily endorse this check.'"

Institute of Actuaries

STAPLE INN HALL, LONDON

COLONIAL EXAMINATIONS

Notice is Hereby Given:

1. That the Annual Examinations of the Institute of Actuaries will be held in the Colonial centres, Melbourne, Sydney, Wellington, Montreal, Toronto, and Cape Town, on Friday, 19th April, 1895, and on Saturday, 20th April, 1895. In the case of candidates submitting themselves for examination in both sections of Part III, the examination will be continued on Monday, the 22nd, and Tuesday, the 23rd April.

2. That the respective Local Examiners will fix the places and hours of the examinations, and inform the candidates thereof.

3. That candidates must give notice in writing to the Honorary Secretaries in London, and pay the prescribed fee of one guinea not later than 31st December, 1894.

4. That candidates must pay their current annual subscriptions prior to 31st December, 1894.

MONTREAL MARKETS

MONTREAL, Oct 3rd, 1894

ASHES.—The market is quiet but the advance we have indicated is firmly held. First quality pots are now quoted at $4 35 indeed a little higher has been paid for one or two lots of extra tares. Seconds are worth $4. Pearls are perhaps easier a little, but in the absence of transactions it is hard to fix a quotation. The receipts of ashes for September were exactly the same as for September last year, namely, 103 barrels.

CEMENTS AND FIREBRICKS.—Supplies of cement are on the light side and English is rather firmer at $2 00 to 2 10. Belgian, $1 90 to 2 00. Firebricks firm, at $15 00 to 20 00 per thousand, according to brand.

DRY GOODS.—The little start up in business due to the frost of a week ago has been lost owing to the again milder weather, and city retailers of dry goods are disposed to complain. Some importing houses report a fair number of country sorting orders, but none of them large. Collections do not improve materially. Recent letters from buyers in England contain nothing of special interest with relation to the textile trade.

DAIRY PRODUCTS.—Transatlantic cheese shipments last week from this port were 67,527 pckgs, against 79,880 pckgs in 1893. The total shipments to date this season are 1,199,815 pckgs, against 1,085,682 to the corresponding date last year. Quotations are as follows: Fine fall western, 10½ to 10¾c.; August western, 10¼c.; fine Townships, 10⅝ to 10¾c. Eastern, 10¼c. per lb. There is a good local demand for fine parcels of butter, but very little shipping movement. September creamery is quoted at 20 to 20½c., earlier makes 18½ to 19½c., Townships dairy 16 to 18c., Western 15½ to 16½c. per pound. Eggs in good demand, and strictly fresh worth 13 to 14c. per dozen.

GROCERIES.—The improved movement in groceries is maintained, and wholesale dealers generally seem fairly satisfied with the business being done. We have seen samples of new California loose muscatel raisins, of which supplies are now to hand, and which are selling well at 6½c. for three crown, and 6c. for peacock brand. They are packed in 50-lb. boxes and are a taking fruit. New evaporated California peaches are also shown at 14c., and evaporated apricots at 15c., the quality being extra fine. The "Dracona," the first direct Mediterranean fruit steamer, has passed Gibraltar, and is due here the 8th or 9th instant. Low grade yellow sugars are very scarce, and the refineries are said to be out of the raw stock to make them. The lowest grade now available is quoted at 3⅝c. at the factory; granulated is unchanged at 4¼c. Molasses is slow of movement, but is still 27½c. per gal. for Barbadoes in round lots, single puncheons 30c. The stock in first hands is about 3,000 puncheons. The milling company is about making an advance in Japan rice, but other lines will remain as before. The tea market is full as strong as last noted, with a good many wanting goods. Offers from Chicago and St. Paul are in the hands of local agents for Japan houses, but are not up to their ideas, and values are undoubtedly stiffer than for a good many years. Canned peas and corn will certainly be in light supply; some small supplies of Hodge's corn are to hand, for which 95c is asked. Tomatoes will also be in short supply and prices are unsettled.

LEATHER.—The market is quiet, and apart from an order for 10,000 sides of sole placed last week by a leading shoe firm, for delivery as required, there has been no important business doing. Shoe manufacturers are pretty well through the fall cut, and setting soles are hardly due yet. Holders of leather are stiff in their ideas and No. 2's decidedly firmer; of splits there are comparatively few here and should any fair general demand arise a slight all round advance would be probable. There is a very fair English demand for junior splits. We quote:—Spanish sole, B A No 1, 18 to 20c.; do No 2 to B A, 17 to 18c.; No 1 ordinary Spanish, 17 to 18c.; No 2, 16 to 17c.; No 1 slaughter, 18 to 20c.; No 2 do, 17 to 18c.; American oak sole 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do small, 10 to 12½c.; calf-splits, 27 to 30c.; calfskins (35 to 40 lbs.), 50 to 60c.; imitation

French calfskins, 60 to 70c.; colored calf, American. 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 25c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 11c.; rough, 16 to 18c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—The advance in pig iron is well maintained, and $21 is asked for Summerlee *ex* yard, there being none on the wharf. We hear of no recent transactions in American iron. The Siemens' people have not yet put their furnace in blast, and are not apparently very anxious sellers. It is reported that American hoop iron is being offered at very low figures. Coke tins are not materially firmer, and offers of round lots for import have been made at very low prices. There are reported transactions in round lots at figures below our inside quotation. Ingot copper has sold at 9¾c. per pound in moderate lots. Zinc easier at $4.75 to $5. We quote:—Coltness pig iron, none here; Calder, No. 1, none here; Calder No. 3, none here; Summerlee, $20.50 to $21; Eglinton, $18.50; Gartsherrie, none here; Langloan, none here; Carnbroe, $19.50; Shotts, none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.50 to 19.00; Siemens, pig, No. 1, $16.50 to $17.50; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.65; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.05 to 2.10; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.30; No. 26, $2.20; No. 24, $2.10; tin plates—Bradley charcoal, $5.25 to $5.50; charcoal I.C., $3.50; P.D. Crown, $4.00; do. I.X., $4.75 to 5.00; Coke I.C., $2.75 to 2.90; coke wasters, $2.75; galvanized sheets, No. 28, ordinary brands, 4¼ to 4½c.; No. 26, 4c.; No. 24, 3¾c., in case lots; Morewood, 5¾ to 6c.; tinned sheets, coke, No. 24, 6 to 6½c.; No. 26, 6¼ to 6¾c.; the usual extra for large sizes. Hoops and bands, per 100 lbs., $2.30 to 2.35. Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.75 to 2.90; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9¾ to 10¼c.; sheet zinc, $4.75 to 5.00; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3¼c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in.. 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ¼c.; ¾ in., 3¼c., ⅞ in., and upwards.

OILS, PAINTS AND GLASS.—Linseed oil is subject to slight advance and likely to go higher; there is said to be a shortage of seed in Europe, and American crushers are buying in Manitoba. Turpentine is also firmer, with prospects of a rise owing to reported purchase in the South of some 60,000 brls. for export to Europe. In some other lines there are no changes reported. We quote:—Turpentine, 44c. per gallon for single barrels; two to four barrels, 43 to 44c. Linseed oil, raw, 55c. per gallon; boiled, 58c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6½ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 39c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

WOOL.—A wool salesman just returned from the West reports millmen more disposed to buy, stocks being low, and has done some fair amount of business. The London sales are progressing favorably, Germany being a pretty heavy buyer, and the firm tone is maintained. On spot sales of Cape have been made at 14 to 16½c.; with some extra lots of border wools at 16c., B. A. scoured has sold at 31 to 33c.; Australian greasy, 16c. No Nor'-West here; Canadian fleece, 17½ to 19c.

TORONTO MARKETS.

TORONTO, Oct. 4th, 1894.

DRUGS.—The general features of the market are very similar to those of last week. Trade, while not dull, has no special "snap" or vigor about it. Borax is easier abroad and lower in price on the local market. Glycerine is easy, prices being considered low. Opium remains unchanged, with the market in favor of the buyers. Morphine is slightly easier. Boracic acid is easier. Mercury and mercurial preparations show tendencies of weakness. Quinine is firm; some had expected manufacturers to advance prices at the beginning of the

PATTERSON & CORBIN
ST. CATHARINES, Ont.

400 ACRES choice farm land for sale in the township of Romney, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southward from Tilbury Centre toward Lake Erie. A portion of the land is within two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south of Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile farther north. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and rich, thoroughly drained, is covered with ash, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

These prices are wholesale by the car load.

month, but as yet this has not been done. Shellac is firm. Camphor has not lost strength. Cream tartar is inclined to be firmer.

GRAIN.—Wheat is dull at a decline of 2c. a bushel all around. One would naturally think that with wheat at 46 to 51c. per bushel, farmers would be inclined to speculate and hold their stocks, but such does not appear to be the case, for offerings at outside points are liberal. Barley, on the other hand, is coming in slowly and only in sufficient quantities to supply the local brewers. There are no shipments being made to the United States—at least we hear of none. American brewers prefer to wait until cold weather sets in before using Canadian barley. The unusually good quality of American barley this year also has affected the demand for the product of Canada, many American brewers failing to see that our barley is worth 10c. a bushel more than that grown in their own country. Oats are unchanged in price and are coming in quite freely at outside points. Rye has been advanced 2c. as a result of the action of two large western distilleries.

GROCERIES.—A rather active trade is being done on the street at present. For Valencias we quote: Layers and selected, 6 to 6¾c.; o.s, to f.o.s, 4¾ to 5¼c. Japan rice shows upward tendencies, but as yet prices show little variation. Local jobbers are quoting granulated sugars lower at 4⅞c.; yellows remain unchanged, with values well maintained. There is an active movement in teas, and Young Hysons have advanced.

HARDWARE AND METALS.—Business is good, and orders received by Toronto houses for general hardware lines are considered satisfactory. Ingot metals are not moving very briskly, but sheet metals are fairly active. Tin plate is selling but slowly, as the canning season is pretty well over. Values are unchanged, or vary little from last week. Fall orders are for large assortments, with few, however, for considerable quantities.

HIDES AND SKINS.—There is an easier appearance to the local market. This is in harmony with the situation in Chicago, where at present the bears are having the best of it. A merchant returning from American centres of the hide trade reports that there is every appearance of an improvement there. Hide merchants have ceased to talk unreasonable prices, and transactions are being made. Receipts of cattle at Chicago yards last week were very large, amounting to over 80,000 head. The advance made recently in Toronto has been nominally sustained; from now until December hides are in their best condition, and at present prices ought to be good property. Calfskins are quiet and attract but little interest. Lambskins and shearlings were advanced 5 cents at the beginning of the month; dealers are not holding stock, and some express it as their opinion that the usual advance will not be made in the middle of the month. Tallow is a little scarce, but prices remain unaltered.

LEATHER.—This has been a quiet week, with but little stir in Toronto leather circles. Orders from the eastern factories when received have been only for small lots. Stocks, especially of sole leather, are said to be small. The recent advance in the price of good heavy harness is being maintained, but light weights are in poor request. Tanners regard with satisfaction the easier appearance of the hide market, for when the prices of leather are down and the prices of hides up, there is but little profit in tanning.

PROVISIONS.—The receipts of butter are growing larger, and creamery especially is becoming more in evidence; medium and commoner qualities are accumulating with no apparent outlet. Quotations are nominal. Pastures are in good condition and the season should be long continued. Cheese, in sympathy with outside markets, is just a trifle easy. Hog products are unchanged in value; long clear is worth 8¾ to 9c.; hams, 11 to 12c.; rolls, 9½c.; lard, 9½ to 10c. Stocks of old products are now about exhausted. Dressed hogs are arriving freely, but arrivals are confined almost entirely to light weights; quotations stand at 6 to 6½c. Eggs are selling at 15c. per doz. Dried apples are selling at 5¾ to 6c., while evaporated are offering at 7½ to 8c. Some merchants are complaining of the poor quality of the samples of evaporated submitted here. The market for new hops is scarcely opened, while prices are low.

WOOL.—The Canadian mills are not making any urgent demands upon stocks. American buyers are holding off, and, in consequence, but little business is doing in Toronto wool circles. Some merchants are inclined to believe that a considerable quantity of fleece is still in the hands of country merchants. A Toronto dealer is said to be carrying 500,000 pounds of fine Territorial wools. A Chicago merchant has been on the street this week soliciting orders for American descriptions with but little success.

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

OUTLOOK FOR WESTERN RAILROADS.

The fall season has advanced far enough to afford some indication of the character of western railroad business during the next few months. A number of significant facts may be noted along this line. The first one, in point of time, to attract attention was that the amount of money going West for the movement of the crops was far below the average. It is true that the demands upon eastern centres were expected to be considerably smaller this year than usual, because the banks of the large western cities were carrying heavier balances in their own vaults than has been their custom. There are no indications, however, that western lending institutions have been subjected to any great pressure for funds for crop purposes. No surer sign of a light railroad tonnage can be discovered than an easy money market at this season of the year. It is to be hoped that conditions will improve as the season advances, but it must be admitted that the banks have about made up their minds that the demand for money is going to be comparatively light for the remainder of the year.

Another very significant fact is that all the western roads find themselves with an abundance of empty cars. Early this week the statement was made that the Chicago, Milwaukee & St. Paul road had 7,000 idle cars at the Chicago end of its line, while the Atchison had 2,000. A striking contrast is here afforded between the present year and past seasons. At this season, and in fact a little earlier, it has been customary to hear a great deal of talk about a scarcity of cars for hauling the crop. The suspicion has not always been lacking that a considerable portion of this talk was for the purpose of affecting the stock market favorably. The fact that no statements of this character are made at the present time is highly significant. The situation must indeed be discouraging when this time-honored argument for higher market quotations is considered unfit for service. It is hard, in the face of such a statement as that the Chicago & Northwestern railroad has not hauled one car of grain east from west of the Missouri river, for over four weeks, to stretch a point sufficiently, to declare that railroad traffic in the West is even moderately satisfactory.

A third straw is the reduction of the Rock Island dividend. The directors have voted to declare only one-half per cent. for the quarter, instead of 1 per cent. as heretofore. No one need be told that the Rock Island management would not have declared less than the usual amount had the same been earned. And yet it is admitted that this road is not likely to be so great a sufferer from the failure of the corn crop as some others, the Chicago, Burlington & Quincy, for instance. It may be assumed that had the directors of the Rock Island seen a good tonnage before them during the coming months, they would not have cut the dividend in half. If the coming quarter had given promise of returning a sufficient amount to insure the payment of the ordinary dividend, a decrease for only one quarter would not have been voted. The conditions enumerated above in connection with the western railroad situation afford scanty hope to those who are looking for a permanently higher stock market. — *United States Investor.*

"BALM" IN GILEAD AND ELSEWHERE.

At the gathering last week in Chicago of the Fire Underwriters' Association of the North-West, a paper was read by Charles E. Carroll, of St. Louis, special agent of the Home Insurance Company. The title of his paper was: "Is there no Balm in Gilead? Is there no Physician there?" Among other things, he said:

"Looking over the 'Chronicle Fire Tables,' you will find that a year's fire losses include about $7,000,000 paid for country stores, 60 per cent. incendiary; $20,000,000 paid for dwellings, 15 per cent. incendiary; $4,000,000 paid for flour mills, 45 per cent. incendiary; $5,000,000 paid for hotels, 32 per cent. incendiary; $5,000,000 paid for barns, 40 per cent. incendiary; and during all my years of experience, I have never seen in the West an offer of a reward for the detection of the incendiary. The crime of arson has been allowed to run rampant, unchecked by the people who suffer by it. The insurance manager has become, by his laxity, the partner in crime of the man who applies the torch, and foots the bills for the privilege of occupying the position.

"The man who is tired of trade, finds the way open to sell out for cash, at market prices. This should not be. Offer a reward, if it is only $25. Print it in the biggest poster type you can get, and post it on every blank wall and fence in the neighborhood. If you don't catch up with the incendiary you will make him feel that his neighbor, and everybody else, is watching him, and this action will deter many who contemplate burning their property.

"You are really your own physician, the balm is within your reach, and it remains but for you to prescribe it. To my personal knowledge the insurance men of this country have for twenty years been harping on the growth of public sentiment. It was to rise up like a mighty host and demand all manner of reforms, and to come down like an avalanche on all kind of iniquity. We have all hoped for a realization of these prophecies, but it has been a long hope, a 'hope on, hope ever, without end,' until it seems to me about time to do something else. This hoping business is just a little like love in a cottage, there's nothing in it.

"Do away with all this false sentiment against contesting fraudulent claims. There's nothing in it. It has become so public that the unscrupulous do not hesitate to take advantage of it, and that openly. If you accept a risk from a man whose name appears on the policy as Gordon, his place burns; he makes a demand on you and you find his name is Gardinsky, instead of Gordon; decline to pay it. His policies were obtained under false pretences. Do away with that cut-throat mortgage clause It is an injustice for which the respectable insurance company should not be responsible."

WHEAT GROWING HERE AND ABROAD.

The attention of wheat growers is drawn by the *Canadian Gazette*, of London, England, to the evidence recently given by Edward Atkinson, of Boston, before the Royal Commission on Agriculture. The farmer of the North-West, said Mr. Atkinson, is as well off when wheat is selling at 32s. a quarter as he was when wheat realized 54s., inasmuch as the cost of cultivation and inland and ocean transit showed a reduction of 22s. per quarter in the interval. Between the years 1873 and 1887, the cost of planting and reaping wheat was reduced by 2s. per quarter through the use of new and improved appliances, while the railway rates from the North-Western States to the eastern seaports of America were reduced 11s. per quarter, and the cost of ocean freight was reduced 5s. per quarter. Of course, wheat is not now selling even at 32s. a bushel, but the point is well taken. Mr. Atkinson does not fear for the American farmer because of the competition of Indian wheat; but he is afraid of the Argentine Republic, and there is certainly something startling in the fact that the imports of wheat into the United Kingdom from the Argentine rose from 2,800,000 cwt. in 1887 to 7,819,000 in 1893.

FOREST FIRES.

Ignatius Donnelly's theory that the fire which recently swept through the forests of Wisconsin and Minnesota was the tail of Biela's comet, a theory that is not new with him by the way, since he held to the same one at the time of the great Peshtigo fire, does not find lodgment to any extent with the public, but an observant and intelligent gentleman from the fire district who was in this city last week said in all earnestness to a group of friends that anyone who went over the ground after the fires had subsided and noticed the antics that had been performed in spots, would be convinced that some force besides ordinary fire assisted in the work of destruction. There has long been quite generally held a theory respecting tornadoes, which is that wind is not the only force at work in those storms. Electricity or some kindred force, it has been held by scientists, is the predominating destructive element in them that snaps off the trunks of trees as if they were pipestems, and performs hundreds of freaks the simple agitation of the atmosphere seems hard to hold accountable for. And now comes this new view of the forest fires. "Anyone who knows anything at all about the action of fire on standing pine knows that the wood is only scorched on the exterior and killed at the tops, and if cut right away is still available for lumber. Now, when the tops of the pine trunks are reduced to a white ash in a few minutes' time I tell you there has been some force there besides simply fire. Another strange thing to account for is that fact that where the force of the destroying element is most noticeable is in clearings where there was apparently nothing to burn. Whereas, in the forests proper the fire swept through the tops of the tall trees, wherever there was a clearing it swooped down and burned the very ground into a fine dust. Another thing, on our relief expeditions in search of the settlers immediately following the fires, we frequently found people lying dead within fifty feet of their burned homes, and apparently not burned at all themselves and with their clothing intact. This showed that they were overtaken and stricken down before they had time to leave their very door steps, and certainly in fleeing from a straight, oncoming fire, people would get further away than that. I have formed a theory—others may have another—that the hot sun which beat down upon the forests for weeks and months during the absolutely rainless summer generated some kind of a resinous gas which, when the fires got under headway, ignited everywhere at once, in the pockets it had accumulated in, and created a heat that burning pine alone never could have furnished."—*Milwaukee Sentinel.*

HOURS OF SHOPKEEPERS.

Mr. J. A. Stacey, secretary of the Early Closing Association, writes to a contemporary as follows:—Will you kindly allow me to call attention to a passage in Mr. Chamberlain's pregnant speech at Liverpool? Speaking of the hours of shopkeepers, Mr. Chamberlain is reported to have said: "In the early days of the session, Sir John Lubbock, who is a Liberal Unionist, brought in a resolution providing that shopkeepers should, in every trade and in every district, be able, under certain reasonable conditions, to regulate the hours during which their shops should be kept open. It is a fact that at the present time shopkeepers and their assistants are frequently forced to work in an atmosphere which, by the necessities of the case, must be heated and very unhealthy. They are forced to work for ten hours, twelve hours, and even fourteen hours a day." (Cries of "Sixteen and eighteen.") Mr. Chamberlain further went on to say that if the bill, which had been unanimously approved by a resolution of the House of Commons, had been brought on by the Government, the House of Lords would not have thrown it out If the Government is alive to its own interests among shopkeeping classes, it will endeavor to assist Sir John Lubbock in the next session. When I was in Glasgow, at the time of the last general election, shopkeepers told me: "We can sink our differences about Home Rule, in order to support the candidate who will vote for an Early Closing Bill." This feeling is not confined to Glasgow, as the remarkable success of the great demonstration in favor of the bill in the principal towns in the kingdom goes to prove.—*Grocers' Review.*

THE "RIGHT LITTLE, TIGHT LITTLE ISLAND."

A writer in the *Forum*, and an American writer at that, has been summing up the English people, and his conclusions are not uninteresting. He says: Here is a little kingdom of 121,115 square miles, with a population of 38,500,000, controlling possessions aggregating 9,145,328 square miles, and 346,025,500 in population; and, in addition to this enormous burden of foreign responsibility, England alone, with a population of 28,000,000, has almost 1,000,000 persons enrolled as paupers, is taxed to the amount of £15,000,000 for their support, and spends £3,800,481 a year, under the general head of Law and Justice, to keep her population in order. When, in addition to these trifles, it is recalled that "John Bull" has had Semitic transactions in the past to the amount of £671,042,842, which he dubs the National Debt, and upon which he pays annual interest at from 2 to 3 per cent., the wonder of less sturdy and less phlegmatic people grows apace. There must needs be colossal strength and pluck, marvellous financial elasticity, tremendous earning power, and a reservoir of national virtue somewhere, to explain these huge incongruities.

Canada Life ASSURANCE COMPANY

Sun Life Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

Brains and Capital

In every partnership there are two factors of great importance—the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the prosperity of each depend in part upon the life of both. The firm should therefore take one of the Unconditional Policies of the Manufacturers', which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

The Investment Annuity Policy
—OF THE—
North American Life Assurance Company

Provides that at death, or if on the Endowment Plan, at the maturity of the endowment period, the Company will pay the amount of insurance in 20 or 25 equal annual instalments, the first of such to be paid on the occurrence of the event or at the expiration of the endowment period. This plan at once secures to the beneficiary an absolute guaranteed income for the period selected.

The particular features of this plan are not embodied in any other policy of insurance offered to the insuring public of Canada. It contains elements which no company has yet offered to the insured.

A much lower rate of premium is chargeable on it than on the other plans of insurance, on account of the payment of the face of the policy being extended over a period of twenty or twenty-five years.

The favorite method of accumulating the profits is equally applicable to this plan of insurance as to the other investment plans of the Company.

For further particulars apply to any of the Company's Agents, or to

The Monetary Times P'tg Co., Ltd., Toronto

FOR SALE.

400 ACRES choice farm land for sale in the townships of Kingsmere, Co. of Kent, which is the Garden of Canada. These lots are situated on either side of the main road leading southwest from Tilbury Centre toward Lake Erie. A portion of the land is worth in two miles of the lake and a half mile north of a station on the new Detroit River and Lake Erie Railway. It is also about five miles south at Tilbury Centre on the Canada Southern and Canada Pacific Railways. The Grand Trunk is still one mile further south. On either of these roads a person may reach Detroit in less than one hour. The soil, which is deep and well cultivated, drained, is covered with oak, elm, hickory, basswood, etc. Terms to suit purchasers. **EDWARD TROUT,** Cor. Church and Court Sts., Toronto.

DECISIONS IN COMMERCIAL LAW.

THE UNION PACIFIC RAILWAY CO. v. SNYDER.—It is the master's duty to exercise reasonable care to furnish suitable machinery and appliances, and to keep the same in repair, and to make inspection thereof, and he cannot interpose as a defence, in an action for injury to a servant, the neglect of another servant to perform that duty. It is the duty of a railroad company to see to it that the wheels of its cars which are about to be drawn out on its road are in safe and proper condition, and this duty cannot be delegated so as to exonerate the company from liability to its servants for injuries caused by an omission to perform that duty, or by its negligent performance. A railroad company is not excused from its duty to inspect its cars by the insufficiency of the number of its inspectors and their competency, according to the Supreme Court of the United States.

LUTZ v. MAGONE.—The Supreme Court of the United States finds that in the interpretation of the revenue laws words are to be taken in their commonly received and popular sense, or according to their commercial designation, if that differs from the ordinary understanding of the word. Where the popular idea of an article and its actual use in the arts are diametrically opposed to its scientific designation, the latter should not prevail in fixing the duties payable thereon.

BELDEN v. CHASE.—The Supreme Court of the United States finds that the register declares the nationality of a vessel engaged in foreign trade, the enrolment, the national character of a vessel engaged in the home traffic, and enables her to procure a coasting license. The terms "coaster" and "coasting vessel" are applied to vessels plying exclusively between domestic ports, and usually to those engaged in domestic trade as distinguished from vessels engaged in the foreign trade or plying between a port of the United States and a port of a foreign country. The mere fact that an ocean-going steamer may touch at some other port of the United States, after leaving her port of departure, will not make her a coaster. Pleasure yachts designed as models of naval architecture are not coasters in any statutory sense, for they are not allowed to transport merchandise or carry passengers for pay. Yachts authorized to proceed from port to port of the United States, and also by sea to foreign ports, retain their character as ocean-going steamers, whether they are actually navigating from port to port of this country or to ports abroad. Obedience to the rules is not a fault even if a different course would have prevented the collision, and the necessity must be clear and the emergency sudden and alarming before the act of disobedience can be excused; masters are bound to obey the rules, and entitled to rely on the assumption that they will be obeyed. Where two steamers are meeting end on or nearly so, if the pilot of either blows a single whistle, the signal of passing to the right, and the other steamer answers by a single whistle, each steamer is bound to pass to its own right, and if afterwards one of the steamers changes the course by blowing two whistles, they must be given time to enable the steamers to change their course and pass safely to the left, or the steamer giving the two whistles is guilty of negligence if a collision thereby occurs

THE SLIDE AND SPUR GOLD MINES v. SEYMOUR.—The principle upon which a vendor's lien rests is, that one who gets the estate of another ought not in conscience to be allowed to keep it without paying the consideration. An intent to abandon a vendor's lien is not to be presumed; the evidence of an intent to abandon or waive it should be clear and satisfactory. A vendor's lien may be defeated if the grantor or vendor do any act manifestly with an intention not to rely on the land for security, but such intention cannot be inferred from the mere fact that the parties may not have contemplated the assertion of the lien in the first instance. The clause in an agreement for the sale of mining property, that the agent of the vendor shall retain control of the property until the purchase money is all paid, makes the property itself security for the price, and negatives the idea that the vendor relied for such complete payment solely upon certain shares of the stock in the vendee company, which were agreed to be pledged as security for such payment. This is a judgment of the Supreme Court of the United States.

SEYMOUR v THE SLIDE AND SPUR GOLD MINES.—One who holds possession of real estate as manager for or under another, cannot dispute that other's title, according to the Supreme Court of the United States. If a foreign corporation takes and holds title to real estate in a State, and by so doing any laws of the State are violated, the State is the one to challenge the act; it does not lie in the mouth of the agent of the corporation to raise the question.

MERRITT AND CORPORATION OF TORONTO.—The section of the Municipal Act which empowers any city, etc., to pass by-laws for the "licensing, regulating and governing of auctioneers and other persons selling or putting up for sale goods, wares and effects for public auction, and for fixing the sum for every such license and the time which it shall be in force," is only for the purpose of raising a revenue and does not confer any right of prohibition so long as the applicant is willing to pay the sum fixed for the license. Where, therefore, a city refused to license the plaintiff as an auctioneer on the ground that he was a person of a notoriously bad character and ill-repute, a mandamus was granted compelling them to issue to him such a license.

SEEBERGER v SCHWEYER.—The Supreme Court of the United States holds that the period of one year within which the importer is entitled to withdraw imported goods upon paying the duties and charges, runs from the date of their arrival at the exterior port and not from the date of arrival at the interior port of destination.

THE GATES IRON WORKS v FRASER.—The Supreme Court of the United States finds that the use of safety brake pins for saving machinery from the strain of a sudden jar is old, and their use for such a purpose in connection with the driving gear of a stone-crushing machine is not patentable.

METCALFE v CITY OF WATERDOWN.—The Supreme Court of the United States holds that statutes of limitations of action, real or personal, as enacted by the legislature of a State, and as construed by its highest courts, are rules of decision in the courts of the United States. Actions upon foreign judgments must be brought within the period prescribed by the local law, the *lex fori*, or the suit will be barred

—Says a London cable: "Taking advantage of the better tone of the markets, several Canadian schemes are being pushed in the city. One is promoted by the friends of the Montreal, Sorel and Baie des Chaleurs railway. It is proposed to float a loan of £4,000,000 in bonds in order to develop the through route between Baie des Chaleurs and Sault Ste. Marie, via Montreal and Ottawa, and thus be in a position to compete for the traffic of the Western States."

GEO. A. STIMSON

9 Toronto St. Toronto, Ont.

Mercantile Summary.

THERE were received last month at Montreal 54 cargoes of coal, aggregating 127,776 tons.

A WELL known resident of Essex county, Mr. Walter S. Pulford, carriage maker, died last week of apoplexy.

MR. JAMES FORREST, of the Halifax firm o Farquhar & Forrest, bankers, died last week after a brief illness.

JUST four years ago, Louis Rajotte, of Pembroke, compromised at 40 cents in the dollar. He is a general dealer. This week he is before his creditors with an exactly similar offer. Further, he is said to have failed once before 1890. Evidently Mr. Rajotte lacks some of the qualifications necessary to business success.

WE regret that a description of the programme of the Royal Agricultural and Industrial Society's Fair at New Westminster, B.C., was received too late for last issue. The fair occupies four days of this week, closing to-day. The show of the B.C. Agricultural Association took place at Victoria last week, Monday being Yacht Day; Tuesday, the opening day, with bicycle races; Wednesday, Americans' Day and Firemen's Tournament; Thursday, Canada's Day, with a lacrosse match; Friday, Citizens' Day, with a civic and school holiday; Staturday, Societies' Day, with horse-racing.

Mercantile Summary.

FREEMAN BROS., a furniture firm in Prescott, are reported as having assigned. They have been in business about four years.——E. Picard, a Quebec city grocer of moderate calibre, has made a voluntary assignment, and a statement of his affairs is being prepared.

THE assignment is reported of A. Cauchon, general store and tanner, of Malbaie, or as it is commonly called Murray Bay, Que. The insolvent was embarrassed two years ago, and then obtained an extension of time upon liabilities of $3,600.——N. Girouard & Co., general merchants at St. Guillaume, Que., have assigned, owing about $7,000. Mr. Girouard failed before in 1891, and has since made use of his wife's name.

THE supplementary catalogue of latest improved flour mill machinery and supplies, published by Wm. & J. G. Greey, of Toronto, is a substantial book of 116 pages with lithographed stiff cover, containing over ninety illustrations. The index shows in stock some fifty articles used by flour mill men, and the pictures give a very fair idea of each, whether it be a roll, a separator, a smutter, scalper, dresser, duster, purifier, packer, or any other mysterious machine used in producing flour. The statistics and tables at the end of the book are serviceable to the mill builder, too. Typographically the catalogue is distinct and pleasant reading, owing to careful type and press work. We know of no sufficient reason why we should withhold the fact that the book was produced at THE MONETARY TIMES printing office, which is ready to submit estimates for all such work.

IT has been decided that the Royal Corset Company of Sherbrooke shall be put into liquidation. The company was organized barely two years ago, and a recent balance sheet showed that their operations had resulted in a loss of $12,295, which will probably be increased by the depreciation the assets will likely suffer under forced realization. It seems that there must have been poor management somewhere. The liabilities to the public are only $4,220

NEW BRUNSWICK failures for the week are described as follows: Miss Agnes Jennings, dealer in stationery in St. John, has assigned. She succeeded her brother, D. J. Jennings, who failed in 1892, and could not get a settlement. ——H. T. Stevens & Co., publishers at Moncton, are reported assigned.——A jeweller at Fredericton, named R. Blackmer, is offering 50 per cent. cash, on liabilities of $4,621.——At Sackville, Edward Read, grocer, has made an assignment, preferring $2,090 out of $3,000 liabilities; the assets apparent are $2,000 or thereabout.

Mercantile Summary.

O'KELLY BROS., extensive dealers in aerated waters at Winnipeg, are in difficulty and have assigned.——This has been brought about by a judgment of $1,927 obtained against them by M. N. Rowney.——In the same city a fruit dealer named Thos. Reid also assigns.

THE Merchants Bank of Canada now occupies the offices in the new building of the bank at Preston, which is situated in the central part of the town. It appears to be well built, both inside and out. The office fitting and furniture are of quarter cut oak, and the work done by Canada Furniture Co., at Preston. The manager, Mr. A. D. Pringle, has a neat and cozy room to himself.

A CORRESPONDENT of the Amherstburg *Echo*, writing from Pelee Island, mingles sarcasm with his wrath in describing the audacity of a grape-buyer who visited that prolific island. We quote: "Two grape-buyers from Montreal came here on Friday last, and had the cheek to offer some of our grape-growers half a cent a pound for Concord grapes, the grape-grower to pay the freight to Windsor and furnish the baskets. Upon this one of the natives quietly showed them where the road was. So, after travelling around for some time without success, they consented to give three-quarters of a cent, furnish their own baskets, and pay their own freight, and thus they bought some." Another authority says they paid a cent the pound for black grapes, and a little more for the other varieties.

Type Presses Printing Material

GWATKIN & SON . . . . .
57 Bay Street
Toronto

About a year ago J. B. Ovens, jeweller, Carberry, was sold out by a Toronto firm. Afterward a new business was started under the style of Ovens & Co., but, meeting with no better success, an assignment was in order.

In this city Holtorf & Postan, tailors, have been sold out by bailiff.——It is evident that John Fogg, brass founder, is in trouble. He has been sued and judgment obtained against him for $375 by one of the banks. Frenkel Bros. are also sueing him for $1,800. He claims to have lost $7,000 by bad debts during the past three years.

The list of belting, belt fastening, belt clamps and lace leather, sent us by the J. C. McLaren Belting Co., of Montreal, is a neat bit of two-color printing. The frontispiece is a bank of clouds, with the name of the firm relieved against it. Why this was chosen as a trade mark we cannot guess, for there is nothing cloudy about the firm.

On Tuesday next the dry goods stock of Tod & Co., Bowmanville, will be sold by auction.——On the same day the general stock of W. Nightingale & Co. will be disposed of.——Saulter & Co.'s dry goods stock, Niagara Falls, was sold to N. P. Gould, realizing 47 per cent. ——Ham & Co., of this city, bought the dry goods stock of John Wall, jr., Chatham, for 69½ per cent.——The tobacconist stock of S. R. Wilkins, Galt, is advertised for sale next week.

The town of Boissevain, Man., has just made a sale of $10,000 school bonds to Mr. G. A. Stimson, debenture broker, of Toronto. These bonds were bearing 6 per cent. interest and repayable in annual instalments. We understand the town got a very good price for them. Mr. Stimson has also purchased $7,000 consolidated debt debentures of the town of Wiarton. These debentures are bearing 5 per cent., and repayable in thirty annual instalments. We are told the town got five hundred dollars premium for them.

A meeting of the creditors of Aaron Sweet & Co., general merchants at Winchester, was held in Montreal on Thursday of last week, at which was made a showing which was rather surprising, considering the general reputation the concern had enjoyed up to the very time of their suspension. The merchandise liabilities were $23,000, besides which there was a liability of some $12,000 to the Broder estate, mainly representing a loss in butter and lumber speculations dating back eight years ago. The assets, after allowing $4,000 on the book debts, and some other contingencies, showed a deficiency of about $8,000. Mr. Sweet made an offer of 45 cents on the dollar, which was not acceptable to the meeting, and he was allowed ten days in which to amend his offer.

At an inquest on a footballer at the Manchester Coroner's Court the other day, it transpired that the deceased was wearing at the time of the accident a pair of braces which carried with them an insurance of £100.

The beet root sugar factory at Berthier, Que., has again begun operations, and is now consuming from 150 to 200 tons of beets daily. The production is expected to be about double that of last year. The factory is under the management of Mr. Musq, with Mr. Ponchon as assistant.

According to the New York *Journal of Commerce*, the fire losses in the United States and Canada for September amounted to $10,149,000, as compared with $10,508,200 for September, 1893. The total loss for the first nine months of 1894 was $97,000,000, and for the corresponding period of last year it was $121,000,000.

Mr. Clarkson has prepared for the creditors a statement of the Ontario Forge and Bolt Co. in liquidation. The direct liabilities are $36,148; indirect, $2,744; preferred, $8,469; secured, $57,499, making a total of $104,860. While the company shows assets in land, plant, etc., of $371,048, subject to various mortgages of $167,000 in all, the liquidator is of the opinion that the only securities to be relied upon by creditors are the merchandise, material, book accounts and notes to $73,784, which leaves a deficiency of $31,075.

Failures among Montreal dry goods retailers have been much more numerous recently than is usual at this season, doubtless due to the fact that retail trade in that line in the city is very much overdone. It will have been noted that a large proportion of late insolvencies in this line has been among comparatively new beginners. Below we note several more additions to the list. E. Falardeau began business in the east end in the spring of 1892, but finding competition keen, moved to the westward extremity of the city. He evidently did not improve his position by so doing, and has assigned on demand, owing about $8,000.——Another retail dry goods concern, Lanthier & Labelle, a recent succession to the old established firm of Lanthier & Archambault, have been asked to assign Business has largely left the neighborhood in which their shop is placed, and there has been a lack of harmony in the new firm.——The liabilities of Bedard & Vincent, the two years old firm, whose suspension we noted last week, are $27,900, and largely due in Germany, where they had been heavy buyers of mantles, etc.

Of the three hundred and eighty-two volumes issued from the library of the Paris Mechanics' Institute last month, the character was as under, says the *Review*: Biography, 13; history, 12; travels, 13; religious, 1; miscellaneous, 14; science, 5; philosophy, 2; periodicals, 30; poetry, 5; fiction, 275; total, 382. That is, of religion, philosophy, science and poetry, only a baker's dozen books; of history, biography and travel, only three dozen; but of novels, twenty dozen! Dear, dear; we thought better of Paris than this. But what can be expected, when the librarian of so Scotch and presumably studious a town as Galt shows by the library returns that the reading of the members is of very much the same character?

A tobacconist named A. S. Chaput, who began business in this line in Montreal last spring, has already assigned. He was unsuccessful in the hardware line in 1890, and is evidently unsuited for business.——J. O. Lafreniere & Co., grain dealers, who compromised last spring at 25 cents on the dollar, have been obliged to assign, with present liabilities of $32,000.——The creditors of M. Lafleur, shoes, held a meeting the other day, when he showed liabilities of $4,200, and assets $2,900. A composition is being sought.——A demand of assignment has been made upon H. Bogaert, a river-front saloon-keeper.——C. Landry, a manufacturer of horse collars in a small way, has been under seizure for rent, and has now assigned.

An assignment has been made by John Dawson, who is a general storekeeper at Gelert, who has been in this business four years without making any substantial progress.——The livery stock of E. B. James at Thorold is advertised for sale under power of a chattel mortgage.——Ike Plumley, who kept a restaurant at Port Hope, has been sold out by the bailiff.——David and Duncan Hamilton, who are cattle dealers at Forest, are in trouble, owing to heavy losses in their trade, and have assigned.——Three years ago Coales & Hamilton purchased the dry goods stock of Keenlyside Bros., at Sarnia, amounting to $12,000, at 80 per cent., paying $3,000 in cash on account of the purchase. At that time it appears the business had declined, and with their limited capital they were never able to put it on a profitable basis.

CLOTHIERS' TRIMMINGS

59 Front St. West Toronto

From the extent of the stationery and book-binding business done in Winnipeg by R. D Richardson it was presumed that he was fairly well-to-do. But the bulk of the money in his business appears to have been borrowed, and he is now in financial embarrassment. There are some heavy judgments held against him.

ONTARIO TANNERS MEET

On Wednesday of this week the upper and harness leather tanners of Ontario held a meeting in Toronto to discuss that all-important question: Shall we raise prices of leather? The meeting was a very representative one, members of the following firms being present: Bickell & Wickett, Beardmore & Co., Toronto; Breithaupt Leather Co., Lang Tanning Co., Berlin; Marlattt & Armstrong, Oakville and Montreal; King Bros., Whitby; Patterson & Son, Peterborough; C. J. Miller, Orillia; Daville Tanning Co., Aurora; Newton & Bro., Richmond Hill: Beal Bros., Uxbridge. As we have previously shown in these columns, the Canadian leather industry is not being conducted on a profitable basis. On the 15th of last month the prices of cured hides in this market were advanced. Within the last severa weeks Chicago markets have advanced probably 40 per cent on the better hides. During the next few months hides are in their best condition, and if dealers are compelled to stock up, paying advanced prices for their raw material, they must necessarily dispose of their finished product for more money, or hold it until the market does take an upward turn.

We have not learned that the meeting decided upon making any definite general advance In values. And there is naturally a diffidence about doing so, since all know that footwear was never at lower prices than at present, and shoe manufacturers are not in a position to demand more money for their goods. It was the general opinion of the meeting that business throughout the country is reviving, and some thought the conditions of trade had improved sufficiently to admit tanners to a share of the prosperity. Others were of the opinion that if an advance were made later in the season it could be better maintained, and probably with this consideration in view a meeting has been called for November 1st. Another argument against an immediate advance is the present condition of the Chicago hide market, where the bears appear to be holding the upper hand, although quotations are no lower. Advices received on Tuesday state that packers are storing up their hides and appear more anxious to do business. Although the meeting may not have accomplished any marked result in the matter of prices, it has been of value in bringing tanners together and placing them more in accord with one another

SUBSCRIBING FOR A BOOK

In the City of London Court recently, Mr Daniel Woodcock sued Mr. R. O. Simmons for £4 4s., the balance of a subscription to a book on the "Home and Haunts of Shakespeare." The defendant had signed a written order for the work, which was to be published in five parts. He had paid the sum of £1 1s., and now the plaintiff sued for the balance due. The defendant's case was that the whole work was to have cost about two and a-half guineas, instead of which it would amount to £13. Mr. Commissioner Kerr said the defendant had better return the book which had been delivered to him, and he (the learned Commissioner) would give judgment for the plaintiff for £2 2s. as damages for breach of contract, and this settlement of the matter was agreed to.

MINING DEVELOPMENT.

The year 1894 has been remarkable as the one in which more advancement in mining has been made in British Columbia than during any year of the past, says the *Inland Sentinel*. What were but prospects in the Kootenay have become mines, and ore is being shipped regularly and in large quantities. In Southern Kootenay both quartz and hydraulic claims have been developed, while the quartz claims of the south Okanagan have become producers. Several of the hydraulics are working successfully in the Fraser river valley, while others have been put in order for next season's work. Preparations have been made for early operations on the Fraser and Thompson rivers, and these will be in operation shortly after the 1st of next February. Work has also been done in Big Bend and Similkameen, and the Kamloops district has not been behind with a shipment made of silver ore from the Homestake, and the Glen Iron mine is likely to resume. Next year will probably see the output of precious minerals from the province at least equal to the largest yield recorded. It seems quite apparent that the second era of British Columbia prosperity is just commencing

THE SITUATION.

One result of the Deep Waterways Convention has been to stimulate the New Yorkers to promote the enlargement of their State canals. The electors of the State will soon be called upon to vote on an amendment of the constitution which contains a provision for the enlargement of the canals. The New York Chamber of Commerce dwells on the importance of this amendment being carried. A depth of nine feet, with a lengthening of the locks, is all that is aimed at. Deepened in this way, the Erie would still be only a barge canal, presenting a great contrast to our canals enlarged to 14 feet, as they soon will be. The Chamber of Commerce expects that the gain in point of cheapness of carriage will be from three, the present rate, to one and a-half cents a bushel. The Erie will be deepened, and the competition of the two routes be made more severe for Canada. If a canal nine feet deep can carry at this rate, what rate can our more capacious canals insure? The increase to 14 feet now being secured has for its object the cheapening of freights, and the advocates of a 20-foot canal have the same object in view. But the fact remains that the Erie barge canal, with all its drawbacks, still attracts the bulk of the trade of the West. What is the explanation of this fact?

The canal question cannot be understood if considered alone and without reference to the Atlantic voyage, which is the complement of the inland traverse. Experience shows that relative rates of the cost of shipment inland, by the two routes, do not determine by which of the lines the bulk of the traffic will go. Down to a date in the sixties, the Canada route had an advantage of seven cents a bushel in the cost of carriage; and yet the relatively great stream of the western traffic went by the little barge canal to New York. At a later date the advantage was reduced to one-half; but under the conditions created by both rates, most of the traffic went to New York. Neither three cents and a-half nor seven cents advantage in our favor sufficed to secure the principal volume of the trade. Much of the grain was required in the Eastern States for home consumption, and had to be taken by the route which leads most easily to the places of distribution. But what of the surplus? The surplus followed the same line. Why it followed that line is the question which it behooves Canadians to try to fathom. Why was an advantage on the inland waters of three and a-half cents a bushel, at one time, and of seven cents, at another, not availed of in the carrying of the Western surplus to Europe? The explanation must be sought in connection with the business at the other end of the line, the Atlantic section, if it has an economic explanation at all. If it is to be found in something else, it behooves us to learn what that something is.

In connection with the authority given by Parliament to increase the Dominion note issue from $20,000,000 to $25,000,000, a singular omission in the printed law has been discovered. The banks had insisted, what the public, even without their intervention, would have demanded, that the additional issue should have a gold basis equal to the full amount. Both Government and Parliament accepted this condition. On the 14th July a resolution to this effect was passed by the Commons. The bill founded on the resolutions which embodied this condition passed both houses without amendment. The bill having become law, it is found not to contain the condition which made the gold basis equal to the five millions of additional issue. How the change was effected is a problem which is now seeking solution. It is not supposable that anybody made a deliberate alteration; the error must be traceable to inadvertence of some kind. A probable solution is that the printer lifted out the passage for the correction of some typographical error, and forgot to put it back. In old times, the original record of the law was a writing on parchment. In England the printed bill was first substituted for the parchment, and Canada followed suit. It is possible that if the written record had been relied upon this blunder would not have been made; but that is scarcely a reason why we should go back to reliance on the written parchment rather than on the printer's type. At the same time it is necessary to take some precaution to render a repetition of the blunder impossible. Will the omission prevent the law being carried into effect?

It is perhaps too soon to weigh the merits of an invention said to have been made in Ontario, in which volume of electric energy will be used to separate gold from inferior metals. In this story there is nothing improbable. True, it comes from Sudbury, and all mining coinages of whatever origin are apt to be subjected to severe scrutiny. That electricity should become an agent for this purpose should not cause surprise. A part of the report is that experiments have given very precise results. Let us wait with patience to see what there is in it. If the alleged discovery be all that is claimed for it, the result might in time be a great increase in the world's stock of gold by making the working of difficult or inferior mines profitable.

European residents in China not being sure of the ability of the Government to protect them, England has asked Russia, France and Germany to join her in concerting measures for the safety of their subjects in the Celestial Empire, and they have all consented to do so. An increased force of vessels will be sent by each of these countries to the treaty ports of China. The movement is in fact, to some extent, a repetition of the European concert previously exercised in regard to Turkey, of which China is the object. Nations are under obligations to protect their subjects who have gone to countries in which they cannot be assured of the protection of the proper Government. But this new European concert will not necessarily interfere with the action of the belligerents as such, or deprive the conqueror of the fruits of his conquest. The difficulty with a concert of nations interfering for protective purposes, in other countries than their own, is that they are apt to work with friction and even to get out of gear. In the Eastern concert of which Turkey was the object, England con-

stantly suspected one of her allies of ulterior objects. The suspected nation was the same Russia which Russophobes believe to have ulterior designs on China. Different aims may be developed by the new European concert in the case of China. A Russian journal, not unknown for its demi-official utterances, suggested before the concert was arranged that Russia, France and England should divide China among themselves. Such partition might not be desired by France, and certainly would not be sanctioned by England.

The formation of a company with a capital of $10,000,000 to operate a trolley railway between Chicago and Milwaukee has in it something of the prophetic. If a trolley can be operated over a road 60 or 70 miles long, it can be extended still further. Thus far it is possible to see at present. What will happen when the trolley is superseded by some other application of electricity to locomotion is a matter of speculation; but no one doubts that an advance of this kind is in the future. The trolley or its successor is destined to a suburban career on which, in this country, it has scarcely yet entered at all. It will create for itself, as it has already done in the United States, a new kind of business, prominent in which is the carrying of farmers' produce in small quantities, at a cost far less than it could be done by the farmer's wagon, and as a result both consumer and producer will benefit.

THE "SINGLE TAX."

By a recent vote, the Trades and Labor Council of Toronto refused to receive delegates from either the Socialists or Single Taxers. By refusing to hold communion with the Single Taxers, the Council has taken a stand which all decent people may be expected to follow. Of all forms of socialism, single tax is the most repellent to justice and fair dealing. The man who to get rid of his own share of the public burthens wishes to throw the whole expense of the protection of life and property upon a single class, has no right to expect the sympathy of the honest man who does not attempt to shirk his fair share of the public burthens. The manifestation of a desire to escape all contribution to the defence of life and property is the next step to leaving life and property unprotected, a state of things which is summed up in the single word anarchy. Some forms of socialism may command respect if not sympathy, but for single tax it is difficult to see how any right-minded person can have any other feeling than that of loathing and contempt. The real object of the Single Taxers, if no longer avowed, is the confiscation of one form of property, and that which in all countries is held in the highest respect. The confiscation of land, be it remembered, means the confiscation of all the mortgages founded upon it, which are not land, but personal property.

PIG-IRON PRODUCTION.

"Unsatisfactory as has been the condition of the pig-iron industry of Great Britain in 1894, it has been almost prosperous in comparison with the corresponding industry of the United States." Such are the words of the London *Economist* on the subject. The United States have fallen from a maximum output in 1890 of 9,202,000 tons to a rate of production in the first half of this year of only 5,436,000 tons, which means a fall of 40 per cent. Great Britain, on the other hand, has fallen from a maximum of 8,493,000 tons in 1882 to a rate of production in the first half of the present year of 7,336,000, which is a fall of 12 per cent. It is to be borne in mind, however, that the output of the last half year (June 30th), 3,668,270 tons, was a substantial increase over the same period of 1893. It was mostly in the Cleveland district that this took place, for Scotland showed a reduced make of pig-iron in that quarter, so did Lancashire, West Cumberland and South Wales. In all districts competition has been severe and prices low, but Derbyshire, Northamptonshire and South Staffordshire showed a marked improvement in output.

The three principal pig-iron producing countries of the world at the present time are Great Britain, the United States, and Germany. So recently as the year 1883 Great Britain produced about 400,000 tons of pig-iron more than the United States and Germany put together, but in 1892 these two countries together produced over twice as much pig as was produced in the United Kingdom. France, Belgium and Sweden all take part in the competition with Great Britain and Germany in the production of iron.

It was considered an extraordinary thing when in the year 1890 the United States for the first time exceeded the figures of Great Britain in the output of pig-iron, which they did by 1,327,000 tons. But in 1892 the Americans produced 2,540,000 tons more than Great Britain. These figures were commented on by American journals with much complacency at the time, while the enterprise and the greatness of America's industries were vaunted. The country had, in fact, doubled its iron output between 1885 and 1890, which we are told is a rate of progress unprecedented in the annals of the trade.

There came a "set-back," however, for the Americans, who had clearly been going ahead too fast in this, as they have done in other matters. In 1893 their production of pig-iron was perforce reduced; they retained the lead, it is true, in pig-iron production over all countries in the world, but were only 195,000 tons ahead of the British. And now, in the first half of 1894, the American iron production is only 2,718,000 tons, or 950,000 tons behind that of Great Britain, which has again taken the lead among the pig-iron making countries of the world.

The *Economist* comments upon the conditions of the industry in different countries, and while finding them scarcely satisfactory at home, declares that those of the iron industry of the United States have been even less so. The average annual output of pig-iron in the United States during the last five years has been under eight millions of tons, whereas the aggregate annual capacity of the furnace plant is not less than 16¼ millions. A significant fact cited is the number of blast furnace plants that have of late years in the United States been dismantled or abandoned, 66 having fallen into this category since 1892. The furnaces that have chiefly been given up are those that made charcoal or anthracite pig-iron, both of these descriptions having of late years given place very largely to iron made with bituminous coal, either as such, or in the form of coke. "Perhaps, however, the most remarkable recent fact about the American iron trade is that during the first half of the present year the blast furnace plant was not employed to the extent of more than one-fifth of its capacity, and at the end of June last there were only 108 furnaces in operation out of a total of 516."

A great decrease is found too in the pig-iron plants of Great Britain, and one naturally looks for such a movement in the finished iron industry, which has been so largely displaced by the improvements and economy effected in the manufacture of steel. "We are not, therefore, surprised to find that between 1877 and 1893 the number of puddling furnaces in Great Britain fell from 7,159 to 3,535, a decrease of more than one-half. But the same movement appears to have been in operation in a very remarkable way in the case of the production of pig-iron. In 1883 there were 909 blast furnaces constructed in

the United Kingdom. In 1894 the number had been reduced to 688." This decrease of 221 in the number of furnaces, assuming an average cost of £20,000 per furnace, would represent a capital expenditure of £4,420,000. But for all this the reduction that one would expect from these figures in the actual make has not taken place. On the contrary, it appears that in 1891 the 854 blast furnaces working produced as much pig-iron as 475 furnaces did in 1884. This result has, of course, been due to the greater efficiency of the means of production, which has enabled an average blast furnace to-day to produce a great deal more —sometimes quite three or four times as much—as an average blast furnace of only a few years ago.

After remarking upon the increasing dependence of Great Britain upon foreign ores, largely Spanish, in maintaining the pig-iron industry—the home ore output falling, within a few years, from 18 to about 11 millions of tons annually, and the Old Country falling, as an iron ore producer, behind both the United States and Germany—the writer in the *Economist* concludes that two things are pretty well established by the present statistical condition of the iron trade. The first, that the capacity of production is quite large enough to overtake any demand that may arise under improved conditions of trade; and the next, that the stocks are not large enough to threaten any serious difficulty in the way of an immediate rise of prices, amounting, as they do, to very little more than six weeks' normal consumption (783,402 tons at end of June).

FIRE RATES, ETC.

Apropos of the meeting in Toronto last week of the Canadian Fire Underwriters' Association, the one broad fact is to be noted as likely to afford satisfaction to the public: No change in the rating of risks has been made during the year. Certain Canadian towns have had their classifications lowered of late in consequence of their not having complied with the requirements of the underwriters in the matter of fire appliances. This was deemed a hardship, and gave rise to much loud talk in municipal councils, much harsh language in various town and country newspapers. But on the other hand, certain towns had their classifications raised by reason of improvements they made in fire protection. Sarnia, for example, because of the prevalence of incendiary fires in that place, had been degraded from class B to class F, "an extreme measure," as was admitted. But it aroused the citizens to do something to remove the stigma. They determined to put down this incendiarism, and offered a reward of $500 for the catching and convicting of the fire-starters. The underwriters promptly added to this reward other $500. This and other measures stopped the fires, and Sarnia was reinstated by the underwriters in class B.

Much time was spent at the meeting, we are told, in perusing and discussing the reports of inspectors of special risks, and it is perhaps not too much to say that it was time well spent. These officers reported in detail concerning the places they had visited, the inspection of premises made, and the improvements effected in individual risks by reason of which reduction of rate had been brought about. We are told, also, that these officials were able to announce that, as a general rule, they had found the authorities of towns willing to approve the recommendations of the underwriters with respect to fire appliances. The truth is, probably, that the sensible nature of the advice about protection from fire given by these experts to reeves and town councils commended itself. People who in their positions as town or village councillors are often apathetic and forgetful about danger of fire, become wide-awake and willing when, as merchants or manufacturers, they are told by an insurance agent or a visiting inspector: "Gentlemen, your fire appliances are defective: you could not fight a fire here with any chance of success; you must get proper water tanks and hose and reels, or else rates of insurance will have to be raised."

The reports submitted by the official inspectors of electric lighting were to the effect that the plants inspected were fairly well arranged in respect of fire risk, and that very few fires had arisen from defective installation. As a rule the fires that had occurred were caused by the workmen, such as plumbers, interfering with wires in the course of their explorations or repairs. It is worthy of note, in passing, that there is a great increase in electric lighting in Canada, especially in Ontario, and that electric motors are being used instead of steam engines to furnish power in a great number of cases. There are said to be now no fewer than 2,000 incandescent lights in nightly use in Toronto. Referring to the new rules of the Western Union of fire insurance agents in the United States, copied elsewhere, we may remark that the danger of using in factories the electric current which furnishes power to trolley cars, has long been recognized in Canada. And the rate of insurance charged on such premises is 8 per cent. extra, which proves prohibitory of the practice.

BANKRUPTCIES IN BRITAIN.

The Inspector-General of Bankruptcy in Great Britain has issued his report for the year 1893. It shows an increase over the previous year in the number of receiving orders granted, though the aggregate liabilities were less, and an increase in the number of arrangements under the Deeds of Arrangement Act of 1887. The insolvency cases under the Bankruptcy Act last year were 4,874 in number, with liabilities of £7,492,000, where in 1892 they were 4,695 in number, owing £8,763,000. The assets were in slightly better proportion last year than the year before, however, viz., 87.6 per cent. as against 85.1.

Among deeds of arrangement proceedings, however, there have been increases all round: in the number of cases of 605; in the liabilities of £1,616,000; of £1,281,000 in the losses to creditors. A comparison will show this:

Year.	No. of Cases.	Liabilities £	Assets £
1893	3,938	7,573,806	3,440,552
1892	3,333	5,957,022	2,937,615
1891	3,008	5,092,448	3,106,755
1890	3,097	4,360,271	2,352,941

Looking at the occupations of those who have gone into bankruptcy or arranged with their creditors, we find the aggregate liabilities of farmers to be the largest, next to them the building trades, then commission and general agents. On the other hand, wool manufacturers, beer and spirit dealers and "merchants" show decreased liabilities. Stock and share brokers show obligations of £713,000, of which £648,000, or ninety per cent., was an increase last year over 1892, a particular result which the Inspector-General attributes to prolonged financial depression, the heavy fall in speculative securities, and the restriction of investment.

It is pointed out by the Inspector that the system introduced by the Bankruptcy Act of 1883 has resulted in an annual average saving to the British Exchequer of £25,000, as compared with the system previously existing, and that the average cost of administration of estates by official receivers under the present Act during the past three years was 21·01 per cent. of gross assets, while the average cost of similar classes of estates administered by non-official trustees under the Act of 1869, during the last three years of its operation, was no less than 43·95 per cent.

TORONTO TRADE FIGURES.

More was exported from Toronto last month than in the same time in 1893, but the imports were much lighter. The aggregate import was $1,795,900 in September, 1893, and only $1,437,381 last month. Exports were $286,972 in September, 1894, and only $192,898 in the previous September. The decline in imports is general, the only items, in a list of twenty, showing increased import, being medicines, furs and jewellery. We give below the principal articles of dutiable import:

Imports.	Sept., 1894.	Sept., 1893.
Cotton and manufactures of	$ 62,836	$ 77,241
Fancy goods	43,178	58,907
Hats, caps and bonnets	31,924	41,365
Silk and manufactures of	51,174	91,313
Woolen manufactures	209,566	312,602
Total dry goods	$398,678	$581,428
Brass and manufactures of	$ 5,756	$ 8,719
Copper, "	438	4,612
Iron and steel goods	80,747	109,274
Lead and manufactures of	1,826	9,407
Metal composition, etc	6,894	8,387
Total metal goods	$ 95,661	$140,399
Books and pamphlets	44,084	62,333
Coal, bituminous	29,744	35,169
Drugs and medicines	14,816	13,375
Earthen, stone and chinaware	17,714	26,619
Fruit, green and dried	13,114	23,852
Furs and fur skins	19,580	11,187
Glass and glassware	32,538	34,892
Jewellery and watches, etc	33,443	27,624
Leather and manfrs. of	13,509	23,112
Musical instruments	10,412	15,675
Paints and colors	6,373	9,915
Paper and manufactures of	26,783	27,132
Spirits and wines	5,744	10,160
Wood and manufactures of	16,525	19,868

As a result of changes in the United States' tariff more activity is manifested in exports of field products, as well as animals and their produce. Increased movement of eggs, wool and dead meats across the border are shown last month by the return. Shipments of manufactured goods are not remarkable for their extent. We give hereunder the exports of Canadian produce:—

Produce of	Sept., 1894.	Sept., 1893.
The Mine	$126	$30
" Fisheries	.....	160
" Forest	24,934	24,118
" Field	41,030	4,090
Animals, etc.	142,029	63,289
Manufactures	50,708	58,920
Miscellaneous	104	.....
	$258,931	$150,607

Anthracite coal heads the list of free goods; its value brought in at this port during September was $90,072; that of coffee $19,297; dyes and chemicals, $19,297; fruits, viz., bananas and pine apples, $7,115; hides and skins, $12,280; metal goods, $13,104; tea, $64,150; wool, $15,100; settlers' effects, $17,240. The total value of free goods imported for the month was $354,691; that of dutiable goods was $1,063,624 in all.

A MARITIME BOARD OF TRADE CONVENTION.

A meeting of delegates from Maritime Province boards of trade was held in St. John, New Brunswick, on Thursday of last week. Mr. W. F. Hatheway, president of the St. John Board, was in the chair; Mr. Ira Cornwall, secretary, and there were delegates present from Newcastle, Woodstock, Moncton, St. Stephen and Fredericton in New Brunswick, and from Halifax and Amherst in Nova Scotia, while Sydney sent regrets at the absence of her delegates. The chairman, in his opening remarks, said that Fredericton had absorbed to herself a large part of the wholesale trade which St. John once had. Newcastle had a capable band of merchants and good representatives. Moncton was now a manufacturing centre of considerable importance. Woodstock was the centre of the dairying interests of the province, being situated in the best farming district. St. Stephen was known for her manufacturiug establishments. He was sorry there were not more delegates. They were not gathered here to talk of any special grievance, but to discuss laws that would help and assist the province. The people of Canada now felt that Canada was somewhat of a nation. Nobody knew what her destiny would be.

The first topic for discussion was railway freight rates. Woodstock delegates declared the freight rates were too high; the people of Carleton county were squeezed because there was no competing railway. They objected to the arbitrary rates of the C.P.R. from McAdam Junction to Woodstock. As an example of overcharge, Mr. Saunders cited the rate on dry goods, 15 cents from St. John to Fredericton, 42 cents from St. John to Woodstock. Resolutions were then passed of sympathy with the Woodstock board in trying to obtain redress of this grievance, copies to be sent the C.P.R. Then a Newcastle delegate moved resolutions censuring the discriminating policy of the G.T.R. and I.C.R. in freights through the north of New Brunswick, and objecting to the 5 cents extra per barrel to deliver at Campbellton, etc., than at Moncton, St. John or Halifax. Mayor Robertson, of St. John, endorsed these, saying that high rates on lumber from the North Shore to St. John handicapped them, especially when the Grand Trunk gave such low rates on lumber sent from Quebec ports to the Argentine Republic through Portland. The motions carried. Later a motion was passed favoring a special lumber rate from North Shore ports to St. John in winter.

It appears from the statements of Messrs. Morrison of Newcastle, Saunders of Woodstock, Pitts of Fredericton, that not only the country districts but the towns of New Brunswick are overrun with pedlars, selling shoddy cloth and every conceivable thing. Mayor Robertson said the hard times in the United States had driven these pedlars to new fields, and they were coming into the provinces in great numbers. As it was in St. John, a pedlar came in, got a license and then sent out a small army of agents to sell goods. As to the proposals made to the meeting that Local House legislation should be secured to tax every pedlar from $10 to $40 a year and make him wear a badge, several speakers showed that this was impracticable, as the Dominion controlled such matters, and the subject was dropped, but brought up again in the evening, when a resolution respecting pedlars' licenses was carried.

The adoption of a single standard of time, such as that of Eastern standard time, throughout New Brunswick, to get rid of the confusion of using first St. John local time and then railway time, was urged by Mr. Cruickshank in a series of resolutions. Many opinions were expressed, pro and con, but on motion further discussion was postponed.

Mr. Troop, president of the Halifax Board of Trade, moved, and C. A. Everett, of St. John, seconded, that a maritime board of trade be organized, representing all the local boards of trade in the Maritime Provinces; and that a committee of five be appointed from among the delegates here assembled, whose duty it shall be to report a brief scheme for such board. This being carried, Messrs. Troop (Halifax), Everett, Morrison, (Newcastle), Teed (St. Stephen), and Mayor Robertson were appointed the committee. The constitution they drafted was adopted, and is as follows:

1st—This body shall be known as the Board of Trade of the Maritime Provinces.

2nd—It shall be composed of delegates selected by the various boards of trade throughout the Maritime Provinces.

3rd—It shall deal with all matters of trade and commerce affecting the interests of the Maritime Provinces or of any section thereof, as well as matters affecting the interests of the whole Dominion.

4th—The officers shall be a president, a vice-president for each of the Maritime Provinces, a secretary, a treasurer and a board of directors, upon which there shall be at least one member from each board of trade affiliated with this body.

5th—Meetings of this board shall be held semi-annually in the month of —— at such places as may be selected by the board at its meeting.

Your committee recommend that the first meeting be called by the president of the Halifax Board of Trade at such time and place as he finds will be likely to best accommodate the various boards.

Then came the resolutions, submitted by Mr. Schofield, of St. John, claiming that the exportation of the products of Canada should be through Canadian and not through United States ports. It was suggested that Canadian railways and boards of trade and the Dominion Government should promote Canadian unity and prosperity by utilizing our own maritime ports in winter when the St. Lawrence is closed, and carry out the policy of Canada for the Canadians. The tenor of the addresses by the mover and Mayor Robertson was that of disappointment, that after all the money spent in building the Intercolonial Railway and the short line from Montreal to St. John, freight still went from the west to American seaports. It was insisted that the four ports of Halifax and Louisburg in Nova Scotia, St. John and St. Andrews in New Brunswick, were capable of handling the business, and some means should be found of forcing it to go to them. Hon. Mr. Lindsay, however, did not see what right any government had to say by what route people should import or export their goods. In spite of this hint, that trade would go where traders thought they could do best, the resolutions carried.

Mr. Joseph Finlay, of St. John, urged the curtailing of credit and

the selling of goods on shorter terms, both at wholesale and retail Shorter terms was, he sensibly said, in the interest of the legitimate trader. It reduced undue competition. It would be one of the best helps to collect accounts. The shortening of credit reduced the accumulation of stock. The short credit man was the more careful buyer.

A resolution passed, on the motion of Mr. Creaghan, seconded by Mr. Thorne, condemning the practice of wholesale dealers selling goods at retail. The business proceedings were succeeded by a most enjoyable luncheon.

MOLSONS BANK.

It is quite possible that the shareholders of this bank did not expect so favorable a report as was laid before them on Monday last. The showing of earnings for the year is equal to 13.24 per cent., which is more than 2 per cent. better than the year before. But no bonus is paid, the Rest being further swelled. From the proportions of the balance maintained at the credit of Profit and Loss, it would seem that the management aims at being prepared for some contingencies beyond the provision already made.

The aggregate assets and liabilities have shown for some years a steady increase. Deposits have increased by half a million. Among the assets, while current discounts are lessened, the sum of municipal and other securities and call loans is correspondingly swelled, and the holding of Dominion Government debentures remains as before. The aggregate of loans is now between eleven and twelve millions.

The habitual calm of the president was manifestly disturbed by the remarks made upon the statement by one of the shareholders. With something approaching heat, he replied minutely to questions asked, but refused very firmly to approve the suggestions of Mr. John Crawford as to the furnishing of a statement of gross profits and gross losses, reduction of expenses, paying quarterly instead of half-yearly dividends, etc. The opening of a branch in the west end of the city is referred to by the directors as adding to the convenience of customers, and tending to retain and add to the present Montreal business of the bank.

LONDON AND CANADIAN LOAN AND AGENCY CO.

The address of the president at the annual meeting of the London and Canadian, equally with the report of the directors, expressed with frankness but very hopefully the conditions prevailing among the farmers of Manitoba. They have had a fair crop of over average quality, secured in good condition, but the price they get for wheat is very low. On the other hand, they are learning to rely less exclusively on wheat growing, and to cultivate an increased variety of products; and further, the very economies they have been forced by reduced incomes to practise are having a good effect upon their financial condition. Payments of interest by their borrowers have been found, it appears, better than was to be expected. More money was received for interest this year than last, especially from Manitoba.

A reduction is observable in aggregate mortgage loans, while those on call or short date and the holding of municipal and other debentures are increased in amount. While not at present disposed to increase its borrowings in Great Britain, the company proposes changing the form of some of its obligations. With this object in view, the manager, during a personal visit, has made arrangements in Britain for issuing 4 per cent. perpetual stock in lieu of terminable debentures; indeed some have already been arranged for at a price netting the company very close to par. The reduction in the liability was $218,000 on the year.

Net earnings for the twelve months amounted to $66,940, which paid the dividend of 8 per cent., which required $56,000; municipal tax, $888, and left $10,052 to be dealt with. Of this, $5,000 was added to Reserve, making that fund $410,000, and the remainder carried forward to next year. We observe a reduction of some $12,000 in the aggregate of real estate vested in the company.

MUNICIPAL MEMORANDA.

As this is the time of year when assessors are making up the totals of their work, and comparing the wealth of their various municipalities this year with last, it is appropriate that we should make a small collection of such returns among the Ontario towns and villages, and of other memoranda relating to town and city councils

The Stratford assessors announce a gain in population of the town over that of last year of 138. The taxable property has risen from $3,880,275 in value to $3,964,060, an increase of $83,785 in the twelve months.

According to the returns of the assessor the population of Brockville is now 9,013—an increase of 382 over last year. The assessed value of property in the town is $2,853,760, somewhat less than last year.

In the city of Windsor the current year's assessment of real estate amounts to $5,221,263; personal taxes, $268,800; income, $59,050; total, $5,448,913. The population now numbers 11,452, which shows an increase of 450 in the twelve months.

The assessment valuation of Berlin is announced to be as follows: Value of real property, $2,483,070; personal property, $160,700; income, $58,900; total, $2,691,670. The population is declared at 7,775, being an increase of 213 over a year ago. The subject of the amalgamation of Berlin and Waterloo has been mooted. If Waterloo should agree to the union the two could corporate as a city with about 11,000 people.

Galt shows an increase of 202 in population as compared with last year. The valuation made this year of realty is $2,559,145, against $2,483,585 in 1893. Personalty this year $200,250, was $197,000 in 1893. Income this year $64,100, against $65,000 in 1893. Showing an aggregate gain over the whole of $77,910, of which increase real estate contributes $75,560 and personalty $3,250, while income loses $900. Population this year is 7,420, and last year it was 7,218.

In the course of some remarks made to a reporter of the Montreal *Gazette* by Mr. Charles D. Rose, of the banking firm of Morton, Rose & Co., London, England, that gentleman said, upon being asked how our securities stood in the London market:—"There is no doubt but Canada has held its own in this respect, but there is a feeling in the money market just now that some of the municipalities in the Dominion are showing a disposition to exceed their borrowing limit, rather overdoing it, in fact. However, they always get all the money they require when they ask for it."

The Lindsay town council has repealed a by-law passed some time since, making a grant of $25,000 to the Lindsay, Bobcaygeon and Pontypool railway.

The village of Brighton levies a rate of 14 mills on the dollar this year.

We learn from the Manitoba *Free Press* that the civic debt of Winnipeg is to be reduced. The first series of bonds of that city, amounting to $250,000, mature on October 31st. It was thought advisable to pay these bonds instead of asking for a renewal, as such a step would tend to strengthen the credit of the city. The sinking fund trustees were therefore called upon to furnish such funds as they were able towards liquidation of the above debentures. The trustees accordingly realized a portion of their securities, and have paid to the city $135,000. The balance has been provided for by the finance committee, and on the 31st of October the city debt will be reduced by $250,000.

Under authority of the "Water Works Loan By-law" of the city of Victoria, B.C., tenders are being asked for for the purchase of $150,000 debentures. The corporation reserves to itself the right to redeem these debentures at the end of twenty-five years.

Tenders for the purchase of 320 first mortgage bonds of the Ottawa Electric Company are asked for. The paid-up capital of the company is $645,000, and bonding power limited to amount equal to one-half the paid-up capital stock.

INDUSTRIAL LIFE ASSURANCE

There are in Great Britain six industrial companies having annual incomes of £100,000 or over. These offices received in premiums and disbursed in claims, surrenders, commissions and expenses the following sums during six recent years:

	Premiums	Claims and Surrenders	Commission and Expenses	Per cent. of Claims to Premiums	Per cent. of Expenses to Premiums
Prudential	£21,629,372	£8,947,376	£8,362,136	41.4	38.7
Refuge	3,644,819	1,633,621	1,577,429	44.8	43.3
Pearl	1,648,114	714,414	812,849	43.3	48.7
British Workman's	1,657,350	829,768	820,144	49.7	48.5
Wesleyn and General	1,145,770	532,251	562,275	46.7	49.4
London, Edinburgh and Glasgow	1,088,328	513,389	727,818	49.4	70.0

A casual glance at this table shows that the per cent. of claims to premiums and of expenses to premiums are pretty nearly in the inverse order of the volume of business transacted. During the six years named these companies paid in claims and surrenders the sum of thirteen million pounds sterling, or over $65,000,000. The little amounts which constituted this immense aggregate went to myriads of homes in the hour of sorrow and distress. Who knows the amount of suffering which they alleviated?—*U. S. Review.*

THE NEW RULES OF THE WESTERN UNION

The following are the new rules just issued by the Western Union of fire insurance agents in the United States:

Electrical Fire Hazard—

Whereas, Inspections of the wirings of buildings for the use of electric light or power reveal many defects from the requirements of the national code of rules, therefore,

Resolved, That an addition to the rate shall be made for such defects as may be shown by the report of the electrical inspector; that to secure such inspection, which, whenever practicable, shall be at the cost of the assured or of the party who has done the writing, local board commissioners shall take such action as they may deem wise and proper; and,

Whereas, The use of a current from trolley wires, or street railway rails, is largely the cause of fires; therefore,

Resolved, That if such risks are written at all by members it must be done at an increased rate; therefore,

Resolved, As mandatory, that the several local board commissions be, and they are hereby, requested to advance the rates on all buildings or their contents, where an electric current from trolley wires or street railway rails is used for electric light or power, not less than 1 per cent.

PETROLIA OIL MARKET.

Some improvement has lately taken place in the Petrolia crude oil market, and as values still remain upon a very low basis, even better things are expected. The Petrolia *Topic* believes that the producer is not getting as much for crude oil as the price of refined would warrant.

"Last August," says the *Topic*, "the Imperial Oil Co. was paying 98½ cents for crude at Marthaville, and $1 delivered at the refinery. Now they are paying $1 at Marthaville, and $1.1½ at the refinery. In that time the price of refined has risen from 5½ cents (in bulk) to 6⅞ cents, a difference of 1¼ cents. The generally accepted ratio between refined and crude is about 1 to 16. That is, a difference of 1 cent per gallon in refined should make a difference of 16 cents per barrel of crude. On this argument the price of crude should have risen about 20 cents per barrel since August 1. Instead of that it has gone up *one cent and a half*. Truly this a magnificent raise! Yet the producer appears perfectly content to go on delivering his oil to the refineries, taking just what they choose to offer, and complaining about 'hard times,' instead of hiring a mule to kick him for his own folly and faintheartedness."

Appended are the shipments of crude, and refined reduced to crude equivalent, from Petrolia over the G.T.R. and M.C.R. for the month of September, together with a comparative statement for the same month of the two preceding years:—

GRAND TRUNK.

Crude.	Refined.	Equivalent.
14,220 bbls.	23,430 bbls.	72,795 bbls.

MICHIGAN CENTRAL.

3,915 bbls.	13,305 bbls.	37,178 bbls.
Total equivalent.....		86,345 bbls.

1892.	1893.	1894.
116,605 bbls.	109,027 bbls.	109,973 bbls.

DRY GOODS JOTTINGS.

Tips their hats—the wind.

Cold weather has had a good effect on trade.

The price of cotton has taken a sudden fall in Manchester.

The uses for black ribbon increase as the season rolls on.

With the football season now on, sweaters are selling well. Prices are much lower than they were a year ago.

Retail merchants who can offer an assortment of durable gloves to retail for $1 as a holiday leader, will aid sales.

Solid checks and dog-tooth checks are novelties in patterns of prints for the spring trade, and are very taking.

A good number of Canadian merchants and buyers are now in Manchester, Eng., looking after dry goods supplies.

The price of cotton is lower than it has been in 45 years, and the crop this year promises to be the largest ever known.

In Paris, when a local shopkeeper advertises to sell "at cost," he has to keep his word, or the Government knows the reason why.

The designs in prints this year are not large, but, on the other hand, samples indicate that small and medium sized designs will be most in favor.

In British fabrics for dress purposes fancy tweeds occupy a prominent position. Serges, covert coatings, and hop sacks are also likely to have a good run.

Have you had a cloak opening? The season is getting late, but you may yet be able to arrange a special day devoted to displaying and selling women's cloaks.

The Shopper—"I'd like to buy that lovely lamp shade, but I can't affork to pay $10 for it." The Salesman—"Well, ma'am, I'll make the price $9.99." The shopper—"Oh, how good of you; I'll take it."

The Belfast Flax Supply Association gives the following as the total acreage under flax in Ireland in 1893 and 1894:—Statute acres, 67,487 in 1893, and 100,851 acres in 1894, showing an increase for this year of 33,364, or almost 50 per cent.

A whipcord like serge, says the New York *Economist*, is out for next spring, and foreign agents are banking considerable faith in its popularity. As a travelling costume material its equal will be hard to find. Foreign retail houses have looked upon this material with great favor, so we are informed, as a leader for next season.

In the goods now being shown in Manchester for the autumn trade crepons and habit cloths occupy a prominent position. The latter have met with a very steady sale, and for plain cheviots the demand is steady, the shades including tan, brown, myrtle, reseda and olive.

The sable tail business will be good if the numbers shown are any guide. They are seen everywhere in profusion, ornamenting the necks of costumes and mantles, and even coiling round otherwise ugly iron columns they look remarkably well. From all appearances it seems safe to assume that the "little animals" will command a good sale.—*London, Eng., Draper's Record*.

Before cold weather has fairly set in, preparations are being made for the spring trade. One would naturally imagine that wholesale jobbing houses would now be hammering away for all they were worth on winter goods, but instead of this we find this class of trade completed, or nearly so. John Macdonald & Co. have just opened out their samples of prints for the spring, and a very fine showing they make. Novelties in prints are unusually numerous this year, and include plain satin drills, printed satin drills, printed ducks, crepe cloths, diagonal cloths, and zephyr effects.

FOR GROCERS AND PROVISION DEALERS.

Farmers are putting their orchards in apple pie order.

Potato contracts are being made in Brockville at 40c. a bushel.

The Milton Cheese Factory is to be converted into a butter factory.

The Belmont factory has disposed of their August cheese, 336 boxes, at 10⅛c. per lb.

Mr. D. Cantelon, of Clinton, Ont., has purchased over 20,000 barrels of fall and winter apples.

Mr. Newans, grocer, Wharncliffe road, London, has sold out to Mr. George Deacon, who takes possession at once.

The price of American whiskey, a Peoria despatch says, was lowered ten cents as a result of the abolition of rebates.

"Who pulled that bell cord?" asked the street car conductor. "I did," answered a passenger. "What did you ring both ends for?" "Because I wanted both ends to stop."

Says the Mount Forest *Confederate:* The Holstein creamery has cleaned out July and August's make of butter at 18¾c. per lb. to Mr. Brill, of Guelph, and for the past two weeks has been shipping in pound rolls the total make at 23c. per lb.

Mr. S. M. Schell, apple buyer, says this year's crop in Oxford county is an enormous one, and that the yield is much heavier than was expected. Already in the different sections he has purchased between 12,000 and 15,000 barrels for shipment to the Old Country market.

Our Montreal letter states that the German granulated sugar mentioned in our market report some weeks ago is not yet to hand, although one of the Montreal papers said that it had arrived. "Some 700 bags have been sold in all at a cost laid down said to be $3.78½ per cwt."

In the window of a Toronto grocer is the following, printed on placards:—

"Folding Table, Book Case, Music Rack or Chair.
Trade with us until your purchases amount to $25, and we will send you as above."

A grocer of this city was fined $120 and costs in the police court Saturday morning for selling liquor without a license, and a similar charge against a resident of Cap Rouge was continued to give an opportunity for witnesses for the defence. A third case was fixed for proof.—*Quebec Chronicle*.

A number of hotelkeepers in Montreal have formed what is to be known as the "Province of Quebec Retail Licensed Victuallers' Association." Officers of the amalgamated committee were elected as follows:—President, Jos. Riendeau; secretary, J. B. Bureau; committee, L. A. Lapointe, Theo. Lanctot, H. Jones, T. A. Lynch, H. Gilchen, George Chartrand and E. Cadieux.

Country merchants are evidently coming round to the view that the recent advances made in Japan teas are of a permanent character. Both Montreal and Toronto jobbing houses report an increased movement in these teas. There is not a large quantity of Japans yet to come

forward, and advices from the east report primary markets as practically closed.

The fruit shipping, says the St. Catharines *Journal*, except in the way of late smock peaches, grapes, and still later apples, is now rapidly drawing to a close in this district. The season's shipments have been unprecedented, and the opinion is expressed that not less than a million of dollars are in the possession of our local fruit growers. Regarding the profits, we are informed they are substantial all around, but particularly to plum growers.

It is not every one who knows how to properly clean windows For the benefit of those who do not know, we give the following words of advice: Choose a time when the sun does not shine upon the window; else it will be dry streaked, and no amount of rubbing can prevent it. Brush off all the dust inside and out, and clean wood work around glass first. Use for this warm water and ammonia. Do not use soap. Wipe dry with cotton cloth. Do not use linen, because it leaves lint on the glass when dry. Polish with tissue or soft old newspapers.

SHOE AND LEATHER ITEMS.

Keep well sized up.

Sales lost means customers lost.

Fashion, says an American authority, has decreed plain opera toes must go.

Hunter & Caldwell have discontinued the boot and shoe business at Parkhill, and removed to London.

He—"Do you think your father would object to my marrying you?" She—"I don't know. If he's anything like me he would." —*Life*

It is rumored that negotiations are in progress looking to the transference of the last factory at Granby, Que., to parties in the United States.

G. S. McConnell & Co., wholesale dealers in clothing and men's furnishings, Vancouver, B.C., have recently added a stock of boots and shoes to their shelves.

Mr. Samuel Dutton has purchased the boot and shoe business of Mr. R. H. Waters, King street, Ingersoll. The latter had to relinquish his business owing to failing health, and is now on his way to his native land with a view to recuperation.

"Linen and duck will have a great run next summer as material for the uppers of men's shoes," said a well-known shoe dealer recently "Manufacturers are already getting out a great variety of samples. This duck and linen is being supplied in a dozen shades from white to black. The white and the drab, however, will be the favorites in samples."—*Shoe and Leather Facts*.

A few days ago it was the privilege of one of our staff to visit the tannery of King Bros., in Whitby. Some new machinery has recently been added to the plant of this tannery, including a Hemingway unhairer and flesher, which dispenses with the services of two men. The firm are placing a new boiler in their establishment, which will double their steam capacity, and contemplate adding a scouring machine. A special brand of American calf has just been placed on the market, and is meeting with good favor at the hands of the trade.

It is well to remember that the feet are one-third of an inch longer when the body is standing than when seated, and the elongation is further increased when walking, for the weight is then thrown entirely on one foot at each alternate step. The shortness may not be felt at once, but after a few weeks it becomes very manifest; and, moreover, by forcing the great toe back it is apt to produce a bunion on the joint The smart retailer can often turn this knowledge to advantage when fitting his patrons, and much delay in choosing a good fit may be avoided. A bad fit, whether the fault of the patron or the retailer, generally discredits the latter and always hurts his trade.

HARDWARE AND METAL TRADE NOTES

The Sackville, N.B., stove foundry has been reopened by the proprietor, Charles Fawcett.

The Montreal coal returns for the month of September show a total income at that port of 127,776 tons.

Exports of copper from the United States for August were 6,408 tons, and for the first eight months of the year 53,403 tons, against 36,669 tons in 1893

The foreign shipments of coal from Nanaimo, B.C., for September amount to 61,297 tons; Wellington, 21,062 tons; New Vancouver Coal Co., 20,275 tons; and Union, 19,960 tons

The Arthabasca exploration party for petroleum, under direction of Dr. Selwyn, put down 600 feet of casing on Thursday last to pipe off a second flow of gas They are now down about 700 feet —*Edmonton, N W T., Bulletin*

Shipments of pig iron from the following places since the beginning of the year have been, in tons, as follows: Scotland, to Sept 22nd, 182,229 Middlesbro', to Sept 27th 691,586 Cumberland to Sept 22nd, 266,585 tons In 1893 the shipments during a corresponding period of time were Scotland, 227,745 Middlesbro' 681,020 Cumberland, 195,873 tons.

James Watson & Co., Glasgow, under date of Sept 28th write "A fair amount of business continues to be transacted in the Scotch pig iron market, without, however, producing any great fluctuation in price. Coal is gradually becoming rather more plentiful, and in consequence, iron works are being re-started. Trade reports for the coming winter are anything but bright."

A writer in the London *Times* gives some reasons for believing the British iron industry "is in a state of decay." British exports of iron and steel diminish constantly, and imports of foreign manufactured iron grow apace. "The high price of labor and the discrimination against shipments from United Kingdom ports, from which iron freights are appreciably dearer than from Antwerp and Hamburg," have led to their goods being displaced from over-sea markets by German and Belgian iron.

A correspondent writing to the St. John, N.B., *Telegraph* from Sydney, Cape Breton, says: "Since the opening of navigation in the St. Lawrence this year there has been great activity at the Cape Breton collieries. All the mines are being taxed to their full capacity to meet the increasing requirements of the St. Lawrence and local markets Old Sydney mine is booming and will likely, as usual, show the largest output of any one mine in Cape Breton, where they have no new and improved appliances such as have been put into a number of the collieries of the Dominion Coal Company. Below is a comparison of the outputs of 1893 and 1894: For one year to September 30, 1893, the total output was 217,000 tons; daily average, 852 tons; or 1,265 tubs. For one year to September 30, 1894, the total output was 246,000 tons; daily average, 946 tons, or 1,408 tubs; increase over last year, 29,000 tons."

Referring to the general features of the iron markets of the United States, the Cleveland *Review* says: In spite of the evidences of weakness that crop out here and there, many furnaces report engagements for months ahead, and along with the additions to the list of producers there is a limit to the amount of spot iron offered, and no indication of an accumulation of stocks. Yet the month of September brought a decline of 65 cents in Bessemer iron, and of about 50 on some grades of foundry iron. Sales of the latter in the past week have brought out low prices, and Lake Superior charcoal has broken its record again, a Central New York agricultural contract being taken at $12 50, Buffalo. Pittsburg advices tell of limited sales of Bessemer at $11 In finished material there have been few large deals in any selling centre the past week. Bridge material is still moving freely Wrought pipe makers, also, have made some good sales.

BOOKS AND STATIONERY

It takes not less than 2,600 cedar trees to supply wood for the pencil manufactories of the United States.

The recent crusade in England and Ireland against German competition is having its effect. Messrs. Marcus Ward & Co. advertise 1894 Christmas cards with the display, "Not printed in Germany."

A new slate eraser consists of layers of blotting paper compressed solidly and cut into rectangular pieces an inch and a half long, an inch wide and five-eighths of an inch thick. These erasers are used dry on the slate.

Mrs Isabella Bird Bishop, whose books on the "Rocky Mountains and "Unbeaten Tracks in Japan" have had so many interested readers, has just written "The Hawaiian Archipelago"; six months among the palm groves, coral reefs, and volcanoes of the Sandwich Islands

Thomas Bailey Aldrich lately writes

> I little read those poets who have made
> A noble art a pessimistic trade,
> And trained their Pegasus to draw a hearse
> Through endless avenues of drooping verse

A little packet of articles that look like garters or shirt sleeve fasteners, comes to us from Irving P. Fox, of Boston, Mass. It contains samples of the Fox Automatic Tape Band, which it is said has all the virtues and none of the defects of rubber bands, for the filing of legal and other papers, the tying of small bundles, etc., etc.

A little 16mo book entitled "Songs from Vagabondia" was published last month. Its authors are Bliss Carman, of Nova Scotia, and R Hovey, of whom the New York *Mail and Express* says "Both the

poets are among the men who are coming rapidly to the front, and this volume of their best verses in collected form will win widespread popularity."

"Tan Pile Jim; or, a Yankee Waif among the Bluenoses." Such is the name of a pretty 8vo. story, of which the *Literary News* says: "A little waif was found one morning in a little seaport town of Nova Scotia, by James Payzant, the tanner of the town, and one of nature's noblemen. The little boy had escaped from a Yankee fishing sloop, where he had been brutally treated, and had lain down despairing in the woods, after being refused shelter on account of his rags and generally trampish appearance. Old Mr. Payzant and his dear old wife took the boy in and put him in the place of the drowned lad at sea."

An invention has been patented by a Dundee gentleman which is causing some stir in paper-making circles. The purpose of the invention is to make up by machinery paper of the quality and with all the characteristics of hand-made paper. At the present time hand-made paper is much in demand, but it is necessarily much more expensive than machine-made. This invention, however, reduces the cost approximately to that of paper made by machines. The inventor is Mr. R. W. Moncrieff, a native of Dundee. He is now at the Rush paper mills, near Northampton, where his invention is in regular use.—*Effective Advertiser.*

LUMBER AND TIMBER PIECES.

Messrs. Maitland, Rixon & Co., of Owen Sound, are shipping an order of 400,000 feet of cedar construction timber for the Grand Trunk Railway.

The British ship "Alexander" is under charter to carry a cargo of British Columbia lumber to Calais, France. This is, if we do not mistake, the first shipment from that province to Calais.

Gilmour & Hughson will have 17 more shanties on the Gatineau River than last season. If the winter prove a good one for taking out logs, the cut is likely to be the largest ever made by this company.

It is stated that 104,555,000 feet of logs have been taken out of the Spanish River this summer to American mills. It is estimated that not less than 60,000,000 feet will yet be brought down this season for the same market.

The British Columbia Logging Co. has been organized with a capital stock of $50,000 divided into one thousand shares. The head offices are at Vancouver, B.C., and the trustees, Messrs. J. H. Taylor, Jonathan Crook and Elmer Evans.

In New Brunswick nearly all the mills on the Miramichi closed last week for want of logs. One or two will run for a short time to finish cargoes for vessels consigned to them. The mills on the Restigouche have enough logs to keep them busy till snow flies.

The Assiniboine Lumber Company is applying for incorporation. The chief base of operations of the company will be at Brandon, Man. The capital stock is to be $100,000, in 1,000 shares of $100 each. The first directors of the company are to be J. A. Christie, W. M. Alexander, G. Aske, J. Hanbury and R. M. Matheson, all of Brandon.

North Shore lumbermen are making preparations for the woods. Several cars of horses have been imported from Prince Edward Island for the winter's work. The Albert county lumber operators are also preparing extensively for the winter's work, and generally the outlook is that the winter's operations will be on a larger scale than for several years.—*Moncton, N.B., Times.*

FIRE INSURANCE MATTERS.

A contract has been given to Stanley Winslow of sinking five tanks or wells for the purpose of supplying the town of Shediac, N.B., with water in cases of fire. The town purchased a hand fire engine last summer, and now they are sinking tanks to complete the proposed method of fire protection.

Although the gathering of the Canadian Fire Underwriters last week lasted during most of Tuesday, Wednesday, Thursday and Friday, the proceedings were, to a great extent, of a technical nature. The reports of the Montreal and Toronto secretaries were read and referred to the proper committees. Much of the business upon the *agenda* was delegated to committees A, B and C, who devoted most of Thursday to their consideration, with the result that their recommendations were for the most part adopted.

Mr. Thomas R. Wood, of the Ætna, was re-elected president of the association. The resignation of Mr. Thomas Davidson, of the North British and Mercantile office, Montreal, by reason of ill health, was accepted with regret, and in his room Mr. F. W. Evans, of the London and Lancashire office in Montreal, was chosen to the office. The second vice-president, Mr. P. H. Sims, of the British America, was re-elected. The two secretaries, Robt. McLean, Toronto, and A. W. Hadrill, Montreal, were re-elected. A lunch was given by the western members of the board to their eastern brethren.

The number for October 5th of the Chicago *Argus*, containing 68 pages, is a worthy tribute to that important body, the Fire Underwriters' Association of the Northwest, a condensed history of which is given in its pages. No fewer than forty-seven portraits are supplied of former and present presidents and members of boards since the organization, twenty odd years. And they are first-class portraits, too, of cabinet size. The whole proceedings of last month's convention are given, too, with admirable fulness. Ten pages are also devoted to the proceedings of the Mutual Life & Accident folks in Boston, and a dozen portraits illustrate that portion. Beautiful paper and clear type make the number one which people like to read and to keep for reference.

CANADIAN HOPS.

The market for new hops may scarcely be considered as fully opened yet, although the hop harvest has been finished in most sections of the country some weeks ago. Brewers appear to have a supply of old hops on hand, and evidently think that the views of growers will not grow stronger with time. At present there is quite a difference between the ideas of buyers and sellers. The few transactions passing are made upon a very low basis. We hear of sales in Toronto at 9c. per pound. During the last few years hop growers have made money; this has served to encourage them to add to their yards, and given others an impetus to go into the industry, and as a result the acreage in Canada has been largely increased.

Regarding the extent and quality of this year's crop, sensational reports have come from Prince Edward county, an important centre of the Canadian industry. A dispatch to a Montreal paper from Kingston says: "There is not more than half a hop crop in this district this season. About the middle of September a blight attacked the hops, turning them black and brown, so much so that not half of the crop has been picked, the other half not being worth the labor." Although this may be true of some localities, it certainly will not apply to the whole county.

BOOKS RECEIVED.

The Exhibition Number of the *Maritime Grocer* is a credit to its publishers, and we thank Messrs. A. M. Bauld, the president, and I. C. Stewart, the secretary, of the publishing company which issues it, for sending us a specimen. It consists of 70 pages, with tinted cover, and advertisements cover 32 of these pages, which is an earnest of the way in which the business people down by the salt water support a trade journal; and the advertisers are not all grocers, either. The printers have shown, in the *Maritime Grocer*, unusually good taste in displaying cards and in varying them. Seeton & Co.'s advertisement, in particular, is a specimen of this, while Mott's two half pages and the Confederation Life advertisement are very neat. As to the contents, Mr. J. A. Chipman contributes an article on the West India trade. "Forty Years in Business" would have made his paper more interesting if he had put some persons and incidents into it. People are led to expect something of the sort from its title. It was an excellent notion to give portraits of some of the former presidents of the Halifax Board of Trade The venerable head of Mr. Silver, the rugged, strong face of Mr. Stairs, the less stern, and, to Western readers, more familiar countenances of Messrs. Doull and Pickford—these, as well as the pictures of present officers and of St. John dignitaries, will be welcomed by many. It is a pity, however, that the photographic views are for the most part unworthy illustrations of the beautiful landscapes they represent.

CLEARING-HOUSE RETURNS.

The following are the figures of the Canadian clearing-houses for the week ended with Thursday, Oct. 11th, compared with those of the previous week:

Clearings.	Oct. 11.	Oct. 4.
Montreal	$11,958,157	$13,321,508
Toronto	6,343,364	5,863,376
Halifax	1,253,087	1,405,056
Winnipeg	1,558,452	1,489,922
Hamilton	744,726	658,189
Total	$21,857,786	$22,738,051

Aggregate balances this week, $2,938,128; last week, $3,643,818.

—Barley from Russia to America is one of the latest features to be announced. A steamer has been chartered to carry barley from the Black Sea to New York, where it would cost, duty paid, about 50 cents per bushel. It has been offered in Montreal at 37½ cents, freight and insurance paid.

Meetings.

MOLSONS BANK.

The annual meeting of the shareholders of the Molsons Bank was held on Monday afternoon, 8th instant, at 3 o'clock, in the bank premises, St. James street, Montreal. The president, Mr. J. H. R. Molson, occupied the chair, and among those in attendance were Messrs. R W. Shepherd, vice-president; D Wilson, R. W. Shepherd, jr., Henry Hogan, S H. Ewing, D. McCarthy, J. McCarthy, J Torrance Molson, John Crawford, Rev. W. S. Barnes, J. Try-Davies, S. Finley, W. N. Evans, W. J. Withall, James Hutchison, J. M. Kinghorn, W. S. McLaren and C. E. Spragge.

The president requested Mr. James Elliott to act as secretary of the meeting, after which Messrs. J. Try-Davies and W. N. Evans were appointed scrutineers for the election of directors.

The secretary read the advertisement convening the meeting, and this was followed by the general manager, Mr. Wolferstan Thomas, reading the report of the directors, as under:—

REPORT.

The directors beg to submit to the shareholders the thirty-ninth annual report of the Molsons Bank, being for the year ending 30th September past.

The net earnings for the year, after making full provision for bad and doubtful debts, amount to $264,817.28. From this two semi-annual dividends at the rate of 8 per cent. per annum, equal to $160,000, have been paid, leaving the sum of $104,817.28, which, added to the amount carried over from last year, $90,923.26, makes the sum of $195,740.54, which has been appropriated as follows:—

Transferred to rest account	$100,000 00
Rebate on current bills discounted.	20,000 00
Carried over at credit of profit and loss account	75,740 54

The amount of credit of rebate on current bills discounted is now $80,000, which is considerably in excess of the sum actually required for that purpose,

All the branches of the bank have been inspected once or oftener since last we met you.

To meet the requirements of the increasing trade in the upper part of the city, and for the convenience of our customers, a branch of the bank has been opened on St. Catherine street west. We have every reason to believe that this step will prove satisfactory in retaining and adding to our present city business.

The members of the staff continue to perform their duties efficiently and to possess the confidence of the board.

PROFIT AND LOSS ACCOUNT.

Balance at credit of profit and loss account, 30th September, 1893		$ 90,923 26
Net profits for year, after deducting expenses of management, reservation for interest accrued on deposits, exchange and provision for bad and doubtful debts		264,817 28
		$355,740 54
Appropriated as follows:—		
77th dividend at rate of 8 per cent. per annum, 2nd April, 1894	$ 80,000 00	
78th dividend at rate of 8 per cent. per annum, 1st October, 1894	80,000 00	
Rebate on current bills discounted ..	20,000 00	
Rest account	100,000 00	
		280,000 00
Leaving at credit of profit and loss account on 29th September, 1894		$75,740 54

The Molsons Bank, Head Office, Montreal, 2nd October, 1894.

General statement of the affairs of the Molsons Bank on the 29th September, 1894.

Other assets	12,182 40
	$14,618,350 89

THE PRESIDENT'S ADDRESS.

The President then rose and said: Well, gentlemen, you have heard the report read. It is not very long; but it is very satisfactory We have had a good year's business, and I would ask you to adopt this report. I don't think it is necessary for me to say anything, as the report speaks for itself. We have earned, as you see by the financial statement, 13¼ per cent., which is very good indeed, when you take into consideration the state of financial matters all over this continent. Last autumn we had our meeting, and did not look forward to a very money-making year; but our expectations have been considerably exceeded, and we are able to present you the flattering—I may almost call it such—statement we now show you. For this we are indebted in a great measure to the energy, skill and devotion of our general manager, Mr. Wolferstan Thomas, who is indefatigable in the interests of the bank. All our officers have taken an interest in their work, and there is an *esprit de corps* among them which is very gratifying.

The business last year, after the crisis which occurred in the American market, did not give much encouragement, as I have said, but it made every one cautious, and we ourselves had to be cautious, as other bankers had, and I am happy to say it has borne good fruit. Our Rest now is $1,300,000, or 65 per cent. upon the capital, and we have been able to add to the fund for the rebate of interest $20,000, bringing it up to $80,000, which is considerably in excess of the amount that can ever be brought against it. With these few remarks I will just merely move the adoption of the report. If any gentleman has any questions to ask or remarks to make, we shall be glad to hear and to give any information he desires. When a statement is so satisfactory it is not necessary to say much. We leave it to speak for itself.

Mr. R.W. Shepherd, vice-president, seconded the motion for the adoption of the report.

Mr. John Crawford asked a number of questions, which were subsequently replied to by the president. In the course of some lengthy observations, he said he thought that the shareholders would agree with him that the financial statement was very satisfactory. A net earning of 13¼ per cent was not under all the adverse circumstances against which the bank had had to contend, a bad showing by any means. It proved that there must have been judgment, common sense and devotion to the interests of the bank

THE PRESIDENT REPLIES.

No other shareholders having any questions to ask or remarks to make, the president replied to Mr John Crawford's queries. He said I thought when I stood up and moved the adoption of the report I had said about all that could be expected. It is not my province to make long speeches; I am not in the habit of talking much People who talk a great deal are apt to talk a good deal of nonsense at times, to which I have a great objection. Mr. Crawford complained that he did not get the financial statement soon enough. Our year closes on the 30th September, and we have about twenty or twenty-one branches, at Calgary, Winnipeg and all over the country. To get in the returns from all these and to go over them certainly requires some little time. I think we got them in very quickly indeed, and as fast as they could be put into print it was done. By our charter the annual meeting is fixed to take place on the second Monday in October. This is the second Monday, and I think that the statement was brought in very quickly for such an amount of work and such a number of branches. Reports have to be received and examined, and sometimes questions have to be asked about them and alterations made, which takes time. As to the meeting being advertised, Mr. Crawford, I am sorry to say, has not exercised his usual vigilance; there have been the usual number of advertisements in the usual city papers, and if he didn't see them, I should say that he was to blame rather than the bank; the advertisements were there.

Mr. Crawford has, as usual—he has asked it here before, and also at the Merchants Bank and the Bank of Montreal—asked to have a statement of the gross profits and the gross losses. He has asked me that question before, and I have always given him the same answer. If any good purpose was to be served, the statement would be given; but as there is no good purpose to be served, this bank, the same as other banks, has said that it does not see the wisdom of giving it Instead of being an advantage, it would be a disadvantage. The losses have been written off fully, we believe. Mr Crawford says there ought to be reduced expenditure, by which, I suppose, he means that, owing to business being hard, etc., we could do with fewer employes. That cannot be done; the number of employes is as small as possible. He then comes back to the old question of a quarterly dividend, which he thinks ought to be paid. In the past banks have not done this, although I believe one Western bank is now doing it. One bank did it once before, and it is now out of existence; but I don't make that statement in any disparagement. If a quarterly dividend were to be paid, the bank books would have to be closed four times a year, instead of twice, which would be a serious inconvenience to those buying and selling stocks. If a quarterly dividend were instituted, the next thing would be a monthly dividend, and, perhaps, to some a weekly dividend might be acceptable. As to Mr. Crawford's statement that the president's replies to queries at the annual meeting are not satisfactory, I may say that we are willing to give all the information we can. Regarding the rapid increase of agencies referred to by Mr. Crawford, we have opened one branch this year for the convenience of our customers in the west end of the city. We think it will be appreciated.

The matter of increased dividends is another important question. We have been able to give an 8 per cent dividend for some years past, and twice we gave a bonus of 1 per cent at the end of the year. Now our west is getting large and we are doing well it is quite possible that in the future larger dividends may be given; it is quite possible such a thing may happen, but I neither like to promise nor to prophesy We have set aside $80,000 for rebate of interest on notes discounted We think, after going through the books, that the amount required probably may not be more than $70,000 or $70,000 at the outside. I find that our account is in excess of what other banks have put aside for the purpose.

After some further remarks from Mr. John Crawford, the president said Mr Crawford

suggests that an adjournment of the annual meetings should take place to a later date, in order to give the shareholders an opportunity to thoroughly study the financial statement. I certainly don't think that Mr. Crawford requires any such period of time to understand it. He understands it at a glance. I cannot see that a man of his astuteness should require so long a time to look into the simple statement of a bank's report. I could not recommend the adoption of such a suggestion, and I don't believe that it would meet with the approval of the other shareholders.

The motion for the adoption of the report was then carried unanimously.

Mr. Henry Hogan moved:

"That the thanks of the shareholders are due and are hereby tendered to the president, vice-president and directors of the bank for their attention to its interests during the year just closed."

This was seconded by Mr. D. Wilson, and unanimously concurred in, after which the president briefly returned thanks.

The scrutineers then reported that the following directors had been elected: Messrs. Henry Archbald, S. H. Ewing, S. Finley, J. H. R. Molson, W. M. Macpherson, W. M. Ramsay and R. W. Shepherd.

At a subsequent meeting of the directors, Mr. J. H. R. Molson was elected president and Mr. R. W. Shepherd vice-president.

LONDON AND CANADIAN LOAN AND AGENCY CO., LTD.

The twenty-first annual meeting of this company was held in the offices of the company, 103 Bay street, Toronto, on Wednesday, the 10th day of October, 1894, at noon. Among those present were the following: Sir W. P. Howland, Hon. Senator Gowan, C.M.G., Hon. J. C. Aikins, Rev. Dr. Warden (Montreal), Rev. Dr. Moffatt, Rev. C. Parker (Bowanville), Dr. Larratt W. Smith, Q.C., and Messrs. Frank Arnoldi, Q.C., G. R. R. Cockburn, M.A., M.P., O. A. Howland, M.P.P., R. D. Moffatt, M.D., William Gordon, C. E. Hooper, Donald Mackay, George Robinson, Henry Lamport, John Aitken, David McGee, John Scott, James Campbell, David Higgins, E. J. Hobson, C. S. Gzowski, jr., H. L. Hime, F. J. Stewart, W. H. Cawthra, M. O'Donnell, R. W. Boyle, James Henderson, and Hugh Ryan.

On the motion of Mr. Donald Mackay, seconded by Mr. William Gordon, Sir W. P. Howland was appointed chairman and Mr. J. F. Kirk secretary of the meeting.

The minutes of last meeting were taken as read.

The following report was then placed before the meeting:—

REPORT.

The directors beg to submit to the shareholders the twenty-first annual report of the company, together with accounts for the year ending 31st August, 1894.

Applications for loans were received during the year to the amount of $1,558,668 on property estimated as worth $3,281,861, and loans were approved and effected to the extent of $422,581.50 on property valued by the company's own appraisers at $867,414.

The debentures and certificates paid off by the company during the year amounted to		$1,042,659 53
While the amount issued and renewed was	$779,982 40	
Add debenture stock issued to the extent of	44,140 66	
		824,123 06
Effecting a reduction in the liabilities of the company of		$218,536 47
The revenue account, after all interest and charges have been deducted and all ascertained losses written off, shows a balance of		$66,940 59
From which, deducting two half-yearly dividends, amounting, with the tax thereon, to		56,888 53
There remains a balance of		$10,052 06

Of which $5,000 has been added to the company's "Reserve Fund," and $5,052.06 is carried forward at the credit of "Revenue Account" to next year.

Borrowers, both in Ontario and Manitoba, have met their payments of interest in a satisfactory manner, and the amount received is above the average.

Your directors have not thought it advisable to press for business during the year, preferring to apply surplus funds in reducing the liabilities of the company until indications of reviving prosperity become more strongly evident.

Having in view the general and long-continued depression common to the whole world, which has affected the value of real estate in Canada, your directors have deemed it prudent to make more than ordinary provision for doubtful debts, which, under improved conditions, may be wholly recovered.

Accompanied by the chief inspector, the president made his usual visit to Manitoba, and found that the results of the harvest were very satisfactory—a fair average crop of exceptionally good quality having been secured in good condition. The extremely low price prevailing, and the high rate of inland freights maintained, will materially reduce the net return which the farmers would otherwise receive; but the strict economy they are now practising, and the increased variety of their prodncts, will place them in a more favorable position to meet their liabilities than heretofore

Considering it desirable to convert part of the liabilities of the company into a permanent form, your directors decided to commence the issue of 4 per cent. debenture stock in lieu of terminable debentures. For this purpose the manager visited Britain last summer, and succeeded in making satisfactory arrangements for the issue of this stock, which will likely become a popular form of investment amongst the classes to whom a safe and steady income from a permanent investment is important.

The directors have pleasure in testifying to the efficiency and fidelity of the manager and officers of the company, both here and in Manitoba, in the performance of their duties.

W. P. HOWLAND,
President.

Toronto, 9th October, 1894.

AUDITORS' CERTIFICATE.

To the president and directors of the London and Canadian Loan and Agency Co., Ltd.:

Gentlemen,—We have completed the annual audit of the books and accounts of the company for the year ending 31st August, 1894, and have found them correct, and the cash balances to agree with the bankers' books

We have also examined the company's statement of "Assets and Liabilities" and "Revenue Account," have compared them with the ledger balances, and found them correct.

The mortgages, debentures and other securities have been carefully examined. They agree with the schedule submitted to us, and with their respective entries in the ledger.

The "Loans on call or short date on debentures and securities" have been valued at their respective market prices, and we find that the amounts advanced on them are amply covered.

We are, gentlemen, yours faithfully,

DAVID HIGGINS,
J. J. WOODHOUSE,
Auditors.

Toronto, 5th October, 1894.

J. F. KIRK, Manager.

The report was adopted.

The scrutineers reported the following gentlemen duly elected directors: Sir W. P. Howland, Sir C. S. Gzowski, Sir D. A. Smith, Donald Mackay, Dr. L. W. Smith, Q.C., Sandford Fleming, C.E., C.M.G., C. E. Hooper, G. R. R. Cockburn, M.P., and James Henderson.

At a subsequent meeting of the newly-elected board, Sir W. P. Howland was elected president, and Sir C. S. Gzowski vice-president.

SHOPPERS AS THEIR OWN MODELS.—Here is a new thought in merchandising—and advertising. A merchant in a neighboring city who was having a dress and cloak opening took this shrewd way to emphasize its interests: During the morning hours the attendants made an effort to try the beautiful garments upon all who made request. It was found impossible to continue doing so in the afternoon, the crowd was so great and its desire to "try on" so extensive. The old way was to hang the goods lifelessly on wire dummies or wax figures. The new way permits the shoppers themselves to officiate as models. And it is a vastly better method; for goods that are tried on are half sold. But the merchant must first gather his throng of models. This done—by advertising—the rest is easy.—*Phil. Record.*

FIRE INSURANCE MISCELLANY.

Excusing the smallness of a monthly report, the agent wrote the company: "There is little inspiration in the business and but few expirations."

One reason which was given why we ought to write a certain risk, was the emphasized fact that "the building is equipped with a first-class fire escape."

A farmer living some ten miles from Wauseon, O., procured a policy on his barn. The locomotive of the train which took him home set fire to the barn which he had just insured.

An agent answering the question concerning the water supply of his town, said: "What little water this town has is religiously reserved for fire purposes. It is never used as a beverage."

Said the suspicioned claimant to the suspicious adjuster, "I cannot look at these ruins without tears. For a man who loved his home as I did, what a scene—what a sorrowful scene." "Yes," thought the adjuster, "a regular case of kerosene."—*J. L. Cunningham, N.Y. Bulletin.*

—The Duet at the Goldstein Reception—Ikenheimer: "My! My! Ain't dese hardt times awful? Dose Goldstein girls has both to blay off der same piano!"—*Puck.*

CONSUMERS' GAS CO.

The Annual General Meeting of the Stockholders of the Consumers' Gas Company of Toronto, to receive the report of the directors and for the election of directors for the ensuing year, will be held at the Company's Office, No. 19 Toronto street, on

Monday, the 29th Day of October Next,

At Twelve O'clock Noon.

W. H. PEARSON,
Gen. Manager and Secretary.

—The members of the Winnipeg Grain Exchange are enthusiastic over this season's sample of two-rowed barley grown in the country. It weighs fifty-six pounds to the bushel.

THE OTTAWA ELECTRIC CO.

Issue of $320,000. First Mortgage Bonds. Five Per Cent.

Authorized under Company's Act of Incorporation, 57 and 58 Victoria, Chap. III., Statutes of Canada.

Principal to be payable First October, 1904. Interest, First April and First October in each year. Paid-up capital of the company $645,000, and bonding power limited to amount equal to one-half the paid-up capital stock.

The above company now owns and operates all the property (including water powers) and the businesses lately owned and carried on by the Ottawa Electric Light Company, the Chaudiere Electric Light and Power Company (Limited), and the Standard Electric Company of Ottawa (Limited). The company's contract for the lighting of the streets, etc., of the city of Ottawa, extends until 1st May, 1905.

It is proposed to issue 320 first mortgage bonds of the company of $1,000 each, principal and interest payable at the Bank of Ottawa, city of Ottawa.

The bonds will be secured by a first mortgage to the Trusts Corporation of Ontario as trustees upon the property of the company as mentioned in the mortgage.

Sealed tenders for the whole or any smaller number of said bonds (to be specified in the tender) will be received up to 6 o'clock in the evening of the 26th instant, at the head office of the company, Russell House Block, Sparks Street, Ottawa, addressed to the undersigned and marked "Tender for Mortgage Bonds."

The directors may sell the whole or only a portion of the proposed issue, and may in their discretion decline all or any of the tenders.

The bonds will, it is expected, be ready to be delivered early in November, and the purchase price will be payable at Ottawa within five days after notification to a tenderer of the acceptance of his offer, and if not then paid the directors may sell the bonds in any manner they see fit.

In consequence of the first coupons including interest from 1st October, 1894, it will be necessary for the purchasers to allow for the accrued interest in respect of first coupons from 1st October to date of payment of purchase price.

Any further information required may be obtained from the undersigned.

G. S. MACFARLANE,
Secretary-Treasurer.

Dated 4th October, 1894.

City of Victoria

BRITISH COLUMBIA

Tender for Debentures

Sealed Tenders, endorsed "Tenders for Debentures," will be received at the office of the undersigned up to 4 p.m. on the 1st Day of November, 1894, for the purchase of debentures of the Corporation of the City of Victoria, B.C., amounting to $[illegible] or the sterling equivalent at the rate of $4.86⅔ to the £ sterling bearing interest at 4½ per cent. per annum, payable half-yearly, and principal at the end of [illegible] years from the 1st October, 1894, and bearing interest from that date at the rate of 4½ per cent. per annum, payable half-yearly, with principal and interest payable at the Office of the Bank of British North America, either in London, England, New York, U.S.A., Montreal, Canada, or Victoria, Canada.

The corporation reserves to itself the right to redeem and purchase these debentures in paying the amount thereof and the interest due thereon, at the date of such purchase to the holder or holders thereof at any time after twenty-five years from the date of issue of such debentures. The tenderer must state the price net at Victoria which he will pay.

In addition to the net price the purchaser will have to pay the corporation the interest at 4½ per cent. from the 1st October, 1894 to whatever date the money is received by the City Treasurer.

The above debentures are issued under authority of "The Water Works Loan By-Law, 1894," with principal and interest secured by a rate on all ratable land and improvements in the corporation of the City of Victoria.

The corporation does not bind itself to accept any tender.

WELLINGTON J. DOWLER,
City Clerk.

A HANDSOME BUILDING FOR GUELPH.

There is now approaching completion a handsome opera house in the Royal City of Guelph. The building is of rock-dressed Guelph limestone, designed in the Romanesque style of architecture, and covers a lot of land 104 x 107 feet. The front or business portion contains five stores on the ground floor, six offices on the second floor, a large lodge room, ante-room, and two offices on the third floor. The lodge room is 40 x 54 feet, and 15 feet high, and is beautifully finished. The architect is Henry J. Powell, of Stratford, Ont.

The portion of the building in which the theatre is situated, and which will be known as the "Royal Opera House," is at the rear, being of generous proportions, 107 x 58 ft. in size. The theatre will seat 1,200 people, and it is not too much to say is one of the finest in the Dominion. There are two galleries, and the building is so arranged that the stage can be seen from every seat in the house. There are two open and two closed boxes, and provision has been made for two more closed boxes should they at any time be needed. Special attention has been paid to the exits, so that in case of fire the building can be speedily emptied. The stage is very complete and of a good size, being 33 feet deep from back wall to footlights, and 58 feet wide. The stage fittings and scenery are being put in by Messrs. Sosman and Landis of Chicago, who have instructions to make everything as complete and "up to date" as possible, with fly galleries, scene painters' bridge and gridiron floor. Under the stage are eight large dressing rooms.

The lighting will be by combination fixtures for electric light and gas. The system of heating and ventilation is being supplied by Clare Bros., of Preston. The cost of the building is in the neighborhood of $40,000. We are told that the theatre has been leased for five years to Mr. Tavernier of the Ida Van Courtland Co. The building will be finished at the close of October, and it is intended that the theatre in finish and appointment shall be second to none in Canada.

The officers of the company which built the Opera House block are: Frank Dowler, president; W. H. Stubbs, secretary; and I. C. Keleher, G. J. Sully, and George Sleeman, directors.

Guelph has been up to this time but ill supplied with a hall for the proper accommodation either of lecturers, concert companies, theatrical troupes or their audiences. And yet there is in Guelph and vicinity a large constituency of ladies and gentlemen who have both the taste and the means to patronize such entertainments. It is a matter of congratulation that so appropriate a building is being erected, and we trust the company which provides it may find it a good investment.

—In Belgium, and at Hamburg and Frankfort, cigars are made of beetroot leaves steeped in a decoction of tobacco juice, and sold as pure Havanas. Germany, for that matter, excels in counterfeiting Havana cigars. The manufacturers there take a poor quality of Virginia, or Rhine, tobacco as a filling, and cover it with a magnificent wrapper. As soon as a vessel from Cuba is signalled off Hamburg or Bremen, thousands of these bogus Havanas, all packed in boxes marked and ribboned, as though made in the Antilles, are put on board. When the ship reaches her dock these cigars are entered at the Custom House as coming from Havana. The cedar wood, the paper, and even the little nails used in the manufacture of the boxes, are sent to Germany by the Cuban merchants.—*Manchester Review.*

Commercial.

MONTREAL MARKETS.

MONTREAL, Oct. 10th, 1894.

ASHES.—The market is steady at $4.35 for first quality pots, seconds $4. In pearls there has been only one recent sale of 4 brls. on p.t., but late high prices have eased off somewhat. In the way of shipments there have been only a few small lots of late.

CEMENTS AND FIREBRICKS.—The demand for cement continues fair considering the season, and some moderate lots have moved westward. We quote English brands $2 to 2.10; Belgian, $1.90 to 2.00. Bricks are rather firmer at $19.50 to $20.50 as to quality.

DAIRY PRODUCTS.—A falling off in cheese shipments last week is shown as compared with the corresponding week of last year, the figures being 77,015, as against 117,526, but the aggregate for the year thus far is still ahead of 1893, the total to date being 1,276,830, some 73,000 odd boxes more than at corresponding date a year ago. The English market shows some weakness, which local dealers are loath to acknowledge, and prices are as yet fairly maintained at 10½ to 10⅝c. per lb. for finest Ontario, Townships 10½ to 10¼c. The butter market is quiet; we quote fine Sept. creamery 20 to 20½c., earlier makes 18½ to 19½c., Townships dairy 16 to 18c., Western 15 to 16½c. per pound.

GROCERIES.—There is a general feeling of satisfaction prevailing among grocery wholesalers with the trade movement. Teas are specially active, as country merchants seem now to have accepted the belief that the advance is here to stay, and one leading house reported tea sales on Tuesday morning aggregating 342 pkgs. Trading is not confined solely to Japans, but very fair lots of blacks are moving. In these latter goods the advance is not as pronounced as in Japans, and goods are being sold at figures below what it would cost to replace them from London. Of Japans there are not a great many more to come forward, and advices from the East are to the effect that the market there is practically closed. Sugars remain just as they have now been for several weeks. There

is still a notable scarcity of dark yellows, and only one or two lots have been turned out since last writing; the lowest grade available is 3⅜c at factory. The German granulated beet root sugar, spoken of several weeks ago, is not yet to hand, though one of our contemporaries reported last week that it had arrived. Some 700 bags have been sold in all, at a cost laid down said to be $3 78½ per cwt. New Valencia raisins are being sold at 4½ to 5½c for off stalk, layers 6½c. No new currants here yet; first supplies are on the "Dracona," which is not now expected before the 13th to 15th. The canners' combine is reported to have advanced corn, tomatoes, etc., 2½c. per doz. last week. In other lines we hear of nothing new.

WATEROUS, Brantford, Can.

HIDES AND TALLOW.—The general price for green No. 1 light hides being 4c per lb., though in the keen competition that exists something higher is occasionally paid. Sales to tanners of cured are reported at 4½ to 5c. Heavy steers bring 5 to 5½ per lb. tanners paying 6c for cured. Lambskins are advanced to 50 to 55c each; calfskins 5 to 6c per lb., and few coming in. Tallow is weak, with a lack of demand best unrendered only brings 3½ to 3¼c., rendered 5c per lb.

LEATHER.—While there are always some moderate lots of sole leather selling there is not much black leather moving, and the market is on the whole quiet. Prices are fairly steady, but there is not enough demand to establish any advance, which some were hopeful of, basing their expectations on the stronger hide market. Splits are held pretty stiffly, and there are none too many for local supply; while tanners have been producing less, there has been more than usual of this stock cut, owing to the larger demand for cheap shoes, due to the hard times. We quote: Spanish sole, B A No. 1, 18 to 20c.; do No. 2 to B A, 17 to 18c.; No. 1 ordinary Spanish 17 to 18c.; No. 2, 16 to 17c.; No. 1 slaughter 18 to 20c.; No. 2 do., 17 to 18c.; American oak sole, 39 to 43c.; waxed upper, light and medium, 24 to 26c.; do heavy, 20 to 24c.; grained, 24 to 26c.; Scotch grained, 25 to 27c.; splits, large, 13 to 16c.; do small, 11 to 12½c.; calf splits, 27 to 30c.; calfskins (85 to 40 lbs.), 50 to 60c.; imitation French calfskins, 60 to 70c.; colored calf, American, 23 to 27c.; Canadian, 19 to 21c.; colored pebble cow, 12½ to 13½c.; russet sheepskin linings, 30 to 40c.; harness, 18 to 23c.; buffed cow, 9 to 11c.; extra heavy buff, 12½c.; pebbled cow, 8 to 12c.; polished buff, 9 to 11c.; glove grain, 9 to 10c.; rough, 16 to 17c.; russet and bridle, 40 to 50c.

METALS AND HARDWARE.—Some moderate sales of Summerlee pig iron, aggregating about 150 tons, are reported since last report at $20.50 ex-wharf, and $21.00 ex-yard. Domestic iron is quiet, but steady at quotations. There is considerable wrangling amongst makers of domestic bars, and purchases of fair lots are reported at a cut price under quotations. Hoops and bands are easier, and can be bought at $2.25, American make even lower. Coke tins as before; P. D. Crown is being offered at $3.75 in moderate lots. Other lines as before. We quote:—Coltness pig iron, none here. Calder, No. 1, none here. Calder No. 3, none here. Summerlee, $20.50 to $21. Eglinton, $18.50; Gartsherrie, none here; Langloan, none here. Carnbroe, $19.50. Shotts none here; Middlesboro, No. 3, $17; Niagara No. 2, $18.50 to 19.00. Siemens, pig, No. 1, $16.50 to $17.50; Ferrona, No. 1, $16.50 to 17.00; machinery scrap, $15.00; common do., $12.00; bar iron, Canadian, $1.65; British, $5.25; best refined, $2.40; Low Moor, $5.10; Canada plates—Blaina, or Garth, $2.05 to 2.10; all polished Canadas, $2.75; Terne roofing plate, 20 x 28, $5.75 to $6.00. Black sheet iron, No. 28, $2.30. No. 26, $2.20. No. 24, $2.10. tin plates—Bradley charcoal $5.25 to $5.50, charcoal I C, $3.50. P D Crown, $3.75 to 4.00. do I X, $4.75 to 5.00; Coke I.C., $2.75.

Steel boiler plate, ¼ inch and upwards, $2.00 to 2.10 for Dalzell, and equal; American steel plates, $1.90 to $2; ditto, three-sixteenths inch, $2.60; common tank iron, $1.65 to 1.75; tank steel, $1.80; heads, $2.85; Russian sheet iron, 10 to 10½c.; lead, per 100lbs., pig, $2.75 to 2.90; sheet, $4.00 to $4.25; shot, $6.00 to 6.50; best cast steel, 10½ to 12c.; spring, $2.50; tire, $2.50 to 2.75; sleigh shoe, $2.40; round machinery steel, $3; ingot tin, 18 to 18½c.; bar tin, 25c.; ingot copper, 9¾ to 10⅛c.; sheet zinc, $4.75 to 5.00; spelter, $4.50 to 4.75; American do., $4.50 to 4.75. Antimony, 10 to 12c.; bright iron wires, Nos. 0 to 8, $2.65 per 100 lbs.; annealed do, $2.70; galvanized, $3.35; the trade discount on wire is 20 per cent. Barb and twisted wire and staples, 3½c. Coil chain, ¼ inch, 5c.; ⅜ inch, 4½c.; 7-16 in., 4¼c.; ½ in., 3¾ to 4c.; ⅝ in., ½c.; ¾ in., 3½c., ⅞ in., and upwards.

Oils, Paints and Glass.—Linseed oil shows great firmness at home, and local prices have been further advanced to 58 to 59c. per gal. for boiled, and 55 to 56c. for raw. Steam refined seal oil is a little stiffer, as there will be no further supplies coming forward this season. Cod oil dull with very little moving. Other lines unchanged. We quote:—Turpentine, 45c. per gallon for single barrels; two to four barrels, 43 to 44c. Linseed oil, raw, 56c. per gallon; boiled, 59c.; 5-barrel lots, 1c. less; olive oil, machinery, 90c.; castor, in lots, 6½c.; single cases, 6⅞ to 6¾c.; tins, 7c.; Nfld. cod, 38 to 40c. per gal.; Gaspe oil, 38c. per gal.; steam refined seal, 38 to 40c., in small lots. Leads (chemically pure and first-class brands only), $4.50 to 5.00; No. 1, $4.50; No. 2, $4.25; No. 3, $4.00; dry white lead, 5c; genuine red do., 4½c.; No. 1 red lead, 4c.; putty, 2c. in bladders per brl.; London washed whiting, 40 to 45c.; Paris white, 90c.; Venetian red, $1.50 to 1.75; yellow ochre, $1.50 to 1.75; spruce ochre, $2.25 to 2.50; window glass, $1.20 per 50 feet for first break; $1.30 for second break; third break, $2.80.

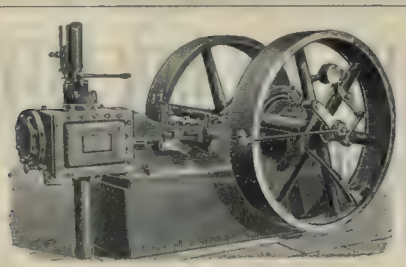
Wool.—The improvement in the local demand noted last week is maintained, and a good proportion of the cargo of Cape wool now close at hand has already been placed. We quote greasy Cape 14 to 16c., with some few lots of blue wools at 16½c.; B.A. scoured 28 to 33c.; Canadian fleece 17 to 20c.; domestic pulled supers 20 to 20½c.; extra 23 to 26c.

TORONTO MARKETS.

Toronto, Oct. 11th, 1894.

Boots and Shoes.—Local mauufacturers are not exactly pushed to fill orders; on the contrary, making for the most part the better grade of foot-wear, they find trade dull. Jobbers are not carrying large stocks and in consequence there is often some difficulty in filling orders. Ontario tanners have advanced the price of leather; the question now comes, can this advance be passed on to the consumer. Some see difficulty ahead when the attempt is made.

Dry Goods.—Notwithstanding the fact that a spirt of cold weather during the week has given some zest to the retail trade, business in the wholesale houses is just a little quiet. Samples of prints for the spring trade arrived early in the week, and there is promise of many novelties and pretty designs. The representatives of a syndicate of retail merchants are in the city, and it would appear that their stocks must be low, for they appear anxious to buy goods. But merchants here are not anxious to give concessions, as they are not carrying any heavy



The "Robb-Armstrong" Engine

Is up to date in design and workmanship. Simplest and best governor made. Interchangeable parts. Economical in use of steam and oil.

Robb Engineering Co., Ltd.
Amherst, N. S.

THE OAKVILLE BASKET CO.

MANUFACTURERS OF

These prices are wholesale by the car load.

stocks of fall and winter goods. The spring trade should open well, but caution is the watchword all over the land.

FLOUR AND MEAL.—The market is an easy one with everything in the buyer's favor. Prices should be advancing, but what should be and what is, as is too often the case, are different things. Manitoba strong bakers' is lower, at $3.20 to 3.25. Straight roller has declined 10c. a barrel, standing at $2.50 to 2.60, while extra at $2.30 is quoted 20c. a barrel lower. The cold weather is bringing out a consumptive demand for oatmeal, and the movement is daily growing larger; quotations stand at $3.80 to 3 95, according to size of the lot.

GRAIN.—The week's market has been a very quiet one, and although quotations may have varied a few points from time to time, they now stand in the same position as given in our last report. Wheat has been without interesting features, and only an occasional car has been selling to local millers. Peas are dull and quiet. Barley is not yet moving by way of export, and sales are made only to meet the consumptive demand of local brewers. Oats are offering freely at unaltered prices.

The stocks of grain in store at Port Arthur on Sept. 22nd were 992,712 bushels. During the week there were received 698,322 bushels, and shipped 727,493 bushels, leaving in store on Sept. 28th, 963,541.

GROCERIES.—Although business has not been dull, the operations of wholesale grocers have been characterized by no special activity. Fine off-stalk Valencia raisins are selling at 5½c.; cable advices report such descriptions firm in primary markets. Filiatras currants are quoted at 4 to 4½c. to arrive. Syrups appear to be firmer, although prices have not advanced. Jobbers understand that an advance is to be made in the price of Japan milled rice. Sugars are easy, and we understand that a number of Ontario houses are amusing themselves by cutting prices. Most canned goods are firm, and jobbers' prices gradually tending upward, as a glance at our prices current will show. Canned salmon, red, is selling at $1.23 to 1.35, and cohoes at $1.10 to 1.15. Advices from British Columbia indicate a short pack of cohoes this fall.

HIDES AND SKINS.—There has been a moderate amount of business doing, but trade lacks any special vigor. Until tanners can obtain better prices for leather, they are unwilling to make any large purchases of hides. Prices of hides remain unaltered. Calfskins are steady and without features worthy of special note. Lambskins and shearlings remain steady at 50c., to which price they were raised at the beginning of the month. Deacons are unchanged at 25 to 30c. each, and 15c. for culls. Tallow is quiet and steady.

LEATHER.—All interest has centered this week in the meeting of Ontario tanners which took place on Wednesday. We note elsewhere at length the meeting and the questions which were discussed. Last week was a dull one; the present, however, has shown more life and some fairly large lots have been moving. An English buyer was on the street this week soliciting consignments; we hear of no exports being made, but some leather will probably go forward in the course of a week or two.

PROVISIONS.—There continues to be a scarcity of good dairy butter; 18 to 19c. per lb. is being paid for offerings of this description; medium is neglected; common stock is in plentiful supply and sales have been made at 12c. Cheese is jobbing in a quiet way, with prices unaltered. Hog products remain as before, with stocks of old about finished and dealers beginning to talk of the new pack. Dressed hogs are a turn dearer at $6 50. Eggs are steady at 15c. per doz., with the demand light and the supply not excessive. Dried and evaporated apples show no change; merchants claim that the notions of evaporators are too high to admit of business being done

SEEDS.—Advices from abroad indicate that markets are inclined to weakness, and the local market in sympathy is not strong. For the season, deliveries of alsike are fair. But little, however, is being done in either red clover or timothy.

Paid-up Capital ... . 100,000 00 Reserve 54,720 00

Business in force over $4,000,000 00

The attention of the insuring public and live progressive agents is called to the following reasons for selecting this company:

First—It is the only Canadian company giving its policyholders the security of a four per cent. reserve; all others without exception reserving on a lower standard.

Second—The policy contract is as liberal as any issued. No restriction as to residence, travel or occupation, and incontestable after one year.

Third—The premium rates are low and the cost to the policyholder is certain to be less than in any other company because a better rate of interest can be earned in the west than at the home of any other company.

Fourth—Every desirable plan of insurance is issued from the low priced "PAY AS YOU GO" plan to the shortest single premium endowment.

A LITTLE JOURNEY.

Nothing can be more delightful during the autumnal weather than an excursion into the country. To one who has been confined to office work a short jaunt out there is both health-giving and brain-clearing. This is the season when the maple blushes most profusely, and squashes and pumpkins are biggest and best. Now can be heard the clatter of the apple-packer, and the occasional crash of a falling limb as some too venturesome boy reaches out for what appears to him to be a "daisy." The distance between Toronto and Whitby is only thirty miles, but even this distance is enough to give a city person the feeling that he is pretty far away. On the rear platform of an east-bound train one day last week stood a couple of young men. They were, presumably, there for the purpose of viewing the city and surroundings as seen from the Scarboro' heights. There was no mistake about their being in the best place for sight-seeing, for as the train sped up the steep grade one could view the Island in its entirety and the city as well.

If you take your eyes off the Island and the smoky city, and look at the trees, the ferns, the unploughed fields, and all the lovely objects around, they will become rested. One of the young men said something like this to the other at this point, adding that "if all around us could be placed in a painting, true to nature, it would not be appreciated by those who had not seen the original. Some one would be sure to say it was too highly colored, and so on." The other young man didn't say anything for a minute, until a shower of cinders came cracking from over and around the end of the car. Then he remarked, a little gruffly: "Wish we'd taken the smoker." His gruffness had a cause. After the train had left the city those two young men had entered the front end of the smoker and walked through the entire train to the rear platform, ostensibly looking for a seat, but really to see who was on. When the rear platform was reached, it was agreed that they should stay there until the first stop was made, else people would think they hadn't travelled much, and were promenading that they should be seen. No stops were made, however, till Port Union was reached, when a scramble resulted in more comfortable quarters in the smoker.

Country town busses, gravel roads, etc., somehow manage to shake you just so that a big dinner is needed. In this case it was a county town bus, and it was just as good nevertheless. Whitby is blessed with several good things. They have an apple packing industry in that town that is just now extremely busy. They have King Bros.' tannery, which employs 40 hands, and which is constantly keeping the road between the tannery and the station warm because of shipments. They have a good class of merchants, the ladies' college, an agricultural implement company, and they are further blessed with a good neighbor in Oshawa. There is a straight road between the two places, which are four miles apart, and along this road one has a chance of knowing or forming an idea of the value of farming land thereabouts. The orchards bear evidence of a light crop. The trafficking done over the road brought to mind the subject of electric railways, but mentioning the matter shortly after to some Oshawa merchants, they seemed to scout the idea, because they all said it would be of no advantage to any one. Yet, as the Hamilton colored prophet said, "The world do move." The town is in a fine district. Whether for agricultural prosperity or mere landscape beauty, the county of Ontario is not easily surpassed.

The town of Oshawa is the more fortunate of the two places in the matter of manufactures and extent of population. They have the Malleable Iron Works, a couple of good shoe manufactories, a large tannery, and mills, both woolen and flour. The Williams' Piano Works are no small affair, for they have floor space to the extent of 7½ acres. A pipe organ, which will grace the new Grace Methodist Church in Winnipeg, is being packed and shipped. It took over three weeks to put this organ together after all the parts had been made, and it will cost $8,000. Besides these things, Oshawa has live business men. There are other things as well that attract a stranger's attention. One of these is the well-arranged store windows and stores. These look well, too, at night, for nearly every merchant down there uses the incandescent light in his premises. Little or no farm produce is shipped from Oshawa, because through her having so many industries all the produce of near-by farms can be used in the town. Milk, of course, is an exception. A great deal of this is sent to Toronto each morning: this, from the fact that fairly good prices are obtained, and accounts are paid monthly. Thus the existence of cheese factories in that vicinity is unknown.

MR. HINE AND THE HEBREWS.

We have on our desk this week two essays on Jews—one a pamphlet on "Hebrew Influence upon Civilization," written by Mr. John T. Ashley, of 446 Willoughby avenue, Brooklyn; the other Mr. C. C. Hine's paper on "The Jew in Fire Insurance." Mr. Ashley is a kind-hearted old gentleman who has written his little book "to do an act of justice to a people who, in an important matter, have been too much neglected." The author's view of the important matter alluded to is concisely expressed in the title of his pamphlet. Ordinary history, he thinks, is strangely silent as regards the influence of the Hebrew race in numerous ways in the world's civilization. Mr. Hine deals with the Jew as a customer of fire insurance companies; that is, he confines himself wholly to the fire history of the Jews as it has been written, in very modern times, on the books of New York city officials, who keep records of the names of persons who have fires in this town. Mr. Hine will probably read Mr. Ashley's book with interest and approval, for the veteran editor of the *Insurance Monitor* is not a Jew-hater, but, for the moment, a statistician who is convinced by the inexorable logic of figures that Jews, through misfortune or intent, ask fire insurance companies to pay a great many "losses." What Mr. Ashley would think of Mr. Hine's conclusions is doubtful. He does not look at Jews as individuals, but as the possessors of a philosophy and a literature that have exerted "an influence beyond estimate." If Mr. Hine says the Jews cause the fire bells in American cities to ring too often, Mr. Ashley will answer that "even the bell that rang out American liberty and brought hope to the nations was made vocal by the words it bears of the Hebrew jubilee: 'Proclaim liberty throughout the land to all the inhabitants thereof.'" Fire underwriters, we think, will find Mr. Hine's compilation very interesting, and so will the Hebrews. In justice to his race some Hebrew statistician should go over the ground that Mr. Hine has covered and find the flaws, if any, in the latter's statistics and deductions.—*N.Y. Chronicle.*

KINGSVILLE'S INDUSTRIES.

Kingsville has two prosperous industries of which it is justly proud, and which are suitable to the fruit-growing capacity of this country [a fruit cannery and an evaporating works.] Our climatic conditions and our location is such that our farmers should leave grain growing to other less favorably situated parts of Canada, and devote their soil and energies to the more remunerative work of fruit and vegetable raising and dairying. The establishment of evaporating, canning, cheese and butter factories is the means by which such a desirable state of things will be brought abont.

A visit to the evaporating factory at Kingsville showed it to be in full blast, with a large supply of apples on hand. Mr. Delong, the manager, says the factory is one of six now operated by this company, one each at Belleville, Norwich, Ayton, two in Prince Edward county, and a branch in Michigan.

The factory at Kingsville has a capacity of 600 bushels a day and is now running full time. There are fourteen hand parers and forty hands employed, mostly girls. It requires three hands to each machine to do the paring and trimming. The slicing is also done by the machines. From the paring machine the sliced apples are taken to the bleacher, where with the sulphur fumes they are bleached white. From here they go upstairs to the dryers, three in number, each with capacity of 100 bushels. They are placed in the dryers by moving drawers, and they require five hours for the process. They are then thrown into bins ready to be placed into boxes for shipment.

Germany is the great market for this fruit. So far very little is shipped to the North-west. At preent the factory is paying 30 cents per 100 lbs. for apples; everything over two inches in diameter are taken. At the time of the writer's visit over 3,000 bushels were on board. Mr. Delong says a cider mill will shortly be added and also machines for making apple jelly. At present the company have nine tons of evaporated apples on hand ready for shipment. During the week the company paid out for wages and fruit the sum of $1,000.

The other important industry is the canning factory. The factory is now running full time and with a full complement of hands. At present 17 tons of tomatoes and 400 bushels of corn in the ear are used daily, and over 40 hands find employment. Ten tons of peaches were purchased last week to be canned. In one week $1,200 was paid out for labor and produce. Some of the girls in the tomato department make as high as $1 50 per day, and the boys in the corn about the same. The output of the factory is 16,000 cans per day. It shipped on Monday of last week a car load of corn and tomatoes to Toronto. After corn and tomatoes are done, apples will be canned.

The peach crop on Pelee Island, which has been a good one this year, is about all bargained for. Quite a lot was shipped by boat to Amherstburg and Windsor, while the Kingsville Canning Company also got a large quantity. Jerry Srigley sold 250 bushels to the latter. Green & Co. have received the contract to make the boxes for the Evaporating Company next year. At present they have a contract for 25,000 boxes for the Canning Company.—*Amherstburg Leader.*

WHAT THE FARMERS REALLY SUFFER FROM.

The distress of the farmer has been described over and over again in so many ways that a strong opinion has grown up that the tiller of the soil has been left far behind in the struggle for comfort and competence. Hon. J. Sterling Morton, Secretary of Agriculture, takes occasion, in the June number of the *Forum*, to show that this is a fallacy. Seventy per cent. of the farms in the United States are unincumbered by any indebtedness; their owners are still the home-builders and home-lovers of the land, as this class has always been; and Mr. Morton points out how, as in preceding generations, nearly all of our Presidents were called from their farms to executive duties, and consequently the farmers represented the better elements of our life—so, now also, the farmer is the most independent and prosperous of all the large classes of our people. He explains the growth of the story of their distress by showing that a few farmers have left their furrows to follow the false prophets of politics. It is the political farmer, who is really a politician and not a farmer at all, that has done all this evil. Mr. Morton goes over the whole ground to show the relative importance and independence of the agricultural class, and their influence on the community at every stage of our history.

HIS DOUBT DISPELLED.

One afternoon Mr. B.'s Irish man-of-all-work came to him and requested to have the evening off to go to a wedding. The request was granted and nothing more was seen of Thomas until the next morning, when he appeared in a decidedly used-up condition. One eye was black, his nose jammed in and strips of court plaster adorned his face in every conceivable direction.

"For heaven's sake, Thomas?" exclaimed Mr. B., upon catching sight of him, "what have you been up to? I thought I gave you permission to go to a wedding."

"And so youse did, sor."

"Well, did you go?"

"Shure I wint, and when I got to the house I found a felley sitting in the parlor. He was dressed up in foine shape, wid a long-tailed coat and a white necktie. Sez I to him: 'And who may yez be?' Sez he to me: 'Can't yez see, yer Irish mick,' sez he, 'I'm the best man.' And he waz, sor."—*Brooklyn Life.*

—During the past twelve months, according to a recent report of the engineer, 4,407,150 tons of sand have been removed from the Queen's channel at the mouth of the Mersey, making a total of 6,845,860 tons since operations were begun. The depth of water in a buoyed channel 1,000 feet wide is not less than 20 feet in any part at extreme low water, and outside the buoys it is 19 feet on one side and 15 on the other. The great dredger which is employed can be used in rough weather. In 24 hours it took up 39,000 tons of sand, and in a week of five and a half days 183,000 tons.

Sun Life Assurance Co. of Canada . . . . . .

HEAD OFFICE—MONTREAL.

THE prosperous condition of the Sun Life of Canada is doubtless due to its fair treatment of policyholders, its unconditional policy and prompt payment of death claims.

NOTWITHSTANDING the financial depression of the year 1893 it was the most successful in the history of this progressive company. The New Business completed is greater than that secured by any other Canadian Company in one year, and must be gratifying to policyholders and directors alike.

Substantial increases have been made in **New Business, Total Business in Force, Income and Assets.**

R. MACAULAY, President.

ISSUES policies both on the Mutual and on the Stock plans. Its Stock, or low-level rate policies, are at lower rates than purely stock companies, and its mutual, or with profits policies, are not equalled by any "purely mutual" life insurance company for lowness of cost, produced by annual cash dividends upon identical policies.

. . . . W. H. ORR & SONS, Managers,
Cor. Toronto & Court Sts.

Brains and Capital

In every partnership there are two factors of great importance the managing brain and the capital employed, and if death removes either, the business must suffer. It often happens that the brains belong to one man and the capital to another. If the manager dies the capital is worth less than before; if the capitalist dies and his capital is withdrawn, the manager is crippled. It is clear that each has an insurable interest in the life of the other because the profits of each depend in part upon the life of both. The firm should, therefore, take one of the Unconditional Policies of the Manufacturers Life, which are free from all restrictions as to travel, residence or occupation, and are **absolutely indisputable on any ground whatever after the FIRST YEAR.** Get the rates and all particulars from any of the Company's Agents or from Head Office.

WHAT IS THE 7% Guaranteed Income Bond
OF THE
North American Life Assurance Company?

It is a contract that may be secured by the payment of 15 or 20 annual premiums, and should death occur within the period selected, the full face of the Bond becomes payable.

If living at the maturity of the Bond, the guaranteed cash value, as also the surplus, may be withdrawn, or a paid-up Bond (payable at death) taken out for its full face, and in addition a 7% Guaranteed Life Annuity secured; in which case the surplus is also payable.

Pamphlets explanatory of this admirable plan will be given on application to any of the company's agents, or to
